We object to the inland railway coming through on the existing line our area due to the following reasons.

1. property values, how much have they already been impacted and into the future? When will someone be able to give us information on this?
2. when purchased our property it has stable complex for agisting thorough bred racehorses, in the future people may not want to use our facilities due to excess noise and activity not only from trains but bells and lights also.

Will we be compensated for this?

3. There is a school bus stop in close proximity, what measures will be taken to address this matter and make it safe?
4. We will be affected greatly by noise indoors and outdoors everytime a train goes past we will feel it.

We brought this property for the peaceful rural outlook and with this amount of trains doing high speed this will be taken away from us and our neighbours.

5. We will also be impacted by waits at level crossings. makes popping into to town inconvenient. We are completely against these trains going on the existing railway so close to town.
