ALBURY TO ILLABO ENVIRONMENTAL IMPACT STATEMENT

ARTC

INLAND
RAIL 
An Australian Government Initiative

Contents

Summary

Glossary and definitions

Chapter 1

1.	INTRODUCTION	1-1
1.1	Overview	1-1
1.2	The proposal	1-2
1.2.1	Location	1-3
1.2.2	Key features	1-3
1.2.3	Operation	1-5
1.2.4	Timing	1-5
1.2.5	Related development	1-5
1.3	Objectives of the proposal and Inland Rail	1-5
1.4	EIS purpose and structure	1-6

Chapter 2

2.	STRATEGIC CONTEXT AND NEED	2-1
2.1	The existing situation	2-1
2.2	The opportunity and challenges	2-3
2.2.1	Growth in freight demand	2-3
2.2.2	Existing freight capacity and infrastructure issues	2-3
2.2.3	Assessment of demands for Inland Rail	2-4
2.3	Need for Inland Rail	2-4
2.4	Need for the proposal	2-4
2.5	National, state, and regional planning policies and strategies	2-5
2.6	Key benefits	2-5

Chapter 3

3.	LOCATION AND SETTING	3-1
3.1	Regional context	3-1
3.1.1	Albury to Illabo rail corridor	3-1
3.1.2	Existing rail facilities and operations	3-1
3.2	The proposal site and surrounds	3-4
3.2.1	Proposal site definition	3-4
3.2.2	General biophysical environment	3-9
3.2.3	General socio-economic and cultural environment	3-10

Chapter 4

4.	STATUTORY CONTEXT	4-1
4.1	Overview of the approval pathway	4-1
4.2	Environmental Planning and Assessment Act 1979	4-1
4.2.1	Critical State Significant Infrastructure	4-1
4.2.2	Planning approval process under Part 5, Division 5.2 of the EP&A Act	4-1
4.2.3	Landowner's consent or notification requirements	4-3
4.2.4	NSW environmental planning instruments	4-4
4.3	Other NSW legislation	4-4
4.3.1	Approvals that would otherwise apply	4-4
4.3.2	Approvals that must be applied consistently	4-5
4.3.3	Other NSW legislation that is still applicable	4-6
4.4	Commonwealth requirements	4-6
4.4.1	Environment Protection and Biodiversity Conservation Act 1999	4-6
4.4.2	Other Commonwealth legislation	4-7
4.5	Summary of approval requirements	4-7

Chapter 5

5.	ENGAGEMENT	5-1
5.1	Engagement approach, objectives, and strategy	5-1
5.1.1	Overall approach and objectives	5-1
5.1.2	Stakeholder identification	5-2
5.2	Engagement process and activities	5-2
5.3	Summary of issues raised and responses to feedback received	5-4
5.3.1	Where issues relevant to the EIS have been addressed	5-4
5.3.2	How the proposal has responded to the inputs received	5-5
5.4	Future engagement	5-6
5.4.1	Engagement during exhibition of the EIS	5-6
5.4.2	Engagement during design and delivery of the proposal	5-7

Chapter 6

6.	ALTERNATIVES AND PROPOSAL OPTIONS	6-1
6.1	Inland Rail alternatives	6-1
6.1.1	Strategic alternatives—alternative freight transport solutions	6-1

6.2	Alternative locations/route options for Inland Rail	6-4	8.4	Hours of construction	8-8
6.2.1	North–South Rail Corridor Study	6-4	8.4.1	Work during possessions or under track occupancy authorisations	8-9
6.2.2	Melbourne–Brisbane Inland Rail Alignment Study	6-6	8.5	Construction resources	8-10
6.3	Options for Albury to Illabo	6-8	8.5.1	Workforce	8-10
6.3.1	Phase 1 concept design assessment	6-8	8.5.2	Plant and equipment	8-10
6.3.2	Phase 2 reference design	6-9	8.5.3	Materials	8-12
6.3.3	Option assessment outcomes	6-9	8.5.4	Site servicing requirements	8-13
6.3.4	Public road interactions	6-15	8.6	Construction compounds and laydown areas	8-14
6.4	Approach to avoiding or minimising impacts during construction and operation	6-17	8.7	Temporary land requirements	8-14
6.4.1	Construction methodology options	6-17	8.8	Transport, access, and haulage arrangements	8-29
6.4.2	Site-specific considerations	6-19	8.8.1	Construction access and traffic	8-29
			8.8.2	Traffic management and access	8-31

