

10 October 2025

TfNSW Reference: SYD25/01212/01

DPHI Reference: SSD-95341456

Ms. Kiersten Fishburn
Secretary
Department of Planning, Housing, and Infrastructure
Locked Bag 5022
Parramatta NSW 2150

Attention: Liam Frayne

**REQUEST FOR SECRETARY'S ENVIRONMENTAL ASSESSMENT REQUIREMENTS (SEARS)
RESIDENTIAL FLAT BUILDING DEVELOPMENT
7 CONCORD AVENUE, 202 GEORGE STREET & 69-73 VICTORIA AVENUE, CONCORD WEST**

Dear Ms Fishburn,

Thank you for providing Transport for NSW (**TfNSW**) an opportunity to provide input to the Secretary's Environmental Assessment Requirements (**SEARs**) for the proposed residential flat building development at 7 Concord Avenue, 202 George Street and 69-73 Victoria Avenue, Concord West.

TfNSW has reviewed the Scoping Report (prepared by Beam Planning on 25 September 2025) and provides assessment requirements and comments in **TAB A** for the consideration of the Department of Planning, Housing and Infrastructure (**DPHI**).

Should you have any questions regarding the above matter, please contact Annelly Ketheson, Land Use Planner, on phone 9983 2731 or via email at development.sydney@transport.nsw.gov.au

Yours sincerely,

A handwritten signature in black ink, appearing to read "B. Pegg".

Brendan Pegg
Senior Manager Land Use Assessment Central and Western
Transport Planning
Planning, Integration and Passenger Division

TAB A - TfNSW suggested requirements and comments

1. **Transport Impact Assessment (TIA):** A TIA shall be prepared in accordance with the *Guide to Transport Impact Assessment (GTIA)*. GTIA replaces the Guide to Traffic Generating Developments and can be found at this [link](#). The TIA will enable TfNSW to understand the impacts the development may have on the state classified road network that it manages, as well as the impacts from local road connections with the state classified road network because of increased vehicular, bus and pedestrian/active transport movements. The TIA must include, but not be limited to, the following:
 - Details of all traffic types and volumes likely to be generated during construction and operation. Traffic flows are to be shown diagrammatically to a level of detail sufficient for easy interpretation.
 - An assessment of the predicted impacts of development traffic on road safety and the capacity of the road network, including consideration of cumulative impacts of nearby approved developments at key intersections on Homebush Bay Drive using SIDRA or similar traffic model (further details at point 2 below).
 - Identification of the necessary road network infrastructure upgrades (e.g. signage, pedestrian facilities, intersection upgrades, etc.) Homebush Bay Drive that are required to mitigate the development impact on the classified road network, in terms of safety and efficiency for both vehicles and pedestrians. Any proposed intersection upgrades on Homebush Bay Drive should consider the broader growth planned for the Homebush Precinct and opportunities for rationalising access to/from Homebush Bay Drive particularly improving the safety. Any required/proposed road network infrastructure upgrades/mitigation measures along Homebush Bay Drive should be developed in consultation with TfNSW.
 - A review of the crash data along the identified transport route/s and key nearby intersections for the most recent 5-year reporting period and an assessment of the safety implications of the proposed development and required mitigation measures.
 - Plans demonstrating how all vehicles likely to be generated during construction and operation and awaiting loading, unloading, or servicing can be accommodated on the site to avoid queuing in the street network.
 - Details of the site access and pedestrian network and parking provision associated with the proposed development, in accordance with the relevant Australian Standards, Austroads Guide and Council's Development Control Plan (DCP).
 - Details of travel demand management measures to minimise the development impact on general traffic and bus operations, including details of a location-specific sustainable travel plan (Green Travel Plan and/or specific Workplace Travel Plan) and the provision of facilities to increase the non-car mode share for travel to and from the site.
 - Details of the adequacy of existing public transport or any future public transport infrastructure within the vicinity of the site, pedestrian and bicycle networks and associated infrastructure to meet the likely future demand for the proposed development; and
 - Measures to integrate the development with the existing/future public transport network.
2. **Traffic Modelling:** Detailed traffic modelling (e.g. SIDRA) will be required to document the impact of the proposed development on the existing and proposed road network with an existing base and a +10-year background traffic growth scenarios, with and without the proposed development, for weekday AM, PM and weekend peak periods.

At a minimum, the traffic modelling should include the following intersections:

- Homebush Bay Drive / Underwood Road
- George Street / Pomeroy Street
- George Street / Victoria Avenue
- Concord Road / Wellbank Street

Modelling undertaken must include, but not be limited to, the following:

- Be based on current traffic counts.
- Ensure the base model is calibrated with on-site observations (e.g. queue lengths, delays). Details on the calibration undertaken must be provided.
- Details of any default settings that have been changed, along with supporting justification for each change; and
- Ensure the electronic copies of all modelling files are provided to TfNSW for review.

SCATS data for signalised intersections can be requested via SCATS.Traffic.Signal.Data@transport.nsw.gov.au.

3. **Rezoning:** TfNSW notes that this State Significant Development Application (SSDA) is subject to a concurrent Planning Proposal to rezone the site to R4 High Density Residential, thereby enabling the intended residential outcome and associated uplift in height and floor space ratio. Details of the proposed Local Environmental Plan (LEP) amendments to facilitate this development should be provided as part of the Planning Proposal documentation and early consultation with TfNSW is encouraged in the process.
