1. Introduction

1.1 Purpose

This report has been produced to assess impacts to vegetation and detail the species and number of trees that will be removed as part of the Southwest Metro Corridor Works (SMC).

The report has been written in accordance with the requirements of the *Sydney Metro City & Southwest - Sydenham to Bankstown Interim Tree Management Strategy* and *Sydney Metro City & Southwest - Sydenham to Bankstown - Instrument of Approval*, Condition of Approval E5.

1.2 Project Overview and Location

Sydney Metro City & Southwest is a new 30km metro line extending metro rail from the end of Sydney Metro Northwest at Chatswood under Sydney Harbour, through new CBD stations and southwest to Bankstown. It is due to open in 2024 with the capacity to run a metro train every two minutes each way through the centre of Sydney. The Sydney Metro City & Southwest comprises of two components;

- Chatswood to Sydenham Project
- Sydenham to Bankstown upgrade, now known as Southwest Metro

The Southwest Metro Corridor, referred to as “the Project” or ‘the works” in this document, will be undertaken in accordance with the *Sydney Metro City & Southwest Sydenham to Bankstown Upgrade Instrument of Approval* (SSI_8256). The SMC Project site is located on the T3 Bankstown line between Sydenham and Bankstown stations, NSW. Works will predominately occur within the rail corridor, with limited activities occurring within station precincts. Southwest Metro Station Upgrade Packages will be undertaken by others.

Works will occur predominately within the rail corridor. SMC is expected to be finished in 2022.

The works will be undertaken by a John Holland Group Pty Limited (John Holland) and Laing O’Rourke Construction Pty Limited (Laing O’Rourke) joint venture referred to as JHLOR.

The works include all permanent new infrastructure and modifications to existing infrastructure, as part of the construction of Sydenham to Bankstown station upgrade works. The permanent new infrastructure and modifications to existing infrastructure to be constructed includes;

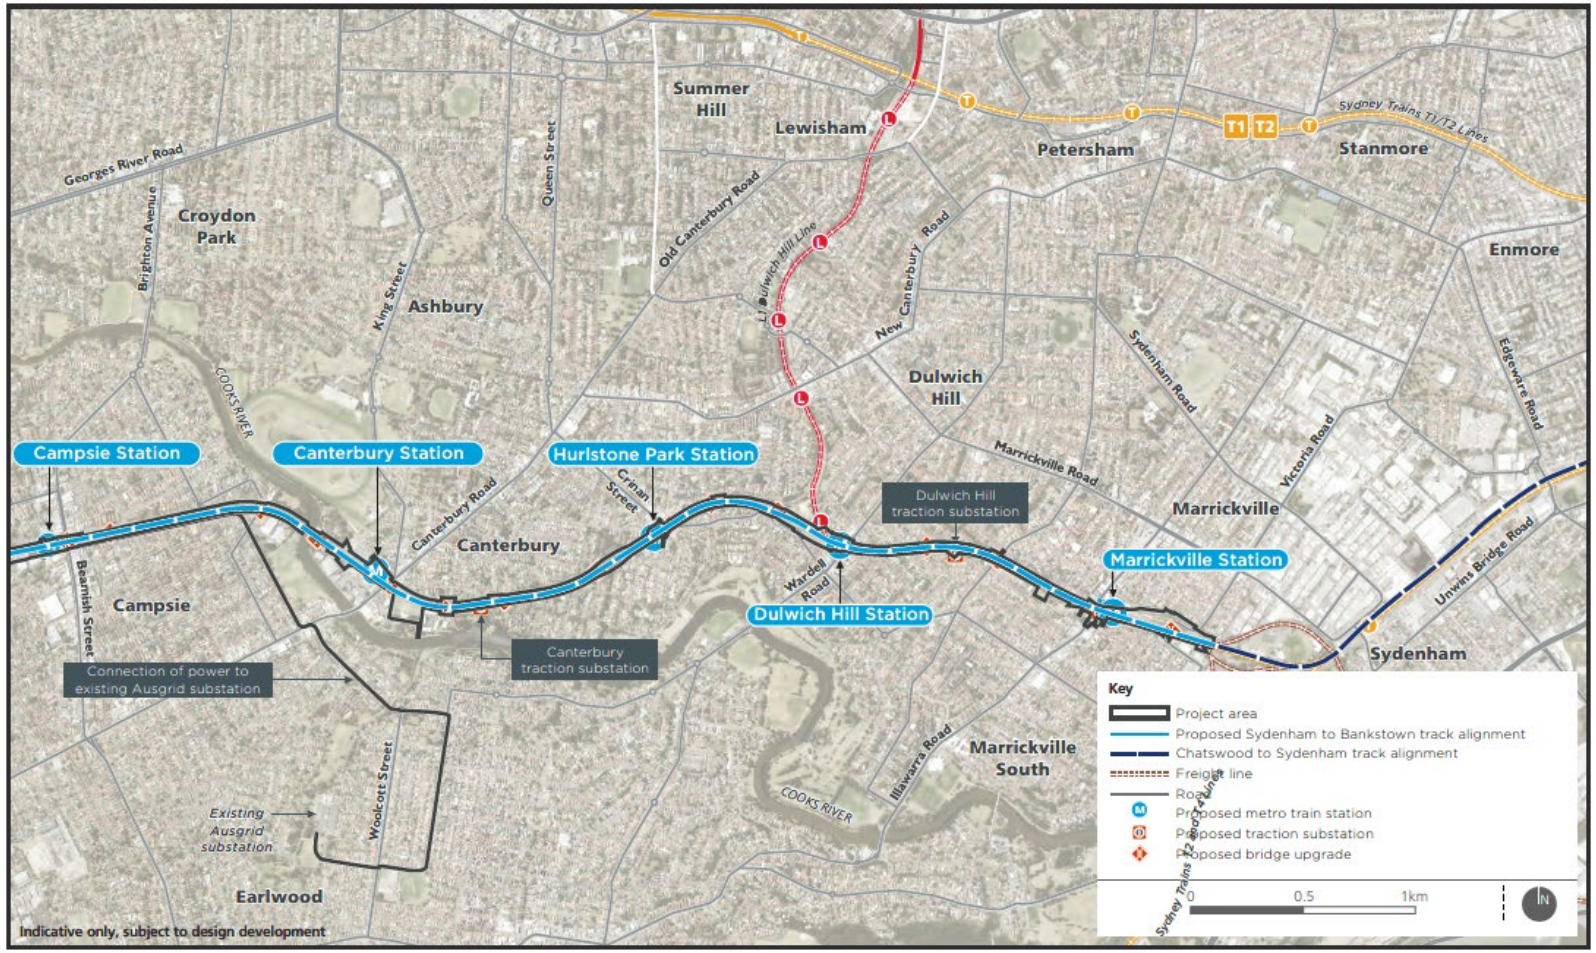

- Installation and commissioning of Combined Service Route (GST, GLT, pit & pipe)
- Signalling, communications and HV diversions
- Rail embankment stabilisation including retaining walls
- Installation of drainage
- Installation of security and segregation fencing
- Vegetation clearing
- Access road upgrades/establishment
- Utility diversions
- Bridge remedial works, including installation of crash barriers and throw screens
- Modifications to the existing rail track (including crossovers and hi-rail access pads),
- Overhead wire works
- Demolition of redundant infrastructure
- Construction of a Metro Service Building near Bankstown Station
- Construction of the down track side Sydney Metro platform at Bankstown Station

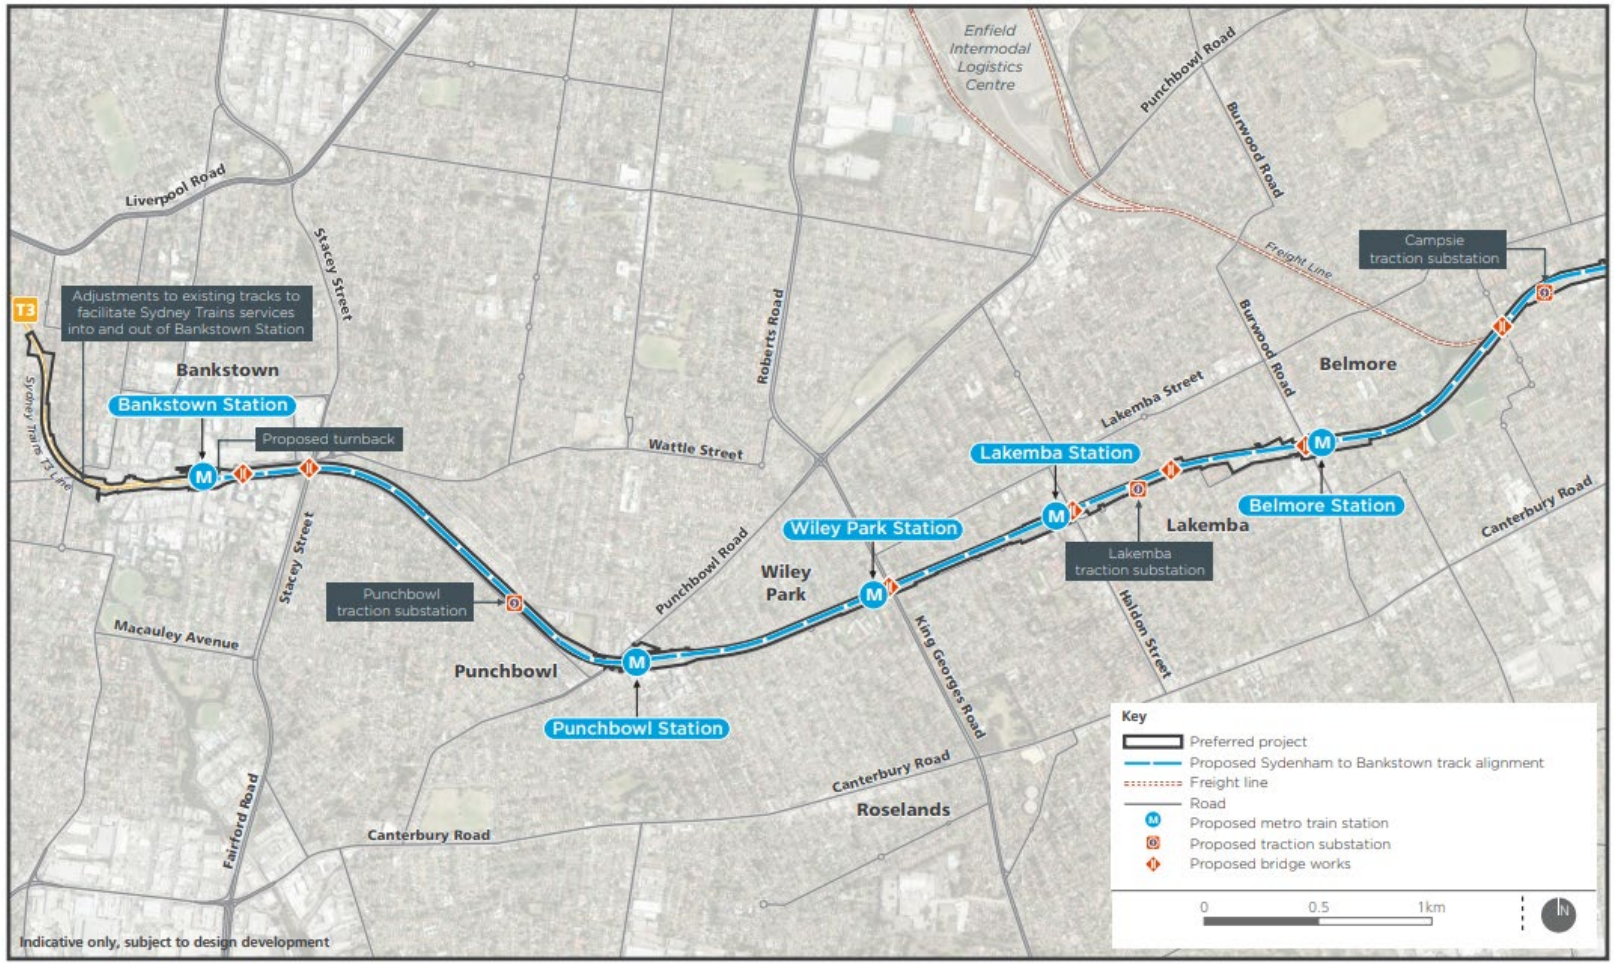

In addition to the above, temporary works will be undertaken to facilitate the permanent works, including;

- Temporary arrangements to divert and control pedestrians, public transport users, cyclists, public transport and traffic and to provide public access, amenity, security and safety during all stages of design and construction of the Works;
- Temporary arrangements for people and vehicles to safely access all property, including publicly accessible space affected by the Contractor's Activities;
- Temporary arrangements for people and vehicles to safely access the Site;
- Temporary access stairs, walkways and platforms within the Site;
- Temporary construction hoardings, fencing, noise walls, access gates, barriers and signage on and around the Site;
- All environmental safeguards and measures necessary to mitigate environmental effects which may arise during the design and construction of the Works;
- Cleaning, maintenance, repair, replacement and reinstatement, as required, of all areas occupied by the Contractor during design and construction of the Works;
- Temporary site facilities/compounds required for design and construction of the Works (i.e. Canterbury Bowls Club Compound and North Terrace, Bankstown Carpark Compound, Bankstown Metro Service Building Site);
- Temporary infrastructure, safety screens and ground support installed or erected to undertake design and construction of the Works;
- Temporary arrangements for Utility Services including water, electricity, stormwater, sewerage, gas and electronic communications;
- Temporary power for stations
- Temporary works and measures required as a consequence of requirements arising from the stakeholder and community liaison process; and
- All other temporary works and measures required for the construction of the Works.
- Geotechnical and intrusive service searching (including contamination testing) investigation works in the vicinity of Bankstown Station

The SMC site is shown in Figure 1.

1.3 Background

In accordance with the *Sydney Metro City & Southwest Sydenham to Bankstown Instrument of Approval* a tree is defined as "*Long lived woody perennial plant greater than (or usually greater than) 3 m in height with one or relatively few main stems or trunks*".

Condition of Approval E5 states "*The Proponent must commission an independent experienced and suitably qualified arborist, to prepare a comprehensive Tree Report(s) before removing any trees as detailed in the documents listed in Condition A1. The Tree Report may be prepared for the entire CSSI or separate reports may be prepared for individual areas where trees are required to be removed. The report(s) must identify the impacts of the CSSI on trees and vegetation within and adjacent to the Construction footprint. The report(s) must include:*

a) a description of the conditions of the tree(s) and its amenity and visual value;
b) consideration of all options to avoid tree removal, including relocation of services, redesign or relocation of ancillary components (such as substations, fencing etc.) and reduction of standard offsets to underground services; and
c) measures to avoid the removal of trees or minimise damage to existing trees and ensure the health and stability of those trees to be protected. This includes details of any proposed canopy or root pruning, root protection zone, excavation, site controls on waste disposal, vehicular access, storage of materials and protection of public utilities.

A copy of the report(s) must be submitted to the Planning Secretary before the removal or pruning of any trees, including those affected by site establishment Work. All recommendations of the report must be implemented by the Proponent, unless otherwise agreed by the Planning Secretary."

The ecological potential of the project site has been assessed under the Sydney Metro City & Southwest Chatswood to Sydenham Environmental Impact Statement (EIS). Section 22.2 of the EIS states "*The majority of the study area has been heavily modified by past and ongoing disturbances associated with urban development and the active rail corridor. Urban development, clearance, and ongoing maintenance of the rail corridor has resulted in fragmentation, a high level of disturbance, and degradation of vegetation communities.*

The majority of vegetation in the project area and surrounding study area comprises exotic or planted native species on highly modified landforms. There are small isolated patches of remnant or regrowth native vegetation in small portions of the study area associated with rail cuttings with less disturbed soil profiles.

Native vegetation and habitat within the project area is in medium to poor condition, and features impacts from existing maintenance activities, edge effects, weed infestation, and exotic pests."

The EIS also states "*There is relatively low native species richness within the study area, which confirms that the native vegetation has been extensively modified and is in moderate to poor condition.*

A total of 129 flora species from 40 families were recorded within the study area, comprising 63 native and 66 exotic species. Poaceae (grasses, 22 species, 11 native), Myrtaceae (flowering shrubs and trees, 20 species, 13 native), Fabaceae (23 species, 17 native), and Asteraceae (flowering herbs, 11 species, 2 native) were the most diverse families recorded. One threatened flora species (Downy Wattle) was recorded in the study area, outside the project area."

In regards to plant communities Section 22.2 of the EIS states "*two of the native plant communities identified conform to the following threatened ecological communities listed under the TSC Act:*

- *Sydney Turpentine Ironbark Forest in the Sydney Basin Bioregion (Sydney Turpentine Ironbark Forest)*

- *Shale Gravel Transition Forest in the Sydney Basin Bioregion (Shale Gravel Transition Forest).*

No threatened ecological communities listed under the EPBC Act are located in the study area."

It is noted that one threatened plant species was recorded in the vicinity of the EIS study area, however the species does not reside within the Project area. Downy Wattle (*Acacia pubescens*) was recorded near Punchbowl Station. The Downy Wattle will not be removed as part of these works and will be protected. The EIS states "*No listed threatened flora species were recorded in the project area. One threatened plant species Downy Wattle (Acacia pubescens) listed as vulnerable under the EPBC Act and TSC Act, was recorded in the study area. Around 650 stems are located near the project area as shown in Figure 22.1.*

The patches of stems recorded are located mainly in the vicinity of Punchbowl Station, with around two stems recorded in the rail corridor, and one stem in a Council reserve around 100 metres east of the Yagoona substation. The project has been designed to avoid impacting on the recorded locations of this species."

The *Sydney Metro City & Southwest Sydenham to Bankstown Upgrade – Submissions and Preferred Project Report* (SPIR) states "*It is expected that large areas of the planted native vegetation and exotic scrub and forest would not require removal for the corridor works, however this is subject to the detailed design of the proposed works, including fencing and the communications services route.*

This vegetation would potentially include trees that provide screening along the corridor for surrounding properties. The need to clear vegetation would be reviewed by the construction contractor/s and minimised wherever practicable."

The SPIR also states "*about 16.3 hectares of vegetation (not including vegetation classed as exotic grassland) may need to be removed, including*:

- *up to 7.3 hectares of planted native vegetation*
- *up to nine hectares of exotic scrub and forest*."

The SPIR does not specify where these areas of clearing are located as this was to be developed as part of detailed design. Furthermore, these areas represent the clearing to occur for both corridor and station precinct works from Sydenham to Bankstown under all work packages (refer to the *Sydney Metro City & Southwest Sydenham to Bankstown Upgrade Staging Report* for more information on the different packages under which the project has been staged). As such, minimisation of impacts is driven through the design and construction methodology. Refer to Section 4 for more information on minimisation of impacts through design and construction methodology. Refer to Section 5 for Mitigation Measures.

For the purpose of producing this report, the Arboricultural reports that form the appendices of this document have been divided on the following basis;

- Appendix A – Design Related Arboricultural Report
- Appendix B – Construction Impacts Arboricultural Report
- Appendix C – Bankstown Area Design Impact Arboricultural Report

It is noted however that there may be some design and constructability impacts captured within all of the Arboricultural reports, particularly where temporary design and changes relating to Contract variations occur.

