Content:

We whole heartily object to the inland rail continuing past the back boundary of our property. We feel that it would significantly decrease the value of our property & disrupt our lifestyle and don't feel that we would be sufficiently compensated because of its existence. I don't feel that a major rail network cutting directly through one of the more affluent parts of town would be of any benefit to a small rural community.

We hope that adequate consideration has been given to the residences both directly and indirectly affected by the rail and all that it entails.
