

Crown land, waterway and roads will be directly and indirectly impacted by the proposed project and ancillary pipeline. The Applicant has sufficiently described in the Environmental Impact Statement the impacts and the required consultation and negotiation with the Department regarding Crown land.

As mentioned in Section 3.3.10 an application for an easement across Crown land for the pipeline will be required to be submitted to the Department for assessment with some potential native title considerations.

A number of Crown roads will require closing and purchasing. Part of the Crown waterway tributary for the Belubula River will also be impacted by the infrastructure and will also be required to be purchased by the Applicant.

It is noted that there are Crown land parcels adjacent to the Project and have the potential to be impacted thus reducing there viability for tenure in the future. The Applicant is currently in discussion with the Department regarding the relevant Crown land.