It is also noted that as the Construction and Design Arboricultural reports have assessed tree impacts independently on the basis of the scope of each report. Where there is a difference in outcome for a tree between the reports it should be assumed that the most impactful outcome will occur. i.e. If the Construction Arboricultural report identifies that a certain tree is to be trimmed, and the Design Arboricultural Report identifies that the same tree should be removed it is assumed that the tree will be removed. This has been accounted for within final tree number calculations included in Section 3 of this report.

2. Site Inspections

Bryce Claassens, Consulting Arborist of Urban Arbor, has attended site on numerous occasions. Please refer to inspection dates within the respective Arboricultural reports for details regarding inspection dates.

Urban Arbor have subsequently produced Arboricultural Reports to satisfy the Planning Approval conditions related to tree and vegetation removal. Copies of the reports are included in Appendix A, Appendix B and Appendix C as described above.

A curriculum vitae for Bryce is attached in Appendix D.

3. Inspection Results

The Design Arboricultural Reports have captured all trees within the Sydney Metro City & Southwest Sydenham to Bankstown Project Boundary, including both corridor and station precinct areas. A copy of the report is included in Appendix A and Appendix C for Bankstown Specific works.

As JHLOR's work package, Southwest Metro Corridor, is located largely within the corridor and generally excludes works within the station precincts a number of trees identified within Appendix A Design Arboricultural Report for removal are excluded from this report. These trees are listed under Section 4.1 of this document. It is noted that one JHLOR works will occur in one station precinct, that of Bankstown Station, as part of Bankstown Early Works. Design related impacts for these trees are included within Appendix C.

The results of the tree inspections can be found in Section 7, Section 8, Section 9 and Appendix 2 of the Appendix A and Appendix B Arboricultural Reports and Section 7, Section 8 and Appendix 2 of the Appendix C Arboricultural Report. Section 7 of both the Appendix A and Appendix B Arboricultural Reports indicates where clashes between design or construction interfaces and trees exist. This is included in Section 8 of the Appendix C Arboricultural Report.

In accordance with the Arboricultural Reports a total of **376** standalone trees and **7** groups (or approximately **617** trees in total) will be removed as part of the works. In addition, **243** trees and **4** groups will be trimmed. Due to the subsurface and therefore unknown location of tree roots, all trees may be subject to root trimming where the arborist confirms that the trees health will be maintained following trimming. Where root trimming must occur and that trimming will impact the viability of the tree, the tree will be included within this tree report for removal prior to any removal works.

Overall clearance of vegetation has also been assessed. JHLOR has estimated the area of planted native vegetation and exotic scrub and forest to be removed as part of SMC. Based on current calculations SMC will require the removal of;

- Approximately 0.27 hectares of planted native vegetation
- Approximately 0.07 hectares of exotic scrub and forest.

Broad mapping within the EIS is likely to overstate impacts of clearing, as the broad mapping accounts for areas that may not be vegetated.

It is noted that the majority of the rail corridor in which SMC is located is vegetated with exotic grassland.

Total areas for removal is indicative only and is based off canopy spread values included within the Arboricultural reports. Noting that canopy spread is measured from the widest part of the tree the estimation does not take into account tree symmetry or overlapping of canopies.

4. Alternatives to Design

Section 9 of the Appendix A and Appendix B Arboricultural Reports and Section 8 of the Appendix C Arboricultural Report identify why these trees and vegetation must be removed. Removal of the trees and vegetation predominately relates to relocation of the Sydney Trains services, construction of the Combined Service Route (CSR), fencing, track works, the Bankstown Metro Service Building, the Bankstown Sydney Metro down track platform and the retaining walls. These design components are integral to the functionality of the new Sydney Metro line. Due to limited space within the project boundary, existing services and to maintain access tracks, it is not feasible or reasonable to move these design components to accommodate the existing trees and vegetation.

In accordance with the Sydney Metro Sydenham to Bankstown Interim Tree Management Strategy tree and vegetation removal has been limited through detailed design and construction planning. Refer to Section 9 of both the Appendix A and Appendix B Arboricultural Reports and Section 8 of the Appendix C Arboricultural Report for removal justifications.

Avoidance of impacts to trees and vegetation on the project has been undertaken based on the following hierarchy;

1. Avoid impacts to tree, ensuring design and construction falls outside the tree protection zone
2. Impacts within the tree protection zone, but no trimming or removal
3. Trimming of trees with visual or amenity value (including privacy screening)
4. Removal of trees with visual or amenity value (including privacy screening)
5. Trimming of trees with ecological value (habitat, threatened vegetation communities, threatened flora species)
6. Removal of trees with ecological value (habitat, threatened vegetation communities, threatened flora species)

It is noted that a number of trees within the corridor and at access gates will be trimmed to accommodate the design components and construction requirements.

Where trenching may impact trees, tree sensitive service installation methods will be reviewed to determine if alternative methods of service installation (such as non-destructive digging trench excavation of underbores) are practicable and feasible to undertake.

4.1 Considerations and Restrictions

JHLOR and their designers have explored a number of means for retaining trees and vegetation on the project site. These include;

- Alignment of components such as the CSR have been located to minimise impacts to vegetation in accordance with the hierarchy listed above.
- Galvanised Steel Trough fixed to posts at regular intervals has been favoured over pit and pipe for the CSR. GST has a lesser impact on the tree protection zones (and tree roots) as small post excavations occur over 2m intervals, whereas pit and pipe CSR required extensive excavations, potentially impacting tree roots or requiring tree removal.
- Clearance between CSR and vegetation has been assessed to ensure accessibility and maintainability of the CSR while reducing impacts to vegetation.
- Use of GST instead of pit and pipe routes to minimise ground disturbance
- The fence alignment has been modified to mitigate impacts to trees within neighbouring properties
- The CSR and fence line have been designed to avoid impacts to Threatened Ecological Communities (TEC).

- Giken piling methodology for Retaining Wall 21 at Lakemba has removed the need to create a haul road along the bottom of the wall.

There are also a number of restrictions specific to the site that have resulted in the need for tree and vegetation removal. These include;

- Access tracks are to be maintained through the rail corridor to allow for maintenance of infrastructure and emergency response.
- In some parts of the corridor, a walking and cycling track will be constructed in the future, the design must make provision for the construction of this track.
- The GST used for the CSR is higher than standard GST, meaning some vegetation will need to be trimmed to accommodate the GST.
- The security fencing is higher than the existing fencing within the corridor, meaning some vegetation will need to be trimmed to accommodate the fences.
- CSR transitions between corridor and bridges restrict the design alignment, meaning some vegetation at bridge abutments will need to be removed to accommodate the transitions.
- Known locations of future infrastructure such as service buildings.

It is noted that a number of trees included within Appendix B have already been removed for SMC early works, SMEW works or by other Contractors. These trees are not included in the total tree count within Section 3. These trees are; G27, 605, 680, 681, 693, 694, 731, 3276, 3277, 3278, 3279, 3280, 3281, 3282, 3286, 3287, 3288, 3293, 3294, 3295, 19 CoCB, 20 CoCB, 43a CoCB, 43b CoCB, 44 CoCB, 46 CoCB, 47 CoCB, 48 CoCB, 63 CoCB, 63a CoCB, 63b CoCB & 63c CoCB. It is noted that trees denoted with a suffix “CoCB” are located within the Canterbury Bowls Club and are numbered based on the City of Canterbury Bankstown tree mapping for the bowling club area. Of this list of trees, those removed by JHLOR are captured and accounted for within the Southwest Metro Early Works (SMEW) Tree Removal Register.

It is noted that trees within the Project area may at times be trimmed or removed by Sydney Trains, other authorities or other Contractors. At times this may occur without JHLOR’s knowledge. The tree count included within this report is based on impacts calculated for JHLOR’s scope. The final tree removal number will be determined via the JHLOR SMC Tree and Vegetation Removal Register, refer to Section 5 of this report.

The Arboricultural Reports indicate that a number of trees outside of the Project Boundary are to be removed or trimmed as part of project works. Where a tree is to be removed outside of the Project Boundary JHLOR will obtain land owner’s consent prior to the removal works. Where a tree branch from a tree outside of the project boundary overhangs within the project and is to be trimmed, JHLOR will inform the tree owner and will trim the tree to the nearest growth point in accordance with AS4373-2007, or, if the owner objects, to the project boundary. Where tree trimming is required outside the project boundary (e.g. at gates and local roads leaving to site gates) JHLOR will seek landowner’s consent.

The following trees are subject to a Sydney Metro witness point prior to trimming or removal;

- 3472, 3473, 3474, 3475 – Livingstone Road Bridge, Marrickville.

A Sydney Metro Representative will be contacted prior to the trimming or removal of these trees to agreed appropriate actions. Agreement will be reached prior to any action taking place.

Tree 3489 (*Pittosporum undulatum*) forms part of a Threatened Ecological Community (*Turpentine - Grey Ironbark open forest on shale*). Minor trimming is proposed for this tree. Tree 3489 will not be trimmed until a Planning Approval Consistency Assessment (PACA) is undertaken to determine whether trimming is consistent with approved project. Approval of the PACA is to be obtained prior to trimming.

5. Mitigation Measures

JHLOR will implement a number of measures to ensure the correct vegetation and trees are removed and to mitigate the risk of damage to trees and vegetation that will remain. These mitigation measures include;

- Undertake all Protection Measures as identified within Appendix A, Appendix B and Appendix C of this Report
- The project will be designed to minimise impacts to trees where possible. This will include a review of design impacts and construction impacts on trees
- Relevant Councils and the DPIE will be consulted in regards to replacement tree planting locations. Relevant Councils will be consulted in regards to appropriate sizes for replacement trees.
- A Vegetation Removal and Trimming Permit will be implemented
- All existing trees to be retained within the site area must be protected in accordance with Australian Standard AS 4970 'Tree protection in development sites' to avoid and minimise impacts
- All trees to be removed or trimmed will be appropriately demarcated
- Qualified and experienced tree loppers will be engaged to removed and trim trees
- Where works will occur in the vicinity of trees that are to remain intact, demarcation or barriers will be put in place around the tree at the extent of the structural root zone
- Access tracks will be clearly delineated and defined within the Environmental Control Maps
- Staff and workers to be educated on vegetation trimming and removal requirements
- A copy of the Tree Report must be submitted to the Secretary for information before the removal, damage and/or pruning of any trees, including those affected by the site establishment works.
- All recommendations of the Tree Report must be implemented by the Proponent, unless otherwise agreed by the Secretary.
- JHLOR will consult with the relevant Council in regards to the timing of removal of trees on council land, as required.
- JHLOR will consult with the relevant land owner's in regards to the trimming of branches that overhand into the rail corridor.
- Detailed design and construction planning would avoid direct impacts to vegetation mapped as threatened ecological communities or native plant community types, specifically Downy Wattle Turpentine - Grey Ironbark open forest on shale, Degraded Turpentine - Grey Ironbark open forest on shale and Broad-leaved Ironbark – Grey Box in accordance with REMM B1.
- Pre-clearing surveys and inspections for endangered and threatened flora and fauna species would be undertaken by qualified ecologists prior to any clearing occurring in accordance with REMM B2.
- Impacts to Downy Wattle Turpentine - Grey Ironbark open forest on shale, Degraded Turpentine - Grey Ironbark open forest on shale and Broad-leaved Ironbark – Grey Box would be avoided. The locations of these species and communities would be marked on plans, fenced on site, and avoided in accordance with REMM B4.
- Equipment storage and stockpiling would be restricted to identified compound sites and already cleared land in accordance with REMM B5.

- A trained ecologist would be present during the clearing of native vegetation or removal of potential fauna habitat to avoid impacts on resident fauna and to salvage habitat resources as far as is practicable in accordance with REMM B6.
- JHLOR will consult with relevant local stakeholders in regards to visual amenity impacts.
- Advise will be sought from an Arborist prior to substantial root trimming.

In addition JHLOR will maintain a Tree and Vegetation Removal Register. The register will track which tree have been removed or trimmed (based on the number within the tree report) and the area of vegetation cleared as part of the works. The JHLOR Vegetation Removal and Trimming Permit will prompt the Environmental Manager (or delegate) to record these factors during the permit authorisation site inspection.

This report will be submitted to the Secretary for information prior to the removal, damage and/or pruning of any trees.

5.1 Tree Trimming Memorandum

The SMC scope of works and the interactions with trees across site is complex. Due to the constantly changing nature of construction, construction methodologies must change, leading to unexpected impacts. At times, changes to construction methodology may result in the requirement for the trimming of trees not previously assessed. In these instances trimming would be required to maintain the health of the tree. To ensure all tree trimming is assessed and to mitigate delays to construction JHLOR will implement a Tree Trimming Memorandum (memo) Process.

The process will work as follows;

- All trees in the project area are to be given a number and the condition, amenity and visual value of the tree is to be included. This is to be included in either the Appendix A, Appendix B or Appendix C Arboricultural Report.
- Where known at time of the initial submission, each tree to be trimmed should be included within an Arboricultural Report
- As works commence, any additional trees to be trimmed should be assessed by an arborist and should be captured under a memo for that tree. The memo would address if there are any changes to the aspects of the tree as a result of trimming – condition of the tree, amenity, visual value
- If a tree is to be removed it must be included in the Tree report as per CoA E5c)
- If a tree is to be trimmed but does not have a number under the Arboricultural report the Arboricultural report must be updated to include the tree and description of aspects
- The memo would be submitted to SM & ER for information prior to trimming

URBAN ARBOR
The Trusted Name in Tree Management

1. EXECUTIVE SUMMARY

1.1 Two thousand five hundred and eighteen (2518) trees and thirteen (13) groups of trees have been identified and assessed in this report. Refer to appendix 1 for an inspection schedule of all trees. Each of the trees has been allocated a retention value using the Tree AZ method, see section 8.1 for more information in relation to the retention values.

1.2 For site plans of tree locations, refer to the Eastern and Western Corridor General Arrangement – Tree Survey by Arcadis, Including Sheet 1-70, Rev A, received 13 April 2022. See section 8.2 for more information.

1.3 One hundred and eighty-four (184) trees and three (3) groups of trees have been recommended to be removed. Of these trees, thirty-four (34) trees and one (1) group of trees are located outside the site boundary. The removal of the trees located outside the site boundary is subject to approval by the relevant authorities and/or tree owners. Refer to section 11.2, 11.3, 11.4 and 11.5 for a list of the trees recommended to be removed by retention value.

1.4 It may be possible to retain eighty-nine (89) of the trees recommended for removal in section 1.3 through detailed site investigations of the impact to the trees root system and/or tree sensitive construction measures. Refer to section 10 for more information in regard to detailed site investigations and tree sensitive construction measures. Refer to section 11.4 and 11.5 for a list of the trees by retention value within this category.

1.5 Two thousand three hundred and thirty-four (2334) trees and ten (10) groups of trees have been recommended to be retained and protected. Refer to section 11.6, 11.7 and 11.8 for a list of the trees by retention value.

1.6 Seventeen (17) of the trees recommended to be retained in section 1.5 will be subject to major TPZ encroachment. These trees require tree sensitive construction measures to be retained in a viable condition (see section 10.3 for more information). Refer to section 11.6 for a list of the trees by retention value within this category.

1.7 One hundred and eighty (180) trees and two (2) groups of the trees recommended to be retained in section 1.5 have not been assessed as part of this report. These trees are located within the T2M scope. Refer to section 11.8 for a list of the trees by retention value within this category.

1.8 All canopy pruning required to accommodate the proposed works must be carried out in accordance with AS4373-2007 Pruning of Amenity Trees.[1] See section 10.4 for more information.

1.9 Generic tree protection guidance has been provided in section 13. It is recommended that a detailed tree management plan (TMP) is prepared for the development in accordance with AS4970-2009 and developed in combination with the overall construction management plan for the site. The TMP should be prepared by a consulting Arborist with a minimum AQF level 5 qualification.

1.10 This report does not provide approval for tree removal or pruning works. All recommendations in this report are subject to approval by the relevant authorities and/or tree owners.

URBAN ARBOR
The Trusted Name in Tree Management

2. INTRODUCTION

2.1 Urban Arbor have been instructed by Arcadis to provide an Arboricultural Impact Assessment Report for trees located within the site and adjoining sites in relation to a proposed development.

2.2 Below is a list of all documents and information provided to assist in preparing this report;

A) Eastern and Western Corridor General Arrangement – Tree Survey, Arcadis, Including Sheet 1-70, Rev A, Received 13 April 2022.
B) Detail Survey, Cardno, Including Sheet 1-28, 16 April 2020.

2.3 The site and tree inspections were carried out between the dates of 6 January 2020 to 3 April 2020. Access was available to the subject site and adjoining public areas only. All tree data contained in this report was collected during these site inspections.

3. SCOPE OF THE REPORT

3.1 This report has been undertaken to meet the following objectives.

3.1.1 Conduct a ground level visual assessment of all significant trees located within 5 metres of development works. For the purpose of this report, a significant tree is a tree with a height equal to or greater than 5 metres.

3.1.2 Assess the trees condition, landscape value, estimated useful life expectancy and award the trees a retention value.

3.1.3 Carryout an assessment of the potential impact the proposed development is going to cause to the condition of the subject trees in accordance with AS4970 Protection of trees on development sites (2009). The proposed development works that have been assessed in this report include the following;

- Security fencing.
- Combined Service Routes (CSR).
- Bridge construction works.
- Hi-Rail pads.
- Culverts.
- Retaining walls.

3.1.4 Trees that are located within the T2M scope areas (i.e. station precincts, service buildings, hard surfacing, etc.) have not been assessed within this report.

3.1.5 Specify generic tree protection measures in accordance with AS4970-2009 for any tree to be retained during the development.

URBAN ARBOR
The Trusted Name in Tree Management

4. LIMITATIONS

4.1 The observations and recommendations are based on the site inspections identified in section 2 only. The findings of this report are based on the observations and site conditions at the time of inspection.

4.2 All of the observations were carried out from ground level. The accuracy of the assessment of the subject trees structural condition and health is limited to the visibility of the tree at the time of inspection.

4.3 The tree inspection was visual from ground level only. No soil or tissue testing was carried out as part of the tree inspection. None of the surrounding surfaces adjacent to trees were lifted or removed during the tree inspections.

4.4 Root decay can sometimes be present with no visual indication above ground. It is also impossible to know the extent of any root damage caused by mechanical damage such as underground root cutting during the installation of services without undertaking detailed root investigation. Any form of tree failure due to these activities is beyond the scope of this assessment.

4.5 While an assessment of the subject trees estimated useful life expectancy is included in this report, no specific tree risk assessment has been undertaken for any of the trees at the site.

4.6 The report reflects the subject trees as found on the day of the inspections. Any changes to the growing environment of the subject trees, or tree management works beyond those recommended in this report may alter the findings of the report. There is no warranty, expressed or implied, that problems or deficiencies relating to the subject trees, or subject site may not arise in the future.

4.7 Tree identification is based on accessible visual characteristics at the time of inspection. As key identifying features are not always available the accuracy of identification is not guaranteed. Where tree species is unknown, it is indicated with an *spp*.

