Subject: Extension Request for Meteorological Weather Station – Hunter Power Project (SSI-12590060)

Dear Mr. Bokil,

I refer to your request for an extension of time under Condition B26 of Schedule 2 of the project approval to ensure there is a suitable meteorological weather station operating located on the premises prior to the installation of the gas turbines.

The Department notes the weather station is required to determine operational noise limits and that the Environment Protection Licences for the premises (EPL 21627) requires that a meteorological weather station to be established prior to commencing operations.

Accordingly, the Secretary agrees that a suitable meteorological weather station is required to be operating at the premises or location approved by the NSW Environment Protection Authority prior to the operation of the development.

If you wish to discuss the matter further, please contact Jack Turner on 9995 5387.

Yours sincerely
