Dear Jake

**WestConnex M4-M5 Link Mainline Tunnels  
Noise and Vibration Construction Monitoring Report**

The Acoustic Advisor has reviewed the *M4-M5 Link Mainline Tunnels Noise and Vibration Construction Monitoring Report: 28 May 2021 to 27 November 2021 (Noise and Vibration CMR)*, prepared by the Lend Lease Samsung Bouygues Joint Venture.

The Noise and Vibration CMR meets the requirements of Condition of Approval C17, prepared in line with the Construction Noise and Vibration Monitoring Program.

As required by Condition of Approval A26(d), I endorse the Noise and Vibration CMR as being generally compliant with the requirements outlined in the Infrastructure Approval (SSI 7485).

Kind Regards

John Hutchison  
Acoustic Advisor  
WestConnex M4-M5 Link Project
