YANCO CREEK MODERNISATION PROJECT: PART 2 – BILLABONG CREEK REGULATORS NEW SOUTH WALES

ABORIGINAL CULTURAL HERITAGE ASSESSMENT: VOLUME 2

FINAL REPORT

DCCEEW NSW

18 July 2024

NSW GOVERNMENT

Acknowledgement of Country

We respect and acknowledge the First Nations Peoples of the lands and waterways on which we live and work, their rich cultural heritage, and their deep connection to Country, and we acknowledge their Elders past and present.

Cultural warning

Aboriginal and Torres Strait Islander readers are advised that this report may contain images or names of First Nations people who have passed away.

APPENDIX A2 – STAGE 1.1 LETTER TO AGENCIES

APPENDIX A2 – OUTGOING

Ramsey, Pauline

From: Ramsey, Pauline
Sent: Friday, 22 April 2022 10:00 AM
To: admin.murray@lls.nsw.gov.au
Subject: SDLAM - Yanco Creek - Notice to Agencies (apologies)
Attachments: 3RP-YAN-AP-CH-CO-0002-0.2 RAPs Registration_letter to agencies_Murray LLS.pdf

To whom it may concern,

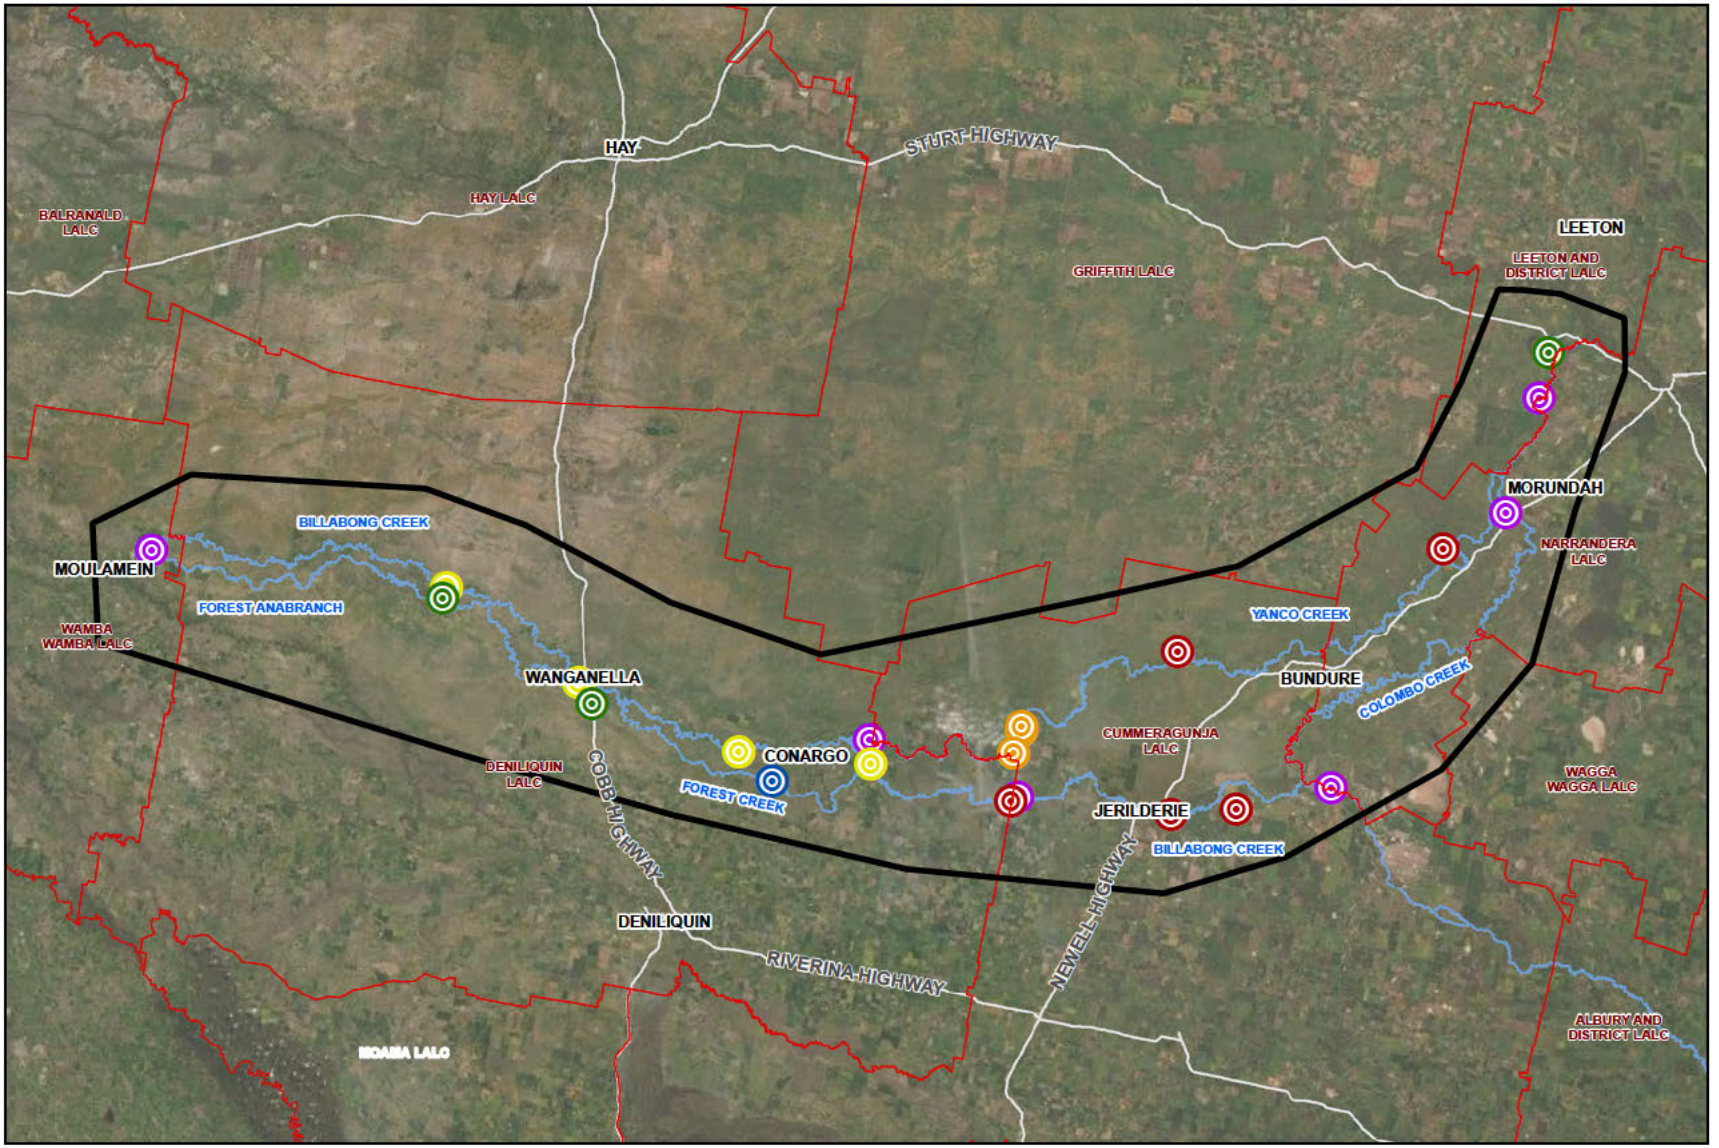
Please find attached a request for more information directed to agencies with possible information regarding local Aboriginal groups, for the ongoing consultation for the Water Infrastructure development along Yanco Creek. Our records indicate that this letter might not have found you at the appropriate time. Please accept our apologies for this oversight.

If you have any questions please do not hesitate to get in touch.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand
P:+614.9047.5898 | Pauline.ramsey@jacobs.com
Level 7/177 Pacific Hwy | North Sydney NSW 2060 | Australia

I acknowledge the Traditional Owners of Country upon which I work, and pay my respects to them, their culture and their Elders past, present and future.



Project Area

Local Aboriginal Land Council (LALC) Boundary

Project Activities

Cummeragunja Local Aboriginal Land Council

Our ref: 3RP-YCMP-RAP

ceo@cummeralalc.com.au

25th August, 2021

Dear Cummeragunja Local Aboriginal Land Council,

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo, and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council. The project area is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. The YCMP's ground-disturbing works will impact previously undisturbed land and are likely to intersect Aboriginal sites.

Following the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010), we are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Community consultation with Aboriginal people will assist Water Infrastructure NSW in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

In accordance with section 4.1.2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents*, it would be appreciated if your organisation could provide a list of the names of, and/or pass this request along to, Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the project area.

Thank you for your assistance and advice in this matter. If you wish to respond to this letter, we would appreciate if you could respond before 17 September 2021. Please send your response, or any questions if you would like to discuss this further, to me at the following:

Our ref: 3RP-YCMP-RAP

25th August, 2021

Dear Murrumbidgee Council,

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council. The project area is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. The YCMP's ground-disturbing works will impact previously undisturbed land and are likely to intersect Aboriginal sites.

Following the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010), we are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Community consultation with Aboriginal people will assist Water Infrastructure NSW in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

In accordance with section 4.1.2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents*, it would be appreciated if your organisation could provide a list of the names of, and/or pass this request along to, Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the project area.

Thank you for your assistance and advice in this matter. If you wish to respond to this letter, we would appreciate if you could respond before 17 September 2021. Please send your response, or any questions if you would like to discuss this further, to me at the following:

Narrandera Local Aboriginal Land Council

nlalc14@bigpond.com

25th August 2021

Dear Narrandera Local Aboriginal Land Council,

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council. The project area is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. The YCMP's ground-disturbing works will impact previously undisturbed land and are likely to intersect Aboriginal sites.

Following the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010), we are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Community consultation with Aboriginal people will assist Water Infrastructure NSW in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

In accordance with section 4.1.2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents*, it would be appreciated if your organisation could provide a list of the names of, and/or pass this request along to, Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the project area.

Thank you for your assistance and advice in this matter. If you wish to respond to this letter, we would appreciate if you could respond before 17 September 2021. Please send your response, or any questions if you would like to discuss this further, to me at the following:

To: council@federationcouncil.nsw.gov.au <council@federationcouncil.nsw.gov.au>

Dear Federation Council,

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP).

Following the consultation guidelines, the 3Rivers partnership (a joint venture of Jacobs and GHD, acting on behalf of Water Infrastructure NSW) is seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Please see the attached letter for information about the proposed project, and the proposed project location.

Community consultation with Aboriginal people will assist in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in his/her consideration and determination of any subsequent permit applications (if required).

As stated in the attached letter, it would be appreciated if your organisation could provide a list of the names of Aboriginal people you know of who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the proposed project area.

Thank you for your assistance and advice in this matter.

Regards,

Dr Oliver Macgregor

Dear Oliver

WRITTEN NOTIFICATION OF PROPOSAL AS REQUIRED UNDER DECCW ABORIGINAL CULTURAL HERITAGE CONSULTATION REQUIREMENTS FOR PROPONENTS 2010

Subject: Registration of Aboriginal Interests – Water Infrastructure NSW Yanco Creek Modernisation Project, Irrigation Way – Narrandera/Federation/Murrumbidgee and Edward River LGA's

Thank you for your correspondence dated 25 August 2021 received by Heritage NSW (Department of Premier and Cabinet) regarding the above project.

Attached is a list of known Aboriginal parties for the Narrandera, Federation, Murrumbidgee and Edward River local government areas that Heritage NSW considers likely to have an interest in the activity. Please note this list is not necessarily an exhaustive list of all interested Aboriginal parties. Receipt of this list does not remove the requirement of a proponent/consultant to advertise in local print media and contact other bodies seeking interested Aboriginal parties, in accordance with the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (April 2010).

Under Section 4.1.6. of the Consultation Requirements, you must also provide a copy of the names of each Aboriginal person who registered an interest to the relevant **Heritage NSW** office and Local Aboriginal Land Council (LALC) within 28 days from the closing date for registering an interest.

Please note that the contact details in the list provided by Heritage NSW may be out of date as it relies on Aboriginal parties advising Heritage NSW when their details need changing. If individuals/companies undertaking consultation are aware that any groups contact details are out of date, or letters are returned unopened, please contact either the relevant stakeholder group (if you know their more current details) and/or Heritage NSW. AHIP applicants should make a note of any group they are unable to contact as part of their consultation record.

If you have any questions about this advice, please email: heritagemailbox@environment.nsw.gov.au or contact (02) 9873 8500.

Yours sincerely

Dan Clegg

Subject: Yanco Creek Modernisation Project - Aboriginal consultation - Letter to agencies

Dear Narrandera Shire Council,

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP).

Following the consultation guidelines, the 3Rivers partnership (a joint venture of Jacobs and GHD, acting on behalf of Water Infrastructure NSW) is seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Please see the attached letter for information about the proposed project, and the proposed project location.

Community consultation with Aboriginal people will assist in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in his/her consideration and determination of any subsequent permit applications (if required).

As stated in the attached letter, it would be appreciated if your organisation could provide a list of the names of Aboriginal people you know of who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the proposed project area.

Thank you for your assistance and advice in this matter.

Regards,

Dr Oliver Macgregor

APPENDIX A3 – STAGE 1.2: REGISTRATION OF INTEREST

APPENDIX A3 – OUTGOING

Dear Clem Christian,

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Please send your completed form, or any questions if you would like to discuss this further, to me at the following:

Email: oliver.macgregor@jacobs.com

Post: Oliver Macgregor, PO Box 237, Civic Square ACT 2608

Any general enquiries concerning heritage management at Water Infrastructure NSW can be directed to:

Dear Darren (Dozer) Atkinson,

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Please send your completed form, or any questions if you would like to discuss this further, to me at the following:

Dear Robert Carroll (Miyagan Culture and Heritage),

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. Dear Yalmambirra,

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Please send your completed form, or any questions if you would like to discuss this further, to me at the following:

Subject: Re: [EXTERNAL] Fwd: Registration as an Aboriginal Party Murray and Murrumbidgee River projects WINSW - Registration form

Happy 2023
Just a reminder that I have registered as a RAP on the following projects

Yanga national park supply project
Millewa Forest supply project
Yanco Creek Modernisation Project
Mid-Murray Anabranches Project

I was told that there was a RAP meeting on the DEC 21st in Deniliquin that was after my registration was submitted and sent.

I have also been made aware by other RAP's that there is a meeting in deniliquin tomorrow, I am available to attend and can I be sent the meeting information.

Kind regards,
Maydina Penrith

Can I confirm you wish to register for the following SDLAM Acceleration Projects:

- Yanga national park supply project
- Millewa Forest supply project
- Yanco Creek Modernisation Project
- Mid-Murray Anabranches Project

If so, **can you please just fill out the attached form for Yanga and return to me?**

We can just replicate your registration across each project as required to avoid you having to fill out 4 identical forms. Please note, 3Rivers are unable to register you for the Koondrook-Perricoota Forest Project as Austral Archaeology are managing this Project.

Cheers,
Tom

Good Morning Pauline and Shaun,

This email is following up a voice message I left Shaun last week.

Shaun as the Acting Manager for the First Nations Team in WINSW and Pauline as the archaeologist on a few; I am writing to register myself as a First Nations RAP.

I would like to ensure that I am registered across Water Infrastructure NSW Murray and Murrumbidgee River projects.

I would like to request my email be registered and recorded appropriately in Borealis and Jacobs' register.

Can my registration also be passed on to any other archaeologist that Jacob's does not cover in this area.

Regards,

Maydina Penrith

Re: SDLAM RAP Maydina Penrith (maypenrith@gmail.com / 0421 509 626)

Hi Tom,

Maydina called today to check if her late RAP registration has been accepted by the client. She mentioned that Jacobs had accepted her late registration across our SDLAM projects however she is experiencing inconsistencies with the client (not included in all RAP meeting invites etc).

- **Tom** – can you confirm with WINSW that Maydina has been accepted as a SDLAM RAP and is being invited to meetings etc. Can WINSW provide direct confirmation of this back to Maydina and cc relevant staff. They may also wish to circulate minutes of any missed meeting since her registration.
- **Pauline** – can you include a note in the consultation log that Maydina Penrith called and the nature of her call.

Thanks all

APPENDIX A4 – STAGE 1.3: NEWSPAPER ADVERTISEMNT

APPENDIX A4 – OUTGOING

NSW GOVERNMENT

Yanco Creek Modernisation Project

Invitation for registration of Aboriginal Cultural Knowledge Holders

Water Infrastructure NSW (WINSW) is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental and cultural outcomes for communities along the Yanco Creek system.

The project would involve a range of construction works at a number of locations on Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

In accordance with the *Aboriginal cultural heritage consultation requirements for proponents* (Department of Environment, Climate Change and Water 2010), WINSW is seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to this large project area and the cultural and spiritual significance of the Yanco Creek system more generally.

Community consultation with Aboriginal people will assist us to prepare an Aboriginal Cultural Heritage Assessment Report. Your feedback will also assist the Department of Planning Industry and Environment in its consideration and determination of the project. Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any subsequent Aboriginal Heritage Impact Permit (AHIP) applications (if required).

Any Aboriginal people or organisations with relevant cultural knowledge can register in writing (email or letter) to:
Oliver Macgregor
Senior Archaeologist, 3Rivers Partnership
Phone: 1300 081 047
Email: oliver.macgregor@jacobs.com
Mail: PO Box 237, Civic Square ACT 2608

Any general enquiries concerning heritage management at Water Infrastructure NSW can be directed to:
Maydina Penrith
Senior Aboriginal Cultural Officer,
Water Infrastructure NSW
Email: Maydina.penrith@dpie.nsw.gov.au

Registrations must be received by close of business on 17 September 2021.

Visit **dpie.nsw.gov.au/yanco-creek-modernisation-project** for more information about the project.

---

To whom it may concern,

As part of the ongoing Aboriginal Cultural Heritage Assessment being undertaken for the Yanco Creek Modernisation Project under the Sustainable Diversion Limit Adjustment Mechanism (SDLAM) Program being completed by Water Infrastructure NSW, please find below a list of all Registered Aboriginal Parties as per Requirement 4.1.6 of the *Aboriginal Cultural Heritage Requirements for Proponents* (2010). A copy of the invitation to register as a RAP for the project which was sent to all RAPs is attached to this email.

Organisation	Contact Name
Cummeragunja Local Aboriginal Land Council	Leon Atkinson
Yarkuwa Indigenous Knowledge Centre	David Crew
Leeton and District Local Aboriginal Land Council	Karen Davy
Deniliquin Local Aboriginal Land Council	Rose Dunn
Bundyi Aboriginal Cultural Knowledge	Mark Saddler
Bangerang Aboriginal Corporation	Darren Atkinson
Wiradjuri Council of Elders	Yalmambirra
Sandhills Artefacts	Michael Lyons
Independent	Kevin Atkinson
Independent	Roley Williams
Independent	Maydina Penrith

Two other organisations also registered as RAPs for the Project and asked that their details not be forwarded to Heritage NSW and the relevant Local Aboriginal Land Councils.

Should you require any additional information please do not hesitate to get in touch.

Kind regards,
Thomas

Yanco Creek SDL Adjustment Measures (SDLAM) Projects

Community Update: Proposed Yanco Creek Modernisation Project

A community and government partnership
Maintaining and improving flows
Keeping the Yanco/Billabong//Colombo/Forest Creeks flowing
Smarter use of available water
Project Benefits – irrigators, town supplies, fish, waterbirds, cultural, recreational

February 2021

What is the Yanco Creek Project?

- ❑ Working together – a community and government partnership
- ❑ Upgrading old and inefficient infrastructure
- ❑ Using best available technology to modernise the Yanco Creek
- ❑ Smarter use of water through models and science
- ❑ Focusing on mutually beneficial outcomes through:
  - ongoing conversations with stakeholders
  - More efficient use of water to environmental assets
  - incorporation of cultural knowledge
  - safeguarding service levels for irrigators and towns
  - Improving fish passage
  - Working with Environmental Water Holders to target flows enhancing native fish and threatened species
  - Improving the control of timing, location, volume, duration and frequency of water flows.

Stakeholder Advisory Group – Your community representatives

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

Yanco Creek Modernisation: Project Overview

Project: Modernising infrastructure to enable smarter use of water and environmental restoration in the Yanco Creek system – including Yanco, Billabong, Colombo, Forest creeks.

Focus: Working hand in hand with local communities:

- Maintaining and improving flows
- Keeping the Yanco Creek system flowing
- Smarter use of available water
- Modernising ageing infrastructure
- ensure town water supplies are secure
- Improved environmental outcomes

Process: Community collaboration in project design

- 50+ projects identified and assessed
- Priority list of 8 possible projects – preferred option

Now: Seeking feedback from the community on the preferred option

Wanganella Swamp

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

Project objectives and expected benefits

Objectives:

- Maintaining and improving flows
- Keeping the Yanco/Billabong/Colombo/Forest Creeks flowing
- Smarter use of available water
- Modernising ageing infrastructure
- Improving environmental and cultural outcomes
- Increasing fish passage and instream connectivity
- Environmental watering to key ecological assets
- Meeting NSW's Basin Plan commitments

Some of the expected benefits in the Yanco/Billabong /Forest/Colombo Creeks and Murrumbidgee systems:

- Improving community confidence over future water security
- More efficient water use
- Improved levels of customer service (water delivery)
- Improved environmental outcomes, health and vitality
- Economic stimulus during construction
- Avoiding water buy-backs

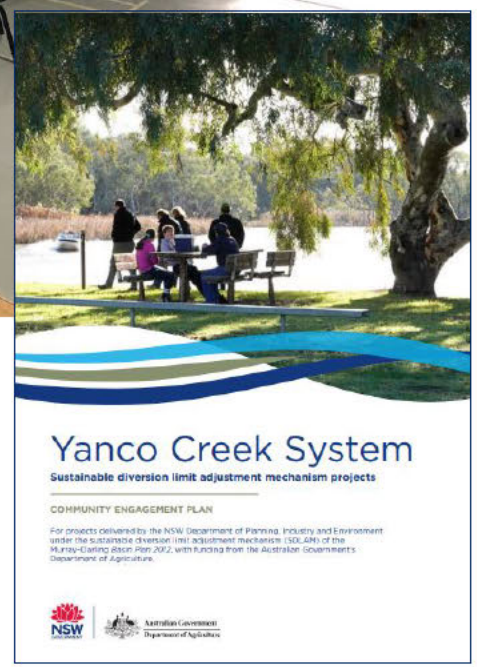
Wanganella Weir

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

Approach to Community Engagement

- ❑ Communities have the local knowledge needed to make the best investment decisions
- ❑ Some projects may affect land managed privately – DPIE is committed to identifying and mitigating impacts
- ❑ Approach to engagement:
  - guided by community / stakeholder advisory group
  - collaborative and co-ordinated
  - accessible and regular
  - transparent and accountable
- ❑ Engagement to collaboratively determine best options for proposed investment to achieve project objectives
- ❑ More detailed information is now available and forms the basis of this update



NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

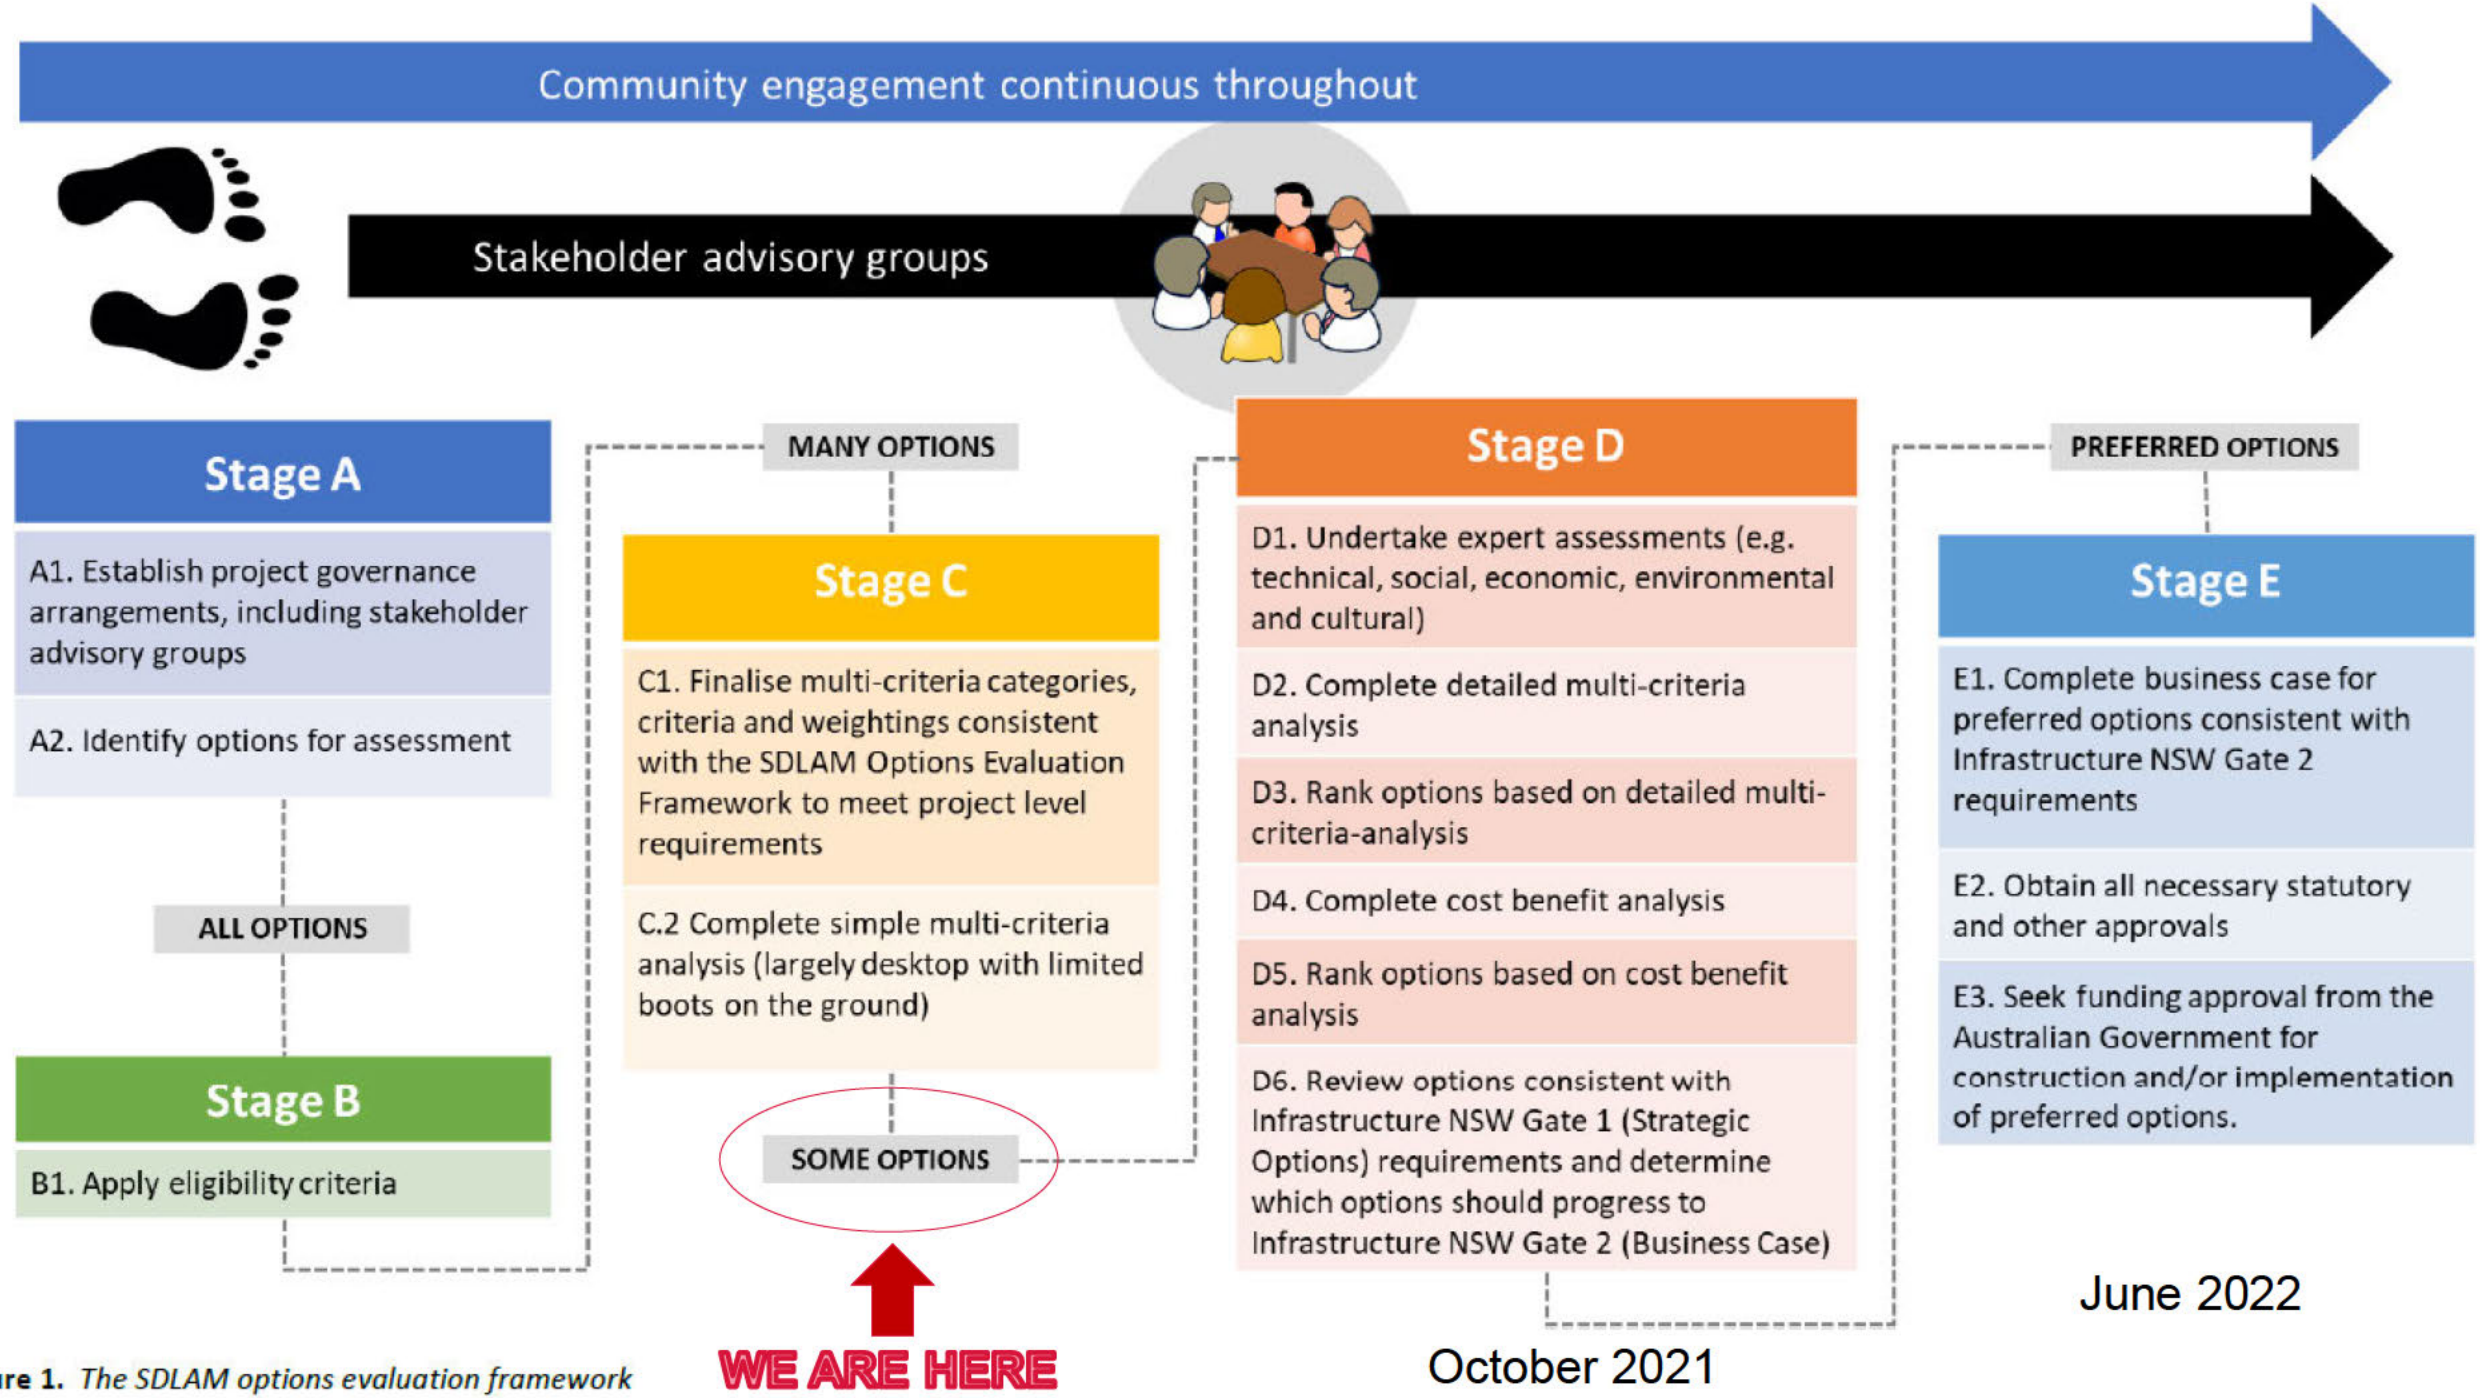


Figure 1. *The SDLAM options evaluation framework*

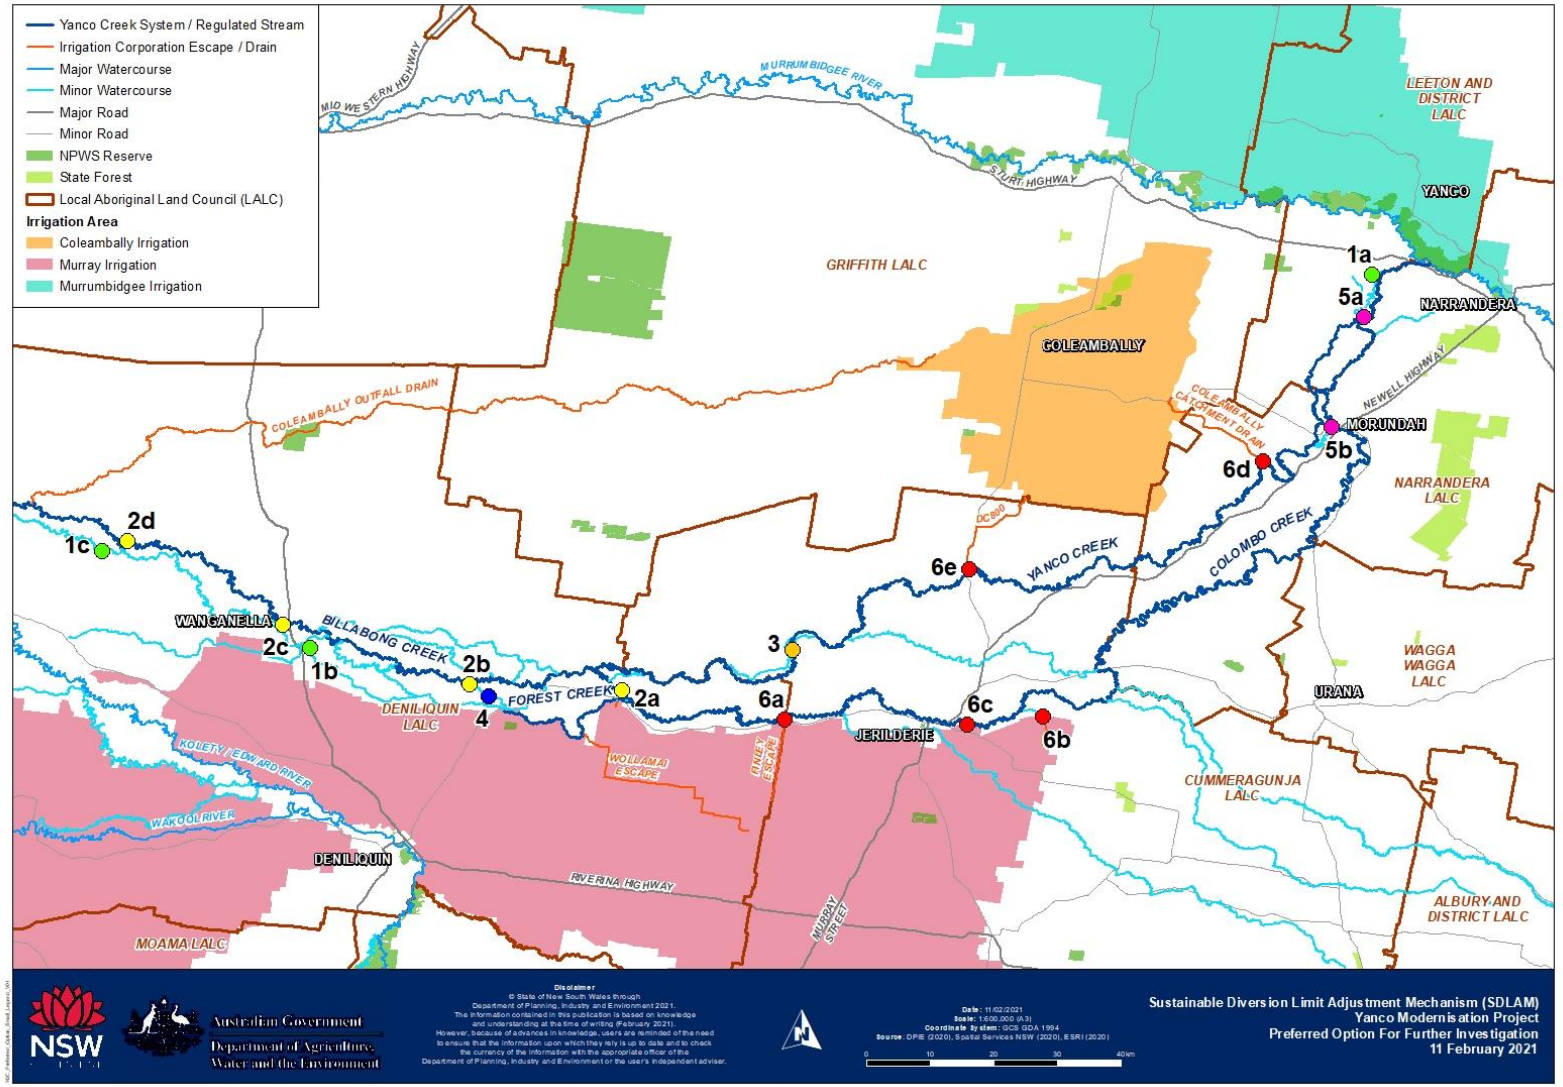
Shortlisted Projects

1. Environmental Water Efficiency
2. Billabong Creek Re-Regulation Weirs
3. Yanco Creek / Mundoora Anabranch Reconfiguration
4. Forest Creek Return Flows Via Piccaninny Creek
5. Improved Flow Measurement
6. Review of irrigation escapes flows
7. Improved Use of Technology
8. Improved riparian management



