Description of the Development/Infrastructure

Development of a 335 MW (or up to around 440 MW for a shorter period) pumped hydro energy storage and generation project, grid connection and ancillary infrastructure, with an anticipated 2,680 megawatt hours (MWh) of energy storage. At a basic level, it will consist of upper and lower water reservoirs, a pipeline connecting them, and a hydro-electric power station connected to the national energy grid that is capable of generating or consuming electricity.

Staged Infrastructure

Are you intending to submit a concept or staged application?

No