Chapter 7

7.	PROPOSAL FEATURES AND OPERATION	7-1
7.1	Overview	7-1
7.2	Key features	7-3
7.2.1	Track infrastructure	7-3
7.2.2	Bridges	7-5
7.3	Ancillary infrastructure	7-24
7.3.1	Level crossings	7-24
7.3.2	Access tracks	7-25
7.3.3	Removal of redundant rail corridor structures	7-25
7.3.4	Signalling and communications	7-25
7.3.5	Signage	7-25
7.3.6	Power	7-26
7.3.7	Fencing	7-26
7.4	Permanent land requirements	7-26
7.5	Urban design and landscaping	7-26
7.6	Operation of the proposal	7-26
7.6.1	Train operations	7-26
7.6.2	Maintenance activities	7-27
7.6.3	Employment	7-27

Chapter 8

8.	CONSTRUCTION OF THE PROPOSAL	8-1
8.1	Construction overview	8-1
8.2	Indicative construction activities	8-1
8.2.1	Site establishment and enabling works	8-2
8.2.2	Track works	8-2
8.2.3	Rail bridge works	8-3
8.2.4	Road bridges works	8-3
8.2.5	Pedestrian bridges	8-4
8.2.6	Associated infrastructure works	8-4
8.2.7	Finishing works	8-6
8.3	Construction schedule and staging	8-6

Chapter 9

9.	TRANSPORT AND TRAFFIC	9-1
9.1	Summary	9-1
9.2	Approach	9-2
9.2.1	Secretary's Environmental Assessment Requirements	9-2
9.2.2	Relevant legislation, policies and guidelines	9-2
9.2.3	Methodology	9-2
9.2.4	Key risks	9-4
9.3	Existing environment	9-4
9.3.1	Regional road and rail network	9-4
9.3.2	Albury precinct	9-8
9.3.3	Greater Hume–Lockhart precinct	9-13
9.3.4	Wagga Wagga precinct	9-15
9.3.5	Junee precinct	9-21
9.4	Impact assessment—construction	9-25
9.4.1	Proposal-wide impacts	9-25
9.4.2	Albury precinct	9-28
9.4.3	Greater Hume–Lockhart precinct	9-31
9.4.4	Wagga Wagga precinct	9-37
9.4.5	Junee precinct	9-44
9.5	Impact assessment—operation	9-52
9.5.1	Proposal-wide impacts	9-52
9.6	Mitigation and management	9-55
9.6.1	Approach to mitigation and management	9-55
9.6.2	Mitigation measures	9-56
9.6.3	Interactions between mitigation measures	9-59
9.6.4	Residual risk	9-59

Chapter 10

10.	ABORIGINAL HERITAGE	10-1
10.1	Summary	10-1

10.2	Approach	10-1
10.2.1	Secretary's environmental assessment requirements	10-1
10.2.2	Relevant legislation, policies and guidelines	10-1
10.2.3	Methodology	10-2
10.2.4	Key risks	10-3
10.3	Existing environment	10-3
10.3.1	Aboriginal historical and cultural context	10-3
10.3.2	Aboriginal sites and places	10-3
10.3.3	Archaeological potential	10-4
10.3.4	Cultural values and significance	10-4
10.4	Impact assessment—construction	10-5
10.4.1	Direct impacts	10-5
10.4.2	Indirect impacts	10-5
10.5	Impact assessment—operation	10-6
10.6	Mitigation and management	10-6
10.6.1	Approach to mitigation and management	10-6
10.6.2	Mitigation measures	10-7
10.6.3	Interactions between mitigation measures	10-8
10.6.4	Residual risk	10-8