NSW GOVERNMENT | Planning, Industry & Environment

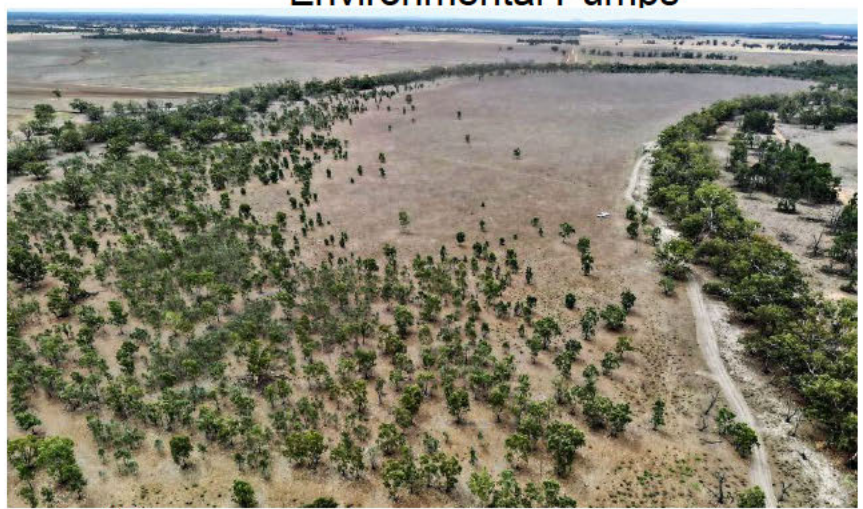
1 - Environmental Efficiency

Purpose: provide more efficient delivery of environmental water at multiple locations, including.

a – Upper Yanco Wetlands

b – Wanganella Swamp

c – Lower Forest Anabranch Environmental Pumps



NSW GOVERNMENT | Planning, Industry & Environment

2 – Billabong Creek Re-Regulation Weirs

Purpose: to reduce unplanned end of system flows in the Billabong Creek at Darlot through upgrade of infrastructure at up to four locations:

a – Hartwood Regulator

b – Piccaninny Regulator

c – Wanganella Regulator

d – Caroonboon Regulator

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

3 - Yanco Creek / Mundoora Anabranch Reconfiguration

Purpose: investigate reconfiguring water delivery arrangements at the Yanco Creek / Mundoora Anabranch area.

Further studies into feasibility and environmental benefits of:

a - a re-regulation storage upstream of McCaugheys block bank

b - a re-regulation storage upstream of 18 Mile block bank and removing the existing McCaugheys block bank.

C - removing both 18 Mile block bank and McCaugheys block bank and establishing a new access bridge at or near the location of the current 18 Mile block bank

NSW GOVERNMENT | Planning, Industry & Environment

4 - Forest Creek Return Flows Via Piccaninny Creek

Purpose: to reduce unplanned end of system flows in the regulated section of the Forest Creek at Warriston Weir.

Achieve this by:

diverting unplanned flows out of the regulated section of the Forest Creek and back to the Billabong Creek (downstream of Conargo) via Piccaninny Creek.

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

5 – Improved Flow Measurement

Purpose: to provide new and/or improved flow measurement* throughout the Yanco Creek System to provide WaterNSW river operators with additional and more timely information to assist them operate the system more efficiently.

Sites to be investigated include:

a - Washpen Creek flows downstream of Spillers Regulator

b - Cheverells Creek Offtake

c - Additional hydrometric stations considering recommendations from WaterNSW (system operator).

* Possible early works

NSW GOVERNMENT | Planning, Industry & Environment

6 – Review of Irrigation Escapes Flows

Purpose: review the use of existing Murray Irrigation Limited (MIL) and Coleambally Irrigation Co-operative Limited (CICL) escapes in a way that best provides a balance between technical, social, environmental, cultural and economic impacts at up to five locations:

a - Finley Escape

b - Berrigan 14 Escape

c - Berrigan 14B1 Escape

d - Coleambally Catchment Drain

e - DC800

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

7 – Improve Use of Technology

Purpose: to use technology to improve the operational efficiency of the Yanco Creek System.

This includes but is not limited to:

a - recognition of the operational efficiencies already provided by WaterNSW through their existing Computer Aided River Management (CARM) system.

b - Integration of new infrastructure considered under the Yanco Modernisation Project with the CARM system.

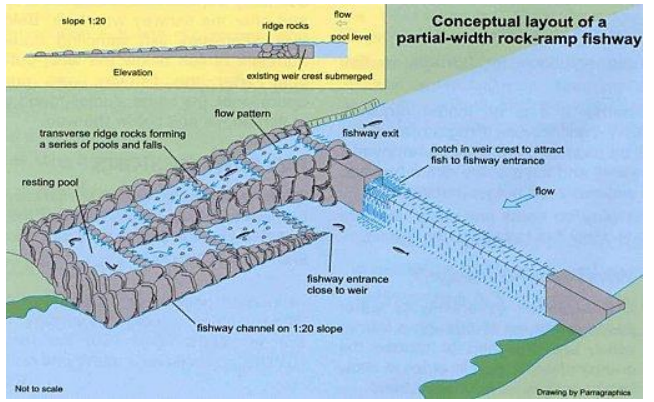
Monitoring site at Darlot

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

8 – Improved Riparian Management

Purpose: complementary riparian management and measures that are consistent with the project objectives and enhance, refine and/or support the other seven parts of the preferred option



Examples include but not limited to:

- environmental offsets,
- removal of flow constraints,
- Improving fish passage (e.g. weir removal, fish ladders),
- installation of fish screens on pumps
- Improving fish habitat (eg Re-snagging)

Stages of our cultural heritage assessment	1

Section 2

What stage are we at for Yanco Modernisation	2
What we have done so far and with whom	3
Results & outcomes	4
Next steps	5

Section 3

Questions & Discussion	6
Archaeological terminology	7

Glossary

- Earth Feature: is the site type we have elected to use to describe the elevated cultural earth mound found during the survey. They are likely earth mounds, but we are unable to confirm their type based on the surface evidence.
- Modified Tree: a tree that has been culturally modified such as scaring or ringing.
- PAD: Potential Archaeological Deposit, an area where sub-surface cultural material is highly likely, even if the surface evidence is not indicative.

1

Aboriginal Cultural Heritage Assessments

- Discussion on overall process

Stages of our ACHA

Gathering background information
- AHIMS search
- Environmental context
- Previous assessments
- Disturbance

Field survey
- Look for what we can see and record
- Identify areas that are likely to have archaeology

Provide information to design team
- To avoid impacting known sites or areas of potential where possible

Testing where required
- Where impact can't be avoided

Analysis of results and final assessment and final report writing
- What do the results of the survey and testing tell us about the significance of the sites being impacted?
- Stage 4 consultation

Apply for approvals where necessary

2

Yanco Modernisation

- Where we are up to and results

What stage are we at with Yanco Modernisation?

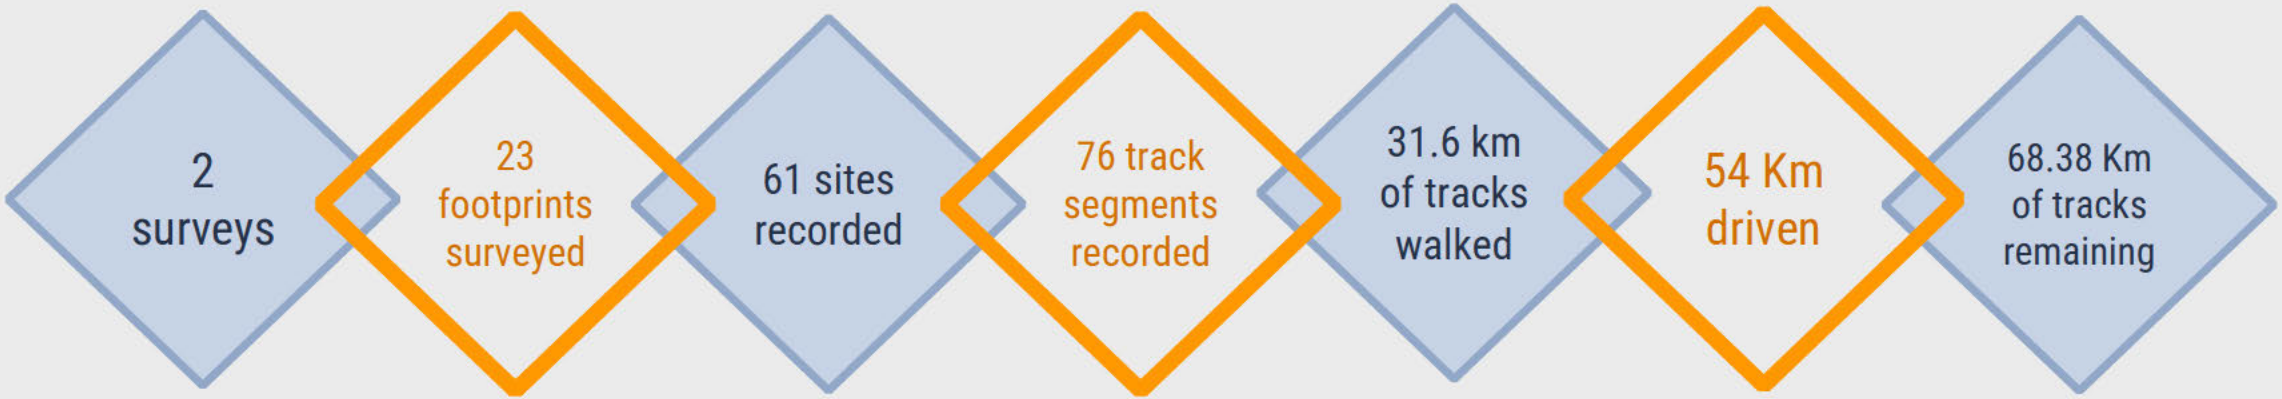
Gathering background information
- Has been completed!

Field survey
- 4 weeks out of 6 have been completed. 2 more weeks to go!

Provide information to design team
- Information from the first 2 weeks of survey has been provided
- In the process of providing information from second 2 weeks survey

Testing where required
- Our aim is to avoid impacts where possible, resulting in as little testing as we can, so we don't harm sites
- Testing anticipated to commence prior to Christmas

What we have done so far



Who has been involved?

Traditional Owner representatives

- Deniliquin LALC
- Yarkuwa Indigenous Knowledge Centre
- Cummeragunja LALC
- Sandhills Artefacts
- Leeton & District Local Aboriginal Land Council

Results at 4 Mile Weir

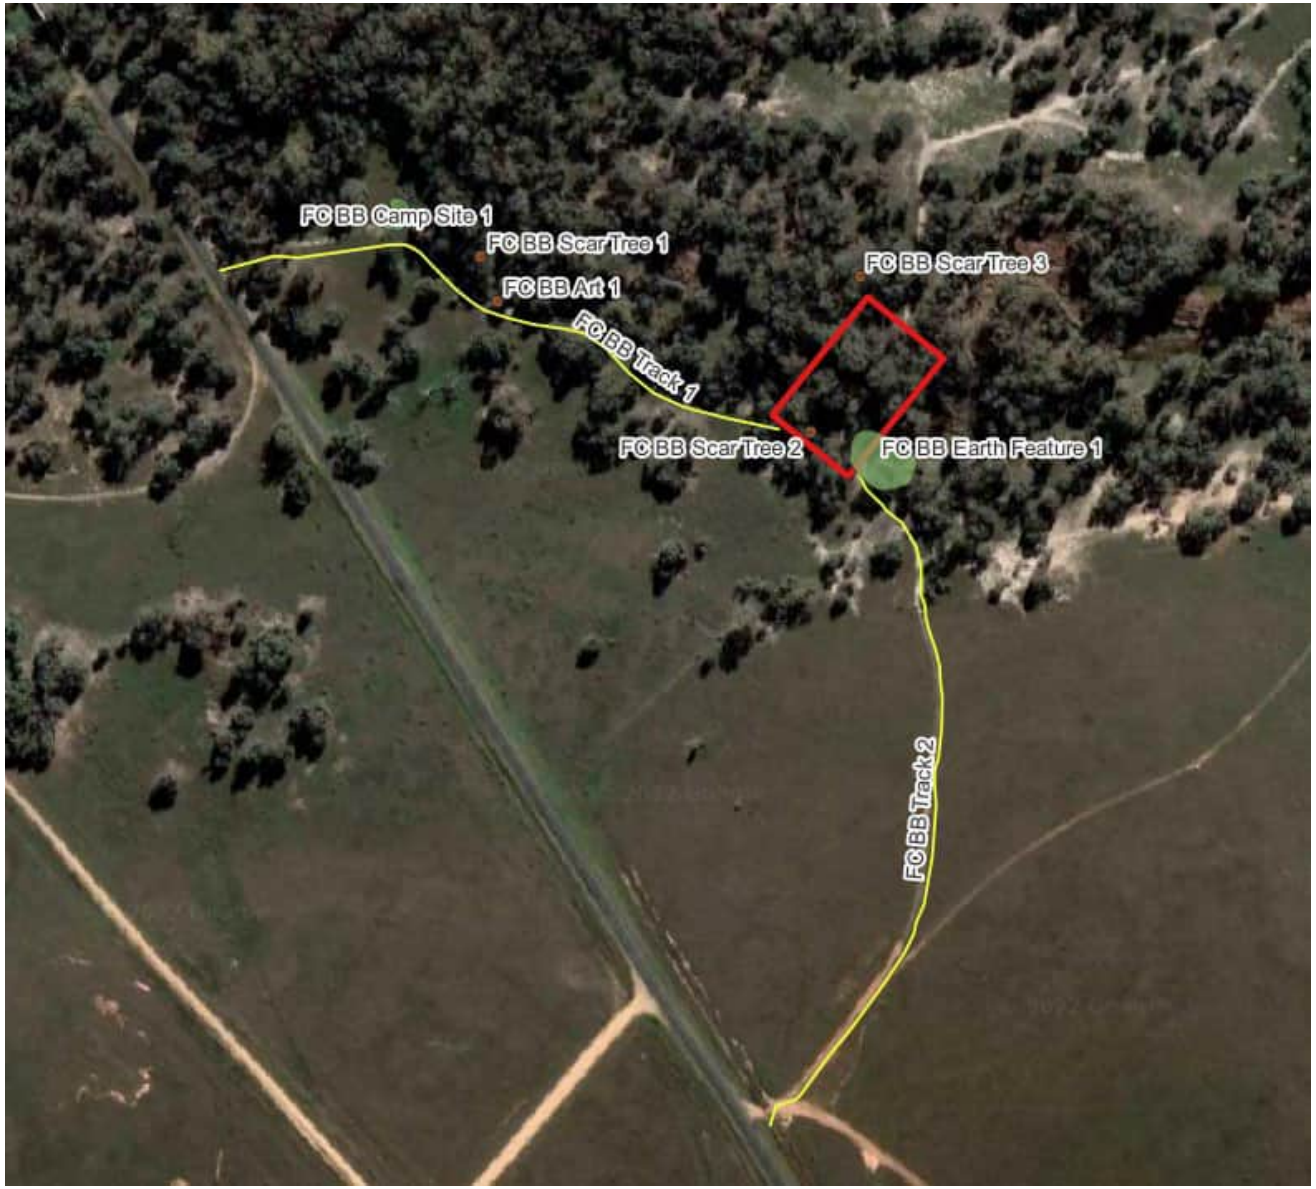
Results at Forest Creek Block Bank



Results at Forest Creek Block Bank

Results at Piccaninny Weir tracks

Results at Piccanniny Weir tracks

Outcomes

Preferred outcome is to avoid harm where possible

Achieved through discussions with design team

- Locations of structures
- Construction techniques

Where we don't know if harm can be avoided, or we need more information before the decision is made

Testing in accordance with the Code of Practice

Where harm can't be avoided

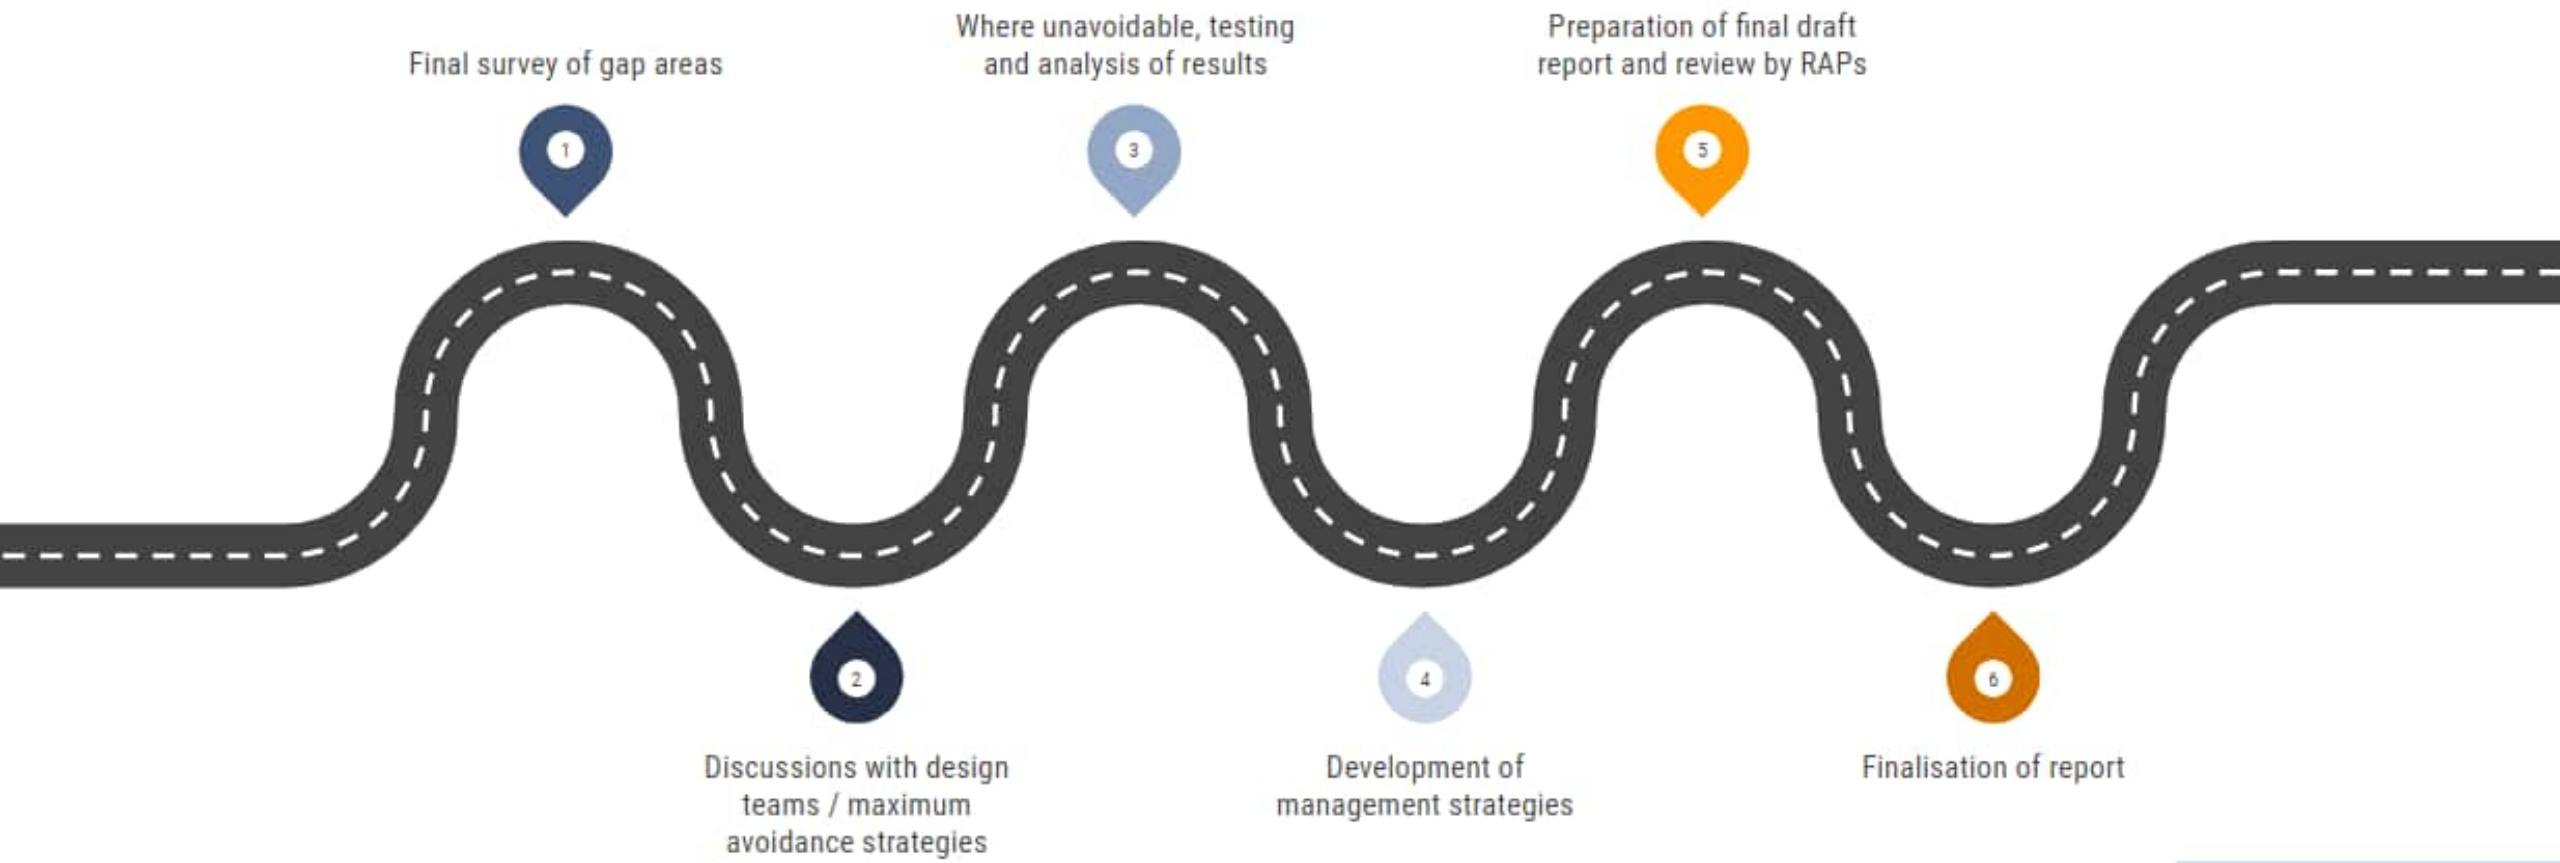
AHIP or Minister's Conditions of Approval will be issued, with conditions for:

- Management of harm
- Minimisation of harm
- Mitigation for harm

Conditions will be based on recommendations in our assessment

The recommendations will be developed with Traditional Owners during the assessment and through feedback on the reports

Next Steps



Final survey of gap areas
1
Discussions with design teams / maximum avoidance strategies
2
Where unavoidable, testing and analysis of results
3
Development of management strategies
4
Preparation of final draft report and review by RAPs
5
Finalisation of report
6

1. Introduction

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (the project). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek system.

The project would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the project.

The purpose of this document is to provide information about the project and to present the proposed method for undertaking the Aboriginal cultural heritage assessment for the project.

1.1 Project description

The project aims to increase the efficiency with which water can be supplied and delivered throughout the Yanco Creek system, including to the environment. Supply of water to the environment involves supplying water to environment conservation areas or areas of high environmental and biodiversity value, such as wetlands. A range of options are being investigated to improve water management in the Yanco Creek system as shown in Table 1.

Table 1: Yanco Creek Modernisation Project Parts

Project Part	Description
Part 1 – Environmental Water Efficiency	To improve efficiency of the environmental watering of wetland areas through improved infrastructure at: ▪ Upper Yanco Wetlands ▪ Wanganella Swamp ▪ Lower Forest Anabranch Wetlands.
Part 2 – Billabong Creek Re-Regulation Weirs	Reduce unplanned end of system flows in the Billabong Creek at Darlot through replacement of existing fixed crest weirs with fully automatic regulated weirs at: ▪ Hartwood Regulator ▪ Piccaninny Regulator ▪ Wanganella Regulator ▪ Caroonboon Regulator.
Part 3 – Yanco / Mundoora Anabranch Reconfiguration	Reconfigure water delivery arrangements in the Yanco Creek / Mundoora Anabranch area to re-regulate flows and provide greater operational flexibility to deliver water to environmental assets.
Part 4 – Forest Creek Return Flows	Reduce unplanned end of system flows below Warriston Weir by diverting unplanned flows in Forest Creek back into the Billabong Creek (downstream of Conargo) via Piccaninny Creek.

Part 5 – Improved Flow Measurement	Provide new and improved flow measurement in the Yanco Creek system with additional and more timely information to assist WaterNSW to operate the system more efficiently. Appropriate locations are to be confirmed.
Part 6 – Murray Irrigation and Coleambally Irrigation Escapes	Review the use of existing Murray Irrigation Limited (MIL) and Coleambally Irrigation Co-operative Limited (CICL) escapes in a way that best provides a balance between social, environmental, cultural and economic impacts. Any works are to be determined.
Part 7 – Improved Use of Technology	Use technology to improve the operational efficiency of the Yanco Creek System. No new works are proposed.
Part 8 – Improved Riparian Management	Implement complementary riparian management and measures, including: ▪ Environmental offsets ▪ Removal of flow constraints ▪ Improving fish passage ▪ Installation of fish screens on pumps ▪ Improving fish habitat (e.g. re-snagging). Any works are to be determined.

Further information about the project is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The location of proposed works comprising Parts1-4 of the project are mapped in figure (Figure 1). Details of any works associated with Parts 5-8 are under further development.

The design of the proposed works for Parts 1-4 in each location is described below, and mapped in the accompanying figures.

1.1.1 Upper Yanco Wetlands

New works are proposed to improve the delivery of environmental water to Mollys Lagoon and Dry Lake (Figure 2). These works include:

- Upgrading the regulator used to divert environmental water from Yanco Creek to Mollys Lagoon
- A new block bank and regulator across the drainage channel near the southern end of Dry Lake to contain environmental water within the lake
- Use of existing access tracks from Sturt Highway (via Mollys Lagoon Road) and Devlins Bridge Road.

1.1.2 Wanganella Swamp

New works are proposed to improve the delivery of, and then retain, environmental water in Wanganella Swamp (Figure 3). These works will include:

- New regulators on Eight Mile Creek upstream and near where the creek crosses Cobb Highway
- New regulator on Clarkes Creek at the southern end of the swamp
- Upgrading the existing McCrabbs regulator (at the northern end of the swamp)
- Upgrading the existing regulator on Estuary Creek
- A new water supply channel to provide environmental water may be required from Billabong Creek

- New culverts at watercourse crossings and some upgrades to existing access tracks from Cobb Highway and Zara Road may be required.

1.1.3 Lower Forest Anabranch Wetlands

New works are proposed to retain environmental water in Rhyola Lake, Rhyola Swamp and Hickories Wetland (Figure 4). These works include:

- A new regulator downstream of Rhyola Lake on lower Forest Anabranch
- A new regulator on Forest Anabranch may be required
- Use of the existing access track from Inverness Road.

1.1.4 Hartwood Regulator

It is proposed to replace the existing Hartwood Weir with a gated re-regulation weir for greater operational flexibility (Figure 5). The proposed works include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of existing access tracks from Conargo Road.

1.1.5 Piccaninny Regulator

It is proposed to replace the existing Piccaninny Weir with a gated re-regulation weir for greater operational flexibility (Figure 6). The proposed works will include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of the existing access track from Wanganella Conargo Road.

1.1.6 Wanganella Regulator

It is proposed to replace the existing Wanganella Weir with a gated re-regulation weir for greater operational flexibility (Figure 7). The proposed works include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of Zara Road and existing access tracks from Cobb Highway.

1.1.7 Caroonboon Regulator

It is proposed to replace the existing Caroonboon Weir with a gated re-regulation weir for greater operational flexibility (Figure 8). The proposed works include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of the existing access track to Wanganella Moulamein Road.

1.1.8 Yanco / Mundoora Anabranch reconfiguration

It is proposed to improve the regulation of water in the vicinity of the 18 Mile and McCaugheys block banks on the Yanco River with new re-regulation gates for greater operational flexibility (Figure 9). The proposed works include:

- A new gated regulator through the existing McCaugheys block bank (likely a gated pipe)
- A new overflow/spillway structure from the McCaugheys weir pool
- Replace the McCaugheys inlet regulator that controls flows into the Mundoora Anabranch (upgraded pipe size and gate)
- Two minor access culverts downstream of McCaugheys block bank
- Use of existing access tracks from North Coree Road and Nine Mile Lane.

1.1.9 Forest Creek return flows via Piccaninny Creek

It is proposed to divert unplanned flows in Forest Creek downstream of Warriston Weir by diverting these flows upstream of the weir along Piccaninny Creek and back to Billabong Creek (Figure 10). The proposed works include:

- A new gated regulator through the existing block bank in the watercourse connecting Forest and Piccaninny creeks
- A new regulation structure may be required to prevent the water being transferred from backflowing up Piccaninny Creek
- Use of the existing access track from Conargo Road.

1.2 Purpose and scope of this document

The purpose of the Aboriginal cultural heritage assessment is to evaluate the potential impacts to Aboriginal cultural heritage that would result from constructing and operating the project. This document presents the method for undertaking the Aboriginal cultural heritage assessment for the project.

This document also provides Registered Aboriginal Parties (RAPs) with detailed information about the project and the proposed assessment method. This will provide RAPs with sufficient information to review and provide feedback on the proposed method prior to its finalisation. The method will not be finalised until this feedback has been received and incorporated into it.

1.3 Limitations

In preparing this document, 3Rivers has relied on information obtained from the Aboriginal Heritage Information Management System (AHIMS) database to provide information on previously identified and recorded Aboriginal sites and Aboriginal Places in or around the project area. 3Rivers has not independently verified or checked the information provided beyond the agreed scope of work. 3Rivers does not accept liability in connection with such unverified information, including errors and omissions in the memorandum which were caused by errors or omissions in that information.

At this stage of the Aboriginal cultural heritage assessment, comprehensive information on the heritage significance or other cultural value associated with sites and places in or around the project area has not been obtained. Gathering comprehensive information on the cultural value of objects and places associated with the project area is one of the aims of the consultation process that is currently underway.

1.4 Aboriginal community consultation

Water Infrastructure NSW is engaged in a broader program of consultation with First Nations about the project. The consultation with the Aboriginal community discussed in this document is specific to the Aboriginal cultural heritage assessment required to be prepared in compliance with the *National Parks and Wildlife Act 1974* and other relevant legislation and regulations.