4.8 Urban Arbor neither guarantees, nor is it responsible for, the accuracy of information provided by others that is contained within this report.

4.9 All diagrams, plans and photographs included in this report are visual aids only, and are not to scale unless otherwise indicated.

4.10 Alteration of this report invalidates the entire report.

URBAN ARBOR
The Trusted Name in Tree Management

5. METHODOLOGY

5.1 The following information was collected during the assessment of the subject tree(s).

5.1.1 Tree common name
5.1.2 Tree botanical name
5.1.3 Tree age class
5.1.4 DBH (Trunk/Stem diameter at breast height/1.4m) - millimetres.
5.1.5 DAB (Trunk diameter directly above the root buttress) – millimetres.
5.1.6 Estimated height - metres
5.1.7 Estimated crown spread (diameter of crown) - metres
5.1.8 Health
5.1.9 Structural condition
5.1.10 Landscape value
5.1.11 Estimated remaining contribution years (SULE)[2]
5.1.12 Retention value (Tree AZ)[3]
5.1.13 Notes/comments

5.2 An assessment of the trees condition was made using the visual tree assessment (VTA) model (Mattheck & Breloer, 1994).[4]

5.3 Tree diameter was measured using a DBH tape or in some cases estimated. Tree height and tree canopy spread was estimated. All other measurements were estimations unless otherwise stated. The other tools used during the assessment were a nylon mallet, compass, camera and a steel probe.

5.4 All DBH measurements, tree protection zones, and structural root zones were calculated in accordance with methods set out in AS4970 Protection of trees on development sites (2009).[5] The calculations were made in a Microsoft Excel spreadsheet.

5.5 The location of all trees included in this report has been collected by Cardno. The tree location provided by Cardno and tree information provided by Urban Arbor has been overlaid onto the proposed site plans by Arcadis. Urban Arbor has used PT-Mapper-Pro to calculate all TPZ encroachment areas and percentages discussed in this report.

5.6 Details of how the observations in this report have been assessed are listed in the appendices.

URBAN ARBOR
The Trusted Name in Tree Management

6. SITE LOCATION AND BRIEF DESCRIPTION

6.1 The area covered in the site inspections is located within two Local Government Areas (LGA), including Inner West LGA and Canterbury Bankstown LGA. All trees within the Inner West LGA are subject to protection under the corresponding Local Environmental Plans (LEP)[6], Development Control Plans (DCP)[7] and Tree Management DCP 2020.[8] All trees within the Canterbury Bankstown LGA are subject to protection under the former governing Canterbury LEP 2012[9], Canterbury DCP 2012[10], Bankstown LEP 2015[11] and Bankstown DCP 2015.[12]

7. GENERAL INFORMATION IN RELATION TO PROTECTING TREES ON DEVELOPMENT SITES

7.1 **Tree protection zone (TPZ):** The TPZ is the principle means of protecting trees on development sites and is an area required to maintain the viability of trees during development. It is commonly observed that tree roots will extend significantly further than the indicative TPZ, however the TPZ is an area identified in AS4970-2009 to be the area where root loss or disturbance will generally impact the viability of the tree. The TPZ is identified as a restricted area to prevent damage to trees either above or below ground during a development. Where trees are intended to be retained proposed developments must provide an adequate TPZ around trees. The TPZ is set aside for the tree's root zone, trunk and crown and it is essential for the stability and longevity of the tree. The TPZ also incorporates the SRZ (see below for more information about the SRZ). The TPZ is calculated by multiplying the DBH by twelve, with the exception of palms, other monocots, cycads and tree ferns, the TPZ of which should be calculated at minimum one metre outside the crown projection.

URBAN ARBOR
The Trusted Name in Tree Management

7.2 **Structural Root Zone (SRZ):** This is the area around the base of a tree required for the trees stability in the ground. An area larger than the SRZ always needs to be maintained to preserve a viable tree. The SRZ is calculated using the following formula; (DAB x 50) $^{0.42}$ x 0.64. There are several factors that can vary the SRZ which include height, crown area, soil type and soil moisture. It can also be influenced by other factors such as natural or built structures. Generally, work within the SRZ should be avoided. Soil level changes should also generally be avoided inside the SRZ of trees to be retained. Palms, other monocots, cycads and tree ferns do not have an SRZ. See the appendices for more information about the SRZ.

7.3 **Minor encroachment into TPZ:** Sometimes encroachment into the TPZ is unavoidable. Encroachment includes but is not limited to activities such as excavation, compacted fill and machine trenching. Minor encroachment of up to 10% of the overall TPZ area is normally considered acceptable, providing there is space adjacent to the TPZ for the tree to compensate and the tree is displaying adequate vigour/health to tolerate changes to its growing environment.

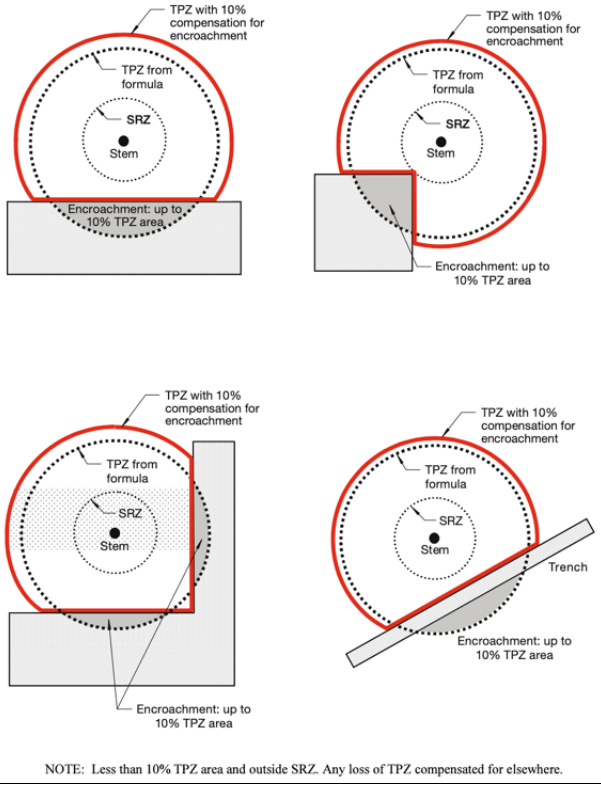

Image 1: Example minor TPZ encroachment from AS4970-2009.

7.4 **Major encroachment into TPZ:** Where encroachment of more than 10% of the overall TPZ area is proposed the project Arborist must investigate and demonstrate that the tree will remain in a viable condition. In some cases, tree sensitive construction methods such as pier and beam footings, suspended slabs, or cantilevered sections, can be utilised to allow additional encroachment into the TPZ by bridging over roots and minimising root disturbance. Major encroachment is only possible if it can be undertaken without severing significant size roots, or if it can be demonstrated that significant roots will not be impacted. Root investigations may be required to identify roots that will be impacted during major TPZ encroachment.

URBAN ARBOR
The Trusted Name in Tree Management

8. OBSERVATIONS

8.1 **Tree information:** Details of each individual tree assessed, including the observations taken during the site inspection, can be found in the tree inspection schedule in appendix 1, where the indicative tree protection zone (TPZ) and Structural Root Zone (SRZ) has been calculated for each of the subject trees. The TPZ and SRZ should be measured in radius from the centre of the trunk. Each of the subject trees have been awarded a retention value based on the observations using the Tree AZ method. Tree AZ is used to identify higher value trees worthy of being a constraint to development and lower value trees that should generally not be a constraint to the development. The Tree AZ categories sheet (Barrell Tree Consultancy) has been included in appendix 2 to assist with understanding the retention values. The retention value that has been allocated to the subject trees in this report is not definitive and should only be used as a guideline. The retention values should be considered in accordance with the following;

Category	Example recommendation
A	The trees in this category should be retained if it is reasonably possible.
Z	The trees in this category should not cause a constraint to the development proposals. Further assessment of the tree condition and suitability for retention, such as tree risk assessment, decay testing or root collar excavations, may be required to retain some trees in this category.

8.2 **Site plans:** The location of all trees included in this report were surveyed by Cardno (registered surveyors). The information for all trees included in this report has been collected by Urban Arbor. The tree location and tree information has been overlaid onto the proposed site plans by Arcadis. Urban Arbor has used the software PT-Mapper-Pro to calculate all TPZ encroachment areas and percentages discussed in this report. Please refer to the Eastern and Western Corridor General Arrangement – Tree Survey by Arcadis, Including Sheet 1-70, Rev A, received 13 April 2022, for detailed site plans. The site plans include tree location/tree trunk, tree identification number, canopy spread, tree protection zone (TPZ) and Structural Root Zone (SRZ). An example of the tree information identified within the site plans has been included in Image 1 below:

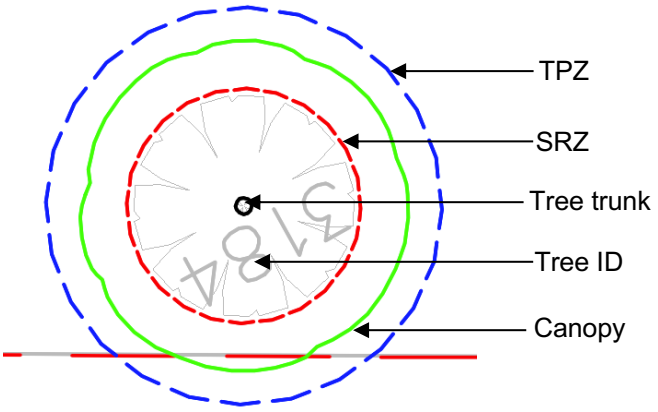

Image 2: Example of tree information identified within site plans.

9. ASSESSMENT OF CONSTRUCTION IMPACTS

9.1 Table 1: In the table below, the impact of the proposed development works has been assessed for all trees included in the report.

Tree ID	Species	Retention Value (Tree AZ)	TPZ radius (m)	TPZ area (m^2)	SRZ radius (m)	TPZ encroachment	Assessment of development impact	Recommendation
1	*Corymbia citriodora*	A1	8.6	234.5	3.0	None	No proposed TPZ encroachment.	Retain and protect
2	*Elaeocarpus reticulatus*	A1	2.0	12.6	1.6	None	No proposed TPZ encroachment.	Retain and protect
3	*Elaeocarpus reticulatus*	A1	2.0	12.6	1.6	None	No proposed TPZ encroachment.	Retain and protect
4	*Elaeocarpus reticulatus*	A1	2.0	12.6	1.6	None	No proposed TPZ encroachment.	Retain and protect
5	*Leptospermum petersonii*	A2	3.0	27.6	2.3	None	No proposed TPZ encroachment.	Retain and protect
6	*Leptospermum petersonii*	A2	2.2	15.4	1.8	None	No proposed TPZ encroachment.	Retain and protect
7	*Leptospermum petersonii*	Z4	2.2	14.7	1.7	None	No proposed TPZ encroachment.	Retain and protect
8	*Leptospermum petersonii*	A1	3.1	30.4	2.4	None	No proposed TPZ encroachment.	Retain and protect
9	*Podocarpus elatus*	A1	7.8	191.1	2.8	None	No proposed TPZ encroachment.	Retain and protect
10	*Corymbia citriodora*	A1	10.0	311.7	3.2	Minor	The tree is located outside the site boundary. The proposed security fence will encroach into the TPZ by less than 5%. This is considered to be a minor and acceptable TPZ encroachment and the proposed works will not significantly impact the condition of the tree.	Retain and protect
11	*Grevillea robusta*	A1	4.6	65.3	2.3	None	No proposed TPZ encroachment.	Retain and protect
12	*Podocarpus elatus*	A1	8.2	209.2	2.9	None	No proposed TPZ encroachment.	Retain and protect

3232	Casuarina glauca	A1	6.0	113.1	2.8	Major	The proposed security fence will encroach into the TPZ by 21% (24.3m^2) but not into the SRZ, indicating that the condition of the tree will potentially be impacted. To reduce the impact to the tree, the proposed security fence must be installed in accordance with section 9.2 of this report.	Retain and protect*
G26	Mixed spp	A1	3.6	40.7	2.1	Major	Area inaccessible between Myrtle Street and Carrington Road. Tree data estimated from Myrtle Street. Group of approximately 20 trees, including Acacia spp, Eucalyptus spp, Ligustrum spp, Cinnamomum camphora. The proposed security fence will not impact the larger and more significant trees located to the East of the group. The smaller weed species trees to the West of the group will potentially be impacted by the proposed security fence. The weed species trees should not be a constraint to the development and are recommended for removal.	Remove weed species only

Notes

- Retain and protect* = The proposed construction must be completed in accordance with section 10.3 to reduce the impact to the tree.
- Retain and protect# = Not assessed within this report. Located within T2M scope.
- Remove* = The tree is located within the site boundary and is recommended for removal due to major TPZ/SRZ encroachment. It may be possible to retain this tree through detailed site investigations to determine the trees viability for retention, i.e. root investigations, tree sensitive design/construction.
- Remove* & # = The tree is located outside the site boundary and is recommended for removal due to major TPZ/SRZ encroachment. It may be possible to retain this tree through detailed site investigations to determine the trees viability for retention, i.e. root investigations, tree sensitive design/construction.
- Remove# = The tree is located outside the site boundary and will be subject to major TPZ/SRZ encroachment. Recommended for removal.

10. DISCUSSION OF IMPACT ASSESSMENT

10.1 **General:** The assessment of development impacts has been undertaken by reviewing the proposed site plans only. The TPZ area identified within AS4970-2009 is an indicative area only that is calculated to assist with determining if a tree is likely to be impacted by development works. The distribution of roots within a TPZ is generally not uniform and can be affected by existing features, such as structures (retaining walls, dwellings e.t.c.) or topography (rock outcrops, slopes e.t.c.). See appendix 3 for a brief description of a trees root system. Where major TPZ encroachment is proposed, the project Arborist must demonstrate that the tree will remain viable. In some cases, it may be possible to demonstrate through detailed site investigations or tree sensitive construction methods that trees will be viable for retention. Some specific trees within the report that are subject to major TPZ encroachment have been recommended to be removed due to indicative development impacts, however it may be possible to retain the trees through tree sensitive design/construction (section 10.3) or more detailed assessments, including root investigations. See appendix 2 for more information in regards to root investigations.

10.2 **Assessment of TPZ Encroachments:** The TPZ and SRZ of each tree or tree group has been overlaid onto the plans. The percentage of TPZ encroachment from the proposed structures has been calculated in the assessment of construction impacts in section 9. For the purpose of this report, the recommendations for tree retention/removal due to TPZ encroachments have been based on the following;

- Trees that are subject to TPZ encroachments of less than 10%, with no encroachment into the SRZ, have been recommended to be retained as the impact to the tree will be minor and acceptable (only if not impacted by other development works).
- Trees that are subject to TPZ encroachments of less than 15%, with no encroachment into the SRZ, have been recommended to be retained as the impact to the tree will be acceptable (only if not impacted by other development works and the trees are in good condition, indicating they have the capacity to tolerate some root disturbance)
- Trees that are subject to TPZ encroachment of 15-35%, with no encroachment into the SRZ, have been recommended to be retained, subject to tree sensitive design and construction recommended in section 10.3. Detailed root investigations can also be undertaken to identify significant roots within the area of TPZ encroachment that should be retained. The percentage of TPZ encroachment for these trees indicates that the condition of the trees will potentially be impacted, however this impact can be satisfactorily mitigated via the recommended tree sensitive construction measures.
- Some Category Z retention trees that are subject to TPZ encroachments of 10-35% have also been recommended for removal based on their condition, species (exempt species/noxious weeds) or size (insignificant/small trees that should not be a constraint to the development).
- Trees that are subject to TPZ encroachment greater than 35% from some proposed structures have been recommended to be removed, as there is likely to be a high impact to the trees condition.
- Any trees that are subject to SRZ encroachment have been recommended for removal, as severing significant roots in the SRZ will potentially impact the trees stability.

10.3 **Tree Sensitive Design/Construction:** Trees that are subject to TPZ encroachment of 15-35%, with no encroachment into the SRZ, have been recommended to be retained, subject to the following tree sensitive design and construction. If the construction cannot be completed in accordance with these specifications, the trees may not be viable for retention.

10.3.1 **Security Fence:** The proposed fencing will be installed using post and rail type construction. The posts will be spaced at 2.4m intervals. To ensure the trees are not significantly impacted by the works, the initial 600mm of excavations for the post holes within the TPZ must be excavated manually. No posts are to be located within the SRZ of trees to be retained or root investigations will be required to determine the post location. See appendix 2 for more information in regards to root investigations. All rails/horizontal materials are to be located on or above existing soil grades. This will allow for the majority of the root system to be retained between the posts, minimising root loss

10.3.2 **Tree Sensitive Footings**: To minimise root loss in the TPZ of the trees, the footings of proposed structures within the TPZ should be pier and beam/suspended slab style footings to bridge over significant tree roots and minimise root loss. To ensure that significant tree roots are retained, it must be demonstrated by the project engineer that the following construction methods can be implemented;

- All excavations for piers must be carried out manually under the supervision of the project Arborist (see section 13 for details of manual excavation and project Arborist).
- The location of piers must be flexible to avoid significant roots (roots greater than 40mm in diameter). All roots greater than 40mm in diameter must be retained unless the project arborist has assessed and approved in writing that severing the root will not impact the condition or stability of the tree.
- Cross beams/slabs must be located on or above the existing soil grades.
- The piers should be located a minimum of 200mm from any root to be retained that is greater than 40mm in diameter.

10.3.3 **Tree Sensitive Hard Surfacing Construction :** To retain the trees in a viable condition, the hard surfacing must be constructed in a tree sensitive method. The hard surfacing should be constructed above existing grades in the TPZ of the trees. The diagram below (Image A) gives an example of a no-excavation method for constructing hard surfacing close to trees. The location of retaining pegs should be flexible, avoiding damage to structural roots.

If excavations are essential, they must not exceed 100mm below the existing grades. The excavations should be supervised by a project Arborist with a minimum AQF level 5 qualification. All excavations for the hard surfacing should be carried out manually to avoid impacting retained tree roots. All tree roots greater than 40mm in diameter should be retained, unless the project arborist has assessed and advised that the pruning/severing of the root will not impact the condition or stability of the tree. Manual excavation may include the use of pneumatic and hydraulic tools, high-pressure air or a combination of high-pressure water and a vacuum device.

Where tree roots greater than 40mm are encountered that must be retained, the hard surfacing should be elevated over the individual tree root to allow for its retention. Examples of methods that can be used to bridge individual tree roots have been included below (Image B and C). Using pier and beam bridges as per image C is the recommended/preferred method, as it will allow for future growth of the tree roots, reducing future damage to the hard surfacing from the roots.

10.3.4 **Tree Sensitive Retaining Walls:** To reduce the impact of retaining walls, timber sleeper retaining walls should be used to avoid severing/pruning significant roots in the TPZ (no continuous strip footing). During the construction of the retaining walls, all sleepers should be located on or above existing soil grades, and piers/posts locations should be flexible to avoid significant roots (roots greater than 40mm in diameter) that are critical to the health and stability of the tree. The project Arborist should directly supervise the construction of retaining walls and no roots greater than 40mm in diameter should be pruned/severed unless assessed and approved in writing by the project Arborist.