Chapter 11

11.	NON-ABORIGINAL HERITAGE	11-1
11.1	Summary	11-1
11.2	Approach	11-1
11.2.1	Secretary's Environmental Assessment Requirements	11-2
11.2.2	Relevant legislation, policies and guidelines	11-2
11.2.3	Methodology	11-2
11.2.4	Key risks	11-3
11.3	Existing environment	11-3
11.3.1	State heritage items within the proposal site	11-4
11.3.2	Local and unregistered potential heritage items that overlap with the proposal site	11-11
11.3.3	Heritage items beyond the proposal site	11-13
11.3.4	Areas of archaeological potential	11-14
11.3.5	Viewsheds and vistas	11-14
11.3.6	Curtilages	11-14
11.4	Impact assessment	11-14
11.4.1	Impacts to state heritage within the proposal site	11-15
11.4.2	Impacts to local and unregistered items that overlap with the proposal site	11-19
11.4.3	Impacts to heritage outside the proposal site	11-23
11.4.4	Impacts on railway heritage by the proposal	11-25
11.5	Mitigation and management	11-26
11.5.1	Approach to mitigation and management	11-26
11.5.2	Mitigation measures	11-26
11.5.3	Effectiveness of mitigation measures	11-29
11.5.4	Interactions between mitigation measures	11-29
11.5.5	Residual risk	11-29

Chapter 12

12.	LAND USE AND PROPERTY	12-1
12.1	Summary	12-1
12.2	Approach	12-1
12.2.1	Secretary's Environmental Assessment Requirements	12-1
12.2.2	Relevant legislation, policies and guidelines	12-1
12.2.3	Methodology	12-2
12.2.4	Key risks	12-2
12.3	Existing environment	12-3
12.3.1	Land uses within the study area	12-3
12.3.2	Land uses within the proposal site	12-4
12.3.3	Surrounding land uses to the proposal site	12-17
12.3.4	Planned future land uses	12-19
12.3.5	Crown land and travelling stock reserves	12-23
12.3.6	National parks and state forests	12-23
12.3.7	Mining, exploration and petroleum leases and licences	12-24
12.3.8	Native title	12-24
12.4	Impact assessment—construction	12-24
12.4.1	General construction land use impacts	12-24
12.4.2	Land requirements	12-24
12.4.3	Agricultural land use and activities	12-25
12.4.4	Public recreation	12-26
12.4.5	Services and utilities impacts	12-26
12.4.6	Exploration licences	12-26
12.5	Impact assessment—operation	12-27
12.5.1	General operational land use impacts	12-27
12.6	Mitigation and management	12-28
12.6.1	Approach to mitigation and management	12-28
12.6.2	Mitigation measures	12-28
12.6.3	Interactions between mitigation measures	12-29
12.6.4	Residual risk	12-29

Chapter 13

13.	SOCIAL	13-1
13.1	Summary	13-1
13.2	Approach	13-1
13.2.1	Secretary's Environmental Assessment Requirements	13-1
13.2.2	Relevant legislation, policies and guidelines	13-1
13.2.3	Methodology	13-2
13.2.4	Key risks	13-3
13.3	Existing environment	13-4
13.3.1	Regional study area	13-4
13.3.2	Nearby township study area	13-9
13.3.3	Local study area	13-10

13.4	Impact assessment—construction	13-10
13.4.1	Way of life	13-11
13.4.2	Community	13-13
13.4.3	Accessibility	13-15
13.4.4	Culture	13-18
13.4.5	Health and wellbeing	13-19
13.4.6	Surroundings	13-21
13.4.7	Livelihood	13-22
13.4.8	Decision making	13-23
13.5	Impact assessment—operation	13-24
13.6	Mitigation and management	13-30
13.6.1	Approach to mitigation and management	13-30
13.6.2	Mitigation measures	13-31
13.6.3	Interactions between mitigation measures	13-33
13.6.4	Residual risk	13-33

Chapter 14

14.	ECONOMIC	14-1
14.1	Summary	14-1
14.2	Approach	14-1
14.2.1	Secretary's Environmental Assessment Requirements	14-1
14.2.2	Relevant legislation, policies and guidelines	14-1
14.2.3	Methodology	14-2
14.2.4	Key risks	14-3
14.3	Existing environment	14-3
14.3.1	Local and regional economy	14-3
14.4	Impact assessment—construction	14-4
14.4.1	Business, industry and employment impacts and positive impacts	14-4
14.4.2	Regional economic positive impacts	14-6
14.5	Impact assessment—operation	14-7
14.6	Mitigation and management	14-8
14.6.1	Approach to mitigation and management	14-8
14.6.2	Residual risk	14-8