Effective consultation with Aboriginal people is integral to any Aboriginal cultural heritage assessment. Section 90K(f) of the *National Parks and Wildlife Act 1974* requires that the consultation process and its results are clearly articulated in an Aboriginal Cultural Heritage Assessment Report (ACHAR) and Section 90K(g) specifies that the consultation substantially complies with the requirements set out in the *National Parks and Wildlife Regulation 2019.*

The requirement for consultation acknowledges that Aboriginal people:

- Should have the right to maintain culture, language, knowledge and identity
- Should have the right to directly participate in matters that may affect their heritage
- Are the primary determinants of the significance of their heritage.

The method for Aboriginal community consultation is in accord with the consultation process specified in the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010a) and Clause 60 of the *National Parks and Wildlife Regulation 2019*.

The objective of Aboriginal community consultation is to ensure that Aboriginal people are involved in the assessment by:

- Sharing relevant information about the cultural significance and values of Aboriginal object(s) and/or place(s)
- Contributing to the assessment of cultural and scientific significance of Aboriginal object(s) and/or place(s)

- Reviewing and commenting on the proposed methods of assessing Aboriginal cultural heritage within the project area
- Contributing to the development of cultural heritage management options and recommendations for Aboriginal object(s) and/or place(s) within the project area
- Commenting and providing feedback on the draft ACHAR prior to finalisation.

The consultation process comprises four separate stages.

- **Stage 1** is the notification of the project and provides Aboriginal people with the opportunity to become RAPs for the project. This was initiated in August 2021 and RAPs' nominations have been registered
- **Stage 2** is where RAPs are provided with information about the project and the proposed assessment method
- **Stage 3** allows relevant cultural information to be gathered. This stage continues throughout the life of the project. It is also the stage where the proposed assessment method is provided to the RAPs, who are provided with time to review and provide comment on it
- **Stage 4** is when RAPs review the draft ACHAR and provide comment on it. This is the stage where management and mitigation measures are designed and refined.

Aboriginal community consultation is undertaken concurrently with the Aboriginal cultural heritage assessment.

1.5 Aboriginal community input points during the assessment process

Input and feedback can be provided by RAPs at any time throughout the assessment process. 3Rivers will specifically seek input and feedback from RAPs at several points during the process (DECCW 2010a):

- During Stage 2 - Initial presentation of information about the project and the proposed cultural heritage assessment process
- During Stage 3 - Providing RAPs with the draft proposed method (this document). RAPs were invited to provide feedback on the proposed method, to identify cultural heritage values associated with the project area and have input into the development of any cultural management options. A 28-day review period was provided, and face-to-face meetings with RAPs were held in Narrandera (on March 7th, 2022) and Denliquin (on March 9th, 2022) to discuss the project and the proposed cultural heritage assessment method.
- During fieldwork - Comments will be recorded in the field and will inform the assessment
- During Stage 4 - Providing RAPs with the draft ACHAR. RAPs will be invited to review and provide feedback on the report, and any further information they wish to be included.

1.6 Sensitive cultural information management protocol

RAPs will have the opportunity to provide 3Rivers with information on the project area and the surrounding region, including information on cultural heritage values. Information can be provided at any point during the cultural heritage assessment process prior to the finalisation of the ACHAR.

It is possible that during this consultation process, RAPs will provide sensitive cultural information to which access needs to be restricted.

In the event that such information is supplied, the RAP supplying the information should state to 3Rivers how they wish that information to be treated, and how access to the information should be restricted.

3Rivers will follow the stated wishes provided by the RAP in question when managing and using the information provided to 3Rivers. All stated restrictions of access, communication and publication of the information will be followed. These might include:

- Restrictions on reproducing the information (in whole or in part) in reports

- Restrictions on reproducing the information in reports provided to different audiences (for example, the version provided to the client, the version provided to Heritage NSW and the AHIMS database)
- Restrictions on communication of the information in other ways
- Restrictions on the location/storage of the information
- Other required processes relating to handling the information
- Any names and contact details of persons authorised within the relevant Aboriginal group to make decisions concerning the information, and their degree of authorisation.
- Any details of any consent given in accordance with customary law
- Any restrictions on access to and use of the information by RAPs.

Please consider the above list when providing your statement of requirements regarding any culturally sensitive information.

1.7 Structure of this document

The *Code of Practice for the Archaeological Investigation of Aboriginal objects in NSW* (DECCW 2010b), referred to in this document as the Code of Practice, provides 26 requirements that must be adhered to when undertaking an archaeological assessment of Aboriginal objects and places. This method has been designed to address these requirements.

The structure of this document is as follows:

Table 2: Structure of this document

Section	Description
Section1	Provides an introduction to the project and explains the purpose of this document
Section 2	Summarises the relevant legislation, policies and guidance material
Section 3	Provides the proposed method for the desktop assessment
Section 4	Provides the proposed method for archaeological survey
Section 5	Provides the proposed method for documenting and reporting the findings and recommendations of the Aboriginal cultural heritage assessment
Section 6	Lists the main 3Rivers personnel involved in the assessment
Section 7	Provides information on safety requirements, project timelines, and contact details of 3Rivers staff
Section 8	Provides a list of references used in this document

2. Legislative and policy context

2.1 Commonwealth legislation

2.1.1 Environment Protection and Biodiversity Conservation Act 1999

The *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) provides for the protection of the environment, especially in matters of national environmental significance (MNES). Under the EPBC Act, a person must not take an action that has, will have, or is likely to have a significant impact on any of the MNES without approval from the Commonwealth Minister of Agriculture, Water and the Environment. The definition of the environment under the EPBC Act includes both natural and cultural elements. Under the EPBC Act, heritage items can be listed on the National Heritage List (for items of National heritage significance) or the Commonwealth Heritage List (for items of heritage significance on land and waters owned or managed by the Commonwealth).

2.2 State legislation

2.2.1 Environmental Planning and Assessment Act 1979

The *Environmental Planning and Assessment Act 1979* (NSW) (EP&A Act) regulates environmental planning and assessment for NSW. The EP&A Act includes provisions to ensure that the potential environmental impacts of a development, including impacts to Aboriginal cultural heritage, are assessed and considered prior to any environmental approval. Local environmental plans may identify items and places of heritage significance.

2.2.2 National Parks and Wildlife Act 1974 and National Parks and Wildlife Amendment Act 2010

The *National Parks and Wildlife Act 1974* (NSW) (NPW Act) protects Aboriginal heritage within NSW.

An 'Aboriginal object' is defined by the NPW Act (Section 5(1)):

Aboriginal object means any deposit, object or material evidence (not being a handicraft made for sale) relating to the Aboriginal habitation of the area that comprises New South Wales, being habitation before or concurrent with (or both) the occupation of that area by persons of non-Aboriginal extraction, and includes Aboriginal remains.

An 'Aboriginal place' is a place gazetted by the Minister, under the NPW Act (Section 84):

The Minister may, by order published in the Gazette, declare any place specified or described in the order, being a place that, in the opinion of the Minister, is or was of special significance with respect to Aboriginal culture, to be an Aboriginal place for the purposes of this Act.

Protection of Aboriginal heritage is outlined in Section 86 of the NPW Act, as follows:

- 'a person must not harm or desecrate an object that the person knows is an Aboriginal object' (Section 86(1))
- 'a person must not harm an Aboriginal object' (Section 86(2))
- 'a person must not harm or desecrate an Aboriginal place' (Section 86(4))

Section 87(1) of the NPW Act provides that it is a defence to these provisions if the harm or desecration is authorised by an Aboriginal heritage impact permit (AHIP).

Section 87(2) of the NPW Act provides that it is a defence to the provisions of Section 86(2) if the defendant exercised due diligence to determine whether an Aboriginal object would be harmed, and reasonably determined that no Aboriginal object would be harmed. This is not a defence to the offence of knowingly harming an Aboriginal object (offences that contravene Section 86(1)).

Harm is defined under the NPW Act (Section 5) as any act or omission that destroys, defaces or damages the object or place, or – in relation to an object – moves the object from the land on which it had been situated.

2.3 Regulatory documents

Heritage NSW and its predecessor agencies have produced a number of guidance documents and codes of practice to guide the various steps of an Aboriginal cultural heritage assessment. Adherence to the requirements outlined in these documents ensures that all advice provided complies with the relevant legislation and regulations, and is legally sound.

2.3.1 Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010 (DECCW 2010a)

This document establishes the requirements for consultation (under Part 6 of the NPW Act) with Aboriginal stakeholders as part of the heritage assessment process to determine potential impacts of proposed activities on Aboriginal objects and places and to inform decision making for any application for an AHIP. The document identifies four stages with associated timeframes which must be adhered to:

- Stage 1 - Notification of project proposal and registration of interest (14 days from date letter sent to register as a registered Aboriginal stakeholders)
- Stage 2 - Presentation of information about the project
- Stage 3 - Gathering information about cultural significance (28 days for RAPs to provide a review and feedback to information about the project, and the proposed method for archaeological assessment)
- Stage 4 - Review of draft ACHAR (RAPs have 28 days from sending of the report to make a submissions).

2.3.2 Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales (DECCW 2010b)

The Code of Practice sets out the detailed requirements for archaeological investigations of Aboriginal objects in NSW for activities that require assessment under the EP&A Act. The Code of Practice sets out in detail:

- Minimum qualifications for anyone undertaking archaeological investigation under the Code in NSW
- Assessment steps required to be undertaken for all archaeological investigations
- Assessment steps that may be required to be undertaken to adequately characterise the Aboriginal objects being investigated.

An AHIP to undertake sub-surface testing is not required if complying with the Code of Practice, as sub-surface testing complying with this Code is excluded from the definition of harm to an Aboriginal object.

2.3.3 Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)

This document provides guidelines for the investigation and assessment of Aboriginal cultural heritage (under Part 6 of the NPW Act) to explore the harm of a proposed activity on Aboriginal objects and declared Aboriginal places and to clearly set out which impacts are avoidable, and which are not.

The document provides:

- Guidance on the process for investigation and assessing Aboriginal cultural heritage in NSW; and
- Heritage NSW's requirements for an ACHAR.

3. Desktop assessment method

3.1 Objectives of desktop assessment

The desktop assessment provides an opportunity to review existing knowledge about the project area and its environs. This is done through analysing environmental information, synthesising previous archaeological information, reviewing relevant contextual information (e.g., historical documents; oral histories; anthropological assessments) and undertaking heritage database searches (as listed in Section 2). This indicates the type of archaeological evidence that we are likely to find in the project area and provides us with an indication of how well it is likely to have been preserved. It also provides context to understand and interpret material evidence of past land use in the project area.

3.2 Method

The method outlined here complies with Requirements 1-4 of the Code of Practice.

3.2.1 Review of previous archaeological work

In accordance with Requirement 1a of the Code or Practice, previous archaeological and ethnohistographical studies will be reviewed and synthesised. This will provide a baseline of knowledge about Aboriginal cultural heritage in the project area and environs. This information also underpins the subsequent significance assessment that will be undertaken for cultural heritage that is present in the project area.

This review will include the following:

- A review of previous archaeological and ethnohistographical work that is appropriate to the scale of the proposed activity, the size of the project area and the anticipated impacts
- A current AHIMS search – this is further discussed in Section 3.2.2
- A synthesis of the known archaeology and ethnohistories of the region, based on relevant published and unpublished sources, local knowledge, information from the AHIMS database and any other sources, as appropriate
- An evaluation of the results of previous reports relevant to the project area, reflecting current knowledge
- A description of the range, nature and extent of known cultural heritage sites and features within and in the vicinity of the project area. This information will be summarised and presented in a table in the report, including a description of the number of sites by type or feature present
- A summary description of any existing predictive models relevant to the project area. This will pay attention to models of past Aboriginal land-use strategies and cultural systems, as well as models of relevant taphonomic processes
- A discussion of the main issues and the regional character of the archaeology of the project area and its environs.

3.2.2 AHIMS and other register searches

An AHIMS search has been undertaken, in accordance with Requirement 1b of the Code of Practice.

The AHIMS search is required to:

- Be contemporaneous with the project. Heritage NSW considers that AHIMS searches have a currency of around 12 months, this may be less in areas of intense development activity. It may be necessary to undertake updated searches throughout the life of this assessment
- Include an area that encompasses the project area but is larger than it. While the Code of Practice does not specify the size the AHIMS search, it will be sufficient to also adequate landscape interpretation to occur and to understand site distribution within the landscape

- Include a search for any previous relevant reports within the AHIMS search area, particularly in the project area

These reports will be reviewed and synthesised to form part of the background assessment, including a discussion of variables that limit the power of the search results, such as how many previous assessments have been undertaken in the search area. Consideration will also be given to Native Title and Aboriginal land claims in the project area, including carrying out a search of the Native Title Register.

3.2.3 Environment and landscape context

A consideration of the environment and landscape is critical to the background assessment, partly because it allows us to understand what resources would have been available to Aboriginal people to use in the past, which would have determined how they used the land, but also to allow us to understand how this evidence is likely to have been preserved.

In accordance with Requirement 2 of the Code of Practice, the environment and landscape review will:

- Describe the landscape history of the project area and environs at a scale that will allow the project area to be characterised into meaningful units for any fieldwork
- Identify and describe the landforms within the project area
- Identify any geomorphic activity in the project area with a view to informing the likelihood of objects being present sub-surface or revealed by erosional processes
- Identify what erosional processes, if any, have occurred within the project area
- Describe the geology present within the project area
- Describe the soils present within the project area, including their formation history
- Identify the hydrology and hydrological processes within the project area
- Describe the natural resources and features that are likely to have influence land use patterns in the project area in the past, including any available records of culturally important plants and animals
- Describe the land use history of the project area
- Summarise how these variables are likely to influence the presence of Aboriginal objects within the project area.

This information will contribute to the development of a predictive model (Requirement 4) for the project area.

3.2.4 Discussion of local and regional Aboriginal land use and material traces

This section addresses Requirement 3 of the Code of Practice and provides a summary of the information obtained in the preceding sections. It includes a synthesis of that information and an analysis of what it may mean for the type of archaeological evidence that may be present in the project area, the levels of disturbance, and how this may affect what is there.

3.2.5 Predictive model

In accordance with Requirement 4 of the Code of Practice, a predictive model will be developed for the project area. It will be based on the information obtained through Requirements 1-3 and a specific multi-criteria spatial analysis that will be developed for this project. The model will be presented both on a map and in a series of statements. It will underpin the proposed approach for all fieldwork proposed for the project.

In accordance with Requirement 4a, the predictive model will:

- Integrate the distribution of known sites using the landscape descriptions identified in Requirement 2
- Characterise the patterns of the archaeological material from information derived in the known social and ethnohistorical review

- Consider the distribution of natural resources, and likely past land-use in the project area
- Consider the spatial and temporal relationships of sites
- Identify what sorts of archaeological deposits are likely to be present, and in what densities
- Make predictive statements about past Aboriginal occupation of the landscape based on the above
- Use these statements to inform a multi-criteria spatial analysis for the project area
- Present the predictive information in a map.

In accordance with Requirement 4b, the model will provide statements of predicted archaeological potential for the project area. These will be assessed through archaeological survey and subsurface testing, if required.

The predictive model will be refined and updated based on the results of fieldwork.

3.3 Documentation and analysis

The information from Requirements 1-4 will be presented in a report that addresses the requirements of Requirement 11 of the Code of Practice. It will include an analysis of that information and will be used to determine appropriate methodologies for fieldwork.

Information from this section will also be incorporated into an ACHAR, as outlined in the *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (DECCW 2011).

Note that some components of the desktop assessment have already commenced. AHIMS search results are provided in Appendix A. Preliminary findings on existing cultural heritage information relevant to the project area, and the predictive model based on these findings, are provided in Appendix B.

4. Survey method

4.1 Objectives of survey

The purpose of the archaeological survey is to systematically inspect the project area to identify physical traces of Aboriginal land use that are visible on the ground surface, as well as other visible features (for example, rock shelters, rock art, scar trees). It also allows for areas to be identified where it is considered likely that Aboriginal objects will be present, although they are not visible on the surface. These areas are known as Potential Archaeological Deposits (PADs).

The results of the survey allow the identification of areas where further assessment, in the form of sub-surface testing, will be required. Where sub-surface testing is not required, appropriate management measures can be determined to guide the ongoing management of archaeology in the project area.

The archaeological survey aims to:

- determine whether any Aboriginal objects are present within the impact zone of the project
- identify any areas with a likelihood of Aboriginal objects being buried beneath the surface, and which should be regarded as areas of PAD
- gather and record information on any sites associated with intangible cultural heritage that are present within or near to the project area.

If Aboriginal objects are present, the archaeological survey aims to gather information on the nature of these objects and the archaeological 'site' or 'sites' they make up. This information will be used in the ACHAR as a basis for a significance assessment of each site and its contents and any subsequent recommendations for heritage management mitigation to be taken.

The archaeological survey will adhere to the requirements of the Code of Practice.

4.2 Research questions

Several research questions have been designed to guide the archaeological fieldwork for this project. The purpose of the research questions is to provide parameters to allow the fieldwork to be focussed and to provide useful data to guide future management of Aboriginal objects throughout the life of this project. They can also help determine significance of Aboriginal objects and to assess the risk of harm as a result of the proposed activity.

The research questions that underpin the survey component of this project are broad, and focus on testing the predictive model. The following questions address this:

- What Aboriginal objects are visible and can site extents be identified?
- How does this compare to the predictive model?
- Are there areas of PAD, and what criteria have been used to identify them?
- What are the levels of disturbance on site and how have these impacted Aboriginal objects or areas of PAD?
- How do the results of the survey compare with other known sites in the region?

4.3 Method

In accordance with Requirement 5 of the Code of Practice, the archaeological survey will adopt a sampling strategy targeting survey on each distinct landform within a given soil landscape. The survey aims to cover all accessible areas and known Aboriginal objects or features where objects are likely to be.

The project area sits between the Murrumbidgee River, to the north, and the Murray River, to the south. Within and around the project area, the Murrumbidgee and Edward Rivers, and their tributaries (including Billabong Creek and Yanco Creek), form the most significant topographical features in the landscape. Watercourses in the area are highly meandering and, being not substantially incised below the level of the surrounding landscape, prone to overbank flooding. Watercourses have created the present-day landscape, which consists of floodplains of quaternary alluvial deposit filled with hydrological features including wetlands, lakes, paleo-channels and oxbow lakes (permanent, ephemeral, and dry).

The soils and sediments (or regolith) forming the current ground surface are almost entirely quaternary deposits of clay or loam sediment deposited alluvially. Mapped deposits of hard-rock surface geology are absent across the project area, except from the region immediately south of Narrandera, mapped as sandstone and siltstone (Pogson 1974).

In most parts of the region, the ground surface is level terrain that consists of floodplain sedimentary deposits. The topography of these areas is broken by hydrological features such as watercourses, wetlands, and lakes. In some areas, sediments have been reworked into aeolian (wind-blown) dunes made from sand or silty-sand.

The Yanco Creek system (i.e. Yanco Creek and associated watercourses flowing between the Murrumbidgee at Narrandera to Morundah, Wanganella, and Moulamein) runs along the course of a palaeochannel that originally formed between 20 and 13 thousand years ago (Pardoe and Martin 2011: 18). This palaeochannel formed at the end of the last glacial maximum, at which time it would have been a major river fed by melting glacial ice. For this reason, the sediments along the Yanco Creek system probably contain a higher proportion of sand than most channels in this part of the riverine plain. Paleochannel beds are generally sand-rich, having been created by rivers with much higher flow velocities than the present-day rivers. Exposed regions of the palaeochannel might also form surface areas of exposed sand, which have high archaeological potential due to their known use by Aboriginal people as areas to camp and to bury the dead (Pardoe and Martin 2011).

The hydrology of the region has been substantially altered by historical farming practises, with the flow and morphology of watercourses today being largely created by modern irrigation. In particular, seasonal snow-melt would have created consistent annual flood events prior to post-contact dams negating this effect. Many ephemeral lakes and wetlands that would have been regularly inundated prior to European settlement are now

rarely or never flooded due to modern water control (Pardoe and Martin 2011: 18) The changes to the region's hydrology have considerable consequences for predicting the distribution of archaeological sites, as the location and size of watercourses today might not correspond with the situation that existed prior to European contact.

4.3.1 Survey sampling strategy

Requirement 5a of the Code of Practice specifies that all landforms that will be potentially impacted by the proposed activity must be surveyed, with a proportional emphasis placed on landforms that have been assessed as likely to have archaeological potential. These areas have been identified through the development of the predictive model in accordance with Requirement 4.

The predictive model, based on background research carried out so far (see Appendix B) identifies the following:

- Elevated landforms near watercourses, or other water features such as lakes and swamps, have high archaeological potential
- Landforms adjacent to permanent water features have a higher archaeological potential than those adjacent to ephemeral watercourses, though noting that the permanence of water features in the current landscape might not reflect their permanence prior to European settlement
- Landforms with thick soil profiles in soft alluvial or aeolian sands or sand-rich sediments will have high archaeological potential
- Areas of remnant vegetation close to waterways are likely to contain culturally modified trees if the trees are of sufficient age
- Areas of PAD are likely to be present close to water, in locally elevated areas with surface soils or sediments
- The most common archaeological site types are likely to be modified trees, stone artefacts (isolated or in clusters), middens, and hearths (as evidenced by distinct structured clusters of baked clay heat retainers)
- Stone artefacts, middens and hearths can be present on the ground surface or buried in subsurface soils and sediments.

The sampling strategy then will survey all landforms within the project area that will be potentially impacted by the proposed activity, focussing on the following:

- Elevated landforms near watercourses, or other water features such as lakes and swamps, particularly adjacent to permanent water
- Landforms with thick soil profiles in soft alluvial or aeolian sands or sand-rich sediments
- Locally elevated areas with surface soils or sediments close to water
- Areas of remnant vegetation close to waterways and mature trees.

It is proposed that the survey covers all areas that will be subjected to ground-disturbing works by the project.

These areas include all areas of ground disturbance associated with the project elements listed in Section 1.1, such as:

- Locations where regulators would be constructed or replaced
- Locations where earthworks would be constructed to divert water, for example coffer dams and diversion channels
- All access roads that would be used by construction vehicles and machinery
- All roads, culverts or other infrastructure that would be upgraded to aid construction or to mitigate the impact of changed water flow regimes on land-users
- Temporary construction yards and laydown areas for vehicles and equipment.

At the time of writing, it has not been decided whether the survey will cover areas that would be inundated as a result of the project but which would not be impacted by any ground-disturbing works during the construction process. It is currently unknown whether the project would represent an impact to any Aboriginal objects in the inundation areas. Further information is being generated on whether the inundation of areas would result in any impact to the ground surface, such as erosion of channels or channel banks. Predictive modelling of the extent of the inundation areas will be carried out, which will enable predictions on the extent and severity of any impacts to the ground surface and subsurface deposits.

Based on this information, 3Rivers will produce an addendum to this method document, which will set out whether the inundation areas are proposed to be surveyed, and if so whether it is proposed to survey these areas in full or in part. This addendum will be circulated to all RAPs, for their review and feedback.

4.3.2 Survey method

In accordance with Requirement 5b of the Code of Practice:

- The project area will be divided into appropriate survey units. These survey units will be determined prior to the commencement of fieldwork and will be illustrated on a map to guide fieldwork
- Systematic pedestrian survey will occur across the survey area (see Section 4.3.1)
- The survey area will be divided into transects in the field where appropriate. Transects will be defined by one or more of the following:
  - Landform boundary
  - Subject area boundary
  - Harm area boundary
  - Significant change in survey conditions
  - Other arbitrary termination
- The following details will be recorded for each transect and survey unit:
  - Landform
  - Ground surface visibility
  - Degree of identifiable disturbance
  - Beginning and end points of transects or boundaries of survey units using handheld GPS receiver (preferentially DGPS), in accordance with Requirement 8a of the Code of Practice
  - Datum points will be recorded using the MGA94 cartesian co-ordinate system in accordance with Requirement 8b of Code of Practice
- All Aboriginal sites will be recorded in accordance with Requirements 6 and 7 of the Code of Practice:
  - The spatial extent of objects will be recorded, or direct evidence of their location, including obvious physical boundaries
  - Areas identified by the RAPs on the basis of cultural information will be recorded
  - Information about the determination of site boundaries will be recorded
  - Areas of PAD will be recorded, along with information about why an area has been identified as PAD
  - Photographs will be taken, including appropriate graded metric scales and ranging poles, surveying staff or tape measure
  - Drawings and sketches will be made as appropriate
- Survey coverage will be recorded in accordance with Requirement 9 of the Code of Practice:
  - Visibility and exposure will be independently described for each survey unit
  - Visibility will be determined and recorded to the nearest 10%

- Description of areas of exposure and processes responsible, natural or otherwise
- The size of areas of exposures will be estimated to the nearest 10%
- Obtrusiveness of features present will be described
- Quantification of survey coverage will be discussed including a description of sampling procedure.

If Aboriginal objects are found within the survey area, the area in which these objects are located would then be recorded as an Aboriginal site. An Aboriginal Site Recording Form would be completed by 3Rivers and lodged on AHIMS.

5. Documentation and reporting

The Aboriginal cultural heritage assessment will be reported in accordance with Requirement 11 of the Code of Practice. This will include a detailed description of what was found during the survey and include:

- A quantification of the results
- Interpretation of what was found
- Analysis and discussion based on the quantification and interpretation
- An assessment of the scientific values and significance of what was found
- An impact assessment
- Determination of appropriate management measures, including consideration of requirements for further assessment.

An ACHAR, documenting the results of the Aboriginal cultural heritage assessment, will be written by 3Rivers. The ACHAR will conform to the requirements of the Code of Practice (DECCW 2010b), the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) and the *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (OEH 2011). The report will include:

- A description of the proposal, the area proposed to be impacted, and the landscape and environmental characteristics of the surrounding region
- A description of the consultation process between 3Rivers and RAPs
- Background information on Aboriginal land-use, land titles or interests in the region. This will include information from historical and ethnographic sources, information submitted to 3Rivers during the consultation process, information from previous archaeological studies, and searches of land titles and interests
- A detailed description of the methods used during field survey
- Results of field survey and rationale for test excavations (if any)
- An assessment of the significance of any Aboriginal objects and sites discovered by the investigation. This would include both scientific significance and cultural significance
- A description of any identified impacts to Aboriginal heritage by the proposed development including an assessment of inadvertent impacts, consistent with the guidelines, that might occur
- A discussion of harm minimisation and management strategies the proposal proposes to employ
- A discussion and assessment of the significance of the identified impacts to Aboriginal heritage. This involves using the assessed significance of the site(s) proposed to be impacted, to assess the loss to the heritage resource that the project would represent.
- Recommendations of management actions that should be implemented to avoid or minimise harm to Aboriginal cultural heritage. These recommendations might include undertaking further archaeological investigation (e.g. test excavation of areas of PAD proposed to be impacted, if any).

The ACHAR would be circulated to all RAPs in draft form. A 28-day period to review the document and provide input and comments will be provided at this point. The final report, incorporating input from RAPs, will be lodged with Heritage NSW.

All site records, including site notebooks, register of Aboriginal objects and PADs identified, photographs, drawings and geospatial data will be kept in a legible form for at least 5 years, in accordance with Requirement 12 of the Code of Practice.

6. Personnel

The fieldwork team that carries out the archaeological survey will comprise archaeologists from 3Rivers, and site officers nominated by the RAPs. The exact numbers will be determined once Stage 1 consultation has been completed.

6.1 Minimum qualifications required for compliance with the Code of Practice

Archaeologists undertaking archaeological investigations in NSW in accordance with the Code of Practice must have the following qualifications and experience:

- A minimum of a bachelor's degree with honours in archaeology or relevant experience in the field of Aboriginal cultural heritage management
- The equivalent of two years full-time experience in Aboriginal archaeological investigation, including involvement in a project of similar scope
- A demonstrated ability to conduct a project of the scope required through inclusion as an attributed author on a report of similar scope.

The above qualification requirements apply to the lead archaeologist on the field survey, to the archaeologist leading the assessment, and the primary author of the resulting ACHAR.

The above requirements do not apply to site officers nominated by the RAPs who take part in fieldwork.

6.2 3Rivers assessment team for this project

The Project Lead for this project is Oliver Macgregor (Senior Archaeologist). Oliver has a PhD in archaeology and palaeoanthropology from the Australian National University, and over ten years' experience as an archaeologist.

Fran Scully (Principal Archaeologist) is the project's Heritage Technical Lead and Reviewer. Fran holds a Master of Science in archaeological geophysics from the University of Bradford and has over 29 years' experience as a field archaeologist, consultant archaeologist, cultural heritage advisor, heritage regulator and policy advisor.

7. Other Aboriginal cultural heritage assessment information

7.1 Safety and access requirements

The survey of the proposal area would be completed under the 3Rivers Health, Safety and Environment (HSE) field pack. All field staff will be required to sign on to this document prior to commencing work. This document will detail the potential risks that might be encountered during fieldwork, and the risk-reduction controls that will be employed.

All field staff will be contacted by 3Rivers in advance of fieldwork occurring, to notify them of safety requirements such as required Personal Protective Equipment (PPE) and other equipment/supplies to bring with them to the survey.

Prior to field staff heading to site, 3Rivers staff will have completed the following:

- A check of the RFS bushfire danger rating before heading to site http://www.rfs.nsw.gov.au/fire-information/fdr-and-tobans. Work will not occur when bushfire hazard rating is Extreme or Catastrophic. If the fire rating is High, Very High or Severe, the risk of carrying out work will be re-assessed
- A check of forecast weather conditions. Work schedules might be changed if extreme weather or weather posing a safety risk to field staff is forecast
- A check of river levels and flood conditions. Works schedules might be changed if inundation would create problems for access or pose a safety risk to field staff.

7.2 Project timelines

Project timelines are outlined in Table 3. Please note that the dates included are estimates at this stage in the process, and are provided to allow for forward planning of personnel and resources.

Table 3: Project timelines

Project milestone	Commencement date
Circulation of draft Method (this document) to RAPs, for 28-day review period	7.2.2022
Archaeological survey fieldwork	Late March 2022
Circulation of draft ACHAR to RAPs for review	May 2022
Provision of comments from RAPs on the draft ACHAR	June 2022
Gathering of information on cultural significance and cultural values associated with Aboriginal objects and places within or relevant to the project area	Throughout, until finalisation of the ACHAR
Finalisation of the ACHAR in consideration of comments received	Mid to late June 2022

7.3 Contact details

For more information, or to discuss the project and the proposed Aboriginal cultural heritage assessment, please do not hesitate to contact:

Oliver Macgregor

Senior Archaeologist, 3Rivers

Oliver.macgregor@jacobs.com

Appendix B. Existing cultural heritage information

B.1 Environmental context

B.1.1 Geology and soils, topography, and hydrology

The Murray Basin forms the southern half of the Murray-Darling system, which extends across Victoria, New South Wales and stretching into Queensland and South Australia. The project area sits toward the eastern end of the Murray Basin, within an area referred to as the Riverine Plain or Riverine Bioregion (Pardoe and Martin 2011) The Murray Basin is a low relief depression covering an area of more than 300,000 km². The Murray River is the main surface drainage system in the region, flowing from its headwaters in the Great Dividing Range to form a border between Victoria and New South Wales. The basin is located in an important transitional zone between the humid coastal fringe and the arid interior (Prendergast 2004, p. 7). The Riverine Plain land system formed during the Pliocene (1.6 – 5 million years ago), when the Neogene sea retreated from the Murray Basin creating the Murray River and its tributaries, and subsequently an extensive and complex alluvial plain. The predominant sedimentary processes within the Riverine Plains are fluvial and aeolian, episodically deposited between glacial and interglacial conditions (Cupper *et al.* 2003). The riverine plain has an average gradient of 20cm per km – an extremely low gradient that enables meandering rivers and contributes to the region's flood-proneness.

The project area sits between the Murrumbidgee River, to the north, and the Murray River, to the south. Within and around the project area, the Murrumbidgee and Edward Rivers, and their tributaries (including Billabong Creek and Yanco Creek), form the most significant topographical features in the landscape. Watercourses in the area are highly meandering and – being not substantially incised below the level of the surrounding landscape – prone to overbank flooding. Watercourses have created the present-day landscape, which consists of floodplains of quaternary alluvial deposit filled with hydrological features including wetlands, lakes, paleo-channels and oxbow lakes (permanent, ephemeral, and dry).

The soils and sediments (or regolith) forming the current ground surface are almost entirely quaternary deposits of clay or loam sediment deposited alluvially. Mapped deposits of hard-rock surface geology are absent across the project area, except from the region immediately south of Narrandera, mapped as sandstone and siltstone (Pogson 1974).

In most parts of the region, the ground surface is level terrain that consists of floodplain sedimentary deposits. The topography of these areas is broken by hydrological features such as watercourses, wetlands, and lakes. In some areas, sediments have been reworked into aeolian (wind-blown) dunes made from sand or silty-sand.

The Yanco Creek system (i.e. Yanco Creek and associated watercourses flowing between the Murrumbidgee at Narrandera to Morundah, Wanganella, and Moulamein) runs along the course of a palaeochannel that originally formed between 20 and 13 thousand years ago (Pardoe and Martin 2011: 18). This palaeochannel formed at the end of the last glacial maximum, at which time it would have been a major river fed by melting glacial ice. For this reason, the sediments along the Yanco Creek system probably contain a higher proportion of sand than most channels in this part of the riverine plain. Paleochannel beds are generally sand-rich, having been created by rivers with much higher flow velocities than the present-day rivers. Exposed regions of the palaeochannel might also form surface areas of exposed sand, which have high archaeological potential due to their known use by Aboriginal people as areas to camp and to bury the dead (Pardoe and Martin 2011).

The hydrology of the region has been substantially altered by historical farming practises, with the flow and morphology of watercourses today being largely created by modern irrigation. In particular, seasonal snow-melt would have created consistent annual flood events prior to post-contact dams negating this effect. Many ephemeral lakes and wetlands that would have been regularly inundated prior to European settlement are now rarely or never flooded due to modern water control (Pardoe and Martin 2011: 18) The changes to the region's hydrology have considerable consequences for predicting the distribution of archaeological sites, as the location and size of watercourses today might not correspond with the situation that existed prior to European contact.

B.1.2 Climate and biodiversity

The present-day climate of the geographic region is characterised by cool wet winters and hot dry summers. Rainfall is winter dominant. The project area sits on the boundary between a temperate climate to the east and a semi-arid climate to the west.

During the Pleistocene/Early Holocene the area was less arid, as indicated by the extensive large palaeochannels that have been identified throughout the Murray Basin. The paleochannels, and their associated paleo-floodplain, which were formed during or at the end of glacial maxima, changed with the stabilisation of the climate at the start of the Holocene around 10 to 15 thousand years ago. It is during this period that the current system of rivers and other watercourses formed (Klaver 1998). Changes to associated resources likely influenced the mobility of past Aboriginal patterns (Watson and Anderson 2014). The distribution of earlier and later sites could well be different as a consequence, though at this stage few securely dated sites are present in the region so robust conclusions cannot yet be made.