10.3.5 **Retaining Walls to Limit Cut and Fill in the TPZ:** The image below (Image D) is an example of how a retaining wall can limit fill within the TPZ.

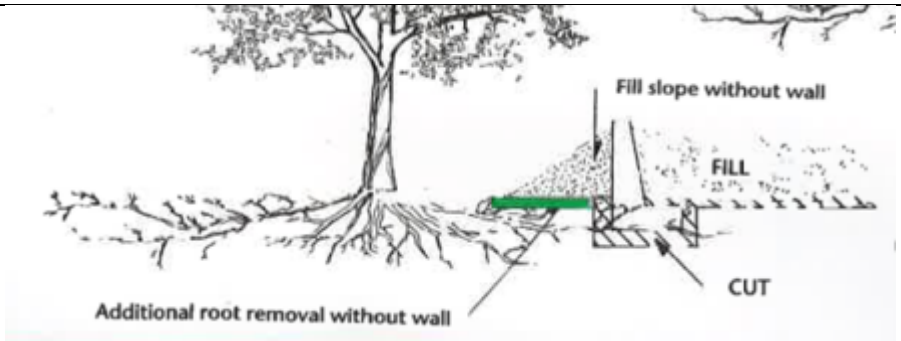

Image D: An image from A technical guide to preservation of trees during land development ,[16] showing how retaining walls can be used to limit fill inside the TPZ.

10.3.6 **Fill in the TPZ:** Tree roots require water, nutrients and air/gaseous exchange to function properly. Increasing the soil level in the TPZ can impact the trees by reducing the availability of water, nutrients and air to the trees underlying root system and can cause the decline of a trees health and vigour, potentially causing the death of the tree. Placing fill directly against the trunk of a tree can potentially cause collar rot. Collar rot forms when soil against the trunk of the tree accelerates sapwood or heartwood decay.[17] Fill material of less than 0.2 metres will not significantly impact trees. Where fill material of more than 0.2 metres is proposed in the TPZ, a structural/gap graded soil should be used that allows filtration of water, nutrients and gaseous exchange to the trees underlying root system. A suitable soil should consist of a mixing ratio of 80% angular size aggregate (crushed stone or coarse sand) and 20% filler soil by volume (clay loam). The aggregate size part should range from 1.5-2.5cm. The filler soil should contain 2-5% organic matter by dry weight. A soil specialist will be able to provide additional information in relation to soil specifications.

[17] Dunster, Julian A., Thomas Smiley, Nelda Matheny, and Sharon Lilly, *Tree Risk Assessment Manual*, Champaign, Illinois: International Society of Arboriculture (2013), page 108.

10.3.7 **Combined Service Routes (CSR):** The proposed CSR will be installed using post excavations and the horizontal service lines. To ensure the trees are not significantly impacted by the works, the initial 600mm of excavations for the post holes within the TPZ must be excavated manually. The post location must be flexible to avoid the severance of significant roots 40mm and greater in diameter. No posts are to be located within the SRZ or root investigations will be required to determine the post location. See appendix 2 for more information in regards to root investigations. All horizontal service lines will be located above ground and will not impact the trees. This will allow for the majority of the root system to be retained between the posts, minimising root loss.

10.3.8 **Underground Services:** AS4790-2009 recommends that all underground services located inside the TPZ of any tree to be retained must be installed via tree sensitive techniques. This should include either directional drilling methods or manual excavations to minimise the impact to trees identified for retention. Section 4.5.5 of AS4970-2009 says that 'The directional drilling bore should be at least 600 mm deep. The project arborist should assess the likely impacts of boring and bore pits on retained trees. For manual excavation of trenches the project arborist should advise on roots to be retained and should monitor the works'.[18]

10.4 **Canopy Pruning:** All canopy pruning required to accommodate the proposed works must be carried out in accordance with AS4373-2007 Pruning of Amenity Trees.[19] The final pruning cuts must be to the branch collar/union. Canopy pruning should not exceed the removal of more than 15% of the live foliage area of a tree. Where required canopy pruning exceeds the removal of more than 15% of the live foliage area, the project arborist must assess the canopy pruning to determine if the condition of the tree will be impacted and if the tree can be retained in a viable condition.

12. RECOMMENDATIONS

12.1 Two thousand five hundred and eighteen (2518) trees and thirteen (13) groups of trees have been identified and assessed in this report. Refer to appendix 1 for an inspection schedule of all trees. Each of the trees has been allocated a retention value using the Tree AZ method, see section 8.1 for more information in relation to the retention values.

12.2 For site plans of tree locations, refer to the Eastern and Western Corridor General Arrangement – Tree Survey by Arcadis, Including Sheet 1-70, Rev A, received 13 April 2022. See section 8.2 for more information.

12.3 One hundred and eighty-four (184) trees and three (3) groups of trees have been recommended to be removed. Of these trees, thirty-four (34) trees and one (1) group of trees are located outside the site boundary. The removal of the trees located outside the site boundary is subject to approval by the relevant authorities and/or tree owners. Refer to section 11.2, 11.3, 11.4 and 11.5 for a list of the trees recommended to be removed by retention value.

12.4 It may be possible to retain eighty-nine (89) of the trees recommended for removal in section 12.3 through detailed site investigations of the impact to the trees root system and/or tree sensitive construction measures. Refer to section 10 for more information in regard to detailed site investigations and tree sensitive construction measures. Refer to section 11.4 and 11.5 for a list of the trees by retention value within this category.

12.5 Two thousand three hundred and thirty-four (2334) trees and ten (10) groups of trees have been recommended to be retained and protected. Refer to section 11.6, 11.7 and 11.8 for a list of the trees by retention value.

12.6 Seventeen (17) of the trees recommended to be retained in section 12.5 will be subject to major TPZ encroachment. These trees require tree sensitive construction measures to be retained in a viable condition (see section 10.3 for more information). Refer to section 11.6 for a list of the trees by retention value within this category.

12.7 One hundred and eighty (180) trees and two (2) groups of the trees recommended to be retained in section 12.5 have not been assessed as part of this report. These trees are located within the T2M scope. Refer to section 11.8 for a list of the trees by retention value within this category.

12.8 All canopy pruning required to accommodate the proposed works must be carried out in accordance with AS4373-2007 Pruning of Amenity Trees.[20] See section 10.4 for more information.

12.9 Generic tree protection guidance has been provided in section 13. It is recommended that a detailed tree management plan (TMP) is prepared for the development in accordance with AS4970-2009 and developed in combination with the overall construction management plan for the site. The TMP should be prepared by a consulting Arborist with a minimum AQF level 5 qualification.

12.10 This report does not provide approval for tree removal or pruning works. All recommendations in this report are subject to approval by the relevant authorities and/or tree owners.

[20] Council Of Standards Australia, *AS 4373 Pruning of amenity trees* (2007).

URBAN ARBOR
The Trusted Name in Tree Management

13. GENERAL TREE PROTECTION REQUIREMENTS

13.1 **Use of this report:** All contractors must be made aware of the tree protection requirements prior to commencing works at the site. This report must also be made available to any contractor prior to works commencing and during any on site operations.

13.2 **Project Arborist:** Prior to any works commencing at the site a project Arborist should be appointed. The project Arborist should be qualified to a minimum AQF level 5 and/or equivalent qualifications and experience, and should assist with any development issues relating to trees that may arise. If at any time it is not feasible to carryout works in accordance with this, an alternative must be agreed in writing with the project Arborist.

13.3 **Tree work:** All tree work should be carried out by a qualified and experienced Arborist with a minimum of AQF level 3 in arboriculture, in accordance with NSW Work Cover Code of Practice for the Amenity Tree Industry (1998) and AS4373 Pruning of amenity trees (2007).

13.4 **Initial site meeting/on-going regular inspections:** The project Arborist is to hold a pre-construction site meeting with the principal contractor to discuss methods and importance of tree protection measures and resolve any issues in relation to tree protection that may arise. In accordance with AS4970-2009, the project Arborist should carryout regular site inspections to ensure works are carried out in accordance with this document throughout the development process. Site inspections are recommended on a monthly frequency throughout the development.

13.5 **Tree Protection Specifications:**

13.5.1 Trunk and Branch Protection: The trunk must be protected by wrapped hessian or similar material to limit damage. Timber planks (50mm x 100mm x 1800mm or similar) should then be placed around tree trunk. The timber planks should be spaced at 100mm intervals, and must be fixed against the trunk with tie wire, or strapping and connections finished or covered to protect pedestrians from injury. The hessian and timber planks must not be fixed to the tree in any instance. The trunk and branch protection shall be installed prior to any work commencing on site and shall be maintained in good condition for the entire development period.

13.5.2 Protective fencing: The protective fencing must be constructed of 1.8 metre ‘cyclone chainmesh fence’. The fencing should only be removed for the landscaping phase and this should be approved by the project Arborist. Where it is not feasible to install fencing at the specified location due to factors such restricting access to areas of the site or for constructing new structures, an alternative location and protection specification must be agreed with the project Arborist. Any modifications to the fencing locations must be approved by the project Arborist.

13.5.3 TPZ signage: Tree protection signage is to be attached to the protective fencing, displayed in a prominent position and the sign repeated at 10 metres intervals or closer where the fence changes direction. Each sign shall contain in a clearly legible form, the following information:

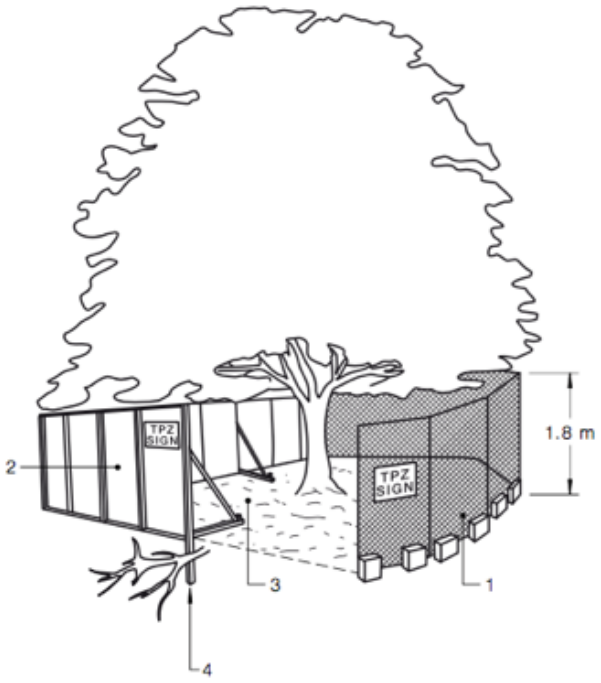

- Tree protection zone/No access.
- This fence has been installed to prevent damage to the tree/s and their growing environment both above and below ground. Do not move fencing or enter TPZ without the agreement of the project Arborist.
- The name, address, and telephone number of the developer/builder and project Arborist

URBAN ARBOR
The Trusted Name in Tree Management

13.5.4 Mulch: Any areas of the TPZ located inside the subject site must be mulched to a depth of 75mm with good quality mulch. Mulch must not be built-up around the trunk the trees as it can cause collar rot.

13.5.5 Ground Protection: Ground protection is required to protect the underlying soil structure and root system in areas where it is not practical to restrict access to whole TPZ, while allowing space for construction. Ground protection must consist of good quality composted wood chip/leaf mulch to a depth of between 150-300mm, laid on top of geo textile fabric, with timber/plywood boards overlaid. If vehicles are to be using the area, additional protection will be required such as rumble boards or track mats to spread the weight of the vehicle and avoid load points. Ground protection is to be specified and approved by the project Arborist as required.

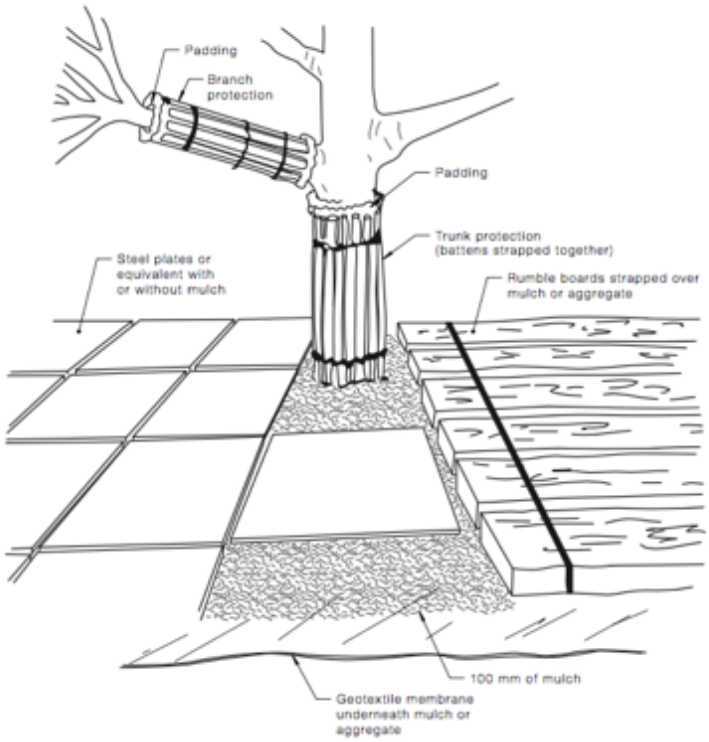

13.5.6 Temporary irrigation: Temporary irrigation should distribute water evenly throughout the area of the TPZ. The irrigation should be used for at minimum one hour daily throughout all stages of the development.

LEGEND:
1 Chain wire mesh panels with shade cloth (if required) attached, held in place with concrete feet.
2 Alternative plywood or wooden paling fence panels. This fencing material also prevents building materials or soil entering the TPZ.
3 Mulch installation across surface of TPZ (at the discretion of the project arborist). No excavation, construction activity, grade changes, surface treatment or storage of materials of any kind is permitted within the TPZ.
4 Bracing is permissible within the TPZ. Installation of supports should avoid damaging roots.

An image from AS4970-2009,[21] with example tree protection.

[21] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009), page 16.

NOTES:

1 For trunk and branch protection use boards and padding that will prevent damage to bark. Boards are to be strapped to trees, not nailed or screwed.

2 Rumble boards should be of a suitable thickness to prevent soil compaction and root damage.

An image from AS4970-2009,[22] with example tree protection.

13.6 **Restricted activities inside TPZ:** The following activities must be avoided inside the TPZ of all trees to be retained unless approved by the project Arborist. If at any time these activities cannot be avoided an alternative must be agreed in writing with the project Arborist to minimise the impact to the tree.

A) Machine excavation.
B) Ripping or cultivation of soil.
C) Storage of spoil, soil or any such materials
D) Preparation of chemicals, including preparation of cement products.
E) Refuelling.
F) Dumping of waste.
G) Wash down and cleaning of equipment.
H) Placement of fill.
I) Lighting of fires.
J) Soil level changes.
K) Any physical damage to the crown, trunk, or root system.
L) Parking of vehicles.

[22] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009), page 17.

13.7 **Demolition:** The demolition of all existing structures inside or directly adjacent to the TPZ of trees to be retained must be undertaken in consultation with the project Arborist. Any machinery is to work from inside the footprint of the existing structures or outside the TPZ, reaching in to minimise soil disturbance and compaction. If it is not feasible to locate demolition machinery outside the TPZ of trees to be retained, ground protection will be required. The demolition should be undertaken inwards into the footprint of the existing structures, sometimes referred to as the 'top down, pull back' method.

13.8 **Excavations:** The project Arborist must supervise and certify that all excavations and root pruning are in accordance with AS4373-2007 and AS4970-2009. For continuous strip footings, first manual excavation is required along the edge of the structures closest to the subject trees. Manual excavation should be a depth of 1 metre (or to unfavourable root growth conditions such as bed rock or heavy clay, if agreed by project Arborist). Next roots must be pruned back in accordance with AS4373-2007. After all root pruning is completed, machine excavation is permitted within the footprint of the structure. For tree sensitive footings, such as pier and beam, all excavations inside the TPZ must be manual. Manual excavation may include the use of pneumatic and hydraulic tools, high-pressure air or a combination of high-pressure water and a vacuum device. No pruning of roots greater 30mm in diameter is to be carried out without approval of the project arborist. All pruning of roots greater than 30mm in diameter must be carried out by a qualified Arborist/Horticulturalist with a minimum AQF level 3. Root pruning is to be a clean cut with a sharp tool in accordance with AS4373 Pruning of amenity trees (2007).[23] The tree root is to be pruned back to a branch root if possible. Make a clean cut and leave as small a wound as possible.

13.9 **Landscaping:** All landscaping works within the TPZ of trees to be retained are to be undertaken in consultation with a consulting Arborist to minimise the impact to trees. General guidance is provided below to minimise the impact of new landscaping to trees to be retained.

- All excavations for landscaping works should be manual and in accordance with section 13.8.
- Replacement planting for all trees recommended for removal should be incorporated into the landscape plan. It is recommended that at minimum one tree for each tree proposed to be removed are planted to maintain/increase overall canopy cover at the site when mature. Any replacement tree must be selected in accordance with AS2303-2015 Tree stock for landscape use.
- The location of new plantings inside the TPZ of trees to be retained should be flexible to avoid unnecessary damage to tree roots greater than 40mm in diameter.
- Level changes should be minimised. The existing ground levels within the landscape areas should not be lowered by more than 50mm or increased by more 100mm without assessment by a consulting Arborist.
- New retaining walls should be avoided. Where new retaining walls are proposed inside the TPZ of trees to be retained, they should be constructed from tree sensitive material, such as timber sleepers, that require minimal footings/excavations. If brick retaining walls are proposed inside the TPZ, considerer pier and beam type footings to bridge significant roots

[23] Council Of Standards Australia, *AS 4373 Pruning of amenity trees* (2007) page 18

that are critical to the trees condition. Retaining walls must be located outside the SRZ and sleepers/beams located above existing soil grades.

- New footpaths and hard surfaces should be minimised, as they can limit the availability of water, nutrients and air to the trees root system. Where they are proposed, they should be constructed on or above existing soil grades to minimise root disturbance and consider using a permeable surface. Footpaths should be located outside the SRZ.
- Where fill/sub base is used inside the TPZ, fill material should be a coarse granular material that does not restrict the flow of water and air to the root system below. This type of material will also reduce the impact of soil compaction during construction.
- Any new fencing in the TPZ of trees should constructed carefully to avoid impacting significant roots. The location of fence posts should be flexible to allow for the retention of root greater than 40mm in diameter. The base of fence panels should be located above existing soil grades.

13.10 **Underground Services:** Where possible underground services should be located outside the TPZ of trees to be retained. All underground services located inside the TPZ of any tree to be retained must be installed via tree sensitive techniques. This should include either directional drilling methods or manual excavations to minimise the impact to trees identified for retention. No roots greater than 30mm in diameter should be severed during the installation of service pipes unless approved in writing by the project Arborist.

13.11 **Sediment and Contamination:** All contamination run off from the development such as but not limited to concrete, sediment and toxic wastes must be prevented from entering the TPZ at all times.