Chapter 15

15.	NOISE AND VIBRATION	15-1
15.1	Summary	15-1
15.2	Approach	15-2
15.2.1	Secretary's Environmental Assessment Requirements	15-2
15.2.2	Relevant legislation, policies and guidelines	15-2
15.2.3	Methodology	15-2
15.2.4	Key risks	15-4
15.3	Existing environment	15-4
15.3.1	Sensitive receivers	15-4
15.3.2	Vibration environment	15-4
15.3.3	Noise catchment areas	15-5
15.4	Assessment criteria	15-11
15.4.1	Construction noise	15-11
15.4.2	Operational rail noise	15-12

15.4.3	Traffic noise	15-12
15.4.4	Vibration	15-13
15.4.5	Ground-borne noise	15-14
15.5	Impact assessment—construction	15-15
15.5.1	Construction noise	15-16
15.5.2	Construction vibration	15-32
15.5.3	Ground-borne noise	15-33
15.6	Impact assessment—operation	15-33
15.6.1	Airborne noise	15-34
15.6.2	Vibration	15-35
15.6.3	Ground-borne noise	15-36
15.7	Mitigation and management	15-36
15.7.1	Approach to mitigation and management	15-36
15.7.2	Mitigation measures	15-38
15.7.3	Effectiveness of mitigation measures	15-40
15.7.4	Interactions between mitigation measures	15-43
15.7.5	Residual risk	15-43

Chapter 16

16.	BIODIVERSITY	16-1
16.1	Summary	16-1
16.2	Approach	16-1
16.2.1	Secretary's Environmental Assessment Requirements	16-1
16.2.2	Relevant legislation, policies and guidelines	16-2
16.2.3	Methodology	16-2
16.2.4	Key risks	16-5
16.3	Existing environment	16-5
16.3.1	Landscape context	16-5
16.3.2	Terrestrial flora	16-5
16.3.3	Terrestrial fauna	16-11
16.3.4	Aquatic flora and fauna	16-12
16.3.5	Groundwater dependent ecosystems	16-13
16.3.6	Protected and sensitive environments	16-13
16.4	Impact assessment—construction	16-14
16.4.1	Native vegetation	16-15
16.4.2	Terrestrial flora	16-16
16.4.3	Terrestrial fauna	16-16
16.4.4	Aquatic flora and fauna	16-17
16.4.5	Impacts on key threatening processes	16-18
16.4.6	Indirect impacts	16-19
16.5	Impact assessment—operation	16-20
16.5.1	Fauna injury and mortality	16-20
16.5.2	Noise, vibration, dust and light impacts	16-21
16.5.3	Habitat connectivity	16-21
16.5.4	Weeds and pests	16-21
16.6	Mitigation and management	16-21
16.6.1	Approach to mitigation and management	16-21
16.6.2	Mitigation measures	16-22
16.6.3	Interactions between mitigation measures	16-24
16.6.4	Biodiversity offsets	16-24
16.6.5	Residual risk	16-24

Chapter 17

17.	LANDSCAPE AND VISUAL AMENITY	17-1
17.1	Summary	17-1
17.2	Approach	17-1
17.2.1	Secretary's Environmental Assessment Requirements	17-1
17.2.2	Relevant legislation, policies and guidelines	17-1
17.2.3	Methodology	17-2
17.2.4	Key risks	17-5
17.3	Existing environment	17-5
17.3.1	Landscape	17-6
17.3.2	Viewpoints	17-7
17.3.3	Night-time visual environment	17-17
17.4	Impact assessment—construction	17-17
17.4.1	Landscape character	17-18
17.4.2	Viewpoint impact	17-19
17.4.3	Night-time visual impact	17-20
17.5	Impact assessment—operation	17-21
17.5.1	Albury precinct	17-22
17.5.2	Greater Hume—Lockhart precinct	17-24
17.5.3	Wagga Wagga precinct	17-25
17.5.4	Junee precinct	17-29
17.6	Mitigation and management	17-31
17.6.1	Approach to mitigation and management	17-31
17.6.2	Mitigation measures	17-31
17.6.3	Interactions between mitigation measures	17-33
17.6.4	Residual risk	17-33