Vegetation across the region today is largely River Red Gum (*Eucalyptus camaldulensis*) and Black Box (*Eucalyptus largiflorens*) woodland and forest, which are generally restricted to corridors along rivers and creeks having been cleared for agriculture in other areas. Native plant species have been displaced by agricultural crops and introduced weeds across most of the region. Martin and Pardoe describe the likely vegetation landscape that existed prior to European contact as consisting of 'fringing woodlands along the rivers and creeks and around swamps and lakes; Callitris woodlands and mixed shrublands on some large palaeochannel features; and the characteristic wide-open plains covered with chenopods or Boree and Whitetop grass' (Pardoe and Martin 2011: 20).

Prior to the large-scale irrigation present in the landscape today, the grazing of sheep and cattle also altered the vegetation of the region, destroying many plant communities. Reed beds in swamps, lakes, and along floodplains adjacent to watercourses were substantially reduced or eradicated by grazing animals. Prior to European settlement, the vegetation landscape of the region is likely to have been more diverse than it is now, consisting of a patchy mosaic of grassland, chenopod scrubland, and woodland (Pardoe and Martin 2011: 20). As a consequence, the diversity of plant and animal resources available to Aboriginal people would have been far greater prior to European settlement than the current environment possesses.

B.1.3 Historical land use

The riverine plains in and around the project have predominantly been used to graze sheep and cattle, which has occurred in the region for approximately the last 150 years. The flat landscape and access to rivers and creeks makes the area highly suited to irrigation farming, with large-scale irrigation increasing markedly in the 1980s and 1990s (Pardoe and Martin 2011). Irrigation farming generally involves substantial earthworks to level fields and construct hydrological features such as canals and embankments. This method of farming consequently disturbs the archaeological record, substantially altering or destroying archaeological sites.

B.2 Aboriginal heritage and archaeological material

Few large-scale systematic studies of Aboriginal archaeological sites have been carried out in the riverine plains of the Murrumbidgee and its tributaries, in contrast with better-studied neighbouring areas such as the lower Murray and the Willandra Lakes. Our understanding of the archaeological sites in the region comes mostly from small-area studies including commercial archaeological assessments and surveys commissioned by Local Aboriginal Land Councils (e.g. Martin 1996). These studies provide detailed information on specific areas within the region, which can be extrapolated to make predictive statements about the archaeological resource of the region and the project area.

From work carried out along the Murrumbidgee and Murray Rivers and their tributaries (e.g. Biosis 2015; Murray Local Land Services 2013; Pardoe and Martin 2011), it is known that a number of different archaeological site types are frequently present in the region. These include:

Fish traps and weirs. Stone weirs, walls, and other features for trapping or attracting fish were constructed by Aboriginal people in the beds of rivers and creeks. Many fish traps were built across the mouths of swamps and reed beds, to hold fish and water within these areas after seasonal floodwaters receded (Pardoe and Martin

2011: 29) These features can survive in the present landscape, though many were destroyed as rivers were cleared for the purposes of irrigation or to make rivers more navigable.

Culturally modified trees. These include scarred trees and carved trees. Scarred trees can possess scars of varying size: the largest scars were probably the result of harvesting bark for canoes. Smaller scars are probably the result of harvesting bark for shields, coolamons (dishes), or pieces for house construction. The smallest scars are the remnants of holes cut to extract honey, possums or other tree-dwelling animals. Small scars could also have been cut to provide toe-holds for climbing the tree, or as marks cut on the tree for symbolic or communication functions. For example, scars could function to mark specific locations in the landscape (Pardoe and Martin 2011: 31). European surveyors also cut marks into trees, though these are usually recognisable for containing chiselled letters or numbers identifying the survey mark, and are often triangular in shape.

Hearths. Hearths are a frequent site type recorded in the region. These structures are constructed to retain the heat of fires, usually for cooking plant and animal foods. In the region, the material used in their construction is usually clay or clay-rich sediments, though hearths made from stone could potentially be found in areas where stone is common and easily procured. Some hearths are discovered in a fairly intact state, while others occur as clusters of baked clay fragments. It is important to note that natural fires can also create areas of baked clay, for example where trees and their root systems have been burnt out during bushfires, which can be mis-identified as remnants of Aboriginal hearths.

Stone artefact scatters. Stone artefacts are one of the most frequently identified Aboriginal objects in the riverine plains region, and scatters of stone artefacts are one of the most frequently recorded site types. Artefacts found in the region include flaked artefacts (flakes, cores, retouched flakes and a variety of implements including backed artefacts). Ground artefacts, including ground-edge axes, grinding dishes, and topstones, have also been found – though in lower frequencies than flaked artefacts, probably due to the longer use-life of ground artefacts. A variety of materials have been used by Aboriginal people in the region to produce stone artefacts, including sandstone, quartzite, and silcrete for grindstones and hammerstones, and chert, quartz, and silcrete for flaked artefacts.

Middens, which consist of cohesive mounds or diffuse scatters of shellfish and animal bones, have been frequently recorded in the region, along the edges of rivers and their associated lakes and flood channels. These sites are prone to destruction during floods, and consequently generally only survive on elevated banks, river terraces, or sandhills. Middens are generally dominated by shellfish remains, with the most common species being freshwater mussel and freshwater snail.

Mounds. Mounds are a common and visually obtrusive site across the riverine plain as a whole. Mounds were used as habitation sites and areas to cook food and process plant materials. Mounds have also been recorded as places for burying the dead. It is likely that mounds were ‘grown’ wholly or fully through their use by Aboriginal people. Progressive and repeated occupation of mounds would result in the deposition of artefacts and midden material, and the construction of cooking ovens would also lead to mound growth (Pardoe and Martin 2011: 32).

Burials. Burials have been found in a number of different landforms in the riverine plain, including around lakes and on high ground near rivers. Along the Lachlan and Murrumbidgee Rivers, in contrast to other rivers such as the Murray and the Darling, burials have been found located on plains away from high ground and away from rivers and lakes (Pardoe and Martin 2011: 39). Burials were generally marked with a raised earth mound or ridge visible on the ground surface, though in the present landscape these raised features can be worn away through erosion and difficult or impossible to distinguish. Areas of soft sandy ground appear to have been preferred locations for burials due to the ease of digging in these locations.

B.3 Aboriginal Heritage Information Management System (AHIMS) search results

A series of searches of AHIMS database was carried out by Dr Oliver Macgregor (Senior Archaeologist, 3Rivers) on October 1, 2021.

It should be noted that the AHIMS database does not represent an exhaustive list of all Aboriginal objects in NSW. Rather, Aboriginal objects are recorded on AHIMS once they have been identified, usually as a result of an assessment process that is part of some form of development. A lack of recorded Aboriginal objects within a particular area does not necessarily mean that Aboriginal objects will not be present, just that they have not been previously identified and recorded.

A series of contiguous rectangular search areas were employed, to encompass all of the project area and a buffer zone of the surrounding landscape. Each search area was assigned a name for reference. The coordinates of the search areas' boundaries are provided in Table 4.

Table 4: AHIMS search area boundaries

Search area name	Eastings		Northings	
Yanco Moulamein 1	207000	255000	6110000	6135000
Yanco Moulamein 2	207000	255000	6085000	6110000
Yanco Wanganella 1	255000	305000	6104000	6129000
Yanco Wanganella 2	255000	305000	6096000	6104000
Yanco Wanganella 3	255000	305000	6090000	6096000
Yanco Wanganella 4	255000	305000	6085000	6090000
Yanco Wanganella 5	255000	305000	6079000	6085000
Yanco Conargo 1	305000	355000	6094000	6119000
Yanco Conargo 2	305000	355000	6069000	6094000
Yanco Jerilderie 1	355000	405000	6099000	6129000
Yanco Jerilderie 2	355000	405000	6069000	6099000
Yanco Morundah 1	405000	455000	6169000	6174000
Yanco Morundah 2	405000	455000	6154000	6169000
Yanco Morundah 3	405000	455000	6129000	6154000
Yanco Morundah 4	405000	455000	6109000	6129000
Yanco Morundah 5	405000	455000	6079000	6109000

It is important to note that the combined AHIMS search area encompasses an area much larger than the project area.

The combined search area's western edge is around 22km west of Moulamein. Its eastern edge is around 3km west of Narrandera. Its northern edge is on the southern outskirts of Leeton, and its southern edge is around 17km south of Jerilderie.

The search area contains 994 previously recorded Aboriginal sites, all of which are open sites (Appendix A). The site types recorded include artefact scatters, middens, burials, earth mounds, culturally modified trees, stone quarries, and potential archaeological deposits, as well as sites of intangible cultural heritage such as ceremony or dreaming sites.

B.4 Archaeological predictive model

The following predictive model is used to identify areas of archaeological sensitivity. The model is based on a 'land system' or 'archaeological landscape' model of site location. This type of model predicts site location based on known patterns of site distribution in similar landscapes, and across landform types.

The predictive model is based on:

- The interpretation of the distribution of known sites close to the project area
- A review of previous impacts to the project area and the potential effects of these impacts on the archaeological record.

The following specific predictive points are noted for the landscape the project area sits within:

- Elevated landforms near watercourses, or other water features such as lakes and swamps, have high archaeological potential
- Landforms adjacent to permanent water features have a higher archaeological potential than those adjacent to ephemeral watercourses, though noting that the permanence of water features in the current landscape might not reflect their permanence prior to European settlement
- Landforms with thick soil profiles in soft alluvial or aeolian sands or sand-rich sediments will have high archaeological potential
- Areas of remnant vegetation close to waterways are likely to contain culturally modified trees if the trees are of sufficient age
- Areas of potential archaeological deposit (PAD) are likely to be present close to water, in locally elevated areas with surface soils or sediments
- The most common archaeological site types are likely to be modified trees, stone artefacts (isolated or in clusters), middens, and hearths (as evidenced by distinct structured clusters of baked clay heat retainers)
- Stone artefacts, middens and hearths can be present on the ground surface or buried in subsurface soils and sediments.

A number of post-depositional processes can result in disturbance or destruction of archaeological sites. Identifying areas of high disturbance is an important factor in the predictive model. Disturbance can alter the patterns of site location expected from the points above. The following general predictive points relate to the effects of site disturbance:

- Landforms which have been subject to frequent high-energy flooding events will have reduced archaeological potential. High energy flooding is likely to be restricted to river, creek, or flood-runner channels, with floodwaters outside these channels typically being slow-moving
- European land-use practices can have a range of impacts to sites. Areas that have been excavated, inundated, or buried under fill or stockpiled materials will have low archaeological potential.

Many post-depositional processes result in the movement of Aboriginal objects away from their original location and context, without resulting in damage or destruction to the objects themselves. Some post-depositional processes will result in the destruction of some, but not all, artefacts within a site. Only severe processes will destroy or remove all Aboriginal objects from a landform. Factoring post-depositional disturbance into the assessment of a landform's archaeological potential should consequently take a precautionary approach. A landform should be assumed to retain archaeological potential unless there is compelling evidence for severe disturbance that can confidently inferred to have removed all sites from the landform.

B.4.1 Constraints to the archaeological predictive model

The review of the project's regional archaeological context is based on previously recorded sites in the AHIMS database. At the time of writing, the understanding of the region's cultural heritage context does not include input from Aboriginal stakeholders. Information received from RAPs will be used to refine the predictive model, and will be incorporated in future versions of the predictive model.

The predictive model considers archaeological objects and sites only. No predictive statements are made relating to sites of intangible heritage value.

Dear [redacted],

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,
Oliver.

Subject: SDLAM - Yanco Survey

Hi [redacted]

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Hi Karen,

The Upper Yanco site survey will require us to jump in local DPIE vehicles, due to concerns regarding biological contamination. As in, the property owner would like to avoid us bringing problematic weeds with us when we visit site. I anticipate that we will all be driven in to site from the meeting location at Narrandera. As details become available we will inform you.

Hi Karen,

Yes of course. The meeting place for 10 May 2022, will be at the Narrandera Caltex petrol station located at: Newell Hwy, Narrandera NSW 2700. We should meet at 9 am.

Our roster is pretty full for this section of the survey so we should only be able to accommodate 1 or 2 representatives.

Subject: SDLAM - Yanco Survey Roster

Dear all,

Please find attached the current roster for the upcoming Aboriginal heritage survey for the Yanco Modernisation Project for SDLAM. This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Whether the survey starts on Monday or Wednesday, we will be meeting at 9 am at the Deniliquin Pioneer Tourist Park, located at 167 Cobb Hwy, Deniliquin NSW 2710.

In the meantime, I wish you all a very happy weekend and I look forward to meeting you all on Monday or Wednesday.

Hi Karen,

I am looking forward to meeting you and your representatives on Tuesday. The meeting spot will be at the Brew Park in Jerilderie at 9 am. From there we will travel to the Wilsons Anabranch survey area and revisit the Hartwood Weir structures as well.

Thank you for your help on this and please, if you have any questions do not hesitate to get in touch.

Kind regards,

Hi Leon,

Please accept my apologies in getting this to you so late. We are proceeding with the survey on Tuesday at Wilson's Anabranch near Jerilderie and will go visit the Hartwood Weir sites as well. The best meeting place would be the Brew Park parking area in Jerilderie at 9 am.

Please feel free to reach out if you have any questions, perhaps directly on my mobile.

Kind regards,

Subject: Yanco Modernisation Project - Aboriginal cultural heritage survey planning

Dear Yalmambirra (Wiradjuri Council of Elders),

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Subject: Fwd: RAP Inspection - Dry Lake - Monday 9 May

Dear all,

Thank you for your ongoing consultation in regard to the Aboriginal cultural heritage assessment at Yanco creek for the overall SDLAM project. On Monday we will be surveying an area of the Upper Yanco. We will meet at 9am at the Caltex at Nerranderra and proceed to site using Water Infrastructure vehicle. This is to comply with a biological restriction imposed on site. For further details please see David Clarke's email below.

If you have any questions please do not hesitate.

Kind regards,

Pauline Ramsey

Subject: [EXTERNAL] RAP Inspection - Dry Lake - Monday 9 May

Pauline,

As discussed, WINSW staff will meet with 3Rivers staff and the RAP members at the Caltex Service Station at the southern end of Narranderra at 9:00am on Monday 9 May. In order to comply with the biosecurity protocols agreed to with the landholder we will transfer everyone into WINSW vehicles that have been fully washed down prior to the inspection (This includes vehicles driven by Gubba, Emily and myself).

We will then drive to the site to meet the landholder. I am waiting for the landholder to advise if he wants us to meet him at the font gate or the site.

Regards

David Clarke

Hi [redacted]

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Subject: SDLAM - Yanco Survey

Hi Rose,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

Hi Roley,

My name is Pauline and will be taking over this project from Oliver. I am glad you can participate in the survey. Could you let me know what days you are available on the week of 2 May 2022? I am currently compiling a roster which, I hope, will be made available next week. Details regarding when and where to meet are still being discussed, but as soon as I know I will get in touch.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:

Remuneration:

The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,

Oliver.

Dr Oliver Macgregor

> Please find attached the current roster for the upcoming Aboriginal heritage survey for the Yanco Modernisation Project for SDLAM. This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Whether the survey starts on Monday or Wednesday, we will be meeting at 9 am at the Deniliquin Pioneer Tourist Park, located at 167 Cobb Hwy, Deniliquin NSW 2710.

In the meantime, I wish you all a very happy weekend and I look forward to meeting you all on Monday or Wednesday.

Dear Yalmambirra (Wiradjuri Council of Elders),

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Yamma (hello) Alexandra,

You where contacted some time ago by Matt Kendall re-Yanco Creek regarding my concerns.

You have since emailed me some time ago. You also rang and spoke to me some time ago.

Since then nothing. The silence is getting louder.

I'm not playing games with our Wiradjuri culture, I have advised you of our concerns, nothing has happened.

Yanco Creek Upgrade is just another project where Government think they can play with our country, people and culture as they will.

Times area changing.

I have cc'd our Walumarra Wiradjuri Consultancy Group into this email. They are the knowledge holders and protectors of our land and people. Also Warren and Pauline Ramsey are in this email trail as well. Nothing is hidden when I yarra (talk)

The Archaeologist companies who your department contracts to, pay huge money too, and seek advise from are not the knowledge holders or experts, re our Wiradjuri culture, customs and "lore". We are !

I will now seek to look elsewhere for help. I will ensure that this garray (land) is protected from those who are ignorant of what "Gunhi Ngurambang" (Mother Country) gives us.

She gives us Life, Stories, Bloodlines, Love, History, Strength, Connection to Country and purpose for being here.
We have cared for and continue to care for place we all now call "Gunyah" (home) for over 100,000 years +

On behalf of ngadhi mudyigaang (My Elders) I will continue to do what I can to stop the erosion of our culture.

Hi Mark

Thanks for taking the time to discuss the issue on Friday that sis outlined in your email.

The project manager for the Yanco Modernisation project is Water Infrastructure NSW- Matt has included Brad Hollis in the emails to you. Brad is the Director of Southern projects who has suggested Alexie Bull as the appropriate contact for you.

Alexie is cc'd into this email:

Alexie Bull

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Hi Alexie

The total disregard and disrepect displayed to Mark and myself was insulting and hurtful. I believe that Mark and I have be advocating improvement to the Yanco Creek system for the last 44 years and to hear our involvement was way laid on the say so of a archaeologist beggars belief. Their arrogance toward Mark and I is unacceptable and the inaction by DPE has been typical of a bureaucracy that undervalues true consultataion and collaboration.

Please ensure you get back to us in a timely fashion

Yamma (hello) Alexandra,

You where contacted some time ago by Matt Kendall re-Yanco Creek regarding my concerns.

You have since emailed me some time ago. You also rang and spoke to me some time ago.

Since then nothing. The silence is getting louder.

I'm not playing games with our Wiradjuri culture, I have advised you of our concerns, nothing has happened.

Yanco Creek Upgrade is just another project where Government think they can play with our country, people and culture as they will.

Times area changing.

I have cc'd our Walumarra Wiradjuri Consultancy Group into this email. They are the knowledge holders and protectors of our land and people. Also Warren and Pauline Ramsey are in this email trail as well. Nothing is hidden when I yarra (talk)

Subject: Yanco Modernisation Project - Aboriginal cultural heritage survey planning

Dear Bangerang Aboriginal Corporation,

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,
Oliver.

Hi David,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Hi Alexie

The total disregard and disrepect displayed to Mark and myself was insulting and hurtful. I believe that Mark and I have be advocating improvement to the Yanco Creek system for the last 44 years and to hear our involvement was way laid on the say so of a archaeologist beggars belief. Their arrogance toward Mark and I is unacceptable and the inaction by DPE has been typical of a bureaucracy that undervalues true consultataion and collaboration.

Please ensure you get back to us in a timely fashion

Yamma (hello) Alexandra,

You where contacted some time ago by Matt Kendall re-Yanco Creek regarding my concerns.

You have since emailed me some time ago. You also rang and spoke to me some time ago.

Since then nothing. The silence is getting louder.

I'm not playing games with our Wiradjuri culture, I have advised you of our concerns, nothing has happened.

Yanco Creek Upgrade is just another project where Government think they can play with our country, people and culture as they will.

Times area changing.

I have cc'd our Walumarra Wiradjuri Consultancy Group into this email. They are the knowledge holders and protectors of our land and people. Also Warren and Pauline Ramsey are in this email trail as well. Nothing is hidden when I yarra (talk)

The Archaeologist companies who your department contracts to, pay huge money too, and seek advise from are not the knowledge holders or experts, re our Wiradjuri culture, customs and "lore". We are !

I will now seek to look elsewhere for help. I will ensure that this garray (land) is protected from those who are ignorant of what "Gunhi Ngurambang" (Mother Country) gives us.

She gives us Life, Stories, Bloodlines, Love, History, Strength, Connection to Country and purpose for being here.

We have cared for and continue to care for place we all now call "Gunyah" (home) for over 100,000 years +

On behalf of ngadhi mudyigaang (My Elders) I will continue to do what I can to stop the erosion of our culture.

Subject: RE: Mark Saddler

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.

Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???

We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.

In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just “Tick A Box” events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a “Desk Top Study” and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Yamma Matt,

I got a phone call just now from Warren your Aboriginal Officer with regards to my email I sent to you.

I have no issues with him.

However I do with you and DPIE.

As you will not response to my respectful emails I now insist that “Walumarra Wiradjuri Consultancy Group” have urgent meetings with yourself and your Director who is responsible for what you do.

Can you please send me the email address of the Director of your department so I can liaise directly with them ?

I have also CC’d in my Directors of Walumarra and Dr Joe McGirr who is our local member and a very marang mudyi (good friend) of Wiradjuri Mayiny (people)

I await your timely email.

Hi Pauline

I find your email very distressing and completely obtuse. [redacted] has been consulting with NSW Water and other bodies concerned with the Yanco Creek upgrade and upkeep for over 20 years if not more and then to be discarded from protecting and speaking on behalf of the system at the last moment has left us speechless and disheartened.
[redacted] had a number of Wiradjuri people who grew up living, laughing, fishing and protecting the biodiversity of this unique and incredible creek system that connected the Yindi Mulwala(Murray River), Kolety/Golety (Edward River) and the Murrumbidya (Murrumbidgee River)
people,ready to participate in this ACH survey. At the last moment I had to tell these people they would not be able to speak on behalf of country and to cancel any other plans they had.

Again I cannot stress how disappointing this has all been and to realise again that archaeological firms decide who has the right to speak on behalf of country without any regards to our previous advocacy. [redacted] has alway had the opinion that we cannot build a big enough boat to send all the first boat people back overseas and that life must go on so we negotiate what best for our environment and our people given the restraints we have in today's society.

[redacted] believes in Yindyamarra. It is a pity that Environmental Solutions Australia and New Zealand and DPIE has not displayed the same.

Regards

Subject: SDLAM - Yanco Survey Roster

Dear all,

Please find attached the current roster for the upcoming Aboriginal heritage survey for the Yanco Modernisation Project for SDLAM. This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Whether the survey starts on Monday or Wednesday, we will be meeting at 9 am at the Deniliquin Pioneer Tourist Park, located at 167 Cobb Hwy, Deniliquin NSW 2710.

In the meantime, I wish you all a very happy weekend and I look forward to meeting you all on Monday or Wednesday.

Subject: SDLAM - Yanco Survey

Hi Kevin,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Subject: RE: Mark Saddler

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area.
Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

On 12 Apr 2022, at 4:00 pm, Macgregor, Oliver <Oliver.Macgregor@jacobs.com> wrote:

Dear Mark (Bundyi Aboriginal Cultural Knowledge),

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,
Oliver.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Yamma Matt,

I got a phone call just now from Warren your Aboriginal Officer with regards to my email I sent to you.

I have no issues with him.

However I do with you and DPIE.

As you will not response to my respectful emails I now insist that "Walumarra Wiradjuri Consultancy Group" have urgent meetings with yourself and your Director who is responsible for what you do.

Can you please send me the email address of the Director of your department so I can liaise directly with them ?

I have also CC'd in my Directors of Walumarra and Dr Joe McGirr who is our local member and a very marang mudyi (good friend) of Wiradjuri Mayiny (people)

I await your timely email.

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Importance: High

Hi Warren,

Thanks for your email and I appreciate your input and advice on the current ACHA survey process.

Re the reference to a meeting in Narranderra below, this was a meeting between WINSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included Mark, [redacted] as well as local Wiradjuri Elder Michael Lyons and the Leeton and Narranderra LALCs. At this meeting the project was explained along with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys.

I'm comfortable with the recommendation that you have put forward, I received a further email from Mark Saddler last night and I am happy to respond summarising a possible way forward and outlining that you/and or John Woods will confirm the detail.

Any issues please let me know.

Subject: RE: Urgent Meeting with DPIE Upper Management

Hi, Matt, David and Pauline,
@Alexandra Bull and @John Woods – copied in as this has a CSE risk as Mark was threatening to go to the Minister, which is his right. We have followed legislation and policy and I'm comfortable with our actions

I spoke to Mark Saddler this afternoon regarding the email he sent to Matt Kendall (below), in reply to the email he received from Jacobs (below).
I am calling him back after speaking to Gubba to explain why the decision was made to only use local RAPs in field surveys. I'm happy to invite him and Mark Ingram to any survey work next week at Dry Lake and/or Jerilderie, as the predicted wet weather didn't eventuate.

I discussed the issue with Gubba tonight, Two RAPs from Narrandera (Michael Lyons and Rory Williams) did not want Mark Saddler involved in surveys on their country. Mark was described as not coming from their country.
This is a complex debate, under legislation you don't have to be from that country, you only have to have an interest in the project area and have cultural knowledge to be a Registered Aboriginal Party and consulted by the proponent (WINSW).
This is different again to being employed to undertake site surveys.

Below in RED is my comments and recommendation on Marks email

Recommnendation:

- Based on the advice / request from 2 Narrandera Elders I would not involve Mark Saddler or [redacted] in this survey ion Monday 9/05/2022 at Narrandera
- WINSW could involve them on Tuesday 10/05/2022, at Jerilderie with Cummeragunja Local Aboriginal Land Council. This will be an operational decision by the Project team and not First Nations Engagemnent Team. It would resolve Mark Saddlers current issue. Im unsure what impact it will have on our relationshipo with Traditional Owners, Elders and LALC in the project area

If this has confuesd you please give me a call. The Legislation is quite clear, its how we and Aboriginal people using our cultural knowledge , cultural proticols and respect interprete it

Subject: [EXTERNAL] Urgent Meeting with DPIE Upper Management

Yamma Matt,

Both myself and [redacted] re bitterly disappointed and have been totally disrespected by "Jacobs" and "DPIE" This is Marks opinion. I don't see how the email disrespected him in any way
This is in regards to the management and care of the Yanco Creek Upgrade. However DPIE also have done and continue to disrespect our land and waters as well.
You were all very happy to invite us to Narrandera to give you feedback (at our expense and time) to assist you all in your endeavours to achieve a good outcome for our traditional land and waters.

I believe neither Mark nor [redacted] attended SAG meetings in Morundah.

The Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines for Part 6 National Parks and Wildlife Act 1974 Part guides consultation with Aboriginal communities and Registered Aboriginal parties when undertaking an Aboriginal Cultural Heritage Assessment. Th proponent (WINSW) and our agent (Jacobs) are required to consult with Aboriginal people about the Aboriginal cultural heritage values (cultural significance) of Aboriginal objects and/or places within the proposed project area.

Community consultation must be an open and honest two-way communication process between the proponent and **Aboriginal people who have cultural heritage knowledge relevant to a proposed project area**. They do not have to be Traditional Owners or Elders from that section of Country. The Guideline and legislation states 'Aboriginal people who may have an interest in the proposed project area and who hold knowledge relevant to determining the cultural significance' Mark Saddler satisfies this requirement

However the company, "Jacobs" that you have contracted to do the work has taken it on themselves to not allow the Traditional Carers, Knowledge Holders and RAPs of the area to attend the crucial work that is being undertaken.
Both myself and [redacted] received a late email, from Pauline Ramsey on Friday 29th April 2-33 pm, to advise us that we would not be needed or wanted to do the work we were engaged to do the following Monday and on.

It was late notice due to forecast wet weather and operational constraints. The decision was made to prioritise the involvement of local groups for this survey.

Firstly I will state that it is not the choice of Archaeologist to decide who will work on our country.
It is the decision of the proponent who will be called to undertake site surveys as a contractual agreement. Site surveys are not consultation under section 3.3 of the Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines. The proponent can decide who attends field surveys based on Elder's opinion or request, operational and weather circumstances or capacity to accommodate maximum numbers of RAPs on site ay one time. Many ACHA surveys have a roster system for RAP participation.

Secondly it is not the choice of the Archaeologist to decide our work and travel rates.
It is a contractual agreement between the Proponent and the RAP, the proponent offers a fair and equitable pay rate that is consistent with Government policy other Department projects. If the RAP declines that pay scale that is their choice. We offered and they declined. Private corporations often pay RAPs well in excess of our daily pay rates

Section 3.4 Consultation should not be confused with employment of the guidelines, states; The consultation process involves getting the views of, and information from, Aboriginal people and reporting on these. It is not to be confused with other field assessment processes involved in preparing a proposal and an application. **Consultation does not include the employment of Aboriginal people to assist in field assessment and/or site monitoring.** Aboriginal people may provide services to proponents through a **contractual arrangement**; however, this is separate from consultation.

The proponent is not obliged to employ those Aboriginal people registered for consultation. **Consultation as per these requirements will continue irrespective of potential or actual employment opportunities for Aboriginal people**.

Thirdly it is not the Archaeologist who knows our country, custom or lores, it is in fact my people and as such any Archaeologist is only a recorder of our culture and not an expert on it as they portray.
Correct, that's why we are required to consult with Registered Aboriginal parties under **Part 6 National Parks and Wildlife Act 1974** and adhere to the **Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines**

As a RAP and a Director of Walumarra Wiradjuri Consultancy Group I insist on a meeting with yourself, Matt Kendall, your upper management and your Minister of your department to sort out what you are all doing wrong. It must stop now.
My next step, if that is not possible, is to go to the main stream media and advise them on the lack of consultation between Aboriginal, Wiradjuri people, land holders and the local communities who you affect by every action that you take and make.
You have not followed the correct "Due Diligence Processes" that you are tasked to do as a public servant. Eager to hear back from you and start a process of getting DPIE DPE OEH or whatever you call yourselves sorted out and to also have Wiradjuri Cultural Programs inserted into your work practices as you should have.

250 + years and you still do not understand or listen to our people and country, however our voices are getting louder and we will be heard.

Secondly it is not the choice of the Archaeologist to decide our work and travel rates.

Thirdly it is not the Archaeologist who knows our country, custom or lores, it is in fact my people and as such any Archaeologist is only a recorder of our culture and not an expert on it as they portray.

As a RAP and a Director of Walumarra Wiradjuri Consultancy Group I insist on a meeting with yourself, Matt Kendall, your upper management and your Minister of your department to sort out what you are all doing wrong. It must stop now.

My next step, if that is not possible, is to go to the main stream media and advise them on the lack of consultation between Aboriginal, Wiradjuri people, land holders and the local communities who you affect by every action that you take and make.

You have not followed the correct "Due Diligence Processes" that you are tasked to do as a public servant.

Eager to hear back from you and start a process of getting DPIE DPE OEH or whatever you call yourselves sorted out and to also have Wiradjuri Cultural Programs inserted into your work practices as you should have.

250 + years and you still do not understand or listen to our people and country, however our voices are getting louder and we will be heard.

This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Hi, Matt, David and Pauline,
@Alexandra Bull and @John Woods – copied in as this has a CSE risk as Mark was threatening to go to the Minister, which is his right. We have followed legislation and policy and I'm comfortable with our actions

I spoke to Mark Saddler this afternoon regarding the email he sent to Matt Kendall (below), in reply to the email he received from Jacobs (below).
I am calling him back after speaking to Gubba to explain why the decision was made to only use local RAPs in field surveys. I'm happy to invite him and Mark Ingram to any survey work next week at Dry Lake and/or Jerilderie, as the predicted wet weather didn't eventuate.

I discussed the issue with Gubba tonight, Two RAPs from Narrandera (Michael Lyons and Rory Williams) did not want Mark Saddler involved in surveys on their country. Mark was described as not coming from their country.
This is a complex debate, under legislation you don't have to be from that country, you only have to have an interest in the project area and have cultural knowledge to be a Registered Aboriginal Party and consulted by the proponent (WINSW).
This is different again to being employed to undertake site surveys.

Below in RED is my comments and recommendation on Marks email

Recommnendation:

- Based on the advice / request from 2 Narrandera Elders I would not involve Mark Saddler or [redacted] in this survey ion Monday 9/05/2022 at Narrandera
- WINSW could involve them on Tuesday 10/05/2022, at Jerilderie with Cummeragunja Local Aboriginal Land Council. This will be an operational decision by the Project team and not First Nations Engagemnent Team. It would resolve Mark Saddlers current issue. Im unsure what impact it will have on our relationshipo with Traditional Owners, Elders and LALC in the project area

If this has confuesd you please give me a call. The Legislation is quite clear, its how we and Aboriginal people using our cultural knowledge , cultural proticols and respect interprete it

Subject: [EXTERNAL] Urgent Meeting with DPIE Upper Management

Yamma Matt,

Both myself and [redacted] are bitterly disappointed and have been totally disrespected by "Jacobs" and "DPIE" This is Marks opinion. I don't see how the email disrespected him in any way
This is in regards to the management and care of the Yanco Creek Upgrade. However DPIE also have done and continue to disrespect our land and waters as well.
You were all very happy to invite us to Narrandera to give you feedback (at our expense and time) to assist you all in your endeavours to achieve a good outcome for our traditional land and waters.

I believe neither Mark nor [redacted] attended SAG meetings in Morundah.

The Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines for Part 6 National Parks and Wildlife Act 1974 Part guides consultation with Aboriginal communities and Registered Aboriginal parties when undertaking an Aboriginal Cultural Heritage Assessment. Th proponent (WINSW) and our agent (Jacobs) are required to consult with Aboriginal people about the Aboriginal cultural heritage values (cultural significance) of Aboriginal objects and/or places within the proposed project area.

Community consultation must be an open and honest two-way communication process between the proponent and **Aboriginal people who have cultural heritage knowledge relevant to a proposed project area**. They do not have to be Traditional Owners or Elders from that section of Country. The Guideline and legislation states 'Aboriginal people who may have an interest in the proposed project area and who hold knowledge relevant to determining the cultural significance' Mark Saddler satisfies this requirement

However the company, "Jacobs" that you have contracted to do the work has taken it on themselves to not allow the Traditional Carers, Knowledge Holders and RAPs of the area to attend the crucial work that is being undertaken.
Both myself and [redacted] received a late email, from Pauline Ramsey on Friday 29th April 2-33 pm, to advise us that we would not be needed or wanted to do the work we were engaged to do the following Monday and on.

It was late notice due to forecast wet weather and operational constraints. The decision was made to prioritise the involvement of local groups for this survey.

Firstly I will state that it is not the choice of Archaeologist to decide who will work on our country.
It is the decision of the proponent who will be called to undertake site surveys as a contractual agreement. Site surveys are not consultation under section 3.3 of the Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines. The proponent can decide who attends field surveys based on Elder's opinion or request, operational and weather circumstances or capacity to accommodate maximum numbers of RAPs on site ay one time. Many ACHA surveys have a roster system for RAP participation.

Secondly it is not the choice of the Archaeologist to decide our work and travel rates.
It is a contractual agreement between the Proponent and the RAP, the proponent offers a fair and equitable pay rate that is consistent with Government policy other Department projects. If the RAP declines that pay scale that is their choice. We offered and they declined. Private corporations often pay RAPs well in excess of our daily pay rates

Section 3.4 Consultation should not be confused with employment of the guidelines, states; The consultation process involves getting the views of, and information from, Aboriginal people and reporting on these. It is not to be confused with other field assessment processes involved in preparing a proposal and an application. **Consultation does not include the employment of Aboriginal people to assist in field assessment and/or site monitoring.** Aboriginal people may provide services to proponents through a **contractual arrangement**; however, this is separate from consultation.

