Dear Sir,

**Exhibition of State Significant Infrastructure Application
Jervis Bay Aquaculture Project SSI 5657**

We do not have any objection to this proposal for Jervis Bay provided the granting of these leases:

- Do **not** change the water quality or clarity
- Do **not** create any smells either in its production or harvesting or lead to an algal bloom or similar.
- Do **not** change the quiet enjoyment along Collingwood Beach by way of such things as harvesting machinery or by use of heavy machinery or engines working on the leases.

We understand that one of the proposed leases at Vincentia maybe in a currently protected zone that cannot be disturbed. Is this the case?

We would not like to see the overall unspoilt nature of Jervis Bay disrupted. Also we would not like parts of the Bay be made off limits to locals or visiting tourists.

We look forward to you ensuring the **pristine condition** of Jervis Bay remains. Further we request the maintenance of this **pristine condition** remains your primary consideration in your granting of these leases or any other leases in the future.

Yours faithfully,

E.M. and M. Jolly