Chapter 18

18.	HYDROLOGY, FLOODING AND WATER QUALITY	18-1
18.1	Summary	18-1
18.2	Approach	18-1
18.2.1	Secretary's Environmental Assessment Requirements	18-1
18.2.2	Relevant legislation, policies and guidelines	18-1
18.2.3	Methodology	18-3
18.2.4	Key risks	18-7
18.3	Existing environment	18-7
18.3.1	Hydrology	18-7
18.3.2	Flooding	18-10
18.3.3	Water quality	18-14
18.4	Impact assessment—construction	18-16
18.4.1	Hydrology	18-16
18.4.2	Flooding	18-18
18.4.3	Water quality	18-20
18.5	Impact assessment—operation	18-22
18.5.1	Hydrology	18-22
18.5.2	Flooding	18-23
18.5.3	Water quality	18-28

18.6	Mitigation and management	18-28
18.6.1	Approach to mitigation and management	18-28
18.6.2	Mitigation measures	18-29
18.6.3	Interactions between mitigation measures	18-30
18.6.4	Residual risk	18-30

Chapter 19

19.	GROUNDWATER	19-1
19.1	Summary	19-1
19.2	Approach	19-1
19.2.1	Secretary's Environmental Assessment Requirements	19-1
19.2.2	Relevant legislation, policies and guidelines	19-1
19.2.3	Methodology	19-2
19.2.4	Key risks	19-3
19.3	Existing environment	19-4
19.3.1	Groundwater systems	19-4
19.3.2	Groundwater levels	19-6
19.3.3	Groundwater quality	19-8
19.3.4	Groundwater contamination	19-9
19.3.5	Hydraulic conductivity	19-10
19.3.6	Water allocation and availability	19-10
19.3.7	Sensitive receivers	19-10
19.3.8	Conceptual hydrological model	19-16
19.4	Impact assessment—construction	19-22
19.4.1	Enhancement sites with negligible or low risk of impact	19-23
19.4.2	Enhancement sites with increased risk of impact	19-23
19.4.3	Water supply	19-24
19.5	Impact assessment—operation	19-25
19.5.1	Enhancement sites with no track lowering	19-25
19.5.2	Enhancement sites with track lowering	19-26
19.5.3	Water balance	19-27
19.6	Minimal impact consideration	19-27
19.7	Mitigation and management	19-28
19.7.1	Approach to mitigation and management	19-28
19.7.2	Mitigation measures	19-28
19.7.3	Interactions between mitigation measures	19-29
19.7.4	Residual risk	19-29

Chapter 20

20.	SOILS AND CONTAMINATION	20-1
20.1	Summary	20-1
20.2	Approach	20-1
20.2.1	Secretary's Environmental Assessment Requirements	20-1
20.2.2	Relevant legislation, policies and guidelines	20-1
20.2.3	Methodology	20-2
20.2.4	Contamination risk assessment matrix	20-3
20.2.5	Key risks	20-3

20.3	Existing environment	20-4	22.4	Impact assessment—construction	22-4
20.3.1	Topography	20-4	22.4.1	Dust emissions	22-4
20.3.2	Soil types	20-4	22.4.2	Other emissions to air	22-5
20.3.3	Saline soils	20-6	22.5	Impact assessment—operation	22-6
20.3.4	Acidity	20-7	22.5.1	Operational sources and characteristics	22-6
20.3.5	Naturally occurring asbestos	20-7	22.5.2	Normal operation emissions	22-6
20.3.6	Contamination	20-7	22.5.3	Train idling emission	22-7
20.4	Impact assessment—construction	20-17	22.5.4	Road traffic emission	22-7
20.4.1	Soils	20-17	22.6	Mitigation and management	22-7
20.4.2	Contamination	20-18	22.6.1	Approach to mitigation and management	22-7
20.5	Impact assessment—operation	20-26	22.6.2	Mitigation measures	22-8
20.5.1	Soil	20-26	22.6.3	Interactions between mitigation measures	22-8
20.5.2	Contamination	20-27	22.6.4	Residual risk	22-8
20.6	Mitigation and management	20-27			
20.6.1	Approach to mitigation and management	20-27			
20.6.2	Mitigation measures	20-28			
20.6.3	Expected effectiveness of mitigation measures	20-29			
20.6.4	Interaction between measures	20-29			
20.6.5	Residual risk	20-30			