The proponent is not obliged to employ those Aboriginal people registered for consultation. **Consultation as per these requirements will continue irrespective of potential or actual employment opportunities for Aboriginal people**.

Thirdly it is not the Archaeologist who knows our country, custom or lores, it is in fact my people and as such any Archaeologist is only a recorder of our culture and not an expert on it as they portray.
Correct, that's why we are required to consult with Registered Aboriginal parties under **Part 6 National Parks and Wildlife Act 1974** and adhere to the **Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines**

As a RAP and a Director of Walumarra Wiradjuri Consultancy Group I insist on a meeting with yourself, Matt Kendall, your upper management and your Minister of your department to sort out what you are all doing wrong. It must stop now.

Hi Yalmambirra,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Subject: SDLAM - Yanco Survey 2

Hi Leon,

I hope this email finds you well and that you are having a pleasant week so far. I am just reaching out in regards to the upcoming survey for the Yanco project as part of the larger SDLAM effort. Your input on our last survey was invaluable and we would like to invite you to participate once again, should you be available. We will be surveying the following areas on these days:

Day	Area
Wednesday 10 August	In consultation with RAPs decide which tracks to target to get sample of future works needed – most likely around Hartwood Weir, Wilson's Anabranch or Forest Creek
Thursday 11 August	In consultation with RAPs decide which tracks to target to get sample of future works needed – most likely around Hartwood Weir, Wilson's Anabranch or Forest Creek

The reason behind the vagueness of these areas is that this survey will serve as a preliminary work to help the design team finalise their plans for the access tracks. With your help, we would like to gauge where the significant areas around these weirs are in association with the tracks. We will mostly be driving and a discussion at the start of the day will be had with all registered Aboriginal parties on which area we will survey.

We will be meeting at 9 am the Local Conargo Display and Public Bathroom (across the street from the pub).

If you have any questions please feel free to get in touch. I look forward to working with you once more on this!

Wednesday 10 August	In consultation with RAPs decide which tracks to target to get a sample of future works needed - this will target tracks in areas near Wanganella Swamp or Piccaninny Weir

We will be meeting at the Deniliquin Pioneer Hotel at 9 am.

If you have any questions please feel free to get in touch. I look forward to working with you once more on this!

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand
P:+614.9047.5898 | Pauline.ramsey@jacobs.com
Level 7/177 Pacific Hwy | North Sydney NSW 2060 | Australia

I acknowledge the Traditional Owners of Country upon which I work, and pay my respects to them, their culture and their Elders past, present and future.

Ramsey, Pauline

Subject: SDLAM - Yanco Survey

Hi Roley,

I hope this email finds you well and that you are having a pleasant week so far. I am just reaching out in regards to the upcoming survey for the Yanco project as part of the larger SDLAM effort. Your input on our last survey was invaluable and we would like to invite you to participate once again, should you be available. We will be surveying the following areas on these days:

Day	Area
Monday 1 August	Cheverells Creek regulator
Thursday 11 August	Wilson's Anabranch Access Tracks
Friday 12 August	Dry Lake Access Tracks

We will be meeting on Monday morning at 9 am at the Ampol petrol station just on the Sturt Highway.

If you have any questions please feel free to get in touch. I look forward to working with you once more on this!

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand
P:+614.9047.5898 | Pauline.ramsey@jacobs.com
Level 7/177 Pacific Hwy | North Sydney NSW 2060 | Australia

I acknowledge the Traditional Owners of Country upon which I work, and pay my respects to them, their culture and their Elders past, present and future.

Hi all,

You are receiving this email as a registered Aboriginal stakeholder for the Yanco Creek Modernisation Project.

Please find below link to the final Aboriginal Cultural Heritage Assessment (ACHA) for the proposed developments at the Hartwood and Wanganella Regulators, which encompass Part 2 of the overall Yanco Creek Modernisation Project.

23039 Yanco SDLAM - Hartwood ACHA Final v2 BS 20240603.pdf

Please provide any further cultural knowledge, comments and/or review of the recommendations by **close of business 28 June 2024.**

If you have any questions or issues accessing the reports or with the project, please don't hesitate to contact me on the below details.

Kind regards,

Brody Saccoccia
Archaeologist

YANCO CREEK MODERNISATION PROJECT: PART 2 – BILLABONG CREEK REGULATORS NEW SOUTH WALES

ABORIGINAL CULTURAL HERITAGE ASSESSMENT: VOLUME 2

FINAL REPORT

DCCEEW NSW

18 July 2024

NSW GOVERNMENT

Acknowledgement of Country

We respect and acknowledge the First Nations Peoples of the lands and waterways on which we live and work, their rich cultural heritage, and their deep connection to Country, and we acknowledge their Elders past and present.

Cultural warning

Aboriginal and Torres Strait Islander readers are advised that this report may contain images or names of First Nations people who have passed away.

APPENDIX A2 – STAGE 1.1 LETTER TO AGENCIES

APPENDIX A2 – OUTGOING

Ramsey, Pauline

From: Ramsey, Pauline
Sent: Friday, 22 April 2022 10:00 AM
To: admin.murray@lls.nsw.gov.au
Subject: SDLAM - Yanco Creek - Notice to Agencies (apologies)
Attachments: 3RP-YAN-AP-CH-CO-0002-0.2 RAPs Registration_letter to agencies_Murray LLS.pdf

To whom it may concern,

Please find attached a request for more information directed to agencies with possible information regarding local Aboriginal groups, for the ongoing consultation for the Water Infrastructure development along Yanco Creek. Our records indicate that this letter might not have found you at the appropriate time. Please accept our apologies for this oversight.

If you have any questions please do not hesitate to get in touch.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand
P:+614.9047.5898 | Pauline.ramsey@jacobs.com
Level 7/177 Pacific Hwy | North Sydney NSW 2060 | Australia

I acknowledge the Traditional Owners of Country upon which I work, and pay my respects to them, their culture and their Elders past, present and future.

Cummeragunja Local Aboriginal Land Council

Our ref: 3RP-YCMP-RAP

ceo@cummeralalc.com.au

25th August, 2021

Dear Cummeragunja Local Aboriginal Land Council,

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo, and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council. The project area is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. The YCMP's ground-disturbing works will impact previously undisturbed land and are likely to intersect Aboriginal sites.

Following the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010), we are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Community consultation with Aboriginal people will assist Water Infrastructure NSW in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

In accordance with section 4.1.2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents*, it would be appreciated if your organisation could provide a list of the names of, and/or pass this request along to, Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the project area.

Thank you for your assistance and advice in this matter. If you wish to respond to this letter, we would appreciate if you could respond before 17 September 2021. Please send your response, or any questions if you would like to discuss this further, to me at the following:

Murray Local Land Services

admin.murray@lls.nsw.gov.au

Our ref: 3RP-YCMP-RAP

22nd April 2022

To whom it may concern,

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo, and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council. The project area is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. The YCMP's ground-disturbing works will impact previously undisturbed land and are likely to intersect Aboriginal sites.

Following the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010), we are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Community consultation with Aboriginal people will assist Water Infrastructure NSW in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

In accordance with section 4.1.2 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents*, it would be appreciated if your organisation could provide a list of the names of, and/or pass this request along to, Aboriginal people who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the project area.

Thank you for your assistance and advice in this matter. If you wish to respond to this letter, we would appreciate if you could respond before 17 September 2021. Please send your response, or any questions if you would like to discuss this further, to me at the following:

Hi Oliver

Council very much sees its alignment to Bpangarang Country and there areas of Federation within your project area (Morundah) is part of their country geographically.

Council's elder contacts for the Bpangarang people are

Uncle Darren (Dozer) Atkinson Darrena@aal.org.au
Uncle Kevin Atkinson Kevina@ ahvic.org.au

Yours sincerely,

Gerard Van Emmerik

Hi Gerard

CC: Leigh Ashford & Ben Falconer

Please see below correspondence from Jacobs requesting information for a Aboriginal Cultural Heritage Assessment Report in regards to their Yanco Creek Water Infrastructure project. I have been advised that you are likely to be able to help them with the information that they are asking for and have assigned you a 'correspondence' action accordingly. Please advise asap if you are unable to assist.

21/39902 Request for Information - Department Planning Industry & Environment - DPIE - Aboriginal Knowledge Holders - Aboriginal Heritage Assessment Report - Yanco Creek Water Infrastructure Project - 20210826

Yours sincerely,

Federation Council

Subject: Yanco Creek Modernisation Project - Aboriginal consultation - Letter to agencies
To: council@federationcouncil.nsw.gov.au <council@federationcouncil.nsw.gov.au>

Dear Federation Council,

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP).

Following the consultation guidelines, the 3Rivers partnership (a joint venture of Jacobs and GHD, acting on behalf of Water Infrastructure NSW) is seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

Please see the attached letter for information about the proposed project, and the proposed project location.

Community consultation with Aboriginal people will assist in the preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in his/her consideration and determination of any subsequent permit applications (if required).

As stated in the attached letter, it would be appreciated if your organisation could provide a list of the names of Aboriginal people you know of who may hold cultural knowledge relevant to determining the significance of Aboriginal objects or Aboriginal places within the proposed project area.

Thank you for your assistance and advice in this matter.

Regards,

Dr Oliver Macgregor

Dear Oliver

WRITTEN NOTIFICATION OF PROPOSAL AS REQUIRED UNDER DECCW ABORIGINAL CULTURAL HERITAGE CONSULTATION REQUIREMENTS FOR PROPONENTS 2010

Subject: Registration of Aboriginal Interests – Water Infrastructure NSW Yanco Creek Modernisation Project, Irrigation Way – Narrandera/Federation/Murrumbidgee and Edward River LGA's

Thank you for your correspondence dated 25 August 2021 received by Heritage NSW (Department of Premier and Cabinet) regarding the above project.

Attached is a list of known Aboriginal parties for the Narrandera, Federation, Murrumbidgee and Edward River local government areas that Heritage NSW considers likely to have an interest in the activity. Please note this list is not necessarily an exhaustive list of all interested Aboriginal parties. Receipt of this list does not remove the requirement of a proponent/consultant to advertise in local print media and contact other bodies seeking interested Aboriginal parties, in accordance with the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (April 2010).

Under Section 4.1.6. of the Consultation Requirements, you must also provide a copy of the names of each Aboriginal person who registered an interest to the relevant **Heritage NSW** office and Local Aboriginal Land Council (LALC) within 28 days from the closing date for registering an interest.

Please note that the contact details in the list provided by Heritage NSW may be out of date as it relies on Aboriginal parties advising Heritage NSW when their details need changing. If individuals/companies undertaking consultation are aware that any groups contact details are out of date, or letters are returned unopened, please contact either the relevant stakeholder group (if you know their more current details) and/or Heritage NSW. AHIP applicants should make a note of any group they are unable to contact as part of their consultation record.

If you have any questions about this advice, please email: heritagemailbox@environment.nsw.gov.au or contact (02) 9873 8500.

Yours sincerely

APPENDIX A3 – STAGE 1.2: REGISTRATION OF INTEREST

APPENDIX A3 – OUTGOING

Dear Clem Christian,

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Please send your completed form, or any questions if you would like to discuss this further, to me at the following:

Dear Michael Lyons (Sandhills Artefacts),

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Please send your completed form, or any questions if you would like to discuss this further, to me at the following:

10/12/2021

Dear [redacted]

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have

registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Dear Will Carter,

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Please indicate on the Notice of Registration form if you are happy for your name forwarded to Heritage NSW and the LALCs.

We hope you or your organisation choose to participate in this project and enclose for your completion a **Notice of Registration**. We would appreciate if the completed Notice of Registration form could be returned via email or post within 14 days from when you receive this letter. Please send your completed form, or any questions if you would like to discuss this further, to me at the following:

Dear William Ingram

Project Name: Yanco Creek Modernisation Project

Subject: Seeking Aboriginal knowledge holders to assist preparation of an Aboriginal Cultural Heritage Assessment Report (ACHAR) for Water Infrastructure NSW's Yanco Creek Modernisation Project

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek System.

Further information about the YCMP is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The YCMP would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The project area of the YCMP is shown in Figure 1.

Water Infrastructure NSW is investigating two projects within the Yanco Creek system, the YCMP and the Yanco Creek Offtake Project. The Yanco Creek Offtake Project is currently being re-scoped and will then be the subject of a future program of consultation.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the YCMP. We are seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to the project area.

The purpose of consultation with the Aboriginal community is to determine the cultural heritage significance of Aboriginal objects and Aboriginal places within and around the project area and to assist in the preparation of an Aboriginal cultural heritage assessment report (ACHAR). Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any Aboriginal Heritage Impact Permit (AHIP) applications required.

Please note that Section 4.1.6 of the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010) requires the proponent to provide Heritage NSW and the relevant Local Aboriginal Land Councils (LALCs) with a list of the Aboriginal people and groups who have registered an interest in the project. Happy 2023
Just a reminder that I have registered as a RAP on the following projects

Yanga national park supply project
Millewa Forest supply project
Yanco Creek Modernisation Project
Mid-Murray Anabranches Project

I was told that there was a RAP meeting on the DEC 21st in Deniliquin that was after my registration was submitted and sent.

I have also been made aware by other RAP's that there is a meeting in deniliquin tomorrow, I am available to attend and can I be sent the meeting information.

Kind regards,
Maydina Penrith

Can I confirm you wish to register for the following SDLAM Acceleration Projects:

- Yanga national park supply project
- Millewa Forest supply project
- Yanco Creek Modernisation Project
- Mid-Murray Anabranches Project

If so, **can you please just fill out the attached form for Yanga and return to me?**

We can just replicate your registration across each project as required to avoid you having to fill out 4 identical forms. Please note, 3Rivers are unable to register you for the Koondrook-Perricoota Forest Project as Austral Archaeology are managing this Project.

Cheers,
Tom

Good Morning Pauline and Shaun,

This email is following up a voice message I left Shaun last week.

Shaun as the Acting Manager for the First Nations Team in WINSW and Pauline as the archaeologist on a few; I am writing to register myself as a First Nations RAP.

I would like to ensure that I am registered across Water Infrastructure NSW Murray and Murrumbidgee River projects.

I would like to request my email be registered and recorded appropriately in Borealis and Jacobs' register.

Can my registration also be passed on to any other archaeologist that Jacob's does not cover in this area.

Regards,

Maydina Penrith

Re: SDLAM RAP Maydina Penrith (maypenrith@gmail.com / 0421 509 626)

Hi Tom,

Maydina called today to check if her late RAP registration has been accepted by the client. She mentioned that Jacobs had accepted her late registration across our SDLAM projects however she is experiencing inconsistencies with the client (not included in all RAP meeting invites etc).

- **Tom** – can you confirm with WINSW that Maydina has been accepted as a SDLAM RAP and is being invited to meetings etc. Can WINSW provide direct confirmation of this back to Maydina and cc relevant staff. They may also wish to circulate minutes of any missed meeting since her registration.
- **Pauline** – can you include a note in the consultation log that Maydina Penrith called and the nature of her call.

Thanks all

APPENDIX A4 – STAGE 1.3: NEWSPAPER ADVERTISEMNT

APPENDIX A4 – OUTGOING

NSW GOVERNMENT

Yanco Creek Modernisation Project

Invitation for registration of Aboriginal Cultural Knowledge Holders

Water Infrastructure NSW (WINSW) is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (YCMP). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental and cultural outcomes for communities along the Yanco Creek system.

The project would involve a range of construction works at a number of locations on Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

In accordance with the *Aboriginal cultural heritage consultation requirements for proponents* (Department of Environment, Climate Change and Water 2010), WINSW is seeking registrations of interest from Aboriginal people who hold cultural knowledge relevant to this large project area and the cultural and spiritual significance of the Yanco Creek system more generally.

Community consultation with Aboriginal people will assist us to prepare an Aboriginal Cultural Heritage Assessment Report. Your feedback will also assist the Department of Planning Industry and Environment in its consideration and determination of the project. Consultation will also assist the Secretary of the Department of Premier and Cabinet in the consideration and determination of any subsequent Aboriginal Heritage Impact Permit (AHIP) applications (if required).

Any Aboriginal people or organisations with relevant cultural knowledge can register in writing (email or letter) to:
Oliver Macgregor
Senior Archaeologist, 3Rivers Partnership
Phone: 1300 081 047
Email: oliver.macgregor@jacobs.com
Mail: PO Box 237, Civic Square ACT 2608

Any general enquiries concerning heritage management at Water Infrastructure NSW can be directed to:
Maydina Penrith
Senior Aboriginal Cultural Officer,
Water Infrastructure NSW
Email: Maydina.penrith@dpie.nsw.gov.au

Registrations must be received by close of business on 17 September 2021.

Visit **dpie.nsw.gov.au/yanco-creek-modernisation-project** for more information about the project.

To whom it may concern,

As part of the ongoing Aboriginal Cultural Heritage Assessment being undertaken for the Yanco Creek Modernisation Project under the Sustainable Diversion Limit Adjustment Mechanism (SDLAM) Program being completed by Water Infrastructure NSW, please find below a list of all Registered Aboriginal Parties as per Requirement 4.1.6 of the *Aboriginal Cultural Heritage Requirements for Proponents* (2010). A copy of the invitation to register as a RAP for the project which was sent to all RAPs is attached to this email.

Organisation	Contact Name
Cummeragunja Local Aboriginal Land Council	Leon Atkinson
Yarkuwa Indigenous Knowledge Centre	David Crew
Leeton and District Local Aboriginal Land Council	Karen Davy
Deniliquin Local Aboriginal Land Council	Rose Dunn
Bundyi Aboriginal Cultural Knowledge	Mark Saddler
Bangerang Aboriginal Corporation	Darren Atkinson
Wiradjuri Council of Elders	Yalmambirra
Sandhills Artefacts	Michael Lyons
Independent	Kevin Atkinson
Independent	Roley Williams
Independent	Maydina Penrith

Two other organisations also registered as RAPs for the Project and asked that their details not be forwarded to Heritage NSW and the relevant Local Aboriginal Land Councils.

Should you require any additional information please do not hesitate to get in touch.

Kind regards,
Thomas

Yanco Creek SDL Adjustment Measures (SDLAM) Projects

Community Update: Proposed Yanco Creek Modernisation Project

A community and government partnership
Maintaining and improving flows
Keeping the Yanco/Billabong//Colombo/Forest Creeks flowing
Smarter use of available water
Project Benefits – irrigators, town supplies, fish, waterbirds, cultural, recreational

February 2021

What is the Yanco Creek Project?

- ❑ Working together – a community and government partnership
- ❑ Upgrading old and inefficient infrastructure
- ❑ Using best available technology to modernise the Yanco Creek
- ❑ Smarter use of water through models and science
- ❑ Focusing on mutually beneficial outcomes through:
  - ongoing conversations with stakeholders
  - More efficient use of water to environmental assets
  - incorporation of cultural knowledge
  - safeguarding service levels for irrigators and towns
  - Improving fish passage
  - Working with Environmental Water Holders to target flows enhancing native fish and threatened species
  - Improving the control of timing, location, volume, duration and frequency of water flows.

Stakeholder Advisory Group – Your community representatives

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

Yanco Creek Modernisation: Project Overview

Project: Modernising infrastructure to enable smarter use of water and environmental restoration in the Yanco Creek system – including Yanco, Billabong, Colombo, Forest creeks.

Focus: Working hand in hand with local communities:

- Maintaining and improving flows
- Keeping the Yanco Creek system flowing
- Smarter use of available water
- Modernising ageing infrastructure
- ensure town water supplies are secure
- Improved environmental outcomes

Process: Community collaboration in project design

- 50+ projects identified and assessed
- Priority list of 8 possible projects – preferred option

Now: Seeking feedback from the community on the preferred option

Wanganella Swamp

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

Project objectives and expected benefits

Objectives:

- Maintaining and improving flows
- Keeping the Yanco/Billabong/Colombo/Forest Creeks flowing
- Smarter use of available water
- Modernising ageing infrastructure
- Improving environmental and cultural outcomes
- Increasing fish passage and instream connectivity
- Environmental watering to key ecological assets
- Meeting NSW's Basin Plan commitments

Some of the expected benefits in the Yanco/Billabong /Forest/Colombo Creeks and Murrumbidgee systems:

- Improving community confidence over future water security
- More efficient water use
- Improved levels of customer service (water delivery)
- Improved environmental outcomes, health and vitality
- Economic stimulus during construction
- Avoiding water buy-backs

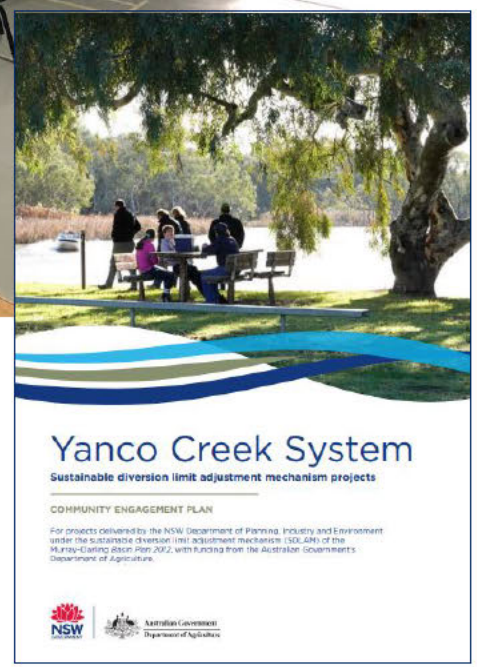
Wanganella Weir

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

Approach to Community Engagement

- ❑ Communities have the local knowledge needed to make the best investment decisions
- ❑ Some projects may affect land managed privately – DPIE is committed to identifying and mitigating impacts
- ❑ Approach to engagement:
  - guided by community / stakeholder advisory group
  - collaborative and co-ordinated
  - accessible and regular
  - transparent and accountable
- ❑ Engagement to collaboratively determine best options for proposed investment to achieve project objectives
- ❑ More detailed information is now available and forms the basis of this update



NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

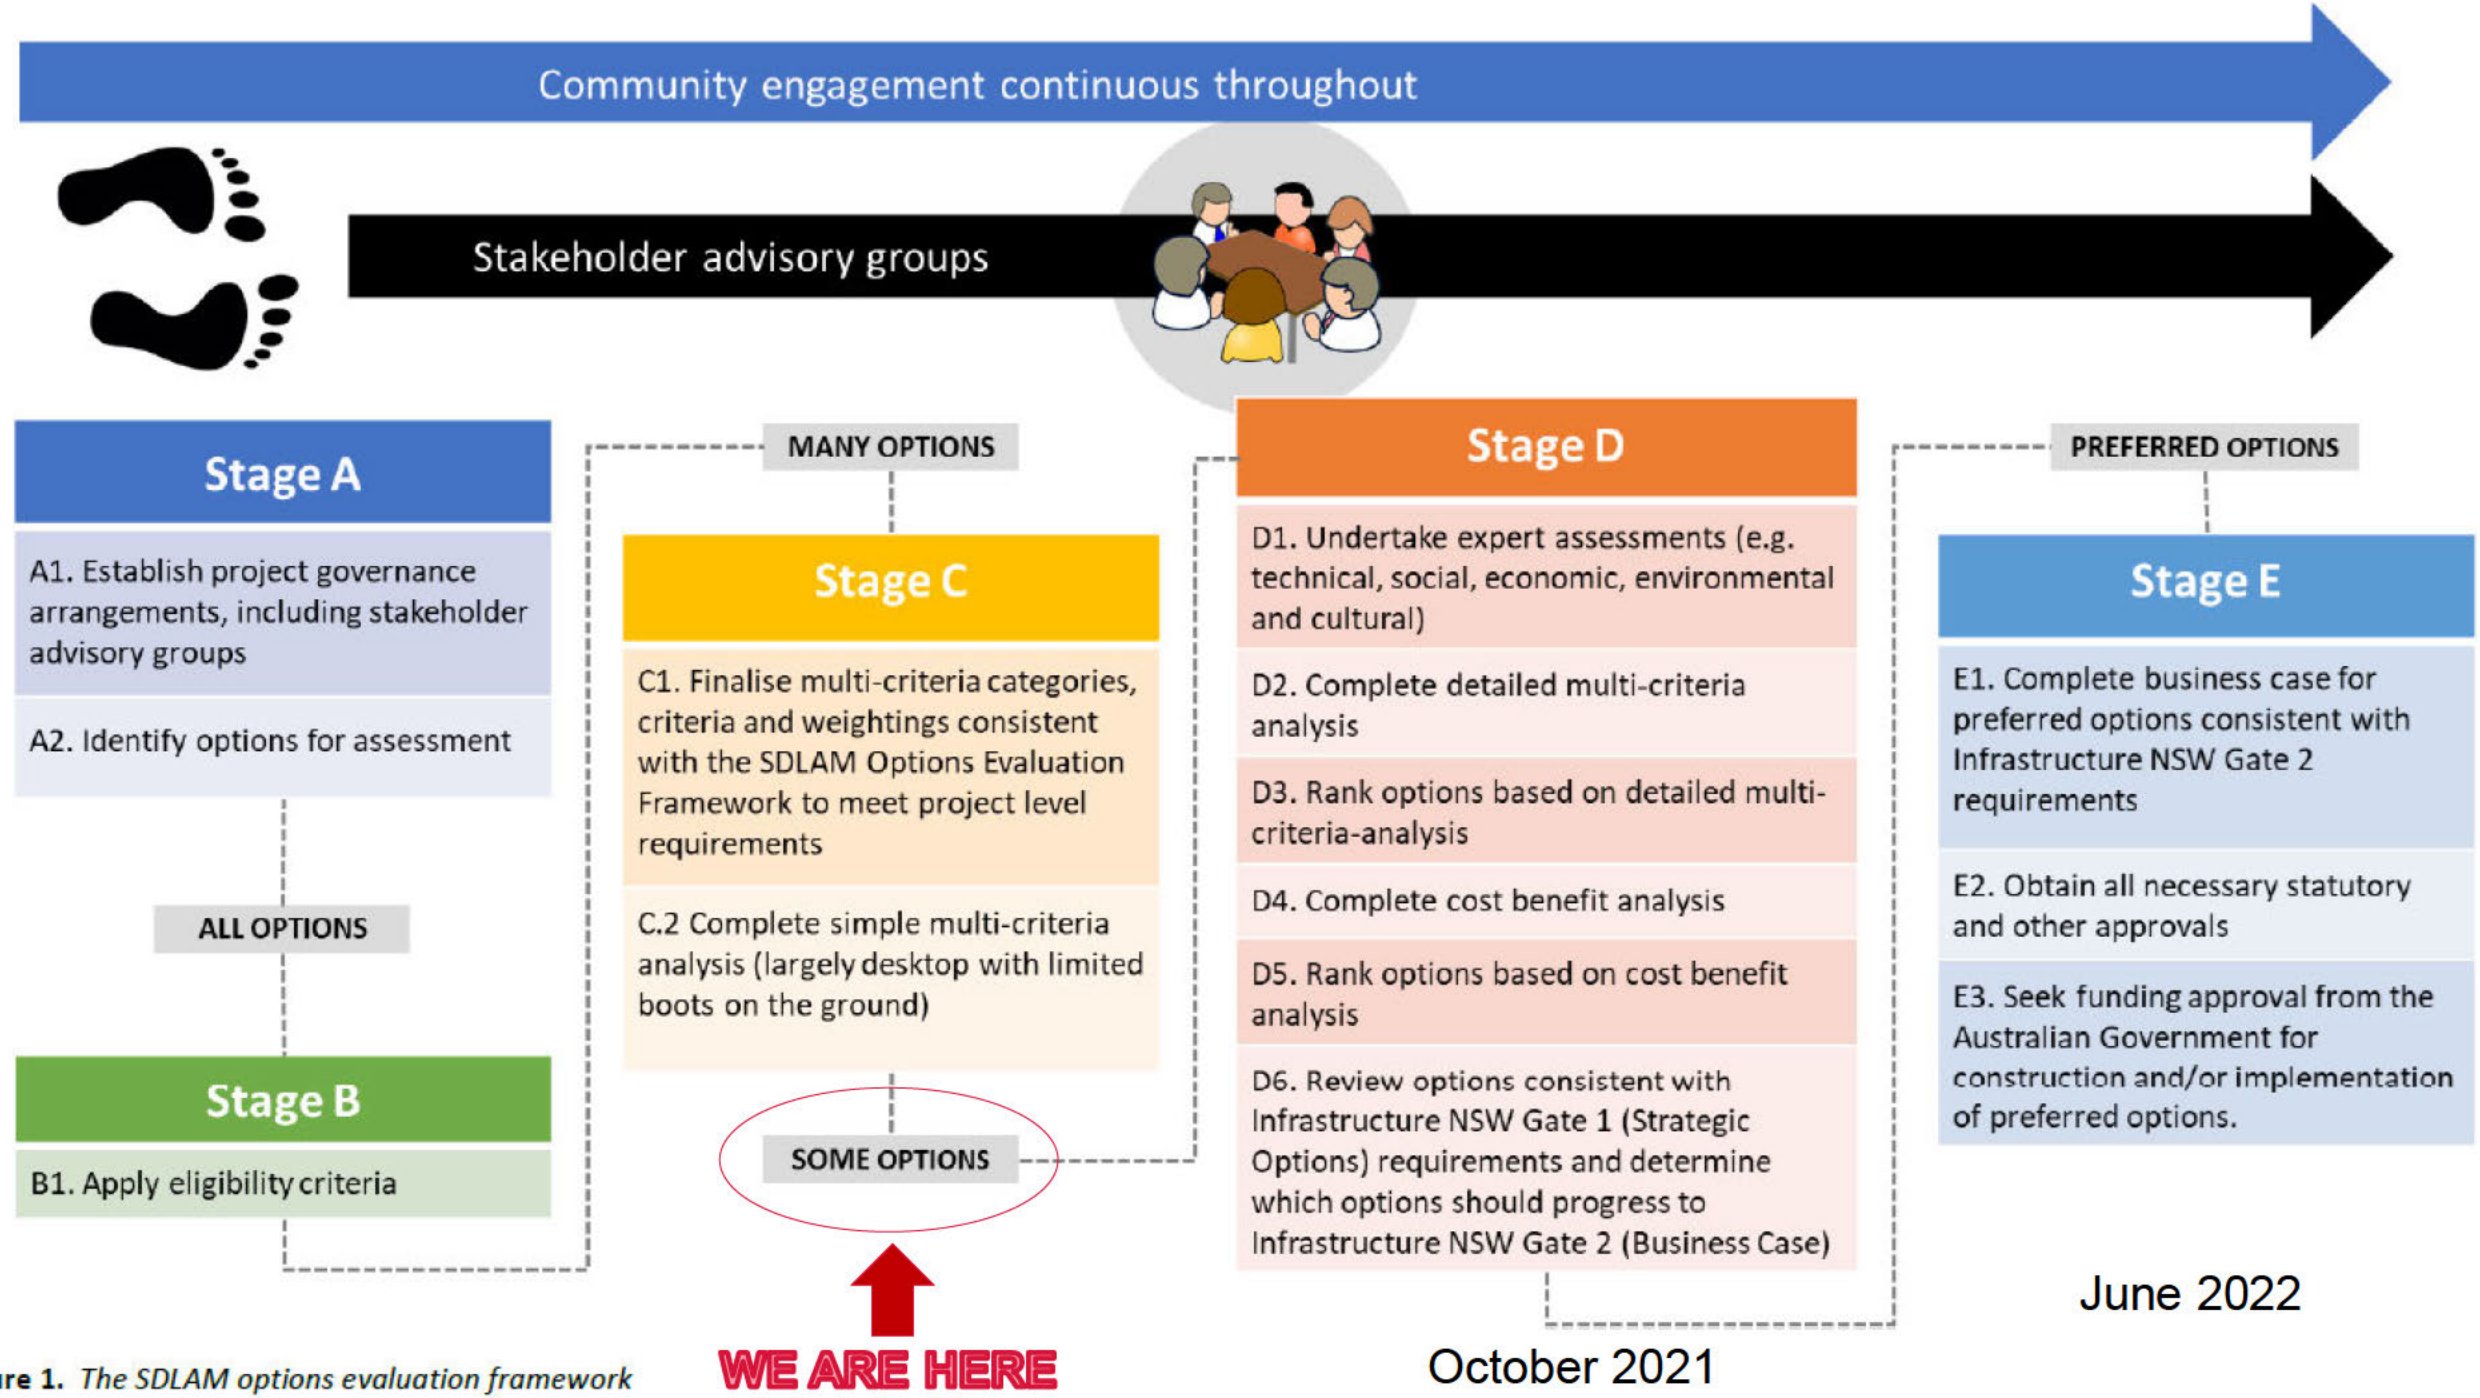


Figure 1. *The SDLAM options evaluation framework*

Shortlisted Projects

1. Environmental Water Efficiency
2. Billabong Creek Re-Regulation Weirs
3. Yanco Creek / Mundoora Anabranch Reconfiguration
4. Forest Creek Return Flows Via Piccaninny Creek
5. Improved Flow Measurement
6. Review of irrigation escapes flows
7. Improved Use of Technology
8. Improved riparian management

NSW GOVERNMENT | Planning, Industry & Environment

1 - Environmental Efficiency

Purpose: provide more efficient delivery of environmental water at multiple locations, including.

a – Upper Yanco Wetlands

b – Wanganella Swamp

c – Lower Forest Anabranch Environmental Pumps

NSW GOVERNMENT | Planning, Industry & Environment

2 – Billabong Creek Re-Regulation Weirs

Purpose: to reduce unplanned end of system flows in the Billabong Creek at Darlot through upgrade of infrastructure at up to four locations:

a – Hartwood Regulator

b – Piccaninny Regulator

c – Wanganella Regulator

d – Caroonboon Regulator

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

3 - Yanco Creek / Mundoora Anabranch Reconfiguration

Purpose: investigate reconfiguring water delivery arrangements at the Yanco Creek / Mundoora Anabranch area.

Further studies into feasibility and environmental benefits of:

a - a re-regulation storage upstream of McCaugheys block bank

b - a re-regulation storage upstream of 18 Mile block bank and removing the existing McCaugheys block bank.

C - removing both 18 Mile block bank and McCaugheys block bank and establishing a new access bridge at or near the location of the current 18 Mile block bank

NSW GOVERNMENT | Planning, Industry & Environment

4 - Forest Creek Return Flows Via Piccaninny Creek

Purpose: to reduce unplanned end of system flows in the regulated section of the Forest Creek at Warriston Weir.

Achieve this by:

diverting unplanned flows out of the regulated section of the Forest Creek and back to the Billabong Creek (downstream of Conargo) via Piccaninny Creek.

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

5 – Improved Flow Measurement

Purpose: to provide new and/or improved flow measurement* throughout the Yanco Creek System to provide WaterNSW river operators with additional and more timely information to assist them operate the system more efficiently.

