Subject: Updated Air Quality Management Plan and Monitoring Program

Dear Mr Lawrence

I refer to your submission dated 14 July 2023, of the Air Quality Management Plan (Revision I, dated July 2023) and the Air Quality Monitoring Program (Revision D, dated 11 July 2023) in accordance with condition A25 (i) of SSI 7666. The department notes that the Air Quality Monitoring Program is contained at Appendix A of the Air Quality Management Plan.

I note that the project Environmental Representative, Mr Duncan Thomson, has reviewed the changes that have been made to the Air Quality Monitoring Program, and has deemed these updates to be minor. The minor amendments include:

- Corrections and updates to the charts of baseline dust deposition gauge data in Appendix A.
- Inclusion of the average baseline dust levels, now that the baseline period has concluded.
- Inclusion of construction phase trigger levels, calculated from the baseline averages.
- Updated figures of the dust gauge locations, noting that some gauges have been relocated out of the finalised construction footprint. This was anticipated in Section 4.1 of Revision C of the monitoring program.

Accordingly, the project Environmental Representative has approved the updated Air Quality Management Plan (Revision I, dated July 2023) and the Air Quality Monitoring Program (Revision D, dated 11 July 2023) in accordance with condition A25 (i) of SSI 7666.

You are reminded that if there is any inconsistency between the Air Quality Management Plan (Revision I, July 2023) inclusive of the Air Quality Monitoring Program (Revision D, dated 11 July 2023) and the conditions of approval, then the requirements of the conditions of approval will prevail.

Please ensure that you make the Air Quality Management Plan inclusive of the Air Quality Monitoring Program publicly available on the project website. If you have any questions, please contact Rebecca Eddington at rebecca.eddington@dpie.nsw.gov.au.

Yours sincerely
