**Sydney Football Stadium Redevelopment (SSD-9835)
Event Noise Monitoring Report (Paul McCartney), Conditions E9 and E10**

Dear Mr Raggatt

I refer to the Event Noise Monitoring Report (noise report) prepared for a Paul McCartney concert event in accordance with condition E9, and submitted to the Planning Secretary under condition E10 of SSD-9835.

In accordance with condition E10, the Applicant is to obtain written advice from the Planning Secretary regarding;

- compliance with condition E9 and validation of the Operational Noise Management Plan (ONMP) after each event; and
- any additional management measures and/or refinement of the ONMP having regard to compliance with condition E9.

The Department has reviewed the noise report and is unable to discharge its functions under E10 because the report does not include the noise analysis required by E9. The Department understands that this was a result of technical issues with the Permanent Noise Monitoring System and workplace safety issues, which prevented octave band data from being measured prior to, and during, the concert.

On 17 January 2024, the Department issued the Applicant with a formal request for further information (RFI) to submit an additional noise report, to be prepared for another concert in accordance with the requirements of condition E9.

On 31 January 2024, the Department received an additional noise report for a Robbie Williams concert event via the planning portal under a new case file, SSD-9835-PA-193. The Department advises that it has withdrawn its formal RFI under PA-185, and will review the Robbie Williams report separately under the new case file, PA-193.

If you have any questions or would like to discuss this matter, please contact Hala Fua, who can be contacted at hala.fua@planning.nsw.gov.au.

Yours sincerely