Sites to be investigated include:

a - Washpen Creek flows downstream of Spillers Regulator

b - Cheverells Creek Offtake

c - Additional hydrometric stations considering recommendations from WaterNSW (system operator).

* Possible early works

NSW GOVERNMENT | Planning, Industry & Environment

6 – Review of Irrigation Escapes Flows

Purpose: review the use of existing Murray Irrigation Limited (MIL) and Coleambally Irrigation Co-operative Limited (CICL) escapes in a way that best provides a balance between technical, social, environmental, cultural and economic impacts at up to five locations:

a - Finley Escape

b - Berrigan 14 Escape

c - Berrigan 14B1 Escape

d - Coleambally Catchment Drain

e - DC800

NSW GOVERNMENT | Planning, Industry & Environment

Australian Government
Department of Agriculture, Water and the Environment

7 – Improve Use of Technology

Purpose: to use technology to improve the operational efficiency of the Yanco Creek System.

This includes but is not limited to:

a - recognition of the operational efficiencies already provided by WaterNSW through their existing Computer Aided River Management (CARM) system.

b - Integration of new infrastructure considered under the Yanco Modernisation Project with the CARM system.

Monitoring site at Darlot

NSW GOVERNMENT | Planning, Industry & Environment

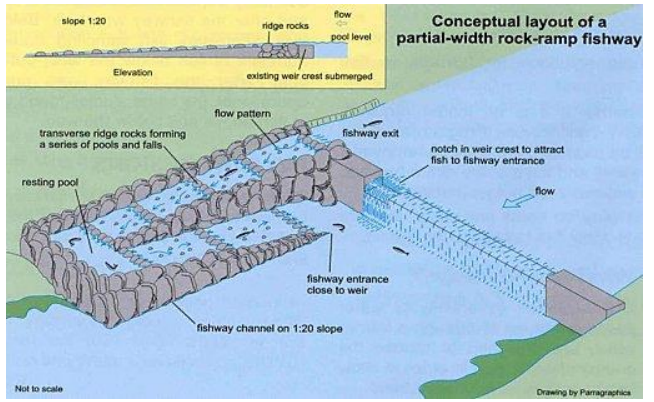
Australian Government
Department of Agriculture, Water and the Environment

8 – Improved Riparian Management

Purpose: complementary riparian management and measures that are consistent with the project objectives and enhance, refine and/or support the other seven parts of the preferred option



Examples include but not limited to:

- environmental offsets,
- removal of flow constraints,
- Improving fish passage (e.g. weir removal, fish ladders),
- installation of fish screens on pumps
- Improving fish habitat (eg Re-snagging)

Results & outcomes	4
Next steps	5

Section 3

Questions & Discussion	6
Archaeological terminology	7

Glossary

- Earth Feature: is the site type we have elected to use to describe the elevated cultural earth mound found during the survey. They are likely earth mounds, but we are unable to confirm their type based on the surface evidence.
- Modified Tree: a tree that has been culturally modified such as scaring or ringing.
- PAD: Potential Archaeological Deposit, an area where sub-surface cultural material is highly likely, even if the surface evidence is not indicative.

1

Aboriginal Cultural Heritage Assessments

- Discussion on overall process

Stages of our ACHA

Gathering background information
- AHIMS search
- Environmental context
- Previous assessments
- Disturbance

Field survey
- Look for what we can see and record
- Identify areas that are likely to have archaeology

Provide information to design team
- To avoid impacting known sites or areas of potential where possible

Testing where required
- Where impact can't be avoided

Analysis of results and final assessment and final report writing
- What do the results of the survey and testing tell us about the significance of the sites being impacted?
- Stage 4 consultation

Apply for approvals where necessary

2

Yanco Modernisation

- Where we are up to and results

What stage are we at with Yanco Modernisation?

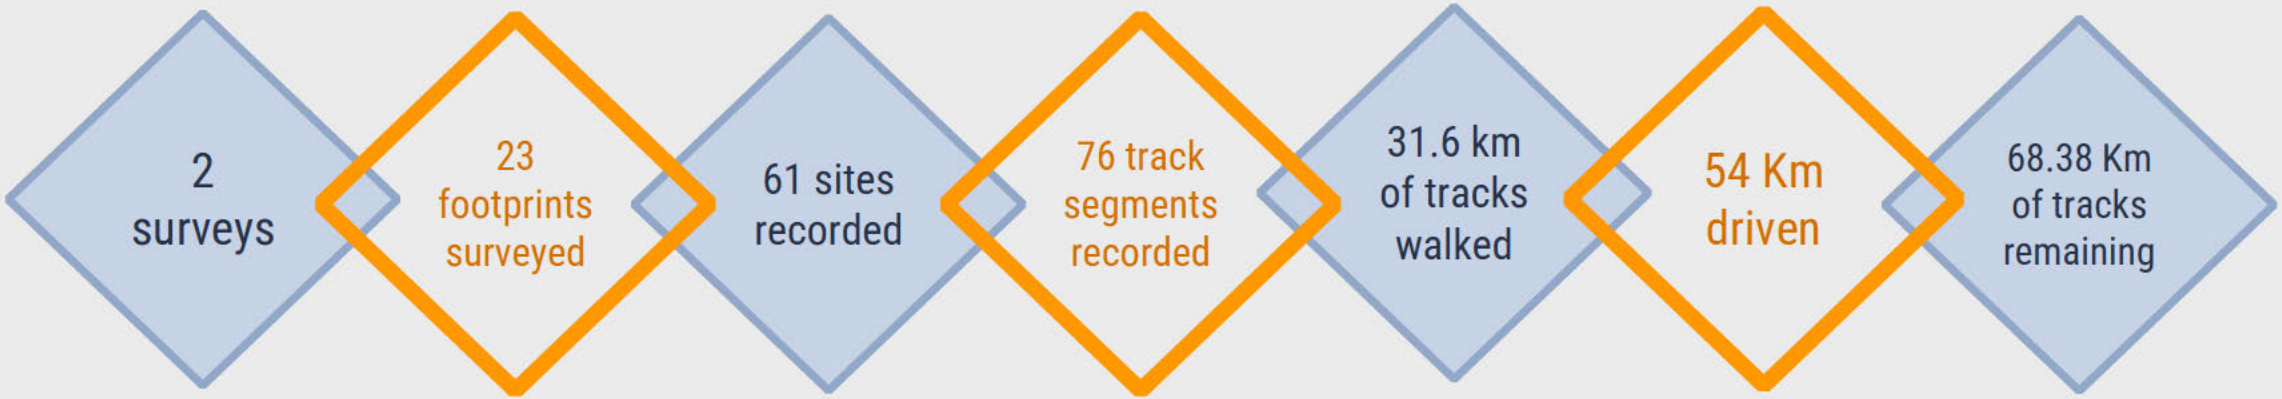
Gathering background information
- Has been completed!

Field survey
- 4 weeks out of 6 have been completed. 2 more weeks to go!

Provide information to design team
- Information from the first 2 weeks of survey has been provided
- In the process of providing information from second 2 weeks survey

Testing where required
- Our aim is to avoid impacts where possible, resulting in as little testing as we can, so we don't harm sites
- Testing anticipated to commence prior to Christmas

What we have done so far



Who has been involved?

Traditional Owner representatives

- Deniliquin LALC
- Yarkuwa Indigenous Knowledge Centre
- Cummeragunja LALC
- Sandhills Artefacts

Outcomes

Preferred outcome is to avoid harm where possible

Achieved through discussions with design team

- Locations of structures
- Construction techniques

Where we don't know if harm can be avoided, or we need more information before the decision is made

Testing in accordance with the Code of Practice

Where harm can't be avoided

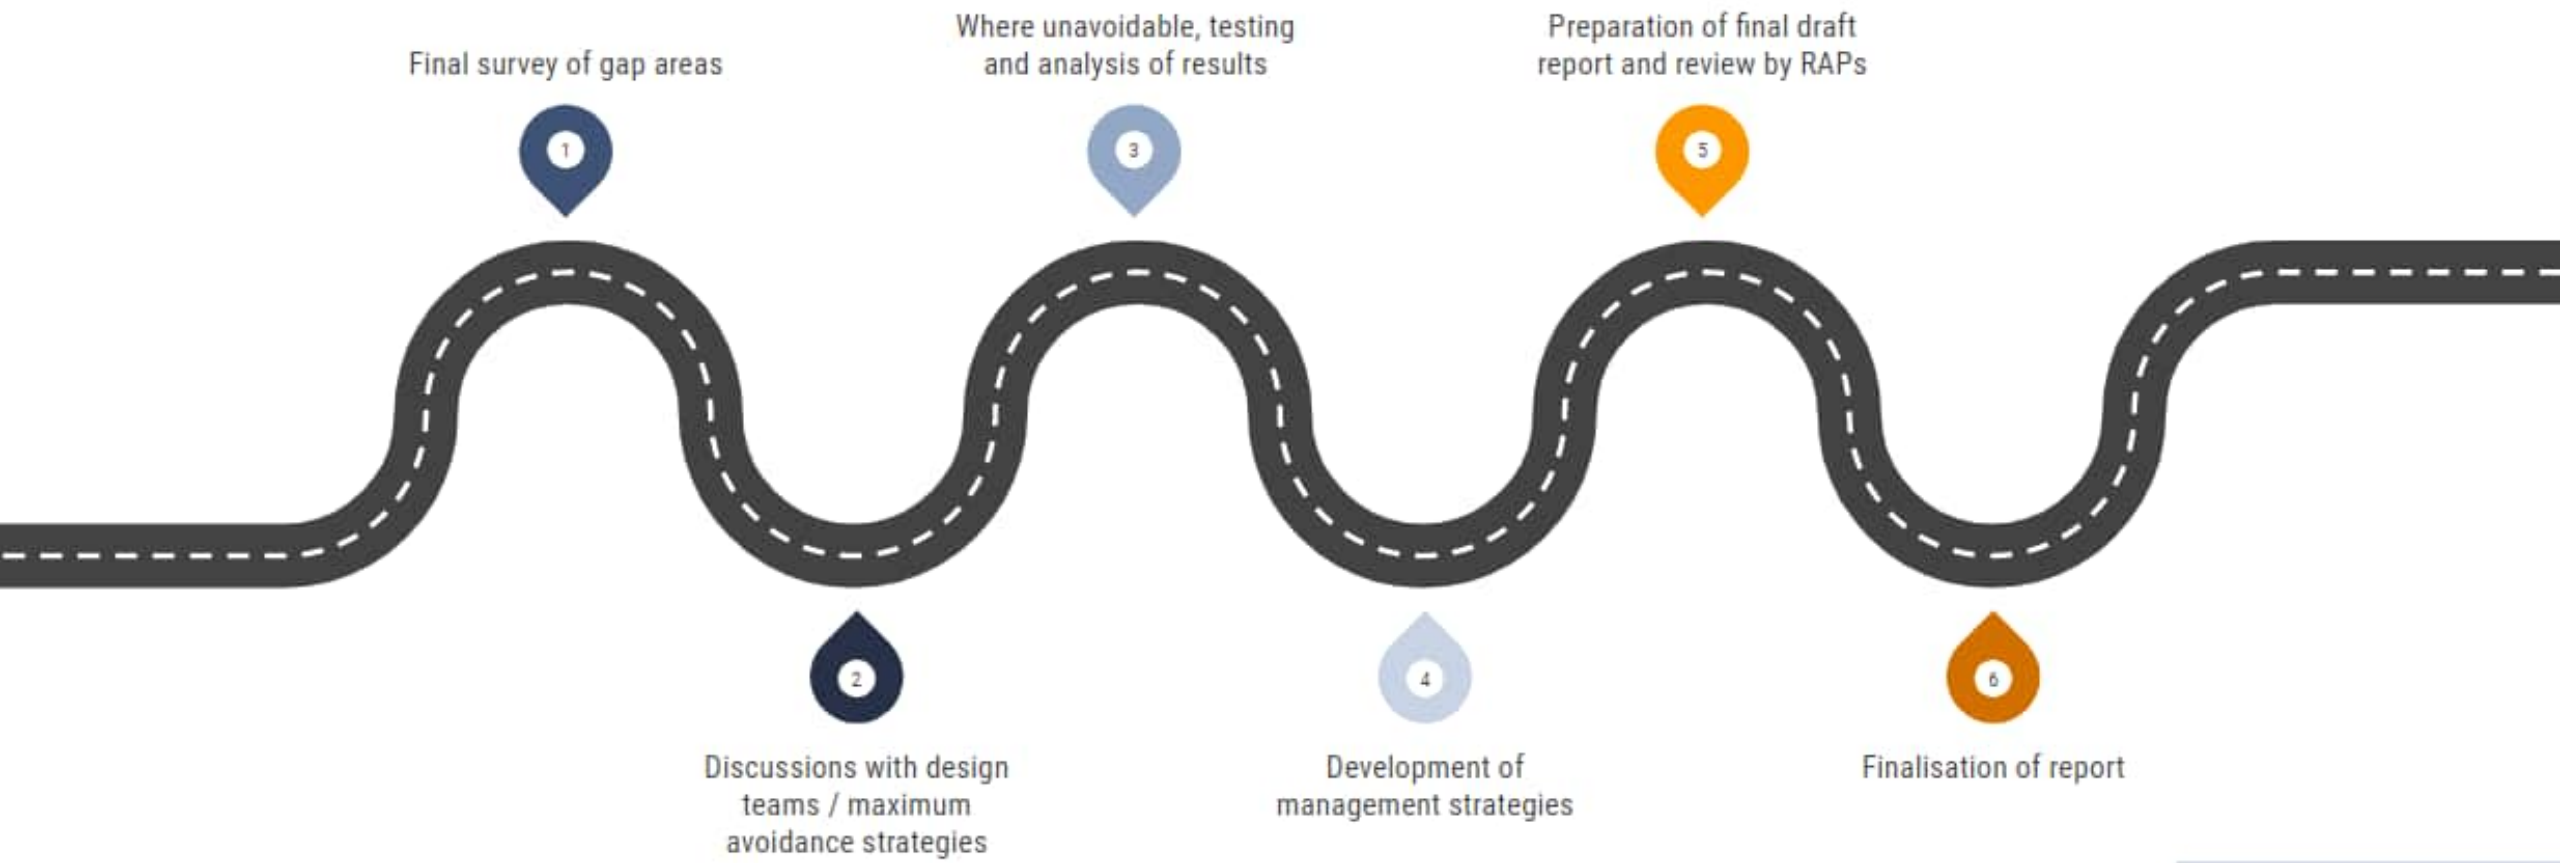
AHIP or Minister's Conditions of Approval will be issued, with conditions for:

- Management of harm
- Minimisation of harm
- Mitigation for harm

Conditions will be based on recommendations in our assessment

The recommendations will be developed with Traditional Owners during the assessment and through feedback on the reports

Next Steps



Final survey of gap areas
1
Discussions with design teams / maximum avoidance strategies
2
Where unavoidable, testing and analysis of results
3
Development of management strategies
4
Preparation of final draft report and review by RAPs
5
Finalisation of report
6

3

1. Introduction

Water Infrastructure NSW is currently investigating a range of infrastructure projects as part of the Yanco Creek Modernisation Project (the project). Modernising infrastructure along the Yanco Creek system will enable improved water management and deliver better social, environmental, and cultural outcomes for communities along the Yanco Creek system.

The project would involve ground-disturbing construction works at a range of locations within a project area that stretches along Yanco, Billabong, Colombo and Forest creeks, near towns such as Morundah, Jerilderie, Conargo and Wanganella.

Project works would occur within the local government areas of Narrandera Shire Council, Federation Council, Murrumbidgee Council and Edward River Council.

The 3Rivers Partnership, on behalf of Water Infrastructure NSW, is carrying out an Aboriginal cultural heritage assessment for the project.

The purpose of this document is to provide information about the project and to present the proposed method for undertaking the Aboriginal cultural heritage assessment for the project.

1.1 Project description

The project aims to increase the efficiency with which water can be supplied and delivered throughout the Yanco Creek system, including to the environment. Supply of water to the environment involves supplying water to environment conservation areas or areas of high environmental and biodiversity value, such as wetlands. A range of options are being investigated to improve water management in the Yanco Creek system as shown in Table 1.

Table 1: Yanco Creek Modernisation Project Parts

Project Part	Description
Part 1 – Environmental Water Efficiency	To improve efficiency of the environmental watering of wetland areas through improved infrastructure at: ▪ Upper Yanco Wetlands ▪ Wanganella Swamp ▪ Lower Forest Anabranch Wetlands.
Part 2 – Billabong Creek Re-Regulation Weirs	Reduce unplanned end of system flows in the Billabong Creek at Darlot through replacement of existing fixed crest weirs with fully automatic regulated weirs at: ▪ Hartwood Regulator ▪ Piccaninny Regulator ▪ Wanganella Regulator ▪ Caroonboon Regulator.
Part 3 – Yanco / Mundoora Anabranch Reconfiguration	Reconfigure water delivery arrangements in the Yanco Creek / Mundoora Anabranch area to re-regulate flows and provide greater operational flexibility to deliver water to environmental assets.
Part 4 – Forest Creek Return Flows	Reduce unplanned end of system flows below Warriston Weir by diverting unplanned flows in Forest Creek back into the Billabong Creek (downstream of Conargo) via Piccaninny Creek.

Part 5 – Improved Flow Measurement	Provide new and improved flow measurement in the Yanco Creek system with additional and more timely information to assist WaterNSW to operate the system more efficiently. Appropriate locations are to be confirmed.
Part 6 – Murray Irrigation and Coleambally Irrigation Escapes	Review the use of existing Murray Irrigation Limited (MIL) and Coleambally Irrigation Co-operative Limited (CICL) escapes in a way that best provides a balance between social, environmental, cultural and economic impacts. Any works are to be determined.
Part 7 – Improved Use of Technology	Use technology to improve the operational efficiency of the Yanco Creek System. No new works are proposed.
Part 8 – Improved Riparian Management	Implement complementary riparian management and measures, including: ▪ Environmental offsets ▪ Removal of flow constraints ▪ Improving fish passage ▪ Installation of fish screens on pumps ▪ Improving fish habitat (e.g. re-snagging). Any works are to be determined.

Further information about the project is available at the following websites https://dpie.mysocialpinpoint.com.au/yanco and https://www.industry.nsw.gov.au/water/plans-programs/sdlam

The location of proposed works comprising Parts1-4 of the project are mapped in figure (Figure 1). Details of any works associated with Parts 5-8 are under further development.

The design of the proposed works for Parts 1-4 in each location is described below, and mapped in the accompanying figures.

1.1.1 Upper Yanco Wetlands

New works are proposed to improve the delivery of environmental water to Mollys Lagoon and Dry Lake (Figure 2). These works include:

- Upgrading the regulator used to divert environmental water from Yanco Creek to Mollys Lagoon
- A new block bank and regulator across the drainage channel near the southern end of Dry Lake to contain environmental water within the lake
- Use of existing access tracks from Sturt Highway (via Mollys Lagoon Road) and Devlins Bridge Road.

1.1.2 Wanganella Swamp

New works are proposed to improve the delivery of, and then retain, environmental water in Wanganella Swamp (Figure 3). These works will include:

- New regulators on Eight Mile Creek upstream and near where the creek crosses Cobb Highway
- New regulator on Clarkes Creek at the southern end of the swamp
- Upgrading the existing McCrabbs regulator (at the northern end of the swamp)
- Upgrading the existing regulator on Estuary Creek
- A new water supply channel to provide environmental water may be required from Billabong Creek

- New culverts at watercourse crossings and some upgrades to existing access tracks from Cobb Highway and Zara Road may be required.

1.1.3 Lower Forest Anabranch Wetlands

New works are proposed to retain environmental water in Rhyola Lake, Rhyola Swamp and Hickories Wetland (Figure 4). These works include:

- A new regulator downstream of Rhyola Lake on lower Forest Anabranch
- A new regulator on Forest Anabranch may be required
- Use of the existing access track from Inverness Road.

1.1.4 Hartwood Regulator

It is proposed to replace the existing Hartwood Weir with a gated re-regulation weir for greater operational flexibility (Figure 5). The proposed works include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of existing access tracks from Conargo Road.

1.1.5 Piccaninny Regulator

It is proposed to replace the existing Piccaninny Weir with a gated re-regulation weir for greater operational flexibility (Figure 6). The proposed works will include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of the existing access track from Wanganella Conargo Road.

1.1.6 Wanganella Regulator

It is proposed to replace the existing Wanganella Weir with a gated re-regulation weir for greater operational flexibility (Figure 7). The proposed works include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of Zara Road and existing access tracks from Cobb Highway.

1.1.7 Caroonboon Regulator

It is proposed to replace the existing Caroonboon Weir with a gated re-regulation weir for greater operational flexibility (Figure 8). The proposed works include:

- A new gated re-regulation weir in the vicinity of the existing weir
- Removal of the existing weir
- A vertical slot fishway for fish passage at the new weir
- Use of the existing access track to Wanganella Moulamein Road.

1.1.8 Yanco / Mundoora Anabranch reconfiguration

It is proposed to improve the regulation of water in the vicinity of the 18 Mile and McCaugheys block banks on the Yanco River with new re-regulation gates for greater operational flexibility (Figure 9). The proposed works include:

- A new gated regulator through the existing McCaugheys block bank (likely a gated pipe)
- A new overflow/spillway structure from the McCaugheys weir pool
- Replace the McCaugheys inlet regulator that controls flows into the Mundoora Anabranch (upgraded pipe size and gate)
- Two minor access culverts downstream of McCaugheys block bank
- Use of existing access tracks from North Coree Road and Nine Mile Lane.

1.1.9 Forest Creek return flows via Piccaninny Creek

It is proposed to divert unplanned flows in Forest Creek downstream of Warriston Weir by diverting these flows upstream of the weir along Piccaninny Creek and back to Billabong Creek (Figure 10). The proposed works include:

- A new gated regulator through the existing block bank in the watercourse connecting Forest and Piccaninny creeks
- A new regulation structure may be required to prevent the water being transferred from backflowing up Piccaninny Creek
- Use of the existing access track from Conargo Road.

1.2 Purpose and scope of this document

The purpose of the Aboriginal cultural heritage assessment is to evaluate the potential impacts to Aboriginal cultural heritage that would result from constructing and operating the project. This document presents the method for undertaking the Aboriginal cultural heritage assessment for the project.

This document also provides Registered Aboriginal Parties (RAPs) with detailed information about the project and the proposed assessment method. This will provide RAPs with sufficient information to review and provide feedback on the proposed method prior to its finalisation. The method will not be finalised until this feedback has been received and incorporated into it.

1.3 Limitations

In preparing this document, 3Rivers has relied on information obtained from the Aboriginal Heritage Information Management System (AHIMS) database to provide information on previously identified and recorded Aboriginal sites and Aboriginal Places in or around the project area. 3Rivers has not independently verified or checked the information provided beyond the agreed scope of work. 3Rivers does not accept liability in connection with such unverified information, including errors and omissions in the memorandum which were caused by errors or omissions in that information.

At this stage of the Aboriginal cultural heritage assessment, comprehensive information on the heritage significance or other cultural value associated with sites and places in or around the project area has not been obtained. Gathering comprehensive information on the cultural value of objects and places associated with the project area is one of the aims of the consultation process that is currently underway.

1.4 Aboriginal community consultation

Water Infrastructure NSW is engaged in a broader program of consultation with First Nations about the project. The consultation with the Aboriginal community discussed in this document is specific to the Aboriginal cultural heritage assessment required to be prepared in compliance with the *National Parks and Wildlife Act 1974* and other relevant legislation and regulations.

Effective consultation with Aboriginal people is integral to any Aboriginal cultural heritage assessment. Section 90K(f) of the *National Parks and Wildlife Act 1974* requires that the consultation process and its results are clearly articulated in an Aboriginal Cultural Heritage Assessment Report (ACHAR) and Section 90K(g) specifies that the consultation substantially complies with the requirements set out in the *National Parks and Wildlife Regulation 2019.*

The requirement for consultation acknowledges that Aboriginal people:

- Should have the right to maintain culture, language, knowledge and identity
- Should have the right to directly participate in matters that may affect their heritage
- Are the primary determinants of the significance of their heritage.

The method for Aboriginal community consultation is in accord with the consultation process specified in the *Aboriginal Cultural Heritage Consultation Requirements for Proponents* (DECCW 2010a) and Clause 60 of the *National Parks and Wildlife Regulation 2019*.

The objective of Aboriginal community consultation is to ensure that Aboriginal people are involved in the assessment by:

- Sharing relevant information about the cultural significance and values of Aboriginal object(s) and/or place(s)
- Contributing to the assessment of cultural and scientific significance of Aboriginal object(s) and/or place(s)

- Reviewing and commenting on the proposed methods of assessing Aboriginal cultural heritage within the project area
- Contributing to the development of cultural heritage management options and recommendations for Aboriginal object(s) and/or place(s) within the project area
- Commenting and providing feedback on the draft ACHAR prior to finalisation.

The consultation process comprises four separate stages.

- **Stage 1** is the notification of the project and provides Aboriginal people with the opportunity to become RAPs for the project. This was initiated in August 2021 and RAPs' nominations have been registered
- **Stage 2** is where RAPs are provided with information about the project and the proposed assessment method
- **Stage 3** allows relevant cultural information to be gathered. This stage continues throughout the life of the project. It is also the stage where the proposed assessment method is provided to the RAPs, who are provided with time to review and provide comment on it
- **Stage 4** is when RAPs review the draft ACHAR and provide comment on it. This is the stage where management and mitigation measures are designed and refined.

Aboriginal community consultation is undertaken concurrently with the Aboriginal cultural heritage assessment.

1.5 Aboriginal community input points during the assessment process

Input and feedback can be provided by RAPs at any time throughout the assessment process. 3Rivers will specifically seek input and feedback from RAPs at several points during the process (DECCW 2010a):

- During Stage 2 - Initial presentation of information about the project and the proposed cultural heritage assessment process
- During Stage 3 - Providing RAPs with the draft proposed method (this document). RAPs were invited to provide feedback on the proposed method, to identify cultural heritage values associated with the project area and have input into the development of any cultural management options. A 28-day review period was provided, and face-to-face meetings with RAPs were held in Narrandera (on March 7th, 2022) and Denliquin (on March 9th, 2022) to discuss the project and the proposed cultural heritage assessment method.
- During fieldwork - Comments will be recorded in the field and will inform the assessment
- During Stage 4 - Providing RAPs with the draft ACHAR. RAPs will be invited to review and provide feedback on the report, and any further information they wish to be included.

1.6 Sensitive cultural information management protocol

RAPs will have the opportunity to provide 3Rivers with information on the project area and the surrounding region, including information on cultural heritage values. Information can be provided at any point during the cultural heritage assessment process prior to the finalisation of the ACHAR.

It is possible that during this consultation process, RAPs will provide sensitive cultural information to which access needs to be restricted.

In the event that such information is supplied, the RAP supplying the information should state to 3Rivers how they wish that information to be treated, and how access to the information should be restricted.

3Rivers will follow the stated wishes provided by the RAP in question when managing and using the information provided to 3Rivers. All stated restrictions of access, communication and publication of the information will be followed. These might include:

- Restrictions on reproducing the information (in whole or in part) in reports

- Restrictions on reproducing the information in reports provided to different audiences (for example, the version provided to the client, the version provided to Heritage NSW and the AHIMS database)
- Restrictions on communication of the information in other ways
- Restrictions on the location/storage of the information
- Other required processes relating to handling the information
- Any names and contact details of persons authorised within the relevant Aboriginal group to make decisions concerning the information, and their degree of authorisation.
- Any details of any consent given in accordance with customary law
- Any restrictions on access to and use of the information by RAPs.

Please consider the above list when providing your statement of requirements regarding any culturally sensitive information.

1.7 Structure of this document

The *Code of Practice for the Archaeological Investigation of Aboriginal objects in NSW* (DECCW 2010b), referred to in this document as the Code of Practice, provides 26 requirements that must be adhered to when undertaking an archaeological assessment of Aboriginal objects and places. This method has been designed to address these requirements.

The structure of this document is as follows:

Table 2: Structure of this document

Section	Description
Section1	Provides an introduction to the project and explains the purpose of this document
Section 2	Summarises the relevant legislation, policies and guidance material
Section 3	Provides the proposed method for the desktop assessment
Section 4	Provides the proposed method for archaeological survey
Section 5	Provides the proposed method for documenting and reporting the findings and recommendations of the Aboriginal cultural heritage assessment
Section 6	Lists the main 3Rivers personnel involved in the assessment
Section 7	Provides information on safety requirements, project timelines, and contact details of 3Rivers staff
Section 8	Provides a list of references used in this document

2. Legislative and policy context

2.1 Commonwealth legislation

2.1.1 Environment Protection and Biodiversity Conservation Act 1999

The *Environment Protection and Biodiversity Conservation Act 1999* (Cth) (EPBC Act) provides for the protection of the environment, especially in matters of national environmental significance (MNES). Under the EPBC Act, a person must not take an action that has, will have, or is likely to have a significant impact on any of the MNES without approval from the Commonwealth Minister of Agriculture, Water and the Environment. The definition of the environment under the EPBC Act includes both natural and cultural elements. Under the EPBC Act, heritage items can be listed on the National Heritage List (for items of National heritage significance) or the Commonwealth Heritage List (for items of heritage significance on land and waters owned or managed by the Commonwealth).

2.2 State legislation

2.2.1 Environmental Planning and Assessment Act 1979

The *Environmental Planning and Assessment Act 1979* (NSW) (EP&A Act) regulates environmental planning and assessment for NSW. The EP&A Act includes provisions to ensure that the potential environmental impacts of a development, including impacts to Aboriginal cultural heritage, are assessed and considered prior to any environmental approval. Local environmental plans may identify items and places of heritage significance.

2.2.2 National Parks and Wildlife Act 1974 and National Parks and Wildlife Amendment Act 2010

The *National Parks and Wildlife Act 1974* (NSW) (NPW Act) protects Aboriginal heritage within NSW.

An 'Aboriginal object' is defined by the NPW Act (Section 5(1)):

Aboriginal object means any deposit, object or material evidence (not being a handicraft made for sale) relating to the Aboriginal habitation of the area that comprises New South Wales, being habitation before or concurrent with (or both) the occupation of that area by persons of non-Aboriginal extraction, and includes Aboriginal remains.

An 'Aboriginal place' is a place gazetted by the Minister, under the NPW Act (Section 84):

The Minister may, by order published in the Gazette, declare any place specified or described in the order, being a place that, in the opinion of the Minister, is or was of special significance with respect to Aboriginal culture, to be an Aboriginal place for the purposes of this Act.

Protection of Aboriginal heritage is outlined in Section 86 of the NPW Act, as follows:

- 'a person must not harm or desecrate an object that the person knows is an Aboriginal object' (Section 86(1))
- 'a person must not harm an Aboriginal object' (Section 86(2))
- 'a person must not harm or desecrate an Aboriginal place' (Section 86(4))

Section 87(1) of the NPW Act provides that it is a defence to these provisions if the harm or desecration is authorised by an Aboriginal heritage impact permit (AHIP).

Section 87(2) of the NPW Act provides that it is a defence to the provisions of Section 86(2) if the defendant exercised due diligence to determine whether an Aboriginal object would be harmed, and reasonably determined that no Aboriginal object would be harmed. This is not a defence to the offence of knowingly harming an Aboriginal object (offences that contravene Section 86(1)).

Harm is defined under the NPW Act (Section 5) as any act or omission that destroys, defaces or damages the object or place, or – in relation to an object – moves the object from the land on which it had been situated.

2.3 Regulatory documents

Heritage NSW and its predecessor agencies have produced a number of guidance documents and codes of practice to guide the various steps of an Aboriginal cultural heritage assessment. Adherence to the requirements outlined in these documents ensures that all advice provided complies with the relevant legislation and regulations, and is legally sound.

2.3.1 Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010 (DECCW 2010a)

This document establishes the requirements for consultation (under Part 6 of the NPW Act) with Aboriginal stakeholders as part of the heritage assessment process to determine potential impacts of proposed activities on Aboriginal objects and places and to inform decision making for any application for an AHIP. The document identifies four stages with associated timeframes which must be adhered to:

- Stage 1 - Notification of project proposal and registration of interest (14 days from date letter sent to register as a registered Aboriginal stakeholders)
- Stage 2 - Presentation of information about the project
- Stage 3 - Gathering information about cultural significance (28 days for RAPs to provide a review and feedback to information about the project, and the proposed method for archaeological assessment)
- Stage 4 - Review of draft ACHAR (RAPs have 28 days from sending of the report to make a submissions).

2.3.2 Code of Practice for Archaeological Investigation of Aboriginal Objects in New South Wales (DECCW 2010b)

The Code of Practice sets out the detailed requirements for archaeological investigations of Aboriginal objects in NSW for activities that require assessment under the EP&A Act. The Code of Practice sets out in detail:

- Minimum qualifications for anyone undertaking archaeological investigation under the Code in NSW
- Assessment steps required to be undertaken for all archaeological investigations
- Assessment steps that may be required to be undertaken to adequately characterise the Aboriginal objects being investigated.

An AHIP to undertake sub-surface testing is not required if complying with the Code of Practice, as sub-surface testing complying with this Code is excluded from the definition of harm to an Aboriginal object.

2.3.3 Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW (OEH 2011)

This document provides guidelines for the investigation and assessment of Aboriginal cultural heritage (under Part 6 of the NPW Act) to explore the harm of a proposed activity on Aboriginal objects and declared Aboriginal places and to clearly set out which impacts are avoidable, and which are not.

The document provides:

- Guidance on the process for investigation and assessing Aboriginal cultural heritage in NSW; and
- Heritage NSW's requirements for an ACHAR.

3. Desktop assessment method

3.1 Objectives of desktop assessment

The desktop assessment provides an opportunity to review existing knowledge about the project area and its environs. This is done through analysing environmental information, synthesising previous archaeological information, reviewing relevant contextual information (e.g., historical documents; oral histories; anthropological assessments) and undertaking heritage database searches (as listed in Section 2). This indicates the type of archaeological evidence that we are likely to find in the project area and provides us with an indication of how well it is likely to have been preserved. It also provides context to understand and interpret material evidence of past land use in the project area.

3.2 Method

The method outlined here complies with Requirements 1-4 of the Code of Practice.

3.2.1 Review of previous archaeological work

In accordance with Requirement 1a of the Code or Practice, previous archaeological and ethnohistographical studies will be reviewed and synthesised. This will provide a baseline of knowledge about Aboriginal cultural heritage in the project area and environs. This information also underpins the subsequent significance assessment that will be undertaken for cultural heritage that is present in the project area.

This review will include the following:

- A review of previous archaeological and ethnohistographical work that is appropriate to the scale of the proposed activity, the size of the project area and the anticipated impacts
- A current AHIMS search – this is further discussed in Section 3.2.2
- A synthesis of the known archaeology and ethnohistories of the region, based on relevant published and unpublished sources, local knowledge, information from the AHIMS database and any other sources, as appropriate
- An evaluation of the results of previous reports relevant to the project area, reflecting current knowledge
- A description of the range, nature and extent of known cultural heritage sites and features within and in the vicinity of the project area. This information will be summarised and presented in a table in the report, including a description of the number of sites by type or feature present
- A summary description of any existing predictive models relevant to the project area. This will pay attention to models of past Aboriginal land-use strategies and cultural systems, as well as models of relevant taphonomic processes
- A discussion of the main issues and the regional character of the archaeology of the project area and its environs.