Chapter 21

21.	SUSTAINABILITY	21-1
21.1	Summary	21-1
21.2	Approach	21-1
21.2.1	Secretary's Environmental Assessment Requirements	21-1
21.2.2	Relevant legislation, policies and guidelines	21-1
21.2.3	Approach to sustainability on Inland Rail	21-3
21.2.4	Methodology	21-4
21.3	Impact assessment	21-8
21.3.1	Sustainability in design	21-8
21.3.2	Future sustainability opportunities	21-10
21.3.3	Program-wide sustainability opportunities	21-11
21.3.4	Skills and legacy	21-11
21.4	Mitigation and management	21-11
21.4.1	Approach to sustainability management	21-11
21.4.2	List of mitigation measures	21-12
21.4.3	Interaction between mitigation measures	21-12

Chapter 22

22.	AIR QUALITY	22-1
22.1	Summary	22-1
22.2	Approach	22-1
22.2.1	Secretary's Environmental Assessment Requirements	22-1
22.2.2	Relevant legislation, policies and guidelines	22-1
22.2.3	Methodology	22-1
22.2.4	Key risks	22-2
22.3	Existing environment	22-2
22.3.1	Climate and meteorology	22-2
22.3.2	Air quality	22-3
22.3.3	Sensitive receivers	22-4

Chapter 23

23.	WASTE AND RESOURCE MANAGEMENT	23-1
23.1	Summary	23-1
23.2	Approach	23-1
23.2.1	Secretary's Environmental Assessment Requirements	23-1
23.2.2	Relevant legislation, policies and guidelines	23-1
23.2.3	Methodology	23-1
23.2.4	Key risks	23-2
23.3	Impact assessment—construction	23-2
23.3.1	Waste-generating activities	23-2
23.3.2	Estimated quantities and classification of waste to be generated	23-3
23.3.3	Impacts of improperly managed waste	23-4
23.3.4	Waste and stockpile locations	23-4
23.3.5	Offsite recycling and waste disposal	23-4
23.4	Impact assessment—operation	23-5
23.4.1	Waste-generating activities	23-5
23.4.2	Classification of waste to be generated	23-5
23.4.3	Potential impacts	23-5
23.5	Mitigation and management	23-5
23.5.1	Approach to mitigation and management	23-5
23.5.2	Mitigation measures	23-9
23.5.3	Expected effectiveness	23-10
23.5.4	Interactions between mitigation measures	23-10
23.5.5	Residual risk	23-10

Chapter 24

24.	HAZARDS	24-1
24.1	Summary	24-1
24.2	Approach	24-1
24.2.1	Secretary's Environmental Assessment Requirements	24-1
24.2.2	Relevant legislation, policies and guidelines	24-1
24.2.3	Methodology	24-1
24.2.4	Key risks	24-2