13.12 **Tree Wounding/Injury:** Any wounding or injury that occurs to a tree during the construction process will require the project Arborist to be contacted for an assessment of the injury and provide mitigation/remediation advice. It is generally accepted that trees may take many years to decline and eventually die from root damage. All repair work is to be carried out by the project Arborist, at the contractor's expense.

13.13 **Completion of Development Works:** After all construction works are complete the project Arborist should assess that the subject trees have been retained in the same condition and vigour. If changes to condition are identified the project Arborist should provide recommendations for remediation.

9	Brown Pine	*Podocarpus elatus*	Mature	10	4	650					650	680	Good	Good	Medium	1. Long	A1	7.8	2.8	Co-dominant stems at 1m.
10	Lemon Scented Gum	*Corymbia citriodora*	Mature	17	5	830					830	900	Good	Good	High	1. Long	A1	10.0	3.2	Canopy extends into corridor.
11	Silky Oak	*Grevillea robusta*	Mature	11	3	380					380	440	Good	Fair	Medium	2. Medium	A1	4.6	2.3	Growing through canopy of adjacent tree. Canopy extends into corridor.
12	Brown Pine	*Podocarpus elatus*	Mature	10	4	680					680	740	Good	Good	High	1. Long	A1	8.2	2.9	Co-dominant stems at 1m.
13	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	14	2	290					290	300	Good	Good	Medium	1. Long	A1	3.5	2.0	Canopy extends into corridor.
14	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	14	2	270					270	290	Good	Good	Medium	1. Long	A1	3.2	2.0	Canopy extends into corridor.
15	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	14	4	410					410	450	Good	Good	Medium	1. Long	A1	4.9	2.4	Canopy extends into corridor.
16	Illawara Flame	*Brachychiton acerifolius*	Semi-mature	8.5	2	250					250	290	Good	Good	Medium	1. Long	A1	3.0	2.0	Canopy extends into corridor.
17	Sydney Blue Gum	*Eucalyptus saligna*	Mature	18	4	450					450	480	Good	Good	High	1. Long	A1	5.4	2.4	Canopy extends into corridor.
18	Swamp Mahogany	*Eucalyptus robusta*	Mature	13	4	460					460	480	Good	Good	High	1. Long	A1	5.5	2.4	Canopy extends into corridor.
19	Swamp Oak	*Casuarina glauca*	Mature	13	2	250					250	270	Good	Good	Medium	1. Long	A1	3.0	1.9	Trunk lean. Canopy extends into corridor.
20	Swamp Oak	*Casuarina glauca*	Mature	12	2	250					250	280	Good	Good	Medium	1. Long	A1	3.0	1.9	Canopy within park only.
21	Swamp Oak	*Casuarina glauca*	Mature	13	3	300					300	350	Good	Good	Medium	1. Long	A1	3.6	2.1	Canopy extends into corridor.
22	Swamp Oak	*Casuarina glauca*	Mature	12	2	230					230	260	Good	Good	Medium	1. Long	A1	2.8	1.9	Canopy within park only.
23	Swamp Oak	*Casuarina glauca*	Mature	9	2	210					210	240	Good	Good	Medium	1. Long	A1	2.5	1.8	Canopy extends into corridor.
24	Swamp Oak	*Casuarina glauca*	Mature	12	2	240	160	100			305	400	Good	Fair	Medium	3. Short	Z9	3.7	2.3	Co-dominant stems with partial failure of stem in direction of corridor.
25	Swamp Oak	*Casuarina glauca*	Mature	16	2.5	340					340	360	Good	Fair	Medium	2. Medium	A1	4.1	2.2	Co-dominant stems at 7m with bark inclusion.
26	Swamp Oak	*Casuarina glauca*	Mature	14	2	330					330	340	Good	Good	Medium	1. Long	A1	4.0	2.1	Canopy extends into corridor.
27	Swamp Oak	*Casuarina glauca*	Semi-mature	8	1.5	180					180	190	Good	Fair	Medium	2. Medium	A1	2.2	1.6	Suppressed by adjacent trees. Canopy extends into corridor.
28	Swamp Oak	*Casuarina glauca*	Mature	12	1.5	210					210	220	Good	Good	Medium	1. Long	A1	2.5	1.8	Canopy within park only.
29	Swamp Oak	*Casuarina glauca*	Mature	12	3	280					280	310	Good	Good	Medium	1. Long	A1	3.4	2.0	Canopy within park only.
30	Swamp Oak	*Casuarina glauca*	Mature	9	2	270					270	290	Good	Good	Medium	1. Long	A1	3.2	2.0	Canopy extends into corridor.
31	Swamp Oak	*Casuarina glauca*	Mature	14	3	280					280	300	Good	Good	Medium	1. Long	A1	3.4	2.0	Upper canopy extends into corridor.
32	Swamp Oak	*Casuarina glauca*	Mature	10	3	310					310	340	Good	Good	Medium	1. Long	A1	3.7	2.1	Canopy extends into corridor.
33	Swamp Oak	*Casuarina glauca*	Mature	14	2	230					230	250	Good	Good	Medium	1. Long	A1	2.8	1.8	Canopy extends into corridor.
34	Swamp Oak	*Casuarina glauca*	Semi-mature	13	2	220					220	240	Good	Good	Medium	1. Long	A1	2.6	1.8	Canopy within park only.
35	Swamp Oak	*Casuarina glauca*	Semi-mature	9	2	180					180	200	Good	Good	Medium	1. Long	A1	2.2	1.7	Canopy extends into corridor.
36	Swamp Mahogany	*Eucalyptus robusta*	Semi-mature	13	2	210					210	230	Good	Good	Medium	1. Long	A1	2.5	1.8	Canopy within park only.
37	Swamp Mahogany	*Eucalyptus robusta*	Mature	11	4	410					410	440	Good	Good	High	1. Long	A1	4.9	2.3	Canopy extends into corridor.
38	Swamp Oak	*Casuarina glauca*	Mature	16	5	570					570	620	Good	Good	High	1. Long	A1	6.8	2.7	Branch failure to the south west. Canopy extends into corridor.
39	Sydney Blue Gum	*Eucalyptus saligna*	Mature	21	6	720					720	790	Good	Good	High	1. Long	A1	8.6	3.0	Old failure of central leader at 10m. New growth appears to be well attached. Canopy extends into corridor.
40	Swamp Mahogany	*Eucalyptus robusta*	Mature	9	3	280					280	300	Good	Good	Medium	1. Long	A1	3.4	2.0	Canopy extends into corridor.
41	Swamp Mahogany	*Eucalyptus robusta*	Mature	11	4	340					340	440	Good	Good	Medium	1. Long	A1	4.1	2.3	Canopy within park only.
42	Swamp Oak	*Casuarina glauca*	Mature	13	3	340					340	380	Good	Good	Medium	1. Long	A1	4.1	2.2	Canopy extends into corridor.
43	Swamp Mahogany	*Eucalyptus robusta*	Semi-mature	15	3	210					210	230	Good	Good	Medium	1. Long	A1	2.5	1.8	Asymmetric crown shape, within park only.
44	Swamp Oak	*Casuarina glauca*	Semi-mature	10	1.5	150					150	180	Good	Good	Medium	1. Long	A1	2.0	1.6	Canopy within park only.

55	Swamp Mahogany	*Eucalyptus robusta*	Semi-mature	13	2	180					180	200	Good	Good	Medium	1. Long	A1	2.2	1.7	Canopy within park only.
56	Swamp Mahogany	*Eucalyptus robusta*	Mature	12	5	330					330	380	Good	Good	High	1. Long	A1	4.0	2.2	Canopy within park only.
57	Coastal Banksia	*Banksia integrefolia*	Semi-mature	7	2	200					200	220	Good	Good	Low	1. Long	A1	2.4	1.8	Canopy extends into corridor.
58	Swamp Mahogany	*Eucalyptus robusta*	Mature	18	5	490					490	530	Good	Good	High	1. Long	A1	5.9	2.5	Canopy extends into corridor.
59	Swamp Oak	*Casuarina glauca*	Mature	15	3	350					350	380	Good	Good	High	1. Long	A1	4.2	2.2	Canopy within park only.
60	Queensland Brushbox	*Lophostemon confertus*	Mature	17	5	570					570	600	Good	Good	High	1. Long	A1	6.8	2.7	Canopy extends into corridor.
61	Swamp Oak	*Casuarina glauca*	Mature	12	3	310					310	330	Good	Good	Medium	1. Long	A1	3.7	2.1	Canopy within park only.
62	Swamp Oak	*Casuarina glauca*	Semi-mature	9	2	220					220	240	Good	Good	Medium	1. Long	A1	2.6	1.8	Canopy within park only.
63	Swamp Oak	*Casuarina glauca*	Mature	13	5	520					520	550	Good	Good	High	1. Long	A1	6.2	2.6	Canopy pruned towards corridor.
64	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Semi-mature	5	1.5	120					120	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
65	Swamp Oak	*Casuarina glauca*	Mature	10	3	150	250				292	400	Good	Good	Medium	1. Long	A1	3.5	2.3	Canopy extends into corridor.
66	Swamp Oak	*Casuarina glauca*	Semi-mature	10	2	180					180	200	Good	Good	Medium	1. Long	A1	2.2	1.7	Canopy extends into corridor.
67	Swamp Oak	*Casuarina glauca*	Mature	12	2	220					220	240	Good	Good	Medium	1. Long	A1	2.6	1.8	Canopy within park only.
68	Swamp Oak	*Casuarina glauca*	Mature	13	3	380					380	100	Good	Good	Medium	1. Long	A1	4.6	1.5	Canopy extends into corridor.
69	Swamp Oak	*Casuarina glauca*	Mature	13	3	310					310	340	Good	Good	Medium	1. Long	A1	3.7	2.1	Canopy within park only.
70	Avacado	*Persea gratissima*	Mature	11	3.5	320					320	360	Good	Good	Medium	1. Long	A1	3.8	2.2	Located within corridor.
71	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	20	6	550					550	600	Good	Good	High	1. Long	A1	6.6	2.7	DBH estimated. Upper canopy extends into corridor.
72	Forest Oak	*Allocasuarina torulosa*	Mature	7	2	150	150	100			235	350	Good	Good	Medium	1. Long	A1	2.8	2.1	Canopy extends into corridor.
73	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	10	3	210	180				277	290	Good	Good	Medium	1. Long	A1	3.3	2.0	Located within corridor.
74	Common Oak	*Quercus robur*	Mature	8	4	450					450	470	Good	Fair	Medium	2. Medium	A2	5.4	2.4	Located within corridor. Pruned for power line clearance.
75	Coral	*Erythrina crista-galli*	Mature	8	4	400					400	440	Good	Fair	Low	2. Medium	Z3	4.8	2.3	Located within corridor. Pruned for power lines. Exempt species.
76	Tree of Heaven	*Ailanthus altissima*	Mature	5	2	240					240	280	Good	Fair	Low	5. Small/Young	Z1	2.9	1.9	Located within corridor. Cavity near base.
77	Norfolk Island Pine	*Araucaria heterophylla*	Mature	20	4	500					500	550	Good	Good	High	1. Long	A1	6.0	2.6	Canopy extends into corridor.
78	Lemon Scented Tea Tree	*Leptospermum petersonii*	Mature	9	4	450					450	480	Good	Good	Medium	1. Long	A1	5.4	2.4	Canopy extends into corridor.
79	Crepe Myrtle	*Lagerstroemia indica*	Mature	5	2.5	250					250	250	Good	Good	Medium	1. Long	A1	3.0	1.8	Canopy extends into corridor.
80	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	5	2.5	250					250	250	Good	Good	Medium	1. Long	A1	3.0	1.8	Suppressed by adjacent tree. Canopy extends into corridor.
80b	Camphor Laurel	*Cinnamomum camphora*	Mature	10	5	550					550	580	Good	Fair	Medium	1. Long	A1	6.6	2.6	Located on nature strip. Pruned for power lines.
80c	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	450					450	480	Good	Fair	Medium	2. Medium	A1	5.4	2.4	Located on nature strip. Pruned for power lines.
80d	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	460					460	480	Good	Good	Medium	2. Medium	A1	5.5	2.4	Located on nature strip. Pruned for power lines.
80e	Camphor Laurel	*Cinnamomum camphora*	Mature	10	3	320	280				425	500	Good	Fair	Medium	2. Medium	A1	5.1	2.5	Located on nature strip. Co-dominant stems with cavity in union.
80f	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	480					480	520	Good	Good	Medium	1. Long	A1	5.8	2.5	Located on nature strip.
80g	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	460					460	480	Good	Good	Medium	1. Long	A1	5.5	2.4	Located on nature strip.
80h	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	510					510	530	Good	Good	Medium	1. Long	A1	6.1	2.5	Located on nature strip.
80i	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	480					480	510	Good	Good	Medium	1. Long	A1	5.8	2.5	Located on nature strip.
81	Unknown	*Unknown spp*	Dead	4	1	150					150	150	Dead	Poor	Very Low	4. Remove	Z4	2.0	1.5	Dead tree. Branch extends into corridor.
81a	Tibouchina	*Tibouchina spp*	Young	3	1	80					80	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.