3.2.2 AHIMS and other register searches

An AHIMS search has been undertaken, in accordance with Requirement 1b of the Code of Practice.

The AHIMS search is required to:

- Be contemporaneous with the project. Heritage NSW considers that AHIMS searches have a currency of around 12 months, this may be less in areas of intense development activity. It may be necessary to undertake updated searches throughout the life of this assessment
- Include an area that encompasses the project area but is larger than it. While the Code of Practice does not specify the size the AHIMS search, it will be sufficient to also adequate landscape interpretation to occur and to understand site distribution within the landscape

- Include a search for any previous relevant reports within the AHIMS search area, particularly in the project area

These reports will be reviewed and synthesised to form part of the background assessment, including a discussion of variables that limit the power of the search results, such as how many previous assessments have been undertaken in the search area. Consideration will also be given to Native Title and Aboriginal land claims in the project area, including carrying out a search of the Native Title Register.

3.2.3 Environment and landscape context

A consideration of the environment and landscape is critical to the background assessment, partly because it allows us to understand what resources would have been available to Aboriginal people to use in the past, which would have determined how they used the land, but also to allow us to understand how this evidence is likely to have been preserved.

In accordance with Requirement 2 of the Code of Practice, the environment and landscape review will:

- Describe the landscape history of the project area and environs at a scale that will allow the project area to be characterised into meaningful units for any fieldwork
- Identify and describe the landforms within the project area
- Identify any geomorphic activity in the project area with a view to informing the likelihood of objects being present sub-surface or revealed by erosional processes
- Identify what erosional processes, if any, have occurred within the project area
- Describe the geology present within the project area
- Describe the soils present within the project area, including their formation history
- Identify the hydrology and hydrological processes within the project area
- Describe the natural resources and features that are likely to have influence land use patterns in the project area in the past, including any available records of culturally important plants and animals
- Describe the land use history of the project area
- Summarise how these variables are likely to influence the presence of Aboriginal objects within the project area.

This information will contribute to the development of a predictive model (Requirement 4) for the project area.

3.2.4 Discussion of local and regional Aboriginal land use and material traces

This section addresses Requirement 3 of the Code of Practice and provides a summary of the information obtained in the preceding sections. It includes a synthesis of that information and an analysis of what it may mean for the type of archaeological evidence that may be present in the project area, the levels of disturbance, and how this may affect what is there.

3.2.5 Predictive model

In accordance with Requirement 4 of the Code of Practice, a predictive model will be developed for the project area. It will be based on the information obtained through Requirements 1-3 and a specific multi-criteria spatial analysis that will be developed for this project. The model will be presented both on a map and in a series of statements. It will underpin the proposed approach for all fieldwork proposed for the project.

In accordance with Requirement 4a, the predictive model will:

- Integrate the distribution of known sites using the landscape descriptions identified in Requirement 2
- Characterise the patterns of the archaeological material from information derived in the known social and ethnohistorical review

- Consider the distribution of natural resources, and likely past land-use in the project area
- Consider the spatial and temporal relationships of sites
- Identify what sorts of archaeological deposits are likely to be present, and in what densities
- Make predictive statements about past Aboriginal occupation of the landscape based on the above
- Use these statements to inform a multi-criteria spatial analysis for the project area
- Present the predictive information in a map.

In accordance with Requirement 4b, the model will provide statements of predicted archaeological potential for the project area. These will be assessed through archaeological survey and subsurface testing, if required.

The predictive model will be refined and updated based on the results of fieldwork.

3.3 Documentation and analysis

The information from Requirements 1-4 will be presented in a report that addresses the requirements of Requirement 11 of the Code of Practice. It will include an analysis of that information and will be used to determine appropriate methodologies for fieldwork.

Information from this section will also be incorporated into an ACHAR, as outlined in the *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (DECCW 2011).

Note that some components of the desktop assessment have already commenced. AHIMS search results are provided in Appendix A. Preliminary findings on existing cultural heritage information relevant to the project area, and the predictive model based on these findings, are provided in Appendix B.

4. Survey method

4.1 Objectives of survey

The purpose of the archaeological survey is to systematically inspect the project area to identify physical traces of Aboriginal land use that are visible on the ground surface, as well as other visible features (for example, rock shelters, rock art, scar trees). It also allows for areas to be identified where it is considered likely that Aboriginal objects will be present, although they are not visible on the surface. These areas are known as Potential Archaeological Deposits (PADs).

The results of the survey allow the identification of areas where further assessment, in the form of sub-surface testing, will be required. Where sub-surface testing is not required, appropriate management measures can be determined to guide the ongoing management of archaeology in the project area.

The archaeological survey aims to:

- determine whether any Aboriginal objects are present within the impact zone of the project
- identify any areas with a likelihood of Aboriginal objects being buried beneath the surface, and which should be regarded as areas of PAD
- gather and record information on any sites associated with intangible cultural heritage that are present within or near to the project area.

If Aboriginal objects are present, the archaeological survey aims to gather information on the nature of these objects and the archaeological 'site' or 'sites' they make up. This information will be used in the ACHAR as a basis for a significance assessment of each site and its contents and any subsequent recommendations for heritage management mitigation to be taken.

The archaeological survey will adhere to the requirements of the Code of Practice.

4.2 Research questions

Several research questions have been designed to guide the archaeological fieldwork for this project. The purpose of the research questions is to provide parameters to allow the fieldwork to be focussed and to provide useful data to guide future management of Aboriginal objects throughout the life of this project. They can also help determine significance of Aboriginal objects and to assess the risk of harm as a result of the proposed activity.

The research questions that underpin the survey component of this project are broad, and focus on testing the predictive model. The following questions address this:

- What Aboriginal objects are visible and can site extents be identified?
- How does this compare to the predictive model?
- Are there areas of PAD, and what criteria have been used to identify them?
- What are the levels of disturbance on site and how have these impacted Aboriginal objects or areas of PAD?
- How do the results of the survey compare with other known sites in the region?

4.3 Method

In accordance with Requirement 5 of the Code of Practice, the archaeological survey will adopt a sampling strategy targeting survey on each distinct landform within a given soil landscape. The survey aims to cover all accessible areas and known Aboriginal objects or features where objects are likely to be.

The project area sits between the Murrumbidgee River, to the north, and the Murray River, to the south. Within and around the project area, the Murrumbidgee and Edward Rivers, and their tributaries (including Billabong Creek and Yanco Creek), form the most significant topographical features in the landscape. Watercourses in the area are highly meandering and, being not substantially incised below the level of the surrounding landscape, prone to overbank flooding. Watercourses have created the present-day landscape, which consists of floodplains of quaternary alluvial deposit filled with hydrological features including wetlands, lakes, paleo-channels and oxbow lakes (permanent, ephemeral, and dry).

The soils and sediments (or regolith) forming the current ground surface are almost entirely quaternary deposits of clay or loam sediment deposited alluvially. Mapped deposits of hard-rock surface geology are absent across the project area, except from the region immediately south of Narrandera, mapped as sandstone and siltstone (Pogson 1974).

In most parts of the region, the ground surface is level terrain that consists of floodplain sedimentary deposits. The topography of these areas is broken by hydrological features such as watercourses, wetlands, and lakes. In some areas, sediments have been reworked into aeolian (wind-blown) dunes made from sand or silty-sand.

The Yanco Creek system (i.e. Yanco Creek and associated watercourses flowing between the Murrumbidgee at Narrandera to Morundah, Wanganella, and Moulamein) runs along the course of a palaeochannel that originally formed between 20 and 13 thousand years ago (Pardoe and Martin 2011: 18). This palaeochannel formed at the end of the last glacial maximum, at which time it would have been a major river fed by melting glacial ice. For this reason, the sediments along the Yanco Creek system probably contain a higher proportion of sand than most channels in this part of the riverine plain. Paleochannel beds are generally sand-rich, having been created by rivers with much higher flow velocities than the present-day rivers. Exposed regions of the palaeochannel might also form surface areas of exposed sand, which have high archaeological potential due to their known use by Aboriginal people as areas to camp and to bury the dead (Pardoe and Martin 2011).

The hydrology of the region has been substantially altered by historical farming practises, with the flow and morphology of watercourses today being largely created by modern irrigation. In particular, seasonal snow-melt would have created consistent annual flood events prior to post-contact dams negating this effect. Many ephemeral lakes and wetlands that would have been regularly inundated prior to European settlement are now

rarely or never flooded due to modern water control (Pardoe and Martin 2011: 18) The changes to the region's hydrology have considerable consequences for predicting the distribution of archaeological sites, as the location and size of watercourses today might not correspond with the situation that existed prior to European contact.

4.3.1 Survey sampling strategy

Requirement 5a of the Code of Practice specifies that all landforms that will be potentially impacted by the proposed activity must be surveyed, with a proportional emphasis placed on landforms that have been assessed as likely to have archaeological potential. These areas have been identified through the development of the predictive model in accordance with Requirement 4.

The predictive model, based on background research carried out so far (see Appendix B) identifies the following:

- Elevated landforms near watercourses, or other water features such as lakes and swamps, have high archaeological potential
- Landforms adjacent to permanent water features have a higher archaeological potential than those adjacent to ephemeral watercourses, though noting that the permanence of water features in the current landscape might not reflect their permanence prior to European settlement
- Landforms with thick soil profiles in soft alluvial or aeolian sands or sand-rich sediments will have high archaeological potential
- Areas of remnant vegetation close to waterways are likely to contain culturally modified trees if the trees are of sufficient age
- Areas of PAD are likely to be present close to water, in locally elevated areas with surface soils or sediments
- The most common archaeological site types are likely to be modified trees, stone artefacts (isolated or in clusters), middens, and hearths (as evidenced by distinct structured clusters of baked clay heat retainers)
- Stone artefacts, middens and hearths can be present on the ground surface or buried in subsurface soils and sediments.

The sampling strategy then will survey all landforms within the project area that will be potentially impacted by the proposed activity, focussing on the following:

- Elevated landforms near watercourses, or other water features such as lakes and swamps, particularly adjacent to permanent water
- Landforms with thick soil profiles in soft alluvial or aeolian sands or sand-rich sediments
- Locally elevated areas with surface soils or sediments close to water
- Areas of remnant vegetation close to waterways and mature trees.

It is proposed that the survey covers all areas that will be subjected to ground-disturbing works by the project.

These areas include all areas of ground disturbance associated with the project elements listed in Section 1.1, such as:

- Locations where regulators would be constructed or replaced
- Locations where earthworks would be constructed to divert water, for example coffer dams and diversion channels
- All access roads that would be used by construction vehicles and machinery
- All roads, culverts or other infrastructure that would be upgraded to aid construction or to mitigate the impact of changed water flow regimes on land-users
- Temporary construction yards and laydown areas for vehicles and equipment.

At the time of writing, it has not been decided whether the survey will cover areas that would be inundated as a result of the project but which would not be impacted by any ground-disturbing works during the construction process. It is currently unknown whether the project would represent an impact to any Aboriginal objects in the inundation areas. Further information is being generated on whether the inundation of areas would result in any impact to the ground surface, such as erosion of channels or channel banks. Predictive modelling of the extent of the inundation areas will be carried out, which will enable predictions on the extent and severity of any impacts to the ground surface and subsurface deposits.

Based on this information, 3Rivers will produce an addendum to this method document, which will set out whether the inundation areas are proposed to be surveyed, and if so whether it is proposed to survey these areas in full or in part. This addendum will be circulated to all RAPs, for their review and feedback.

4.3.2 Survey method

In accordance with Requirement 5b of the Code of Practice:

- The project area will be divided into appropriate survey units. These survey units will be determined prior to the commencement of fieldwork and will be illustrated on a map to guide fieldwork
- Systematic pedestrian survey will occur across the survey area (see Section 4.3.1)
- The survey area will be divided into transects in the field where appropriate. Transects will be defined by one or more of the following:
  - Landform boundary
  - Subject area boundary
  - Harm area boundary
  - Significant change in survey conditions
  - Other arbitrary termination
- The following details will be recorded for each transect and survey unit:
  - Landform
  - Ground surface visibility
  - Degree of identifiable disturbance
  - Beginning and end points of transects or boundaries of survey units using handheld GPS receiver (preferentially DGPS), in accordance with Requirement 8a of the Code of Practice
  - Datum points will be recorded using the MGA94 cartesian co-ordinate system in accordance with Requirement 8b of Code of Practice
- All Aboriginal sites will be recorded in accordance with Requirements 6 and 7 of the Code of Practice:
  - The spatial extent of objects will be recorded, or direct evidence of their location, including obvious physical boundaries
  - Areas identified by the RAPs on the basis of cultural information will be recorded
  - Information about the determination of site boundaries will be recorded
  - Areas of PAD will be recorded, along with information about why an area has been identified as PAD
  - Photographs will be taken, including appropriate graded metric scales and ranging poles, surveying staff or tape measure
  - Drawings and sketches will be made as appropriate
- Survey coverage will be recorded in accordance with Requirement 9 of the Code of Practice:
  - Visibility and exposure will be independently described for each survey unit
  - Visibility will be determined and recorded to the nearest 10%

- Description of areas of exposure and processes responsible, natural or otherwise
- The size of areas of exposures will be estimated to the nearest 10%
- Obtrusiveness of features present will be described
- Quantification of survey coverage will be discussed including a description of sampling procedure.

If Aboriginal objects are found within the survey area, the area in which these objects are located would then be recorded as an Aboriginal site. An Aboriginal Site Recording Form would be completed by 3Rivers and lodged on AHIMS.

5. Documentation and reporting

The Aboriginal cultural heritage assessment will be reported in accordance with Requirement 11 of the Code of Practice. This will include a detailed description of what was found during the survey and include:

- A quantification of the results
- Interpretation of what was found
- Analysis and discussion based on the quantification and interpretation
- An assessment of the scientific values and significance of what was found
- An impact assessment
- Determination of appropriate management measures, including consideration of requirements for further assessment.

An ACHAR, documenting the results of the Aboriginal cultural heritage assessment, will be written by 3Rivers. The ACHAR will conform to the requirements of the Code of Practice (DECCW 2010b), the *Aboriginal Cultural Heritage Consultation Requirements for Proponents 2010* (DECCW 2010a) and the *Guide to Investigating, Assessing and Reporting on Aboriginal Cultural Heritage in NSW* (OEH 2011). The report will include:

- A description of the proposal, the area proposed to be impacted, and the landscape and environmental characteristics of the surrounding region
- A description of the consultation process between 3Rivers and RAPs
- Background information on Aboriginal land-use, land titles or interests in the region. This will include information from historical and ethnographic sources, information submitted to 3Rivers during the consultation process, information from previous archaeological studies, and searches of land titles and interests
- A detailed description of the methods used during field survey
- Results of field survey and rationale for test excavations (if any)
- An assessment of the significance of any Aboriginal objects and sites discovered by the investigation. This would include both scientific significance and cultural significance
- A description of any identified impacts to Aboriginal heritage by the proposed development including an assessment of inadvertent impacts, consistent with the guidelines, that might occur
- A discussion of harm minimisation and management strategies the proposal proposes to employ
- A discussion and assessment of the significance of the identified impacts to Aboriginal heritage. This involves using the assessed significance of the site(s) proposed to be impacted, to assess the loss to the heritage resource that the project would represent.
- Recommendations of management actions that should be implemented to avoid or minimise harm to Aboriginal cultural heritage. These recommendations might include undertaking further archaeological investigation (e.g. test excavation of areas of PAD proposed to be impacted, if any).

The ACHAR would be circulated to all RAPs in draft form. A 28-day period to review the document and provide input and comments will be provided at this point. The final report, incorporating input from RAPs, will be lodged with Heritage NSW.

All site records, including site notebooks, register of Aboriginal objects and PADs identified, photographs, drawings and geospatial data will be kept in a legible form for at least 5 years, in accordance with Requirement 12 of the Code of Practice.

6. Personnel

The fieldwork team that carries out the archaeological survey will comprise archaeologists from 3Rivers, and site officers nominated by the RAPs. The exact numbers will be determined once Stage 1 consultation has been completed.

6.1 Minimum qualifications required for compliance with the Code of Practice

Archaeologists undertaking archaeological investigations in NSW in accordance with the Code of Practice must have the following qualifications and experience:

- A minimum of a bachelor's degree with honours in archaeology or relevant experience in the field of Aboriginal cultural heritage management
- The equivalent of two years full-time experience in Aboriginal archaeological investigation, including involvement in a project of similar scope
- A demonstrated ability to conduct a project of the scope required through inclusion as an attributed author on a report of similar scope.

The above qualification requirements apply to the lead archaeologist on the field survey, to the archaeologist leading the assessment, and the primary author of the resulting ACHAR.

The above requirements do not apply to site officers nominated by the RAPs who take part in fieldwork.

6.2 3Rivers assessment team for this project

The Project Lead for this project is Oliver Macgregor (Senior Archaeologist). Oliver has a PhD in archaeology and palaeoanthropology from the Australian National University, and over ten years' experience as an archaeologist.

Fran Scully (Principal Archaeologist) is the project's Heritage Technical Lead and Reviewer. Fran holds a Master of Science in archaeological geophysics from the University of Bradford and has over 29 years' experience as a field archaeologist, consultant archaeologist, cultural heritage advisor, heritage regulator and policy advisor.

7. Other Aboriginal cultural heritage assessment information

7.1 Safety and access requirements

The survey of the proposal area would be completed under the 3Rivers Health, Safety and Environment (HSE) field pack. All field staff will be required to sign on to this document prior to commencing work. This document will detail the potential risks that might be encountered during fieldwork, and the risk-reduction controls that will be employed.

All field staff will be contacted by 3Rivers in advance of fieldwork occurring, to notify them of safety requirements such as required Personal Protective Equipment (PPE) and other equipment/supplies to bring with them to the survey.

Prior to field staff heading to site, 3Rivers staff will have completed the following:

- A check of the RFS bushfire danger rating before heading to site http://www.rfs.nsw.gov.au/fire-information/fdr-and-tobans. Work will not occur when bushfire hazard rating is Extreme or Catastrophic. If the fire rating is High, Very High or Severe, the risk of carrying out work will be re-assessed
- A check of forecast weather conditions. Work schedules might be changed if extreme weather or weather posing a safety risk to field staff is forecast
- A check of river levels and flood conditions. Works schedules might be changed if inundation would create problems for access or pose a safety risk to field staff.

7.2 Project timelines

Project timelines are outlined in Table 3. Please note that the dates included are estimates at this stage in the process, and are provided to allow for forward planning of personnel and resources.

Table 3: Project timelines

Project milestone	Commencement date
Circulation of draft Method (this document) to RAPs, for 28-day review period	7.2.2022
Archaeological survey fieldwork	Late March 2022
Circulation of draft ACHAR to RAPs for review	May 2022
Provision of comments from RAPs on the draft ACHAR	June 2022
Gathering of information on cultural significance and cultural values associated with Aboriginal objects and places within or relevant to the project area	Throughout, until finalisation of the ACHAR
Finalisation of the ACHAR in consideration of comments received	Mid to late June 2022

7.3 Contact details

For more information, or to discuss the project and the proposed Aboriginal cultural heritage assessment, please do not hesitate to contact:

Oliver Macgregor

Senior Archaeologist, 3Rivers

Appendix B. Existing cultural heritage information

B.1 Environmental context

B.1.1 Geology and soils, topography, and hydrology

The Murray Basin forms the southern half of the Murray-Darling system, which extends across Victoria, New South Wales and stretching into Queensland and South Australia. The project area sits toward the eastern end of the Murray Basin, within an area referred to as the Riverine Plain or Riverine Bioregion (Pardoe and Martin 2011) The Murray Basin is a low relief depression covering an area of more than 300,000 km². The Murray River is the main surface drainage system in the region, flowing from its headwaters in the Great Dividing Range to form a border between Victoria and New South Wales. The basin is located in an important transitional zone between the humid coastal fringe and the arid interior (Prendergast 2004, p. 7). The Riverine Plain land system formed during the Pliocene (1.6 – 5 million years ago), when the Neogene sea retreated from the Murray Basin creating the Murray River and its tributaries, and subsequently an extensive and complex alluvial plain. The predominant sedimentary processes within the Riverine Plains are fluvial and aeolian, episodically deposited between glacial and interglacial conditions (Cupper *et al.* 2003). The riverine plain has an average gradient of 20cm per km – an extremely low gradient that enables meandering rivers and contributes to the region's flood-proneness.

The project area sits between the Murrumbidgee River, to the north, and the Murray River, to the south. Within and around the project area, the Murrumbidgee and Edward Rivers, and their tributaries (including Billabong Creek and Yanco Creek), form the most significant topographical features in the landscape. Watercourses in the area are highly meandering and – being not substantially incised below the level of the surrounding landscape – prone to overbank flooding. Watercourses have created the present-day landscape, which consists of floodplains of quaternary alluvial deposit filled with hydrological features including wetlands, lakes, paleo-channels and oxbow lakes (permanent, ephemeral, and dry).

The soils and sediments (or regolith) forming the current ground surface are almost entirely quaternary deposits of clay or loam sediment deposited alluvially. Mapped deposits of hard-rock surface geology are absent across the project area, except from the region immediately south of Narrandera, mapped as sandstone and siltstone (Pogson 1974).

In most parts of the region, the ground surface is level terrain that consists of floodplain sedimentary deposits. The topography of these areas is broken by hydrological features such as watercourses, wetlands, and lakes. In some areas, sediments have been reworked into aeolian (wind-blown) dunes made from sand or silty-sand.

The Yanco Creek system (i.e. Yanco Creek and associated watercourses flowing between the Murrumbidgee at Narrandera to Morundah, Wanganella, and Moulamein) runs along the course of a palaeochannel that originally formed between 20 and 13 thousand years ago (Pardoe and Martin 2011: 18). This palaeochannel formed at the end of the last glacial maximum, at which time it would have been a major river fed by melting glacial ice. For this reason, the sediments along the Yanco Creek system probably contain a higher proportion of sand than most channels in this part of the riverine plain. Paleochannel beds are generally sand-rich, having been created by rivers with much higher flow velocities than the present-day rivers. Exposed regions of the palaeochannel might also form surface areas of exposed sand, which have high archaeological potential due to their known use by Aboriginal people as areas to camp and to bury the dead (Pardoe and Martin 2011).

The hydrology of the region has been substantially altered by historical farming practises, with the flow and morphology of watercourses today being largely created by modern irrigation. In particular, seasonal snow-melt would have created consistent annual flood events prior to post-contact dams negating this effect. Many ephemeral lakes and wetlands that would have been regularly inundated prior to European settlement are now rarely or never flooded due to modern water control (Pardoe and Martin 2011: 18) The changes to the region's hydrology have considerable consequences for predicting the distribution of archaeological sites, as the location and size of watercourses today might not correspond with the situation that existed prior to European contact.

B.1.2 Climate and biodiversity

The present-day climate of the geographic region is characterised by cool wet winters and hot dry summers. Rainfall is winter dominant. The project area sits on the boundary between a temperate climate to the east and a semi-arid climate to the west.

During the Pleistocene/Early Holocene the area was less arid, as indicated by the extensive large palaeochannels that have been identified throughout the Murray Basin. The paleochannels, and their associated paleo-floodplain, which were formed during or at the end of glacial maxima, changed with the stabilisation of the climate at the start of the Holocene around 10 to 15 thousand years ago. It is during this period that the current system of rivers and other watercourses formed (Klaver 1998). Changes to associated resources likely influenced the mobility of past Aboriginal patterns (Watson and Anderson 2014). The distribution of earlier and later sites could well be different as a consequence, though at this stage few securely dated sites are present in the region so robust conclusions cannot yet be made.

Vegetation across the region today is largely River Red Gum (*Eucalyptus camaldulensis*) and Black Box (*Eucalyptus largiflorens*) woodland and forest, which are generally restricted to corridors along rivers and creeks having been cleared for agriculture in other areas. Native plant species have been displaced by agricultural crops and introduced weeds across most of the region. Martin and Pardoe describe the likely vegetation landscape that existed prior to European contact as consisting of 'fringing woodlands along the rivers and creeks and around swamps and lakes; Callitris woodlands and mixed shrublands on some large palaeochannel features; and the characteristic wide-open plains covered with chenopods or Boree and Whitetop grass' (Pardoe and Martin 2011: 20).

Prior to the large-scale irrigation present in the landscape today, the grazing of sheep and cattle also altered the vegetation of the region, destroying many plant communities. Reed beds in swamps, lakes, and along floodplains adjacent to watercourses were substantially reduced or eradicated by grazing animals. Prior to European settlement, the vegetation landscape of the region is likely to have been more diverse than it is now, consisting of a patchy mosaic of grassland, chenopod scrubland, and woodland (Pardoe and Martin 2011: 20). As a consequence, the diversity of plant and animal resources available to Aboriginal people would have been far greater prior to European settlement than the current environment possesses.

B.1.3 Historical land use

The riverine plains in and around the project have predominantly been used to graze sheep and cattle, which has occurred in the region for approximately the last 150 years. The flat landscape and access to rivers and creeks makes the area highly suited to irrigation farming, with large-scale irrigation increasing markedly in the 1980s and 1990s (Pardoe and Martin 2011). Irrigation farming generally involves substantial earthworks to level fields and construct hydrological features such as canals and embankments. This method of farming consequently disturbs the archaeological record, substantially altering or destroying archaeological sites.

B.2 Aboriginal heritage and archaeological material

Few large-scale systematic studies of Aboriginal archaeological sites have been carried out in the riverine plains of the Murrumbidgee and its tributaries, in contrast with better-studied neighbouring areas such as the lower Murray and the Willandra Lakes. Our understanding of the archaeological sites in the region comes mostly from small-area studies including commercial archaeological assessments and surveys commissioned by Local Aboriginal Land Councils (e.g. Martin 1996). These studies provide detailed information on specific areas within the region, which can be extrapolated to make predictive statements about the archaeological resource of the region and the project area.

From work carried out along the Murrumbidgee and Murray Rivers and their tributaries (e.g. Biosis 2015; Murray Local Land Services 2013; Pardoe and Martin 2011), it is known that a number of different archaeological site types are frequently present in the region. These include:

Fish traps and weirs. Stone weirs, walls, and other features for trapping or attracting fish were constructed by Aboriginal people in the beds of rivers and creeks. Many fish traps were built across the mouths of swamps and reed beds, to hold fish and water within these areas after seasonal floodwaters receded (Pardoe and Martin

2011: 29) These features can survive in the present landscape, though many were destroyed as rivers were cleared for the purposes of irrigation or to make rivers more navigable.

Culturally modified trees. These include scarred trees and carved trees. Scarred trees can possess scars of varying size: the largest scars were probably the result of harvesting bark for canoes. Smaller scars are probably the result of harvesting bark for shields, coolamons (dishes), or pieces for house construction. The smallest scars are the remnants of holes cut to extract honey, possums or other tree-dwelling animals. Small scars could also have been cut to provide toe-holds for climbing the tree, or as marks cut on the tree for symbolic or communication functions. For example, scars could function to mark specific locations in the landscape (Pardoe and Martin 2011: 31). European surveyors also cut marks into trees, though these are usually recognisable for containing chiselled letters or numbers identifying the survey mark, and are often triangular in shape.

Hearths. Hearths are a frequent site type recorded in the region. These structures are constructed to retain the heat of fires, usually for cooking plant and animal foods. In the region, the material used in their construction is usually clay or clay-rich sediments, though hearths made from stone could potentially be found in areas where stone is common and easily procured. Some hearths are discovered in a fairly intact state, while others occur as clusters of baked clay fragments. It is important to note that natural fires can also create areas of baked clay, for example where trees and their root systems have been burnt out during bushfires, which can be mis-identified as remnants of Aboriginal hearths.

Stone artefact scatters. Stone artefacts are one of the most frequently identified Aboriginal objects in the riverine plains region, and scatters of stone artefacts are one of the most frequently recorded site types. Artefacts found in the region include flaked artefacts (flakes, cores, retouched flakes and a variety of implements including backed artefacts). Ground artefacts, including ground-edge axes, grinding dishes, and topstones, have also been found – though in lower frequencies than flaked artefacts, probably due to the longer use-life of ground artefacts. A variety of materials have been used by Aboriginal people in the region to produce stone artefacts, including sandstone, quartzite, and silcrete for grindstones and hammerstones, and chert, quartz, and silcrete for flaked artefacts.

Middens, which consist of cohesive mounds or diffuse scatters of shellfish and animal bones, have been frequently recorded in the region, along the edges of rivers and their associated lakes and flood channels. These sites are prone to destruction during floods, and consequently generally only survive on elevated banks, river terraces, or sandhills. Middens are generally dominated by shellfish remains, with the most common species being freshwater mussel and freshwater snail.

Mounds. Mounds are a common and visually obtrusive site across the riverine plain as a whole. Mounds were used as habitation sites and areas to cook food and process plant materials. Mounds have also been recorded as places for burying the dead. It is likely that mounds were ‘grown’ wholly or fully through their use by Aboriginal people. Progressive and repeated occupation of mounds would result in the deposition of artefacts and midden material, and the construction of cooking ovens would also lead to mound growth (Pardoe and Martin 2011: 32).

Burials. Burials have been found in a number of different landforms in the riverine plain, including around lakes and on high ground near rivers. Along the Lachlan and Murrumbidgee Rivers, in contrast to other rivers such as the Murray and the Darling, burials have been found located on plains away from high ground and away from rivers and lakes (Pardoe and Martin 2011: 39). Burials were generally marked with a raised earth mound or ridge visible on the ground surface, though in the present landscape these raised features can be worn away through erosion and difficult or impossible to distinguish. Areas of soft sandy ground appear to have been preferred locations for burials due to the ease of digging in these locations.

B.3 Aboriginal Heritage Information Management System (AHIMS) search results

A series of searches of AHIMS database was carried out by Dr Oliver Macgregor (Senior Archaeologist, 3Rivers) on October 1, 2021.

It should be noted that the AHIMS database does not represent an exhaustive list of all Aboriginal objects in NSW. Rather, Aboriginal objects are recorded on AHIMS once they have been identified, usually as a result of an assessment process that is part of some form of development. A lack of recorded Aboriginal objects within a particular area does not necessarily mean that Aboriginal objects will not be present, just that they have not been previously identified and recorded.

A series of contiguous rectangular search areas were employed, to encompass all of the project area and a buffer zone of the surrounding landscape. Each search area was assigned a name for reference. The coordinates of the search areas' boundaries are provided in Table 4.

Table 4: AHIMS search area boundaries

Search area name	Eastings		Northings	
Yanco Moulamein 1	207000	255000	6110000	6135000
Yanco Moulamein 2	207000	255000	6085000	6110000
Yanco Wanganella 1	255000	305000	6104000	6129000
Yanco Wanganella 2	255000	305000	6096000	6104000
Yanco Wanganella 3	255000	305000	6090000	6096000
Yanco Wanganella 4	255000	305000	6085000	6090000
Yanco Wanganella 5	255000	305000	6079000	6085000
Yanco Conargo 1	305000	355000	6094000	6119000
Yanco Conargo 2	305000	355000	6069000	6094000
Yanco Jerilderie 1	355000	405000	6099000	6129000
Yanco Jerilderie 2	355000	405000	6069000	6099000
Yanco Morundah 1	405000	455000	6169000	6174000
Yanco Morundah 2	405000	455000	6154000	6169000
Yanco Morundah 3	405000	455000	6129000	6154000
Yanco Morundah 4	405000	455000	6109000	6129000
Yanco Morundah 5	405000	455000	6079000	6109000

It is important to note that the combined AHIMS search area encompasses an area much larger than the project area.

The combined search area's western edge is around 22km west of Moulamein. Its eastern edge is around 3km west of Narrandera. Its northern edge is on the southern outskirts of Leeton, and its southern edge is around 17km south of Jerilderie.

The search area contains 994 previously recorded Aboriginal sites, all of which are open sites (Appendix A). The site types recorded include artefact scatters, middens, burials, earth mounds, culturally modified trees, stone quarries, and potential archaeological deposits, as well as sites of intangible cultural heritage such as ceremony or dreaming sites.

B.4 Archaeological predictive model

The following predictive model is used to identify areas of archaeological sensitivity. The model is based on a 'land system' or 'archaeological landscape' model of site location. This type of model predicts site location based on known patterns of site distribution in similar landscapes, and across landform types.

The predictive model is based on:

- The interpretation of the distribution of known sites close to the project area
- A review of previous impacts to the project area and the potential effects of these impacts on the archaeological record.

The following specific predictive points are noted for the landscape the project area sits within:

- Elevated landforms near watercourses, or other water features such as lakes and swamps, have high archaeological potential
- Landforms adjacent to permanent water features have a higher archaeological potential than those adjacent to ephemeral watercourses, though noting that the permanence of water features in the current landscape might not reflect their permanence prior to European settlement
- Landforms with thick soil profiles in soft alluvial or aeolian sands or sand-rich sediments will have high archaeological potential
- Areas of remnant vegetation close to waterways are likely to contain culturally modified trees if the trees are of sufficient age
- Areas of potential archaeological deposit (PAD) are likely to be present close to water, in locally elevated areas with surface soils or sediments
- The most common archaeological site types are likely to be modified trees, stone artefacts (isolated or in clusters), middens, and hearths (as evidenced by distinct structured clusters of baked clay heat retainers)
- Stone artefacts, middens and hearths can be present on the ground surface or buried in subsurface soils and sediments.

A number of post-depositional processes can result in disturbance or destruction of archaeological sites. Identifying areas of high disturbance is an important factor in the predictive model. Disturbance can alter the patterns of site location expected from the points above. The following general predictive points relate to the effects of site disturbance:

- Landforms which have been subject to frequent high-energy flooding events will have reduced archaeological potential. High energy flooding is likely to be restricted to river, creek, or flood-runner channels, with floodwaters outside these channels typically being slow-moving
- European land-use practices can have a range of impacts to sites. Areas that have been excavated, inundated, or buried under fill or stockpiled materials will have low archaeological potential.

Many post-depositional processes result in the movement of Aboriginal objects away from their original location and context, without resulting in damage or destruction to the objects themselves. Some post-depositional processes will result in the destruction of some, but not all, artefacts within a site. Only severe processes will destroy or remove all Aboriginal objects from a landform. Factoring post-depositional disturbance into the assessment of a landform's archaeological potential should consequently take a precautionary approach. A landform should be assumed to retain archaeological potential unless there is compelling evidence for severe disturbance that can confidently inferred to have removed all sites from the landform.

B.4.1 Constraints to the archaeological predictive model

The review of the project's regional archaeological context is based on previously recorded sites in the AHIMS database. At the time of writing, the understanding of the region's cultural heritage context does not include input from Aboriginal stakeholders. Information received from RAPs will be used to refine the predictive model, and will be incorporated in future versions of the predictive model.