24.3	Existing environment	24-2	26.5.9	Hydrology, flooding and water quality	26-13
24.3.1	Bushfire-prone land	24-2	26.5.10	Air quality	26-14
24.3.2	Flood-prone land	24-3	26.5.11	Waste and resource management	26-14
24.3.3	Hazardous materials	24-3	26.5.12	Hazards	26-14
24.3.4	Utilities	24-3	26.5.13	Greenhouse gases	26-15
24.4	Impact assessment—construction	24-3	26.6	Summary	26-15
24.4.1	Onsite storage, use and transport of dangerous goods and hazardous substances	24-3	26.6.1	Residual risk	26-15
24.4.2	Onsite handling and transport of contaminated soil and hazardous wastes	24-6			
24.4.3	Impacts to utilities	24-7			
24.4.4	Structural damage risks	24-7			
24.4.5	Bushfire risks	24-7			
24.4.6	Emergency vehicle access	24-7			
24.5	Impact assessment—operation	24-8			
24.6	Mitigation and management	24-8			
24.6.1	Approach to mitigation and management	24-8			
24.6.2	Mitigation measures	24-8			
24.6.3	Interactions between mitigation measures	24-9			
24.6.4	Residual risk	24-9			
Chapter 25					
25.	CLIMATE CHANGE RISK ADAPTATION AND GREENHOUSE GAS	25-1			
25.1	Summary	25-1			
25.2	Climate change risk and adaptation	25-1			
25.2.1	Approach	25-1			
25.2.2	Existing and future climate	25-3			
25.2.3	Potential impacts	25-5			
25.2.4	Mitigation and management	25-8			
25.3	Greenhouse gas and energy	25-11			
25.3.1	Approach	25-11			
25.3.2	Estimated greenhouse gas emissions	25-12			
25.3.3	Mitigation and management	25-13			
Chapter 26					
26.	CUMULATIVE IMPACTS	26-1			
26.1	Summary	26-1			
26.2	Approach	26-1			
26.2.1	Secretary's environmental assessment requirements	26-1			
26.3	Methodology	26-1			
26.4	Other projects in the study area	26-2			
26.5	Cumulative impact assessment	26-8			
26.5.1	Transport and traffic	26-9			
26.5.2	Non-Aboriginal heritage	26-10			
26.5.3	Land use and property	26-10			
26.5.4	Social	26-10			
26.5.5	Economic	26-11			
26.5.6	Noise and vibration	26-12			
26.5.7	Biodiversity	26-12			
26.5.8	Landscape and visual	26-13			
				Chapter 27	
			27.	APPROACH TO MITIGATION AND MANAGEMENT	27-1
			27.1	Approach to environmental management	27-1
			27.1.1	Construction environmental management approach	27-1
			27.1.2	Operational Environmental Management Framework	27-3
			27.2	Compilation of mitigation measures	27-4
			27.3	Proposal uncertainties and approach to design refinements	27-22
			27.3.1	Proposal uncertainties	27-22
			27.3.2	Approach to design refinements	27-24
			27.4	Compilation of performance outcomes	27-24
				Chapter 28	
			28.	JUSTIFICATION OF THE PROPOSAL	28-1
			28.1	Summary of the proposal for approval	28-1
			28.1.1	Overview of the proposal	28-1
			28.1.2	Location	28-1
			28.1.3	Key design features	28-1
			28.1.4	Construction features	28-1
			28.1.5	Operation	28-1
			28.1.6	Timing	28-2
			28.1.7	Statutory requirements	28-2
			28.2	Summary of Impacts	28-2
			28.2.1	Outline of strategies to avoid or minimise impacts	28-2
			28.2.2	Impacts that have not been avoided	28-3
			28.3	Justification of the proposal	28-7
			28.3.1	Strategic need	28-7
			28.3.2	Biophysical, economic and social considerations	28-9
			28.3.3	Objects of the Act	28-12
			28.4	Concluding statement	28-13
				Chapter 29

Table 18-17	Operational impacts to flooding characteristics	18-24
Table 18-18	Hydrology, flooding and water quality mitigation measures	18-29
Table 18-19	Residual risk management—Hydrology, flooding and water quality	18-30

Chapter 19

Table 19-1	Groundwater assessment impact ratings	19-3
Table 19-2	Groundwater systems that underlie the proposal site	19-4
Table 19-3	Groundwater levels recorded by manual dip measurements during GMEs	19-6
Table 19-4	Beneficial use categories adopted for the assessment	19-8
Table 19-5	Indicative regional groundwater quality (DPIE, 2019a, 2019b and 2019c)	19-8
Table 19-6	Groundwater quality reordered during GMEs	19-9
Table 19-7	Summary of groundwater contamination	19-9
Table 19-8	Conceptual hydrological model—enhancement sites (Albury precinct)	19-17
Table 19-9	Conceptual hydrological model—enhancement sites (Lockhart–Greater Hume precinct)	19-18
Table 19-10	Conceptual hydrological model—enhancement sites (Wagga Wagga precinct)	19-19
Table 19-11	Conceptual hydrological model—enhancement sites (Junee precinct)	19-20
Table 19-12	Potential risk to the groundwater during construction	19-22
Table 19-13	Low operational risk and impact to the ground water environment	19-25
Table 19-14	Groundwater mitigation measures	19-28
Table 19-15	Residual risk management—Groundwater	19-29