81b	Camellia	*Camellia spp*	Semi-mature	2	0.5	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
81c	Mango	*Mangifera indica*	Young	3	1	150					150	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
82	Weeping Fig	*Ficus benjamina*	Semi-mature	6	2	250					250	250	Good	Good	Low	5. Small/Young	Z1	3.0	1.8	Canopy extends into corridor.
82d	Snow In Summer	*Melaleuca linarifolia*	Young	3	0.5	110					110	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
83	Camphor Laurel	*Cinnamomum camphora*	Mature	10	3.5	190	250	300			434	500	Good	Fair	Medium	1. Long	A1	5.2	2.5	Located in corridor.
84	Silky Oak	*Grevillea robusta*	Mature	9.5	4	400					400	550	Good	Fair	Medium	3. Short	Z9	4.8	2.6	Significant cavity at base of tree. Located in corridor.
85	Silky Oak	*Grevillea robusta*	Mature	14	4	750					750	900	Good	Fair	Medium	3. Short	Z9	9.0	3.2	Located in corridor. Significant cavity at base. Pruned for power lines.
86	Peppercorn Tree	*Schinus molle*	Mature	15	9	1200					1200	1300	Good	Good	High	1. Long	A1	14.4	3.7	Canopy extends into corridor.
87	Camphor Laurel	*Cinnamomum camphora*	Mature	10	5	1500					1500	1500	Good	Good	Medium	1. Long	A1	15.0	3.9	Located within corridor. Multi stem tree DBH estimated.
88	Camphor Laurel	*Cinnamomum camphora*	Mature	10	4	1400					1400	1400	Good	Fair	Medium	2. Medium	A1	15.0	3.8	Cavity at base. Located within corridor.
89	Camphor Laurel	*Cinnamomum camphora*	Mature	10	5	1200					1200	1200	Good	Good	Medium	1. Long	A1	14.4	3.6	Located within corridor.
90	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	9	3	440					440	440	Good	Good	Medium	1. Long	A1	5.3	2.3	Located within corridor.
91	Queensland Brushbox	*Lophostemon confertus*	Mature	9	4	350	300				461	500	Good	Good	Medium	1. Long	A1	5.5	2.5	Located within corridor.
92	Queensland Brushbox	*Lophostemon confertus*	Mature	8	4	250	300				391	480	Good	Good	Medium	1. Long	A1	4.7	2.4	Located within corridor on top of rocky slope. Under power lines.
93	London Plane	*Platanus x hispanica*	Mature	21	8	1100					1100	1200	Good	Fair	High	2. Medium	A1	13.2	3.6	Located within corridor. Asymmetric crown shape due to power line clearance. Suckers at base.
94	London Plane	*Platanus x hispanica*	Mature	22	8	1200					1200	1300	Good	Fair	High	2. Medium	A1	14.4	3.7	Located within corridor. Asymmetric crown shape due to power line clearance.
95	London Plane	*Platanus x hispanica*	Mature	21	8	1200					1200	1250	Good	Fair	High	2. Medium	A1	14.4	3.6	Located within corridor. Asymmetric crown shape due to power line clearance.
96	London Plane	*Platanus x hispanica*	Mature	21	6	1250					1250	1300	Good	Fair	High	2. Medium	A1	15.0	3.7	Located within corridor. Asymmetric crown shape due to power line clearance. Suckers at base.
97	London Plane	*Platanus x hispanica*	Mature	21	7	1180					1180	1360	Good	Fair	High	2. Medium	A1	14.2	3.8	Located within corridor. Asymmetric crown shape due to power line clearance.
98	London Plane	*Platanus x hispanica*	Mature	21	6	850					850	1250	Good	Fair	High	2. Medium	A1	10.2	3.6	Located within corridor. Asymmetric crown shape due to power line clearance.
99	London Plane	*Platanus x hispanica*	Mature	21	6	840					840	910	Good	Fair	High	2. Medium	A1	10.1	3.2	Located within corridor. Asymmetric crown shape due to power line clearance.
100	London Plane	*Platanus x hispanica*	Mature	21	8	960					960	1020	Good	Fair	High	2. Medium	A1	11.5	3.3	Located within corridor. Asymmetric crown shape due to power line clearance.
100a	Queensland Brushbox	*Lophostemon confertus*	Mature	20	5	780					780	800	Good	Good	High	1. Long	A1	9.4	3.0	Canopy extends into corridor.
103	Camphor Laurel	*Cinnamomum camphora*	Mature	17	5	1100					1100	1400	Good	Fair	Medium	2. Medium	A1	13.2	3.8	Canopy pruned for power lines.
104	Camphor Laurel	*Cinnamomum camphora*	Mature	16	7	800					800	880	Good	Fair	Medium	2. Medium	A1	9.6	3.1	Canopy pruned for power lines.
105	Camphor Laurel	*Cinnamomum camphora*	Mature	16	4	450					450	500	Good	Fair	Medium	2. Medium	A1	5.4	2.5	Canopy pruned for power lines.
106	Camphor Laurel	*Cinnamomum camphora*	Mature	16	6	600					600	680	Good	Fair	Medium	2. Medium	A1	7.2	2.8	Canopy pruned for power lines. Cavity at base with bee hive.
107	Parramatta Wattle	*Acacia parramattensis*	Mature	7	3	280					280	300	Good	Good	Medium	2. Medium	A1	3.4	2.0	Located within corridor.
108	Parramatta Wattle	*Acacia parramattensis*	Mature	8	2	200	160				256	330	Good	Good	Medium	2. Medium	A1	3.1	2.1	Located within corridor.
109	Parramatta Wattle	*Acacia parramattensis*	Mature	9	2	200					200	220	Good	Good	Medium	2. Medium	A1	2.4	1.8	Located within corridor.
110	Parramatta Wattle	*Acacia parramattensis*	Mature	8	2	180	120				216	220	Good	Good	Medium	2. Medium	A1	2.6	1.8	Located within corridor.
111	Parramatta Wattle	*Acacia parramattensis*	Mature	7	1	150	150				212	280	Fair	Fair	Low	3. Short	Z4	2.5	1.9	Located within corridor. South stem lopped.
112	Parramatta Wattle	*Acacia parramattensis*	Mature	7	1	170					170	190	Fair	Fair	Low	3. Short	Z4	2.0	1.6	Located within corridor. Low foliage density for species with apical dieback. Early stages of decline.
113	Parramatta Wattle	*Acacia parramattensis*	Semi-mature	5	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
115	Parramatta Wattle	*Acacia parramattensis*	Mature	9	3	180	180				255	350	Good	Fair	Medium	2. Medium	A1	3.1	2.1	Located within corridor. South stem lopped.
117	Black Tea-tree	*Melaleuca bracteata*	Semi-mature	6	2	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Canopy extends into corridor.
118	Black Tea-tree	*Melaleuca bracteata*	Semi-mature	6	2	180	180				255	300	Good	Good	Medium	1. Long	A1	3.1	2.0	Canopy extends into corridor.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
119	White Cedar	*Melia azedarach*	Semi-mature	5	2	190					190	210	Good	Good	Medium	1. Long	A1	2.3	1.7	Canopy extends into corridor.
120	White Cedar	*Melia azedarach*	Semi-mature	5	2	170					170	190	Good	Good	Medium	1. Long	A1	2.0	1.6	Canopy extends into corridor.
121	White Cedar	*Melia azedarach*	Semi-mature	5	2	190					190	210	Good	Good	Medium	1. Long	A1	2.3	1.7	Canopy extends into corridor.
122	Black Tea-tree	*Melaleuca bracteata*	Mature	9	3	300	260				397	440	Good	Good	Medium	1. Long	A1	4.8	2.3	Canopy extends into corridor.
123	Weeping Bottlebrush	*Callistemon viminalis*	Mature	8	2	130	160	180			274	310	Good	Good	Medium	1. Long	A1	3.3	2.0	Canopy extends into corridor.
124	Black Tea-tree	*Melaleuca bracteata*	Mature	9	3	200	230	400			503	460	Good	Good	Medium	1. Long	A1	6.0	2.4	Canopy extends into corridor.
125	Blueberry Ash	*Elaeocarpus reticulatus*	Young	3	1	60					60	80	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy within nature strip only.
126	Blueberry Ash	*Elaeocarpus reticulatus*	Semi-mature	5	1	90	110				142	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy within nature strip only.
127	Honey Myrtle	*Melaleuca bracteata 'Revolution Gold'*	Semi-mature	5	1	150					150	160	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
128	Common Oak	*Quercus robur*	Mature	12	5	600					600	620	Good	Good	Medium	1. Long	A1	7.2	2.7	Located within corridor.
129	Common Oak	*Quercus robur*	Mature	11	5	640					640	650	Good	Good	Medium	1. Long	A1	7.7	2.8	Located within corridor.
130	Tallowood	*Eucalyptus microcorys*	Mature	17	8	980					980	1020	Good	Good	High	1. Long	A1	11.8	3.3	Canopy extends into corridor. Pruned for power lines.
131	Olive	*Olea europaea*	Mature	9.5	4	280	280				396	450	Good	Good	Medium	1. Long	A1	4.8	2.4	Canopy extends into corridor.
132	Tree of Heaven	*Ailanthus altissima*	Mature	8	3	240					240	260	Good	Fair	Low	2. Medium	Z3	2.9	1.9	Exempt species. Canopy extends into corridor.
133	Tree of Heaven	*Ailanthus altissima*	Mature	8	3	250					250	280	Good	Fair	Low	2. Medium	Z3	3.0	1.9	Exempt species. Canopy extends into corridor.
134	Turpentine	*Syncarpia glomulifera*	Mature	5	2.5	250	250	280	300		542	1100	Good	Good	Medium	1. Long	A1	6.5	3.4	Located within corridor.
135	Turpentine	*Syncarpia glomulifera*	Mature	9	4	1100					1100	1200	Good	Good	High	1. Long	A1	13.2	3.6	Located within corridor.
136	Turpentine	*Syncarpia glomulifera*	Mature	5	1	200	160				256	400	Good	Fair	Medium	3. Short	Z9	3.1	2.3	Topped. Located within corridor.
137	Turpentine	*Syncarpia glomulifera*	Mature	9	2.5	1000					1000	1100	Good	Fair	Medium	2. Medium	A1	12.0	3.4	Located within corridor. Pruned for power lines.
138	Turpentine	*Syncarpia glomulifera*	Mature	6	2	240					240	280	Good	Fair	Medium	2. Medium	A1	2.9	1.9	Located within corridor. Pruned for power lines.
139	Turpentine	*Syncarpia glomulifera*	Mature	9	3	1400					1400	1400	Good	Good	High	1. Long	A1	15.0	3.8	Located within corridor. Multi stem tree DBH measured at base.
140	Turpentine	*Syncarpia glomulifera*	Mature	9	4	1300					1300	1300	Good	Good	High	1. Long	A1	15.0	3.7	Located within corridor. Multi stem tree DBH measured at base.
141	Leyland Cypress	*X Cupressocyparis leylandii*	Mature	8	4	600					600	640	Good	Good	Low	1. Long	Z3	7.2	2.7	Canopy extends into corridor. Exempt species.
142	Turpentine	*Syncarpia glomulifera*	Mature	9	4	320	300	260			510	850	Good	Good	High	1. Long	A1	6.1	3.1	Located within corridor. Pruned for power lines.
143	Turpentine	*Syncarpia glomulifera*	Mature	8	3	250	300	250	250		527	1000	Good	Good	High	1. Long	A1	6.3	3.3	Located within corridor.
144	Crepe Myrtle	*Lagerstroemia indica*	Semi-mature	4	1.5	150					150	180	Good	Good	Low	5. Small/Young	Z1	2.0	1.6	Canopy extends into corridor.
145	Broad Leaved Privet	*Ligustrum lucidum*	Mature	8	3	250					250	300	Good	Fair	Low	2. Medium	Z3	3.0	2.0	Canopy extends into corridor. Exempt species.
146	Silky Oak	*Grevillea robusta*	Mature	9	3	340					340	380	Good	Fair	Medium	3. Short	Z9	4.1	2.2	Located within corridor. Topped for power lines.
147	Olive	*Olea europaea*	Mature	5	2	180	100				206	220	Good	Good	Low	5. Small/Young	Z1	2.5	1.8	Located within corridor.
148	Silky Oak	*Grevillea robusta*	Mature	10	4.5	440					440	480	Fair	Fair	Medium	2. Medium	A2	5.3	2.4	Located within corridor. Low foliage density for species.
149	Olive	*Olea europaea*	Mature	5	2	230	160				280	340	Good	Fair	Low	5. Small/Young	Z1	3.4	2.1	Located within corridor.
150	Firewheel	*Stenocarpus sinuatus*	Mature	5	2	160					160	180	Good	Good	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor.
151	Broad Leaved Privet	*Ligustrum lucidum*	Young	4	1	100					100	110	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.5	Located within corridor. Exempt species.
152	Avacado	*Persea gratissima*	Mature	4	2	200					200	240	Good	Fair	Low	5. Small/Young	Z1	2.4	1.8	Located within corridor.
153	Loquat	*Eriobotrya japonica*	Mature	4	1.5	180					180	190	Good	Fair	Low	5. Small/Young	Z1	2.2	1.6	Located within corridor.
154	Silky Oak	*Grevillea robusta*	Semi-mature	7	1	110					110	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
155	Silky Oak	*Grevillea robusta*	Semi-mature	7	2	100	110				149	220	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	Located within corridor.
156	Olive	*Olea europaea*	Mature	7	2	200					200	240	Good	Good	Medium	1. Long	A1	2.4	1.8	Canopy extends into corridor.
157	Mango	*Mangifera indica*	Mature	5	3	240					240	260	Good	Good	Medium	1. Long	A1	2.9	1.9	Canopy extends into corridor.
158	Sweet Pittosporum	*Pittosporum undulatum*	Mature	5	2	150					150	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor. Growing on slope.
159	Golden Wreath Wattle	*Acacia saligna*	Semi-mature	4	1.5	80					80	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
160	Golden Wreath Wattle	*Acacia saligna*	Mature	5	2	160		140			213	220	Good	Fair	Low	5. Small/Young	Z1	2.6	1.8	Located within corridor.
161	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	3	200	190				276	350	Fair	Fair	Medium	3. Short	Z9	3.3	2.1	Located within corridor. Branch failure to the north. Low foliage density for species.
162	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	5	1.5	120					120	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.

Appendix 1 - Tree Inspection Schedule

G2	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	9	2	200					200	200	Good	Fair	Low	5. Small/Young	Z3	2.4	1.7	Located within corridor. Group of camphor laurel. Exempt species. Approximately 4 trees.
163	Golden Wreath Wattle	*Acacia saligna*	Mature	6	2	160					160	290	Good	Fair	Medium	2. Medium	A1	2.0	2.0	Located within corridor. Cavity in trunk.
164	Golden Wreath Wattle	*Acacia saligna*	Semi-mature	4	1.5	140					140	160	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
165	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	3	300					300	330	Good	Good	Medium	2. Medium	A1	3.6	2.1	Located within corridor.
194	Camphor Laurel	*Cinnamomum camphora*	Mature	17	4	1300					1300	1300	Good	Fair	Medium	2. Medium	A1	15.0	3.7	Located within corridor. DBH measured at base.
197	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	8	2	100	100	100	120	110	238	600	Good	Fair	Low	5. Small/Young	Z3	2.9	2.7	Located within corridor. Exempt species. Multi stem tree.
198	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	14	5	390	300				492	500	Good	Good	Medium	1. Long	A1	5.9	2.5	Canopy extends into corridor.
199	Queensland Brushbox	*Lophostemon confertus*	Mature	18	5	510					510	580	Good	Good	High	1. Long	A1	6.1	2.6	Upper canopy extends into corridor.
200	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	8	2	100	110	100			179	250	Good	Fair	Very Low	5. Small/Young	Z3	2.1	1.8	Located within corridor. Exempt species.
201	Robinia	*Robinia pseudoacacia*	Mature	9	3	240	310				392	490	Good	Fair	Very Low	2. Medium	Z3	4.7	2.5	Located within corridor. Exempt species.
202	Robinia	*Robinia pseudoacacia*	Semi-mature	8	2	180					180	200	Good	Fair	Very Low	2. Medium	Z3	2.2	1.7	Located within corridor. Exempt species.
203	Robinia	*Robinia pseudoacacia*	Semi-mature	8	2	180					180	200	Good	Fair	Very Low	2. Medium	Z3	2.2	1.7	Located within corridor. Exempt species.
204	Robinia	*Robinia pseudoacacia*	Mature	10	3	250					250	280	Good	Good	Very Low	2. Medium	Z3	3.0	1.9	Located within corridor. Exempt species.
205	Robinia	*Robinia pseudoacacia*	Mature	9	3	100	170	200			281	340	Good	Fair	Very Low	2. Medium	Z3	3.4	2.1	Located within corridor. Exempt species.
206	Robinia	*Robinia pseudoacacia*	Mature	13	5	480					480	500	Good	Good	Low	2. Medium	Z3	5.8	2.5	Canopy extends into corridor.
207	Robinia	*Robinia pseudoacacia*	Mature	13	4	410					410	440	Good	Fair	Low	2. Medium	Z3	4.9	2.3	Canopy extends into corridor. Large pruning wound at 1.5m.
208	Robinia	*Robinia pseudoacacia*	Mature	12	4	380					380	400	Good	Good	Low	2. Medium	Z3	4.6	2.3	Canopy extends slightly into corridor.
209	Camphor Laurel	*Cinnamomum camphora*	Mature	18	5	550					550	600	Good	Fair	Medium	2. Medium	Z3	6.6	2.7	Located within corridor. Exempt species. Pruned for power lines.
210	Camphor Laurel	*Cinnamomum camphora*	Mature	18	5	610					610	690	Good	Fair	Medium	2. Medium	Z3	7.3	2.8	Located within corridor. Exempt species. Pruned for power lines.
G5	Robinia	*Robinia pseudoacacia*	Semi-mature	8	2	150					150	180	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.6	Located within corridor. Group of trees on upper embankment. Exempt species. Approximately 30 trees.
G5a	Wattle	*Acacia spp*	Young	3	1	80					80	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. Group of wattles. Approximately 5 individuals.
211	Camphor Laurel	*Cinnamomum camphora*	Mature	13	3	290					290	340	Good	Good	Medium	1. Long	A1	3.5	2.1	Located within corridor.
212	Hibiscus	*Hibiscus spp*	Mature	5	2	300					300	300	Good	Fair	Low	5. Small/Young	Z1	3.6	2.0	Canopy extends into corridor.
213	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	20	4	500					500	520	Good	Good	High	1. Long	A1	6.0	2.5	Only upper canopy extends into corridor.
214	Weeping Bottlebrush	*Callistemon viminalis*	Mature	6	2	180	120				216	220	Good	Good	Medium	1. Long	A1	2.6	1.8	Canopy extends into corridor.
215	Camphor Laurel	*Cinnamomum camphora*	Mature	16	4	280	270				389	550	Good	Fair	Medium	2. Medium	A1	4.7	2.6	Located within corridor.
215b	Euodia	*Tetradium daniellii*	Mature	15	5	480					480	500	Fair	Good	Medium	2. Medium	A2	5.8	2.5	Located within adjoining property. Canopy extends slightly into corridor.
216	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	15	4	280					280	300	Good	Good	Medium	1. Long	A1	3.4	2.0	Canopy extends into corridor.
216a	Illawara Flame	*Brachychiton acerifolius*	Young	4	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located in adjoining property. Canopy extends slightly into corridor.
223	Indian Coral	*Erythrina x sykesii*	Mature	10	6	1400					1400	1400	Good	Fair	Low	2. Medium	Z3	15.0	3.8	Canopy extends into corridor. Exempt species. DBH measured at base.
224	Queensland Brushbox	*Lophostemon confertus*	Mature	14	4	360					360	430	Good	Fair	Medium	2. Medium	A1	4.3	2.3	Located within corridor. Pruned for power lines.
225	Queensland Brushbox	*Lophostemon confertus*	Mature	14	4	580					580	620	Good	Good	High	1. Long	A1	7.0	2.7	Located within corridor.
226	Queensland Brushbox	*Lophostemon confertus*	Mature	14	4	560					560	590	Good	Good	High	1. Long	A1	6.7	2.7	Located within corridor.
227	Queensland Brushbox	*Lophostemon confertus*	Mature	14	4	640					640	700	Good	Good	High	1. Long	A1	7.7	2.8	Canopy extends slightly into corridor.
228	Queensland Brushbox	*Lophostemon confertus*	Mature	13	5	790					790	820	Good	Good	High	1. Long	A1	9.5	3.0	Located within corridor.
229	Queensland Brushbox	*Lophostemon confertus*	Mature	13	5	900					900	900	Good	Good	High	1. Long	A1	10.8	3.2	Located within corridor.
229a	Black Tea-tree	*Melaleuca bracteata*	Mature	9.5	3.5	320					320	330	Good	Good	Medium	1. Long	A1	3.8	2.1	Located within nature strip.
229b	Black Tea-tree	*Melaleuca bracteata*	Mature	8	3	300					300	330	Good	Good	Medium	1. Long	A1	3.6	2.1	Located within nature strip.
230	Monterey Pine	*Pinus radiata*	Mature	10	6	750					750	780	Fair	Fair	Low	3. Short	Z3	9.0	3.0	Canopy extends into corridor. Exempt species with low foliage density for species and apical dieback.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
231	Loquat	*Eriobotrya japonica*	Mature	4	2	150					150	180	Good	Fair	Low	2. Medium	Z3	2.0	1.6	Canopy extends into corridor. Exempt species.
232	Olive	*Olea europaea*	Young	3	1	100					100	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
233	Olive	*Olea europaea*	Semi-mature	3	1	150					150	180	Good	Good	Low	5. Small/Young	Z1	2.0	1.6	Canopy extends into corridor.
234	Queensland Brushbox	*Lophostemon confertus*	Mature	10	4	500					500	500	Good	Fair	High	2. Medium	A1	6.0	2.5	Canopy extends into corridor. Significant pruning to the south.
235	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	8	2	150					150	170	Good	Good	Medium	1. Long	A1	2.0	1.6	Canopy extends into corridor.
236	Dwarf Lilly Pilly	*Acmena smithii var. minor*	Semi-mature	9	2	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Canopy extends into corridor.
237	Coastal Banksia	*Banksia integrefolia*	Semi-mature	8	1.5	160					160	180	Good	Good	Medium	1. Long	A1	2.0	1.6	Canopy extends into corridor.
238	Italian Cypress	*Cupressus sempervirens*	Mature	9	2	240					240	260	Good	Good	Medium	2. Medium	A1	2.9	1.9	Canopy extends into corridor.
239	Italian Cypress	*Cupressus sempervirens*	Mature	10	3	490					490	520	Good	Good	Medium	1. Long	A1	5.9	2.5	Canopy extends into corridor.
240	Italian Cypress	*Cupressus sempervirens*	Mature	10	3	480					480	490	Good	Good	Medium	2. Medium	A1	5.8	2.5	Canopy extends into corridor.
241	Bhutan Cypress	*Cupressus torulosa*	Mature	10	3	380					380	420	Good	Good	Medium	1. Long	A1	4.6	2.3	Canopy extends into corridor.
243a	Avocado	*Persea gratissima*	Semi-mature	5	2	200					200	220	Good	Good	Low	5. Small/Young	Z1	2.4	1.8	Canopy extends into corridor.
244	Smooth Japanese Maple	*Acer palmatum*	Semi-mature	5	2	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
245	Eucalypt	*Eucalyptus spp*	Young	7	1.5	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
246	Weeping Bottlebrush	*Callistemon viminalis*	Mature	7	2	150					150	180	Good	Good	Medium	1. Long	A1	2.0	1.6	Canopy extends into corridor.
249	Southern Magnolia	*Magnolia grandiflora*	Mature	10	5	900					900	950	Fair	Good	High	2. Medium	A2	10.8	3.2	Canopy extends into corridor. Minor apical dieback. Monitor tree health.
250	Camphor Laurel	*Cinnamomum camphora*	Mature	11	5	1200					1200	1200	Good	Good	Medium	1. Long	A1	14.4	3.6	Canopy extends into corridor. DBH estimated.
251	Citrus	*Citrus spp*	Semi-mature	4	1	120					120	150	Fair	Fair	Low	5. Small/Young	Z3	2.0	1.5	Canopy within neighbouring property only.
252	Small Leaved Privet	*Ligustrum sinense*	Semi-mature	3	1	50					50	50	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.5	Canopy extends into corridor. Exempt species.
253	Green Cestrum	*Cestrum parqui*	Semi-mature	3	1.5	100					100	120	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.5	Canopy extends into corridor. Weed species.
254	Unknown	*Unknown spp*	Mature	5	4	480					480	480	Fair	Fair	Medium	3. Short	Z4	5.8	2.4	Canopy extends into corridor. Low foliage density with apical dieback. Minimal leaf remaining.
255	Oleander	*Nerium oleander*	Mature	5	2	350					350	350	Good	Fair	Low	5. Small/Young	Z1	4.2	2.1	Canopy extends into corridor. DBH measured at ground.
256	Oleander	*Nerium oleander*	Semi-mature	4	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Canopy extends into corridor. DBH measured at ground.
257	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	8	4	180	200	300			403	450	Good	Fair	Medium	2. Medium	A1	4.8	2.4	Canopy extends into corridor.
258	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	330					330	330	Good	Good	Medium	1. Long	A1	4.0	2.1	Canopy within nature strip only. DBH measured below stems.
259	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	330					330	340	Good	Good	Medium	1. Long	A1	4.0	2.1	Canopy within nature strip only. DBH measured below stems.
260	Camphor Laurel	*Cinnamomum camphora*	Mature	8	4	500					500	500	Good	Fair	Low	3. Short	Z3	6.0	2.5	Located within corridor. Topped for power line clearance.
261	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2.5	350					350	350	Good	Good	Medium	1. Long	A1	4.2	2.1	Canopy within nature strip only. DBH measured below stems.
262	Camphor Laurel	*Cinnamomum camphora*	Mature	7	4	1400					1400	1400	Good	Fair	Low	3. Short	Z3	15.0	3.8	Multi stem tree located within corridor and nature strip. Topped for power line clearance.
263	Camphor Laurel	*Cinnamomum camphora*	Mature	8	4	180	190	170			312	420	Good	Fair	Low	3. Short	Z3	3.7	2.3	Located within corridor. Exempt species topped for power line clearance.
264	Camphor Laurel	*Cinnamomum camphora*	Mature	7	4	400					400	400	Good	Fair	Low	3. Short	Z3	4.8	2.3	Located within corridor. Exempt species topped for power line clearance.
265	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	110	100				149	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only.
266	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	400					400	400	Good	Fair	Low	5. Small/Young	Z1	4.8	2.3	Located within corridor. Multi stem tree DBH measured at ground.
267	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1.5	100	110				149	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only.
268	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	350					350	350	Good	Fair	Low	5. Small/Young	Z1	4.2	2.1	Located within corridor. Multi stem tree DBH measured at ground.
269	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	100	80	90	50		164	250	Good	Good	Low	5. Small/Young	Z1	2.0	1.8	Canopy within nature strip only.
270	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
271	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	120	100	80	80		193	240	Good	Fair	Low	5. Small/Young	Z1	2.3	1.8	Canopy within nature strip only. Mechanical damage to trunk.