The predictive model considers archaeological objects and sites only. No predictive statements are made relating to sites of intangible heritage value.

Dear [redacted],

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,
Oliver.

Hi [redacted]

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Subject: RE: SDLAM - Yanco Survey Roster

Hi Karen,

The Upper Yanco site survey will require us to jump in local DPIE vehicles, due to concerns regarding biological contamination. As in, the property owner would like to avoid us bringing problematic weeds with us when we visit site. I anticipate that we will all be driven in to site from the meeting location at Narrandera. As details become available we will inform you.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Hi Karen,

Yes of course. The meeting place for 10 May 2022, will be at the Narrandera Caltex petrol station located at: Newell Hwy, Narrandera NSW 2700. We should meet at 9 am.

Our roster is pretty full for this section of the survey so we should only be able to accommodate 1 or 2 representatives.

Kind regards,

Subject: SDLAM - Yanco Survey Roster

Dear all,

Please find attached the current roster for the upcoming Aboriginal heritage survey for the Yanco Modernisation Project for SDLAM. This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Whether the survey starts on Monday or Wednesday, we will be meeting at 9 am at the Deniliquin Pioneer Tourist Park, located at 167 Cobb Hwy, Deniliquin NSW 2710.

In the meantime, I wish you all a very happy weekend and I look forward to meeting you all on Monday or Wednesday.

Subject: Yanco Modernisation Project - Aboriginal cultural heritage survey planning

Dear Yalmambirra (Wiradjuri Council of Elders),

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Subject: Fwd: RAP Inspection - Dry Lake - Monday 9 May

Dear all,

Thank you for your ongoing consultation in regard to the Aboriginal cultural heritage assessment at Yanco creek for the overall SDLAM project. On Monday we will be surveying an area of the Upper Yanco. We will meet at 9am at the Caltex at Nerranderra and proceed to site using Water Infrastructure vehicle. This is to comply with a biological restriction imposed on site. For further details please see David Clarke's email below.

If you have any questions please do not hesitate.

Kind regards,

Pauline Ramsey

Subject: [EXTERNAL] RAP Inspection - Dry Lake - Monday 9 May

Pauline,

As discussed, WINSW staff will meet with 3Rivers staff and the RAP members at the Caltex Service Station at the southern end of Narranderra at 9:00am on Monday 9 May. In order to comply with the biosecurity protocols agreed to with the landholder we will transfer everyone into WINSW vehicles that have been fully washed down prior to the inspection (This includes vehicles driven by Gubba, Emily and myself).

We will then drive to the site to meet the landholder. I am waiting for the landholder to advise if he wants us to meet him at the font gate or the site.

Regards

David Clarke

Hi [redacted]

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand

Hi Roley,

My name is Pauline and will be taking over this project from Oliver. I am glad you can participate in the survey. Could you let me know what days you are available on the week of 2 May 2022? I am currently compiling a roster which, I hope, will be made available next week. Details regarding when and where to meet are still being discussed, but as soon as I know I will get in touch.

Kind regards,

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:

Remuneration:

The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,

Oliver.

Dr Oliver Macgregor

> Please find attached the current roster for the upcoming Aboriginal heritage survey for the Yanco Modernisation Project for SDLAM. This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Whether the survey starts on Monday or Wednesday, we will be meeting at 9 am at the Deniliquin Pioneer Tourist Park, located at 167 Cobb Hwy, Deniliquin NSW 2710.

In the meantime, I wish you all a very happy weekend and I look forward to meeting you all on Monday or Wednesday.

Dear Yalmambirra (Wiradjuri Council of Elders),

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day

Dear Leon,

I hope this email finds you well. Due to the recent weather, our ongoing fieldwork for the Yanco Creek Modernisation project as part of SDLAM, has been postponed until the New Year. Please find attached a letter summary of our efforts so far on the project as well as a copy of the PowerPoint we presented at Water Infrastructure NSW's First Nations meetings in September 2022, in Narrandera and Deniliquin.

Should you have any questions regarding our progress, please do not hesitate to get in touch at the details outlined below.

Kind regards,

Pauline Ramsey | 3Rivers | Archaeologist
Email: Pauline.ramsey@jacobs.com
Level 15, 133 Castlereagh Street | Sydney, NSW 2000 | Australia

3Rivers

I acknowledge the Traditional Owners of Country upon which I work, and pay my respects to them, their culture and their Elders past, present and future.

APPENDIX A7 – INCOMING

Yamma (hello) Alexandra,

You where contacted some time ago by Matt Kendall re-Yanco Creek regarding my concerns.

You have since emailed me some time ago. You also rang and spoke to me some time ago.

Since then nothing. The silence is getting louder.

I'm not playing games with our Wiradjuri culture, I have advised you of our concerns, nothing has happened.

Yanco Creek Upgrade is just another project where Government think they can play with our country, people and culture as they will.

Times area changing.

I have cc'd our Walumarra Wiradjuri Consultancy Group into this email. They are the knowledge holders and protectors of our land and people. Also Warren and Pauline Ramsey are in this email trail as well. Nothing is hidden when I yarra (talk)

The Archaeologist companies who your department contracts to, pay huge money too, and seek advise from are not the knowledge holders or experts, re our Wiradjuri culture, customs and "lore". We are !

I will now seek to look elsewhere for help. I will ensure that this garray (land) is protected from those who are ignorant of what "Gunhi Ngurambang" (Mother Country) gives us.

She gives us Life, Stories, Bloodlines, Love, History, Strength, Connection to Country and purpose for being here.
We have cared for and continue to care for place we all now call "Gunyah" (home) for over 100,000 years +

On behalf of ngadhi mudyigaang (My Elders) I will continue to do what I can to stop the erosion of our culture.

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Subject: RE: Mark Saddler

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Hi Alexie

The total disregard and disrepect displayed to Mark and myself was insulting and hurtful. I believe that Mark and I have be advocating improvement to the Yanco Creek system for the last 44 years and to hear our involvement was way laid on the say so of a archaeologist beggars belief. Their arrogance toward Mark and I is unacceptable and the inaction by DPE has been typical of a bureaucracy that undervalues true consultataion and collaboration.

Please ensure you get back to us in a timely fashion

Subject: RE: Mark Saddler

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Matt Kendall

Yamma Matt,

I got a phone call just now from Warren your Aboriginal Officer with regards to my email I sent to you.

I have no issues with him.

However I do with you and DPIE.

As you will not response to my respectful emails I now insist that "Walumarra Wiradjuri Consultancy Group" have urgent meetings with yourself and your Director who is responsible for what you do.

Can you please send me the email address of the Director of your department so I can liaise directly with them ?

I have also CC'd in my Directors of Walumarra and Dr Joe McGirr who is our local member and a very marang mudyi (good friend) of Wiradjuri Mayiny (people)

I await your timely email.

Subject: Yanco Modernisation Project - Aboriginal cultural heritage survey planning

Dear Bangerang Aboriginal Corporation,

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,
Oliver.

Hi David,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Yamma (hello) Alexandra,

You where contacted some time ago by Matt Kendall re-Yanco Creek regarding my concerns.

You have since emailed me some time ago. You also rang and spoke to me some time ago.

Since then nothing. The silence is getting louder.

I'm not playing games with our Wiradjuri culture, I have advised you of our concerns, nothing has happened.

Yanco Creek Upgrade is just another project where Government think they can play with our country, people and culture as they will.

Times area changing.

I have cc'd our Walumarra Wiradjuri Consultancy Group into this email. They are the knowledge holders and protectors of our land and people. Also Warren and Pauline Ramsey are in this email trail as well. Nothing is hidden when I yarra (talk)

The Archaeologist companies who your department contracts to, pay huge money too, and seek advise from are not the knowledge holders or experts, re our Wiradjuri culture, customs and "lore". We are !

I will now seek to look elsewhere for help. I will ensure that this garray (land) is protected from those who are ignorant of what "Gunhi Ngurambang" (Mother Country) gives us.

She gives us Life, Stories, Bloodlines, Love, History, Strength, Connection to Country and purpose for being here.

We have cared for and continue to care for place we all now call "Gunyah" (home) for over 100,000 years +

On behalf of ngadhi mudyigaang (My Elders) I will continue to do what I can to stop the erosion of our culture.

Hi Mark

Thanks for taking the time to discuss the issue on Friday that sis outlined in your email.

The project manager for the Yanco Modernisation project is Water Infrastructure NSW- Matt has included Brad Hollis in the emails to you. Brad is the Director of Southern projects who has suggested Alexie Bull as the appropriate contact for you.

Alexie is cc'd into this email:

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.

Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???

We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.

In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just “Tick A Box” events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a “Desk Top Study” and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Yamma Matt,

I got a phone call just now from Warren your Aboriginal Officer with regards to my email I sent to you.

I have no issues with him.

However I do with you and DPIE.

As you will not response to my respectful emails I now insist that “Walumarra Wiradjuri Consultancy Group” have urgent meetings with yourself and your Director who is responsible for what you do.

Can you please send me the email address of the Director of your department so I can liaise directly with them ?

I have also CC’d in my Directors of Walumarra and Dr Joe McGirr who is our local member and a very marang mudyi (good friend) of Wiradjuri Mayiny (people)

I await your timely email.

Hi Pauline

I find your email very distressing and completely obtuse. [redacted] has been consulting with NSW Water and other bodies concerned with the Yanco Creek upgrade and upkeep for over 20 years if not more and then to be discarded from protecting and speaking on behalf of the system at the last moment has left us speechless and disheartened.
[redacted] had a number of Wiradjuri people who grew up living, laughing, fishing and protecting the biodiversity of this unique and incredible creek system that connected the Yindi Mulwala(Murray River), Kolety/Golety (Edward River) and the Murrumbidya (Murrumbidgee River)
people,ready to participate in this ACH survey. At the last moment I had to tell these people they would not be able to speak on behalf of country and to cancel any other plans they had.

Again I cannot stress how disappointing this has all been and to realise again that archaeological firms decide who has the right to speak on behalf of country without any regards to our previous advocacy. [redacted] has alway had the opinion that we cannot build a big enough boat to send all the first boat people back overseas and that life must go on so we negotiate what best for our environment and our people given the restraints we have in today's society.

[redacted] believes in Yindyamarra. It is a pity that Environmental Solutions Australia and New Zealand and DPIE has not displayed the same.

Regards

Subject: SDLAM - Yanco Survey Roster

Dear all,

Please find attached the current roster for the upcoming Aboriginal heritage survey for the Yanco Modernisation Project for SDLAM. This schedule was carefully planned based on the targeted areas of survey and the degree of local knowledge each of you possesses for these areas. As previously stated, I will be in touch with each of you on Sunday at no later than 3 pm to confirm whether the survey goes ahead or not on Monday. This is dependent on the weather and what it decides to do on Saturday. If the rain is deemed too much, we will postpone the survey to start on Wednesday. The survey then will follow the same order but starting on Wednesday. I understand this may be short notice so please do not hesitate to get in touch if you have any questions.

Whether the survey starts on Monday or Wednesday, we will be meeting at 9 am at the Deniliquin Pioneer Tourist Park, located at 167 Cobb Hwy, Deniliquin NSW 2710.

In the meantime, I wish you all a very happy weekend and I look forward to meeting you all on Monday or Wednesday.

To: Kevin A <Kevin.A@ahvic.org.au>
Subject: SDLAM - Yanco Survey

Hi Kevin,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Hi Mark,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

On 12 Apr 2022, at 4:00 pm, Macgregor, Oliver <Oliver.Macgregor@jacobs.com> wrote:

Dear Mark (Bundyi Aboriginal Cultural Knowledge),

I'm writing to start planning the Aboriginal heritage survey for the Yanco Creek Modernisation Project. This fieldwork will start on **Monday May 2nd** and will continue for at least one week.

As you know, due to the number of RAPs for this project a roster will be organised, so that there will be a representative from six of the RAPs for each day of fieldwork.

Could you respond to my colleague **Pauline Ramsey** (cc'd to this email – Pauline.Ramsey@jacobs.com) and let her know if you have a representative available to take part in fieldwork during the week of May 2nd – once Pauline has an idea of how many parties wish to supply a representative then a roster will be developed.

As advised previously, remuneration for fieldwork will consist of the following:
Remuneration:
The client (Water Infrastructure NSW) has developed a renumeration package for RAP representatives participating in this fieldwork. The remuneration has been developed to be standardised across WINSW projects, and to be consistent with recent WINSW projects in NSW. The payment for fieldwork will be:

- $120 per hour, for a maximum 8 hours work per day
- 72 cents per km in travel allowance (you would need to keep a logbook to support this)

Cheers,
Oliver.

Hi Mark,

Thank you for your email regarding the current ACHA cultural heritage surveys as part of the Yanco Creek Modernisation Project.

Water Infrastructure acknowledges and respects to the traditional owners of the country that the project covers. The Yanco Creek System commences in the traditional lands of the Wiradjuri people and flows through Bangerang, Barrapa Barapa and Wemba Wemba traditional country.

At our recent meeting in Narrandera with yourself and other Registered Aboriginal Parties we provided an overview of the Yanco Modernisation project, as well as the ACHA methods document.

This meeting also outlined that our project partners 3RP (GHD and Jacobs) would be coordinating the upcoming ACHA activities for the project, with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys and arrange for remuneration of any RAPs who participate in the survey activities. This was a meeting between Water Infrastructure NSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included yourself as well as local Wiradjuri Elders and representatives of the Leeton and Narranderra LALCs. We held a similar meeting with other RAPs in Deniliquin later the same week.

I understand that the ACHA survey activities are progressing under the direction of 3RP and a number of locally based Wiradjuri Elders, along with Elders from the other First Nations covered by the project, and representatives of the respective LALCs are participating.

I also understand that Warren spoke to you about the possibility of your involvement, subject to confirmation by 3RP, in the survey proposed for near Jerilderie next Tuesday 10/5 (subject to weather conditions).

I expect that Warren / John Woods and 3RP will be in touch again with yourself regarding these proposed arrangements.

For information Warren Mayers is Water Infrastructure's Manager First Nations Project Engagement. I have also included as cc to this email the WINSW Director Community and Stakeholder Engagement Alexie Bull, and the WINSW Director Southern Projects Brad Hollis.

Thank you again for your inputs to the project and I look forward to working with you on these important activities.

Kind Regards, Matt

Yamma Matt,

I got a phone call just now from Warren your Aboriginal Officer with regards to my email I sent to you.

I have no issues with him.

However I do with you and DPIE.

As you will not response to my respectful emails I now insist that "Walumarra Wiradjuri Consultancy Group" have urgent meetings with yourself and your Director who is responsible for what you do.

Can you please send me the email address of the Director of your department so I can liaise directly with them ?

I have also CC'd in my Directors of Walumarra and Dr Joe McGirr who is our local member and a very marang mudyi (good friend) of Wiradjuri Mayiny (people)

I await your timely email.

Yamma Matt,

I have not been asked to do any work on or around the 10/05/2022.

That aside, my issues, as I have already stated to you, is that the company that you have engaged to do this important work basically sacked me, and I believe [redacted] as well, from doing the work that we were engaged and agreed to do.

I believe that we were removed because I ask too many questions about what you are doing and because I challenge the way that archaeologists go about their business on Wiradjuri country. I will continue to do this with Yindyamarra (respect)

An Archaeological company does not have the right to sack or pick who they want to perform this important work. You as the proponent should be doing that as well as negotiating with RAPs about our rate of pay, travel and work conditions. That was not done and in fact we were told what we would be paid without any negioations from local RAPs.
Have you heard about the mob that went on strike and walked off a cattle station for some years because of unfair wages ???
We have done it before, we will do it again.

The negotiating with RAPs about our rate of pay, travel and work conditions is a very strong point that I brought up at the Narrandera meeting to you, your staff and Oliver from Jacobs. I made it known then, that this was not business like and that every meeting we go too, every body in the room is being paid expect for the Knowledge Holders and Custodians of the land that you work on.
In those rooms we hold the most knowledge of anyone in that room, yet we are treated as second hand citizens and most times your meetings are a just "Tick A Box" events.

I also strongly talked about Oliver from Jacobs doing an Aboriginal Draft Report of the area and that Jacobs had not engaged any local Wiradjuri to have input into that report. Instead the report was done via a "Desk Top Study" and that is not how it should be done.

DPE continue to allow the destruction of our water, land and ceremonial places that our people have protected for over 80,000 + years. We have cared and continue to care for these places and country so as to ensure that future generations of all people can enjoy what we have worked so very hard to maintain.

I have had enough of DPE and the lack of care and protection of and for Wiradjuri customs, lore and country.

I insist that Walumarra and myself have an urgent meeting with your Director and department to sort out the lack of Wiradjuri protocol and cultural awareness that you do not have.

I also insist on you supplying me your Directors direct phone number and email address as I will talk to them about what is happening. This is not the first instance of blatant disregard for our culture in this area. Walumarra Wiradjuri Consultancy Group will meet and we will talk.

Please send me the contact details of your department directors/CEO by close of business today.

Importance: High

Hi Warren,

Thanks for your email and I appreciate your input and advice on the current ACHA survey process.

Re the reference to a meeting in Narranderra below, this was a meeting between WINSW (Maydina, Adam, David Clarke and myself), 3RP (Tony Paull and Oliver) and RAPs for the Yanco Modernisation project which included Mark, [redacted] as well as local Wiradjuri Elder Michael Lyons and the Leeton and Narranderra LALCs. At this meeting the project was explained along with the approach that 3RP would develop a schedule for RAP inputs to the ACHA archaeological surveys.

I'm comfortable with the recommendation that you have put forward, I received a further email from Mark Saddler last night and I am happy to respond summarising a possible way forward and outlining that you/and or John Woods will confirm the detail.

Any issues please let me know.

Subject: RE: Urgent Meeting with DPIE Upper Management

Hi, Matt, David and Pauline,
@Alexandra Bull and @John Woods – copied in as this has a CSE risk as Mark was threatening to go to the Minister, which is his right. We have followed legislation and policy and I'm comfortable with our actions

I spoke to Mark Saddler this afternoon regarding the email he sent to Matt Kendall (below), in reply to the email he received from Jacobs (below).
I am calling him back after speaking to Gubba to explain why the decision was made to only use local RAPs in field surveys. I'm happy to invite him and Mark Ingram to any survey work next week at Dry Lake and/or Jerilderie, as the predicted wet weather didn't eventuate.

I discussed the issue with Gubba tonight, Two RAPs from Narrandera (Michael Lyons and Rory Williams) did not want Mark Saddler involved in surveys on their country. Mark was described as not coming from their country.
This is a complex debate, under legislation you don't have to be from that country, you only have to have an interest in the project area and have cultural knowledge to be a Registered Aboriginal Party and consulted by the proponent (WINSW).
This is different again to being employed to undertake site surveys.

Below in RED is my comments and recommendation on Marks email

Recommnendation:

- Based on the advice / request from 2 Narrandera Elders I would not involve Mark Saddler or [redacted] in this survey ion Monday 9/05/2022 at Narrandera
- WINSW could involve them on Tuesday 10/05/2022, at Jerilderie with Cummeragunja Local Aboriginal Land Council. This will be an operational decision by the Project team and not First Nations Engagemnent Team. It would resolve Mark Saddlers current issue. Im unsure what impact it will have on our relationshipo with Traditional Owners, Elders and LALC in the project area

If this has confuesd you please give me a call. The Legislation is quite clear, its how we and Aboriginal people using our cultural knowledge , cultural proticols and respect interprete it

Subject: [EXTERNAL] Urgent Meeting with DPIE Upper Management

Yamma Matt,

Both myself and [redacted] re bitterly disappointed and have been totally disrespected by "Jacobs" and "DPIE" This is Marks opinion. I don't see how the email disrespected him in any way
This is in regards to the management and care of the Yanco Creek Upgrade. However DPIE also have done and continue to disrespect our land and waters as well.
You were all very happy to invite us to Narrandera to give you feedback (at our expense and time) to assist you all in your endeavours to achieve a good outcome for our traditional land and waters.

I believe neither Mark nor [redacted] attended SAG meetings in Morundah.

The Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines for Part 6 National Parks and Wildlife Act 1974 Part guides consultation with Aboriginal communities and Registered Aboriginal parties when undertaking an Aboriginal Cultural Heritage Assessment. Th proponent (WINSW) and our agent (Jacobs) are required to consult with Aboriginal people about the Aboriginal cultural heritage values (cultural significance) of Aboriginal objects and/or places within the proposed project area.

Community consultation must be an open and honest two-way communication process between the proponent and **Aboriginal people who have cultural heritage knowledge relevant to a proposed project area**. They do not have to be Traditional Owners or Elders from that section of Country. The Guideline and legislation states 'Aboriginal people who may have an interest in the proposed project area and who hold knowledge relevant to determining the cultural significance' Mark Saddler satisfies this requirement

However the company, "Jacobs" that you have contracted to do the work has taken it on themselves to not allow the Traditional Carers, Knowledge Holders and RAPs of the area to attend the crucial work that is being undertaken.
Both myself and [redacted] received a late email, from Pauline Ramsey on Friday 29th April 2-33 pm, to advise us that we would not be needed or wanted to do the work we were engaged to do the following Monday and on.

It was late notice due to forecast wet weather and operational constraints. The decision was made to prioritise the involvement of local groups for this survey.

Firstly I will state that it is not the choice of Archaeologist to decide who will work on our country.
It is the decision of the proponent who will be called to undertake site surveys as a contractual agreement. Site surveys are not consultation under section 3.3 of the Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines. The proponent can decide who attends field surveys based on Elder's opinion or request, operational and weather circumstances or capacity to accommodate maximum numbers of RAPs on site ay one time. Many ACHA surveys have a roster system for RAP participation.

Secondly it is not the choice of the Archaeologist to decide our work and travel rates.
It is a contractual agreement between the Proponent and the RAP, the proponent offers a fair and equitable pay rate that is consistent with Government policy other Department projects. If the RAP declines that pay scale that is their choice. We offered and they declined. Private corporations often pay RAPs well in excess of our daily pay rates

Section 3.4 Consultation should not be confused with employment of the guidelines, states; The consultation process involves getting the views of, and information from, Aboriginal people and reporting on these. It is not to be confused with other field assessment processes involved in preparing a proposal and an application. **Consultation does not include the employment of Aboriginal people to assist in field assessment and/or site monitoring.** Aboriginal people may provide services to proponents through a **contractual arrangement**; however, this is separate from consultation.

The proponent is not obliged to employ those Aboriginal people registered for consultation. **Consultation as per these requirements will continue irrespective of potential or actual employment opportunities for Aboriginal people**.

Thirdly it is not the Archaeologist who knows our country, custom or lores, it is in fact my people and as such any Archaeologist is only a recorder of our culture and not an expert on it as they portray.
Correct, that's why we are required to consult with Registered Aboriginal parties under **Part 6 National Parks and Wildlife Act 1974** and adhere to the **Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines**

As a RAP and a Director of Walumarra Wiradjuri Consultancy Group I insist on a meeting with yourself, Matt Kendall, your upper management and your Minister of your department to sort out what you are all doing wrong. It must stop now.
My next step, if that is not possible, is to go to the main stream media and advise them on the lack of consultation between Aboriginal, Wiradjuri people, land holders and the local communities who you affect by every action that you take and make.
You have not followed the correct "Due Diligence Processes" that you are tasked to do as a public servant. Eager to hear back from you and start a process of getting DPIE DPE OEH or whatever you call yourselves sorted out and to also have Wiradjuri Cultural Programs inserted into your work practices as you should have.

250 + years and you still do not understand or listen to our people and country, however our voices are getting louder and we will be heard.

To All
As a member of Miyagan Culture & Heritage I also endorse [redacted] and Mark's observations and comments and believe that if we are going to continually be disrespected and ignored by the powers that be when discussing critical Aboriginal culture, heritage and land management issues then we might need to organise for larger numbers of our very concerned and loud Aboriginal people to be involved in future development works across Wiradjuri country.

Regards

Robert Carroll

Firstly I will state that it is not the choice of *Archaeologist to decide who will work on our country.*

Secondly it is not the choice of the Archaeologist to decide our work and travel rates.

Thirdly it is not the Archaeologist who knows our country, custom or lores, it is in fact my people and as such any Archaeologist is only a recorder of our culture and not an expert on it as they portray.

As a RAP and a Director of Walumarra Wiradjuri Consultancy Group I insist on a meeting with yourself, Matt Kendall, your upper management and your Minister of your department to sort out what you are all doing wrong. It must stop now.

My next step, if that is not possible, is to go to the main stream media and advise them on the lack of consultation between Aboriginal, Wiradjuri people, land holders and the local communities who you affect by every action that you take and make.

You have not followed the correct "Due Diligence Processes" that you are tasked to do as a public servant.

Eager to hear back from you and start a process of getting DPIE DPE OEH or whatever you call yourselves sorted out and to also have Wiradjuri Cultural Programs inserted into your work practices as you should have.

250 + years and you still do not understand or listen to our people and country, however our voices are getting louder and we will be heard.

To All
As a member of Miyagan Culture & Heritage I also endorse [redacted] and Mark's observations and comments and believe that if we are going to continually be disrespected and ignored by the powers that be when discussing critical Aboriginal culture, heritage and land management issues then we might need to organise for larger numbers of our very concerned and loud Aboriginal people to be involved in future development works across Wiradjuri country.

Regards

Robert Carroll

You were all very happy to invite us to Narrandera to give you feedback (at our expense and time) to assist you all in your endeavours to achieve a good outcome for our traditional land and waters. However the company, "Jacobs" that you have contracted to do the work has taken it on themselves to not allow the Traditional Carers, Knowledge Holders and RAPs of the area to attend the crucial work that is being undertaken.

Both myself and [redacted] received a late email, from Pauline Ramsey on Friday 29th April 2-33 pm, to advise us that we would not be needed or wanted to do the work we were engaged to do the following Monday and on.

Firstly I will state that it is not the choice of *Archaeologist to decide who will work on our country.*

Subject: [EXTERNAL] RE: Urgent Meeting with DPIE Upper Management
Attachments: Aboriginal-cultural-heritage-consultation-requirements-for-proponents-2010.pdf

Hi, Matt, David and Pauline,
@Alexandra Bull and @John Woods – copied in as this has a CSE risk as Mark was threatening to go to the Minister, which is his right. We have followed legislation and policy and I'm comfortable with our actions

I spoke to Mark Saddler this afternoon regarding the email he sent to Matt Kendall (below), in reply to the email he received from Jacobs (below).
I am calling him back after speaking to Gubba to explain why the decision was made to only use local RAPs in field surveys. I'm happy to invite him and Mark Ingram to any survey work next week at Dry Lake and/or Jerilderie, as the predicted wet weather didn't eventuate.

I discussed the issue with Gubba tonight, Two RAPs from Narrandera (Michael Lyons and Rory Williams) did not want Mark Saddler involved in surveys on their country. Mark was described as not coming from their country.
This is a complex debate, under legislation you don't have to be from that country, you only have to have an interest in the project area and have cultural knowledge to be a Registered Aboriginal Party and consulted by the proponent (WINSW).
This is different again to being employed to undertake site surveys.

Below in RED is my comments and recommendation on Marks email

Recommnendation:

- Based on the advice / request from 2 Narrandera Elders I would not involve Mark Saddler or [redacted] in this survey ion Monday 9/05/2022 at Narrandera
- WINSW could involve them on Tuesday 10/05/2022, at Jerilderie with Cummeragunja Local Aboriginal Land Council. This will be an operational decision by the Project team and not First Nations Engagemnent Team. It would resolve Mark Saddlers current issue. Im unsure what impact it will have on our relationshipo with Traditional Owners, Elders and LALC in the project area

If this has confuesd you please give me a call. The Legislation is quite clear, its how we and Aboriginal people using our cultural knowledge , cultural proticols and respect interprete it

Subject: [EXTERNAL] Urgent Meeting with DPIE Upper Management

Yamma Matt,

Both myself and [redacted] are bitterly disappointed and have been totally disrespected by "Jacobs" and "DPIE" This is Marks opinion. I don't see how the email disrespected him in any way
This is in regards to the management and care of the Yanco Creek Upgrade. However DPIE also have done and continue to disrespect our land and waters as well.
You were all very happy to invite us to Narrandera to give you feedback (at our expense and time) to assist you all in your endeavours to achieve a good outcome for our traditional land and waters.

I believe neither Mark nor [redacted] attended SAG meetings in Morundah.

The Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines for Part 6 National Parks and Wildlife Act 1974 Part guides consultation with Aboriginal communities and Registered Aboriginal parties when undertaking an Aboriginal Cultural Heritage Assessment. Th proponent (WINSW) and our agent (Jacobs) are required to consult with Aboriginal people about the Aboriginal cultural heritage values (cultural significance) of Aboriginal objects and/or places within the proposed project area.

Community consultation must be an open and honest two-way communication process between the proponent and **Aboriginal people who have cultural heritage knowledge relevant to a proposed project area**. They do not have to be Traditional Owners or Elders from that section of Country. The Guideline and legislation states 'Aboriginal people who may have an interest in the proposed project area and who hold knowledge relevant to determining the cultural significance' Mark Saddler satisfies this requirement

However the company, "Jacobs" that you have contracted to do the work has taken it on themselves to not allow the Traditional Carers, Knowledge Holders and RAPs of the area to attend the crucial work that is being undertaken.
Both myself and [redacted] received a late email, from Pauline Ramsey on Friday 29th April 2-33 pm, to advise us that we would not be needed or wanted to do the work we were engaged to do the following Monday and on.

It was late notice due to forecast wet weather and operational constraints. The decision was made to prioritise the involvement of local groups for this survey.

Firstly I will state that it is not the choice of Archaeologist to decide who will work on our country.
It is the decision of the proponent who will be called to undertake site surveys as a contractual agreement. Site surveys are not consultation under section 3.3 of the Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines. The proponent can decide who attends field surveys based on Elder's opinion or request, operational and weather circumstances or capacity to accommodate maximum numbers of RAPs on site ay one time. Many ACHA surveys have a roster system for RAP participation.

Secondly it is not the choice of the Archaeologist to decide our work and travel rates.
It is a contractual agreement between the Proponent and the RAP, the proponent offers a fair and equitable pay rate that is consistent with Government policy other Department projects. If the RAP declines that pay scale that is their choice. We offered and they declined. Private corporations often pay RAPs well in excess of our daily pay rates

Section 3.4 Consultation should not be confused with employment of the guidelines, states; The consultation process involves getting the views of, and information from, Aboriginal people and reporting on these. It is not to be confused with other field assessment processes involved in preparing a proposal and an application. **Consultation does not include the employment of Aboriginal people to assist in field assessment and/or site monitoring.** Aboriginal people may provide services to proponents through a **contractual arrangement**; however, this is separate from consultation.

The proponent is not obliged to employ those Aboriginal people registered for consultation. **Consultation as per these requirements will continue irrespective of potential or actual employment opportunities for Aboriginal people**.

Thirdly it is not the Archaeologist who knows our country, custom or lores, it is in fact my people and as such any Archaeologist is only a recorder of our culture and not an expert on it as they portray.
Correct, that's why we are required to consult with Registered Aboriginal parties under **Part 6 National Parks and Wildlife Act 1974** and adhere to the **Aboriginal cultural heritage consultation requirements for proponents (2010) guidelines**

As a RAP and a Director of Walumarra Wiradjuri Consultancy Group I insist on a meeting with yourself, Matt Kendall, your upper management and your Minister of your department to sort out what you are all doing wrong. It must stop now.
My next step, if that is not possible, is to go to the main stream media and advise them on the lack of consultation between Aboriginal, Wiradjuri people, land holders and the local communities who you affect by every action that you take and make.
You have not followed the correct "Due Diligence Processes" that you are tasked to do as a public servant. Hi Yalmambirra,

Thank you for your continued involvement with this Aboriginal Cultural Heritage Assessment. A few changes have been made in regards to the survey for which you should be made aware. The survey will go ahead on Monday 2 May 2022 dependent on the weather. If the weather is dry enough, we will be starting in Wanganella at 9 am. If the weather is deemed to be too wet for us to start, we will let the ground dry for a few days and start the schedule on Wednesday 4 May 2022. The decision to go ahead or to delay will be made on Sunday after the predicted rain has passed, by myself, Emily Ford and Meaghan Aitchison. We will be in touch with all of you regardless on Sunday, no later than 3 pm.

Due to these changes, the roster will be finalised this week and sent to everyone as soon as possible. Please let me know as soon as you can of your availabilities for next week and the following week.

We appreciate your understanding and patience.

Subject: SDLAM - Yanco Survey 2

Hi Leon,

I hope this email finds you well and that you are having a pleasant week so far. I am just reaching out in regards to the upcoming survey for the Yanco project as part of the larger SDLAM effort. Your input on our last survey was invaluable and we would like to invite you to participate once again, should you be available. We will be surveying the following areas on these days:

Day	Area
Wednesday 10 August	In consultation with RAPs decide which tracks to target to get sample of future works needed – most likely around Hartwood Weir, Wilson's Anabranch or Forest Creek
Thursday 11 August	In consultation with RAPs decide which tracks to target to get sample of future works needed – most likely around Hartwood Weir, Wilson's Anabranch or Forest Creek

The reason behind the vagueness of these areas is that this survey will serve as a preliminary work to help the design team finalise their plans for the access tracks. With your help, we would like to gauge where the significant areas around these weirs are in association with the tracks. We will mostly be driving and a discussion at the start of the day will be had with all registered Aboriginal parties on which area we will survey.

We will be meeting at 9 am the Local Conargo Display and Public Bathroom (across the street from the pub).

If you have any questions please feel free to get in touch. I look forward to working with you once more on this!

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand
P:+614.9047.5898 | Pauline.ramsey@jacobs.com
Level 7/177 Pacific Hwy | North Sydney NSW 2060 | Australia

I acknowledge the Traditional Owners of Country upon which I work, and pay my respects to them, their culture and their Elders past, present and future.

Ramsey, Pauline

Hi David,

I hope this email finds you well and that you are having a pleasant week so far. I am just reaching out in regards to the upcoming survey for the Yanco project as part of the larger SDLAM effort. Your input on our last survey was invaluable and we would like to invite you to participate once again, should you be available. We will be surveying the following areas on these days:

Day	Area
Tuesday 2 August	4 Mile Weir
Wednesday 3 August	Estuary Creek Regulator & Water Supply Channel
Thursday 4 August	Old Wanganella Homestead
Friday 5 August	Hartwood Weir
Monday 8 August	finish tracks for Hartwood Weir
Tuesday 9 August	In consultation with RAPs decide which tracks to target to get a sample of future works needed – this will target tracks in areas near Wanganella Swamp
Wednesday 10 August	In consultation with RAPs decide which tracks to target to get a sample of future works needed - this will target tracks in areas near Wanganella Swamp or Piccaninny Weir

We will be meeting at the Deniliquin Pioneer Hotel at 9 am.

If you have any questions please feel free to get in touch. I look forward to working with you once more on this!

Kind regards,

Pauline Ramsey (She / Her) | Jacobs | Project Archaeologist | Environmental Solutions Australia and New Zealand