Chapter 20

Table 20.1	Risk assessment matrix	20-3
Table 20.2	Soil landscape	20-4
Table 20.3	Areas of environmental concern and potential contaminants identified within the proposal site	20-10
Table 20.4	General contamination risk from construction—pathway and receptors	20-20
Table 20.5	Specific contamination risks for Albury precinct	20-23
Table 20.6	Specific contamination risks for Greater Hume–Lockhart precinct	20-24
Table 20.7	Specific contamination risks for Wagga Wagga precinct	20-25
Table 20.8	Specific contamination risks for Junee precinct	20-26
Table 20.9	Soil and contamination mitigation measures	20-28
Table 20.10	Residual risk management—Soil and contamination	20-30

Chapter 21

Table 21-1	Legislative, policy and guideline context	21-2
Table 21-2	Relationship between sustainability commitments and infrastructure sustainability credits	21-3
Table 21-3	IS Rating Scheme framework	21-5
Table 21-4	Infrastructure Sustainability rating levels	21-6
Table 21-5	Sustainability in design measures implemented during the reference design phase	21-8
Table 21-6	Sustainability opportunities that may be implemented during future phases of the proposal	21-10
Table 21-7	Sustainability mitigation measures	21-12

Chapter 22

Table 22-1	Summary of ambient air quality data	22-3
Table 22-2	Air quality mitigation measures	22-8
Table 22-3	Residual risk management	22-8

Chapter 23

Table 23-1	Activities likely to generate potential waste during construction of the proposal	23-2
Table 23-2	Construction waste classification and quantities	23-3
Table 23-3	Impacts of improperly managed waste	23-4
Table 23-4	Local waste facilities	23-4
Table 23-5	Operational waste classification and quantities	23-5
Table 23-6	Waste management hierarchy	23-6
Table 23-7	Construction waste management measures	23-6
Table 23-8	Operational waste management measures	23-9
Table 23-9	Waste and resource management mitigation measures	23-9
Table 23-10	Residual risk management—Waste	23-10

Chapter 24

Table 24-1	Proximity of enhancement sites to bushfire-prone land	24-2
Table 24-2	Indicative list of hazardous materials potentially required during construction and applicable storage/transport thresholds	24-4
Table 24-3	Mitigation measures—Hazards	24-8
Table 24-4	Residual risk management—Hazards	24-9

Chapter 25

Table 25-1	Key policy and guidelines	25-2
Table 25-2	Wagga Wagga weather station key data	25-4
Table 25-3	Detailed climate change projections for Murray Basin/Murray Murrumbidgee from Inland Rail Climate Change Risk Assessment Framework	25-5
Table 25-4	Climate change risks to proposal construction (2030) prior to mitigation	25-6
Table 25-5	Climate change risks to proposal operation (2090) prior to mitigation	25-6

Table 25-6	Current and planned adaptation options	25-8
Table 25-7	Climate change mitigation measures	25-9
Table 25-8	Climate change residual risk assessment	25-10
Table 25-9	Summary of estimated construction Scope 1 greenhouse gas emissions	25-13
Table 25-10	Greenhouse gas emissions mitigation measures	25-13
Table 25-11	Residual risk management—Greenhouse gas emissions	25-14

Chapter 26

Table 26-1	Projects with the potential for cumulative impacts with the proposal	26-2
Table 26-2	Anticipated schedule overlapping with nearby projects	26-7
Table 26-3	Summary of potential cumulative impacts for each project	26-8
Table 26-4	Residual risk management	26-15

Chapter 27

Table 27-1	Compilation of mitigation measures	27-4
Table 27-2	Proposal uncertainties	27-22
Table 27-3	Desired performance outcomes	27-25

Chapter 28

Table 28-1	Summary of key impacts that have not been avoided	28-3
Table 28-2	Objects of the EP&A Act	28-12