Appendix 1 - Tree Inspection Schedule

272	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	4	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
273	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
274	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	5	1	160					160	170	Good	Good	Low	5. Small/Young	Z3	2.0	1.6	Located within corridor. Exempt species.
275	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	80	90	110			163	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only.
276	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
277	Cotoneaster	*Cotoneaster spp*	Semi-mature	4	1.5	80	80	100			151	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only.
278	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
279	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
280	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
281	Cotoneaster	*Cotoneaster spp*	Mature	5	3	170					170	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor.
282	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	100	100				141	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only. Mechanical damage to stem.
283	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
284	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
285	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
286	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	1	250					250	250	Good	Good	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
287	Wattle	*Acacia spp*	Mature	5	2	190					190	200	Good	Fair	Low	3. Short	Z9	2.3	1.7	Located within corridor. Trunk lean into boundary fence.
288	Cheese Tree	*Glochidion ferdinandi*	Mature	5	3	450					450	450	Fair	Fair	Medium	3. Short	Z9	5.4	2.4	Located within corridor. Multi stem tree DBH measured at ground. Topped for power line clearance.
289	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	110					110	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy within nature strip only.
290	Wattle	*Acacia spp*	Semi-mature	4	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
291	Cheese Tree	*Glochidion ferdinandi*	Young	4	1	90					90	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
292	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	120	100				156	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy extends into corridor. Branch failure at 500mm to the south.
G6	Cheese Tree	*Glochidion ferdinandi*	Semi-mature	5	2	100	150				180	200	Good	Fair	Medium	3. Short	Z9	2.2	1.7	Group of trees located within corridor and on nature strip. All topped at 5m for power line clearance. Approximately 15 trees.
293	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	80	130				153	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only.
294	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.
295	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	3	1	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Located within corridor. Multi stem tree DBH measured at ground.
296	Camphor Laurel	*Cinnamomum camphora*	Mature	8	3	260	250	290			463	600	Good	Fair	Low	3. Short	Z3	5.6	2.7	Located within corridor. Exempt species topped for power line clearance.
297	Swamp Oak	*Casuarina glauca*	Semi-mature	4	1	180					180	190	Good	Fair	Low	3. Short	Z9	2.2	1.6	Canopy extends into corridor. Topped for power line clearance.
298	Swamp Oak	*Casuarina glauca*	Semi-mature	4	1	80	80	190			221	300	Good	Fair	Low	3. Short	Z9	2.7	2.0	Canopy extends into corridor. Topped for power line clearance.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
299	Swamp Oak	*Casuarina glauca*	Mature	4	2	360					360	410	Good	Fair	Medium	3. Short	Z9	4.3	2.3	Canopy extends into corridor. Topped for power line clearance.
300	Swamp Oak	*Casuarina glauca*	Mature	9	3	480					480	490	Good	Fair	Medium	3. Short	Z9	5.8	2.5	Canopy extends into corridor. Majority of crown topped for power line clearance.
301	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Semi-mature	4	2	250					250	250	Good	Good	Medium	1. Long	A1	3.0	1.8	Canopy extends slightly into corridor.
302	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	2	350					350	350	Good	Fair	Low	5. Small/Young	Z1	4.2	2.1	Canopy extends into corridor. Multi stem tree DBH measured at ground.
303	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Young	3	1	160					160	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Canopy extends into corridor.
304	Willow Pepermint	*Eucalyptus elata*	Mature	4	2	270					270	300	Good	Fair	Medium	1. Long	A1	3.2	2.0	Canopy extends into corridor. Minor trunk lean.
304a	Bhutan Cypress	*Cupressus torulosa*	Mature	10	2	530					530	530	Good	Good	Medium	1. Long	A1	6.4	2.5	Canopy extends into access way.
305	Wattle	*Acacia spp*	Mature	7	3	340					340	380	Fair	Fair	Medium	3. Short	Z4	4.1	2.2	Low foliage density for species with apical dieback. Early stages of decline.
306	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	5	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Canopy adjacent to footpath only. DBH estimated.
307	Bhutan Cypress	*Cupressus torulosa*	Mature	12	3	500					500	550	Good	Good	Medium	1. Long	A1	6.0	2.6	None.
308	Bhutan Cypress	*Cupressus torulosa*	Mature	12	3	500					500	550	Good	Good	Medium	1. Long	A1	6.0	2.6	None.
309	Japanese Camellia	*Camellia japonica*	Semi-mature	3	1	150					150	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	None.
367	Swamp Oak	*Casuarina glauca*	Mature	10	2	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Located within aquatic centre.
368	Swamp Oak	*Casuarina glauca*	Mature	12	2	300					300	320	Good	Good	Medium	1. Long	A1	3.6	2.1	Located within aquatic centre. Pruned for power lines.
369	Swamp Oak	*Casuarina glauca*	Mature	11	2	280					280	300	Good	Good	Medium	1. Long	A1	3.4	2.0	Located within aquatic centre. Pruned for power lines.
370	Swamp Oak	*Casuarina glauca*	Mature	14	2	300					300	350	Good	Good	Medium	1. Long	A1	3.6	2.1	Located within aquatic centre. Pruned for power lines.
371	Swamp Oak	*Casuarina glauca*	Mature	14	2	300					300	340	Good	Good	Medium	1. Long	A1	3.6	2.1	Located within aquatic centre. Pruned for power lines.
372	Swamp Oak	*Casuarina glauca*	Mature	15	4	490					490	540	Good	Good	High	1. Long	A1	5.9	2.6	Located within aquatic centre. Pruned for power lines.
373	Swamp Oak	*Casuarina glauca*	Mature	15	3	410					410	440	Good	Good	Medium	1. Long	A1	4.9	2.3	Located within aquatic centre. Pruned for power lines.
409	Chinese Tallo	*Triadica sebifera*	Mature	5	2.5	230	220				318	450	Good	Fair	Medium	2. Medium	A2	3.8	2.4	Located within nature strip. Pruned for power lines.
410	Chinese Tallo	*Triadica sebifera*	Mature	5	3	420					420	440	Good	Fair	Medium	2. Medium	A2	5.0	2.3	Located within nature strip. Pruned for power lines.
414	Norfolk Island Hibiscus	*Lagunaria patersonia*	Mature	5	2	340					340	400	Good	Fair	Medium	2. Medium	A2	4.1	2.3	Located within nature strip. Pruned for power lines.
415	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	5	4	800					800	840	Good	Fair	High	3. Short	Z10	9.6	3.1	Located within nature strip. Topped for power lines.
418	Black Peppermint	*Eucalyptus nicholii*	Mature	5	5	520					520	540	Fair	Fair	Medium	3. Short	Z10	6.2	2.6	Located within nature strip. Topped for power lines. Canopy extends into corridor. Exempt species.
421	Chinese Tallo	*Triadica sebifera*	Mature	5	2	300					300	330	Good	Fair	Medium	3. Short	Z10	3.6	2.1	Located within nature strip. Topped for power lines.
422	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	5	3	450					450	480	Good	Fair	Medium	3. Short	Z10	5.4	2.4	Located within nature strip. Topped for power lines.
423	Norfolk Island Hibiscus	*Lagunaria patersonia*	Mature	5	2.5	310					310	330	Good	Fair	Medium	2. Medium	A2	3.7	2.1	Located within nature strip. Pruned for power lines.
424	Sweetgum	*Liquidambar styraciflua*	Mature	8	3	330					330	350	Good	Fair	Low	2. Medium	Z3	4.0	2.1	Located within nature strip. Pruned for power line clearance. Exempt species.
425	Sweetgum	*Liquidambar styraciflua*	Mature	8	4	410					410	440	Good	Fair	Low	2. Medium	Z3	4.9	2.3	Located within nature strip. Minor pruning for power lines. Exempt species.
431	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	11	5	780					780	840	Good	Good	High	1. Long	A1	9.4	3.1	Located within nature strip.
437	Sweetgum	*Liquidambar styraciflua*	Mature	11	4	440					440	450	Good	Good	Low	1. Long	Z3	5.3	2.4	Located within nature strip. Exempt species.
445	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	11	4	750					750	800	Good	Good	High	1. Long	A1	9.0	3.0	Located within nature strip.
452	Black Peppermint	*Eucalyptus nicholii*	Mature	10	4	510					510	550	Fair	Fair	Medium	3. Short	Z9	6.1	2.6	Located within nature strip. Asymmetric crown shape due to power line clearance. Fungal bracket (Phellinus spp) on north side of trunk. Extent of decay in unknown.
455	Chinese Tallo	*Triadica sebifera*	Mature	7	2	250					250	280	Good	Good	Medium	1. Long	A1	3.0	1.9	Located within nature strip.
458	Norfolk Island Hibiscus	*Lagunaria patersonia*	Mature	6	1.5	240					240	280	Good	Fair	Medium	2. Medium	A2	2.9	1.9	Located within nature strip. Pruned for power lines.
459	Chinese Tallo	*Triadica sebifera*	Semi-mature	6	1.5	210					210	230	Good	Fair	Medium	2. Medium	A2	2.5	1.8	Located within nature strip. Pruned for power lines.
461	Chinese Tallo	*Triadica sebifera*	Mature	5	2	260	250				361	490	Good	Fair	Medium	2. Medium	A2	4.3	2.5	Located within nature strip. Pruned for power lines.
462	Chinese Tallo	*Triadica sebifera*	Mature	5	2	300					300	410	Good	Fair	Medium	2. Medium	A2	3.6	2.3	Located within nature strip. Pruned for power lines.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
466	Chinese Tallo	*Triadica sebifera*	Mature	5	2	240	200				312	400	Good	Fair	Medium	2. Medium	A2	3.7	2.3	Located within nature strip. Co-dominant stems with tight union. Pruned for power lines.
469	Chinese Tallo	*Triadica sebifera*	Mature	5	2	370					370	390	Good	Good	Medium	2. Medium	A1	4.4	2.2	Located within nature strip. Growing under power lines. DBH measured below stems.
472	Chinese Tallo	*Triadica sebifera*	Mature	5	2	200	290				352	440	Good	Good	Medium	2. Medium	A1	4.2	2.3	Located within nature strip. Growing under power lines.
476	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	5	2	750					750	900	Good	Fair	Medium	3. Short	Z9	9.0	3.2	Located within nature strip. Topped for power line clearance.
477	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	1.5	310					310	320	Good	Fair	Medium	2. Medium	A1	3.7	2.1	Located within nature strip. Pruned for power lines.
478	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	1.5	230					230	260	Good	Fair	Medium	2. Medium	A1	2.8	1.9	Located within nature strip. Pruned for power lines.
479	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	1	210	170				270	280	Good	Fair	Medium	2. Medium	A1	3.2	1.9	Located within nature strip. Pruned for power lines.
481	Black Peppermint	*Eucalyptus nicholii*	Mature	5	1.5	280					280	300	Fair	Fair	Low	2. Medium	Z3	3.4	2.0	Located within nature strip. Topped for power lines. Exempt species.
483	Norfolk Island Hibiscus	*Lagunaria patersonia*	Mature	5.5	2	350					350	380	Good	Fair	Medium	2. Medium	A2	4.2	2.2	Located within nature strip. Pruned for power lines.
484	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip. Pruned for power lines.
485	Camphor Laurel	*Cinnamomum camphora*	Mature	5	2.5	410					410	440	Good	Fair	Low	3. Short	Z9	4.9	2.3	Located within corridor. Topped for power line clearance.
486	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	1.5	160	150				219	290	Good	Fair	Low	3. Short	Z9	2.6	2.0	Located within nature strip. Topped for power lines.
487	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	1.5	270					270	350	Good	Fair	Medium	2. Medium	A2	3.2	2.1	Located within nature strip. Pruned for power lines.
488	Chinese Tallo	*Triadica sebifera*	Semi-mature	4	2	150	140				205	280	Good	Fair	Medium	2. Medium	A2	2.5	1.9	Located within nature strip. Pruned for power lines.
489	Black Peppermint	*Eucalyptus nicholii*	Mature	12	5	640					640	700	Good	Fair	Medium	2. Medium	Z3	7.7	2.8	Located within nature strip. Asymmetric crown shape due to power line clearance. Exempt species.
490	Sweetgum	*Liquidambar styraciflua*	Mature	8	3	390					390	410	Good	Fair	Low	2. Medium	Z3	4.7	2.3	Located within nature strip. Pruned for power lines. Exempt species.
491	Sweetgum	*Liquidambar styraciflua*	Mature	10	4	460					460	480	Good	Fair	Low	2. Medium	Z3	5.5	2.4	Located within nature strip. Pruned for power lines. Exempt species.
492	Black Peppermint	*Eucalyptus nicholii*	Mature	11	5	920					920	990	Good	Fair	Medium	2. Medium	Z3	11.0	3.3	Located within nature strip. Pruned for power lines. Exempt species.
493	Sweetgum	*Liquidambar styraciflua*	Mature	9.5	4	460					460	480	Good	Fair	Low	2. Medium	Z3	5.5	2.4	Located within nature strip. Pruned for power lines. Exempt species.
494	Sweetgum	*Liquidambar styraciflua*	Mature	9	4	410					410	430	Good	Fair	Low	2. Medium	Z3	4.9	2.3	Located within nature strip. Pruned for power lines. Exempt species.
495	Sweetgum	*Liquidambar styraciflua*	Mature	10	4	430					430	470	Good	Fair	Low	2. Medium	Z3	5.2	2.4	Located within nature strip. Pruned for power lines. Exempt species.
496	Sweetgum	*Liquidambar styraciflua*	Mature	9	4	400					400	440	Good	Fair	Low	5. Small/Young	Z3	4.8	2.3	Located within nature strip. Pruned for power lines. Exempt species.
497	Sweetgum	*Liquidambar styraciflua*	Mature	9	4	450					450	490	Good	Fair	Low	2. Medium	Z3	5.4	2.5	Located within nature strip. Pruned for power lines. Exempt species.
498	Sweetgum	*Liquidambar styraciflua*	Mature	9	4	500					500	540	Good	Fair	Low	2. Medium	Z3	6.0	2.6	Located within nature strip. Pruned for power lines. Exempt species.
503	She Oak	*Casuarina spp*	Mature	8	2	220					220	250	Good	Good	Medium	1. Long	A1	2.6	1.8	Located within corridor.
508	Parramatta Wattle	*Acacia parramattensis*	Young	3	1	100					100	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
510	Parramatta Wattle	*Acacia parramattensis*	Mature	7	2	180					180	200	Good	Good	Medium	2. Medium	A1	2.2	1.7	Located within corridor.
511	Bracelet Honey Myrtle	*Melaleuca armillaris*	Mature	6	3	160	120	130	110		263	450	Good	Fair	Medium	2. Medium	A1	3.2	2.4	Located within nature strip. Canopy extends into corridor.
512	Silky Oak	*Grevillea robusta*	Semi-mature	8	2	170					170	190	Good	Good	Medium	2. Medium	A1	2.0	1.6	Located within corridor.
513	Silky Oak	*Grevillea robusta*	Young	6	1	80					80	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
514	Chinese Hackberry	*Celtis sinensis*	Semi-mature	3	1.5	250					250	250	Good	Fair	Very Low	5. Small/Young	Z3	3.0	1.8	Located within corridor. Exempt species.
515	Cotoneaster	*Cotoneaster spp*	Semi-mature	4	1.5	80	100				128	250	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	Located within nature strip.
526	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	2.5	450					450	450	Good	Fair	Medium	2. Medium	A2	5.4	2.4	Located within nature strip. Multi stem tree DBH measured at base. Topped for power line clearance.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
527	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	3	600					600	600	Good	Fair	Medium	2. Medium	A2	7.2	2.7	Located within nature strip. Multi stem tree DBH measured at base. Topped for power line clearance.
528	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	2	340					340	360	Good	Fair	Medium	2. Medium	A2	4.1	2.2	Located within nature strip. Pruned for power lines.
529	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	3	390					390	440	Good	Fair	Medium	2. Medium	A2	4.7	2.3	Located within nature strip. Topped for power line clearance.
530	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	3	220	170	160	160		358	450	Good	Fair	Medium	2. Medium	A2	4.3	2.4	Located within nature strip. Pruned for power lines.
531	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4.5	3	460					460	460	Good	Fair	Medium	2. Medium	A2	5.5	2.4	Located within nature strip. Multi stem tree DBH measured at base. Topped for power line clearance.
532	Common or Black Mulberry	*Morus nigra*	Semi-mature	3	1.5	100	100				141	200	Good	Fair	Low	5. Small/Young	Z3	2.0	1.7	Located within corridor. Exempt species.
533	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	3	440					440	440	Good	Fair	Medium	2. Medium	A2	5.3	2.3	Located within nature strip. Multi stem tree DBH measured at base. Topped for power line clearance.
534	Weeping Bottlebrush	*Callistemon viminalis*	Mature	4	3	540					540	540	Good	Fair	Medium	2. Medium	A2	6.5	2.6	Located within nature strip. Multi stem tree DBH measured at base. Topped for power line clearance.
535	Turpentine	*Syncarpia glomulifera*	Semi-mature	4	1.5	150					150	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within nature strip. Pruned for power lines.
536	Black Peppermint	*Eucalyptus nicholii*	Mature	10	4.5	790					790	840	Fair	Fair	Medium	2. Medium	Z3	9.5	3.1	Located within nature strip. Low foliage density for species. Pruned for power line clearance.
537	Turpentine	*Syncarpia glomulifera*	Semi-mature	8	1.5	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Located within nature strip.
538	Turpentine	*Syncarpia glomulifera*	Semi-mature	6	1.5	200					200	220	Good	Fair	Medium	2. Medium	A1	2.4	1.8	Located within nature strip. Co-dominant stems at 1m.
539	Sydney Golden Wattle	*Acacia longifolia*	Mature	4	1	150					150	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor.
540	Sydney Golden Wattle	*Acacia longifolia*	Mature	4	1	150					150	160	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
541	Sydney Golden Wattle	*Acacia longifolia*	Mature	4	1	150	110				186	180	Good	Fair	Low	5. Small/Young	Z1	2.2	1.6	Located within corridor.
542	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	4	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
543	Sydney Golden Wattle	*Acacia longifolia*	Mature	4	1	160					160	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor.
544	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	14	6	730					730	750	Good	Fair	Medium	2. Medium	Z3	8.8	2.9	Located within nature strip. Exempt species. Pruned for power line clearance.
740	Tallowood	*Eucalyptus microcorys*	Mature	23	8	850					850	900	Good	Good	High	1. Long	A1	10.2	3.2	Canopy extends into corridor.
741	Tallowood	*Eucalyptus microcorys*	Mature	19	5	500					500	620	Good	Good	High	1. Long	A1	6.0	2.7	Located within corridor.
742	Loquat	*Eriobotrya japonica*	Semi-mature	6	2	160					160	190	Good	Good	Low	2. Medium	Z3	2.0	1.6	Located within corridor. Exempt species.
743	Argyle Apple	*Eucalyptus cinerea*	Mature	17	4	400					400	440	Fair	Fair	Medium	3. Short	Z10	4.8	2.3	Low foliage density for species. Located within adjoining property.
744	Tallowood	*Eucalyptus microcorys*	Mature	24	9	720					720	940	Good	Good	High	1. Long	A1	8.6	3.2	Located within corridor. Co-dominant stems at 8m with relatively good form to union.
745	Blueberry Ash	*Elaeocarpus reticulatus*	Mature	9	3	250					250	300	Good	Good	Medium	2. Medium	A1	3.0	2.0	Canopy extends into corridoor.
746	Black Tea-tree	*Melaleuca bracteata*	Mature	10	4	550					550	600	Good	Good	Medium	1. Long	A1	6.6	2.7	Located within park.
747	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	16	5	500					500	550	Good	Fair	Medium	2. Medium	A2	6.0	2.6	Located within corridor. Majority of structural roots exposed.
748	Weeping Bottlebrush	*Callistemon viminalis*	Mature	12	4	300	260				397	500	Good	Fair	Medium	2. Medium	A1	4.8	2.5	Located within corridor. Canopy interference with adjacent tree.
749	Weeping Bottlebrush	*Callistemon viminalis*	Mature	9	3	250					250	300	Fair	Fair	Medium	3. Short	Z4	3.0	2.0	Located within adjoining property. In decline.
750	Mango	*Mangifera indica*	Mature	9	5	450					450	500	Good	Good	Medium	1. Long	A1	5.4	2.5	Located within adjoining property. Canopy extends into corridor.
751	Monterey Cypress	*Cupressus macrocarpa*	Mature	10	3	400					400	450	Good	Good	Medium	1. Long	A1	4.8	2.4	Canopy extends into corridor.
752	Monterey Cypress	*Cupressus macrocarpa*	Mature	10	4	400					400	450	Good	Good	Medium	1. Long	A1	4.8	2.4	Canopy extends into corridor.
753	Monterey Cypress	*Cupressus macrocarpa*	Mature	10	3	400					400	450	Good	Good	Medium	1. Long	A1	4.8	2.4	Canopy extends into corridor.
754	Silky Oak	*Grevillea robusta*	Mature	14	6	600					600	650	Fair	Fair	Medium	2. Medium	A2	7.2	2.8	Canopy extends into corridor. Low foliage density for species. No pruning required.
755	Firewheel	*Stenocarpus sinuatus*	Semi-mature	8	2	300					300	350	Good	Fair	Medium	2. Medium	A1	3.6	2.1	Canopy extends into corridor. Multi stem tree. DBH estimated.
756	Sweet Chestnut	*Castanea sativa*	Semi-mature	4	2	200					200	220	Good	Good	Low	5. Small/Young	Z1	2.4	1.8	Canopy extends into corridor.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
757	Common or Black Mulberry	*Morus nigra*	Mature	5	2	250					250	300	Good	Fair	Low	5. Small/Young	Z3	3.0	2.0	Canopy extends into corridor.
758	Coastal Banksia	*Banksia integrefolia*	Semi-mature	8	2	200					200	200	Good	Good	Medium	2. Medium	A1	2.4	1.7	DBH estimated.
759	Turpentine	*Syncarpia glomulifera*	Young	4	1	80					80	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located outside corridor.
760	Mango	*Mangifera indica*	Mature	6	2	200	100	120	100		273	400	Good	Good	Medium	1. Long	A1	3.3	2.3	Canopy extends into corridor.
761	Mango	*Mangifera indica*	Mature	6	2	250					250	300	Good	Good	Medium	1. Long	A1	3.0	2.0	Canopy extends into corridor.
762	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	9	4	300	280				410	500	Good	Good	Medium	1. Long	A1	4.9	2.5	Canopy extends into corridor.
763	Cook Pine	*Araucaria columnaris*	Mature	15	3	500					500	550	Good	Good	High	1. Long	A1	6.0	2.6	Located in adjoining property.
764	Weeping Bottlebrush	*Callistemon viminalis*	Mature	7	4	370	300				476	490	Good	Good	Medium	1. Long	A1	5.7	2.5	Located on nature strip.
765	Red Flowering Gum	*Corymbia ficifolia*	Semi-mature	5	2	160					160	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Canopy extends into corridor.
766	Black Tea-tree	*Melaleuca bracteata*	Semi-mature	8	2	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Canopy extends into corridor.
767	Smooth Barked Apple	*Angophora costata*	Mature	18	5	350					350	400	Good	Good	High	1. Long	A1	4.2	2.3	Canopy extends into corridor.
768	Wattle	*Acacia spp*	Mature	10	2	250					250	300	Good	Good	Medium	2. Medium	A1	3.0	2.0	Canopy extends into corridor.
769	Blue Jacaranda	*Jacaranda mimosifolia*	Semi-mature	8	2	180					180	200	Good	Good	Low	5. Small/Young	Z1	2.2	1.7	Canopy extends into corridor.
770	Lemon	*Citrus x limon*	Semi-mature	5	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
771	Common Fig	*Ficus carica*	Semi-mature	4	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.
772	Cabbage Palm	*Livistona australis*	Mature	9	2	340					340	NA	Good	Good	Medium	1. Long	A1	3.0	NA	Set back from corridor. No pruning required.
773	Camphor Laurel	*Cinnamomum camphora*	Young	4	1	50					50	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
774	Cotoneaster	*Cotoneaster spp*	Semi-mature	4	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor.
775	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	5	2	300					300	300	Good	Fair	Very Low	5. Small/Young	Z3	3.6	2.0	Exempt species.
776	Cheese Tree	*Glochidion ferdinandi*	Young	5	1	50	50				71	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
777	Cheese Tree	*Glochidion ferdinandi*	Semi-mature	5	2	200					200	220	Good	Good	Low	5. Small/Young	Z1	2.4	1.8	Located within corridor.
778	Cheese Tree	*Glochidion ferdinandi*	Young	4	1	100					100	110	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
779	Chinese Hackberry	*Celtis sinensis*	Semi-mature	4	2	180					180	200	Good	Fair	Very Low	5. Small/Young	Z3	2.2	1.7	Exempt species.
780	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	1	120					120	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor.
781	Trident Maple	*Acer buergeranum*	Young	5	1	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
782	Parramatta Wattle	*Acacia parramattensis*	Young	5	2	150					150	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor.
783	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	4	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. Topped for power lines.
784	Chinese Tallo	*Triadica sebifera*	Mature	8	4	400					400	470	Good	Good	Medium	2. Medium	A1	4.8	2.4	Located within corridor.
785	Camphor Laurel	*Cinnamomum camphora*	Mature	9	7	700	400	300	300		911	1800	Good	Fair	Medium	3. Short	Z10	10.9	4.2	Significant canopy pruning for powerline clearance. Located outside corridor.
786	River She Oak	*Casuarina cunninghamiana*	Mature	18	5	440					440	500	Good	Fair	Medium	2. Medium	A2	5.3	2.5	Asymmetric crown shape due to power line clearance.
787	River She Oak	*Casuarina cunninghamiana*	Mature	21	7	680					680	990	Good	Fair	Medium	2. Medium	A1	8.2	3.3	Asymmetric crown shape due to power line clearance.
788	Camphor Laurel	*Cinnamomum camphora*	Mature	8	6	800	350	300	250		957	1300	Good	Fair	Medium	3. Short	Z10	11.5	3.7	Significant canopy pruning for powerline clearance. Located outside corridor.
789	Camphor Laurel	*Cinnamomum camphora*	Mature	9	7	420	380	710			908	1400	Good	Fair	Medium	3. Short	Z10	10.9	3.8	Significant canopy pruning for powerline clearance. Located outside corridor.
790	Camphor Laurel	*Cinnamomum camphora*	Mature	9	8	1050					1050	1200	Good	Fair	Medium	3. Short	Z10	12.6	3.6	Significant canopy pruning for powerline clearance. Located outside corridor.
791	Camphor Laurel	*Cinnamomum camphora*	Mature	10	7	1350					1350	1500	Good	Poor	Medium	4. Remove	Z5	15.0	3.9	Significant canopy pruning for powerline clearance. Large internal cavity in central trunk. Located outside corridor.
792	Camphor Laurel	*Cinnamomum camphora*	Mature	8	8	850					850	900	Good	Fair	Medium	3. Short	Z10	10.2	3.2	Significant canopy pruning for powerline clearance. Located outside corridor.
793	Swamp Oak	*Casuarina glauca*	Mature	16	5	460					460	520	Good	Fair	Medium	2. Medium	A1	5.5	2.5	Asymmetric crown shape due to power line clearance.
794	Swamp Oak	*Casuarina glauca*	Mature	5	1	300					300	380	Fair	Poor	Medium	4. Remove	Z10	3.6	2.2	Topped at 5m for power line clearance.
795	Swamp Oak	*Casuarina glauca*	Mature	16	4	500					500	580	Good	Fair	Medium	2. Medium	A1	6.0	2.6	Asymmetric crown shape due to power line clearance.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
796	Camphor Laurel	*Cinnamomum camphora*	Mature	9	7	800					800	850	Good	Fair	Medium	3. Short	Z10	9.6	3.1	Significant canopy pruning for powerline clearance. Located outside corridor.
797	River She Oak	*Casuarina cunninghamiana*	Mature	19	5	580					580	650	Good	Fair	Medium	2. Medium	A1	7.0	2.8	Asymmetric crown shape due to power line clearance.
798	River She Oak	*Casuarina cunninghamiana*	Mature	18	6	600					600	680	Good	Fair	Medium	2. Medium	A1	7.2	2.8	Asymmetric crown shape due to power line clearance.
799	River She Oak	*Casuarina cunninghamiana*	Mature	17	4	360					360	420	Good	Fair	Medium	2. Medium	A1	4.3	2.3	Asymmetric crown shape due to power line clearance.
800	River She Oak	*Casuarina cunninghamiana*	Mature	19	5	470					470	550	Good	Fair	Medium	2. Medium	A1	5.6	2.6	Asymmetric crown shape due to power line clearance.
801	River She Oak	*Casuarina cunninghamiana*	Mature	20	5	550					550	690	Good	Fair	Medium	2. Medium	Z10	6.6	2.8	Asymmetric crown shape due to power line clearance.
802	River She Oak	*Casuarina cunninghamiana*	Mature	20	7	650					650	740	Good	Fair	Medium	2. Medium	A1	7.8	2.9	Asymmetric crown shape due to power line clearance.
803	River She Oak	*Casuarina cunninghamiana*	Mature	20	7	690					690	800	Good	Fair	High	2. Medium	A1	8.3	3.0	Asymmetric crown shape due to power line clearance.
804	Queensland Brushbox	*Lophostemon confertus*	Mature	14	6	750					750	850	Good	Good	High	1. Long	A1	9.0	3.1	None.
805	Chinese Tallo	*Triadica sebifera*	Semi-mature	5	1	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Located within corridor.
806	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	100	120	200			254	360	Good	Fair	Low	5. Small/Young	Z3	3.0	2.2	Located within corridor. Exempt species.
807	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	80	100	130	190		263	450	Good	Fair	Low	5. Small/Young	Z3	3.2	2.4	Located within corridor. Exempt species.
808	Spotted Gum	*Corymbia maculata*	Semi-mature	10	2	200					200	240	Good	Good	Medium	1. Long	A1	2.4	1.8	Located within corridor.
809	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	100	120	80	80	80	209	400	Good	Fair	Low	5. Small/Young	Z1	2.5	2.3	Located within corridor.
810	Chinese Tallo	*Triadica sebifera*	Semi-mature	5	2	100	100	80	60		173	300	Good	Fair	Low	5. Small/Young	Z1	2.1	2.0	Located within corridor.
811	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	100	100	150			206	300	Good	Fair	Low	5. Small/Young	Z3	2.5	2.0	Located within corridor. Exempt species.
812	Blue Jacaranda	*Jacaranda mimosifolia*	Semi-mature	5	2	200					200	250	Good	Fair	Low	5. Small/Young	Z1	2.4	1.8	Located within corridor.
813	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	400					400	400	Good	Fair	Low	5. Small/Young	Z3	4.8	2.3	Located within corridor. Exempt species.
814	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	100	100	100			173	NA	Good	Fair	Low	5. Small/Young	Z3	3.0	NA	Located within corridor. Exempt species.
815	Chinese Elm	*Ulmus parviflora*	Young	5	2	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
816	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	100	100	100	100	100	224	400	Good	Fair	Low	5. Small/Young	Z3	2.7	2.3	Located within corridor. Exempt species.
817	Chinese Elm	*Ulmus parviflora*	Young	4	2	50	50	50			87	250	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	Located within corridor.
818	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	500					500	500	Good	Fair	Low	5. Small/Young	Z3	6.0	2.5	Located within corridor. Exempt species.
819	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	4	2	300	300	300	300		600	1200	Good	Fair	Low	5. Small/Young	Z3	7.2	3.6	Located within corridor. Exempt species. Clump of trees.
820	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	400					400	400	Good	Fair	Low	5. Small/Young	Z3	4.8	2.3	Located within corridor. Exempt species.
821	Camphor Laurel	*Cinnamomum camphora*	Young	4	1	300					300	300	Good	Fair	Low	5. Small/Young	Z3	3.6	2.0	Located within corridor. Exempt species.
822	Camphor Laurel	*Cinnamomum camphora*	Young	4	1	350					350	350	Good	Fair	Low	5. Small/Young	Z3	4.2	2.1	Located within corridor. Exempt species.
823	Broad Leaved Privet	*Ligustrum lucidum*	Young	4	1	200					200	200	Good	Fair	Very Low	5. Small/Young	Z3	2.4	1.7	Located within corridor. Exempt species.
824	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	3	2	450					450	450	Fair	Poor	Low	5. Small/Young	Z3	5.4	2.4	Located within corridor. Exempt species. Topped for power line clearance.
825	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	4	2	500					500	500	Fair	Poor	Low	5. Small/Young	Z3	6.0	2.5	Located within corridor. Exempt species. Topped for power line clearance.
826	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	4	2	350					350	350	Fair	Poor	Low	5. Small/Young	Z3	4.2	2.1	Located within corridor. Exempt species. Topped for power line clearance.
827	Common or Black Mulberry	*Morus nigra*	Semi-mature	4	2	350					350	350	Fair	Fair	Low	5. Small/Young	Z3	4.2	2.1	Located within corridor. Exempt species. Topped for power line clearance.
828	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	2	190					190	240	Good	Good	Low	5. Small/Young	Z1	2.3	1.8	Located within corridor. DBH estimated.
829	Common or Black Mulberry	*Morus nigra*	Young	5	2	250					250	300	Good	Fair	Low	5. Small/Young	Z3	3.0	2.0	Located within corridor. Exempt species. Topped for power line clearance.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
830	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	2	220					220	270	Good	Good	Low	5. Small/Young	Z1	2.6	1.9	Located within corridor. Culvert restricting root growth patterns.
831	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	5	2	260					260	310	Fair	Good	Medium	2. Medium	A2	3.1	2.0	Low foliage density for species.
832	Canary Palm	*Phoenix canariensis*	Semi-mature	5	2	400					400	NA	Good	Good	Low	5. Small/Young	Z3	3.0	NA	Located within corridor. Exempt species.
833	Canary Palm	*Phoenix canariensis*	Semi-mature	5	2	350					350	NA	Good	Good	Low	5. Small/Young	Z3	3.0	NA	Located within corridor. Exempt species.
834	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	450					450	450	Good	Fair	Low	5. Small/Young	Z3	5.4	2.4	Located within corridor. DBH estimated.
835	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	5	2	200					200	250	Good	Good	Medium	1. Long	A1	2.4	1.8	None.
836	African Olive	*Olea europaea subsp. cuspidata*	Young	4	1	200					200	200	Good	Fair	Very Low	5. Small/Young	Z3	2.4	1.7	Located within corridor. DBH estimated.
837	African Olive	*Olea europaea subsp. cuspidata*	Young	4	1	200					200	200	Good	Fair	Very Low	5. Small/Young	Z3	2.4	1.7	Located within corridor. DBH estimated.
838	Ash 'Raywood'	*Fraxinus raywood*	Young	6	2	150					150	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor.
839	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	6	2	210					210	260	Good	Good	Medium	1. Long	A1	2.5	1.9	None.
840	Canary Palm	*Phoenix canariensis*	Semi-mature	5	2	350					350	NA	Good	Good	Low	5. Small/Young	Z3	3.0	NA	Located within corridor. DBH estimated.
841	Camphor Laurel	*Cinnamomum camphora*	Young	5	1	100					100	120	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.5	Located within corridor. DBH estimated.
842	Canary Palm	*Phoenix canariensis*	Semi-mature	5	2	350					350	NA	Good	Good	Low	5. Small/Young	Z3	3.0	NA	Located within corridor. DBH estimated.
843	Camphor Laurel	*Cinnamomum camphora*	Young	5	1	100					100	120	Good	Fair	Low	5. Small/Young	Z3	2.0	1.5	Located within corridor. DBH estimated.
844	Brown Pine	*Podocarpus elatus*	Young	4	1	90	90				127	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor.

846	Brown Pine	*Podocarpus elatus*	Semi-mature	7	2	450					450	450	Good	Fair	Medium	1. Long	A1	5.4	2.4	Located within corridor. DBH estimated at base.
847	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	1	200					200	200	Good	Fair	Low	5. Small/Young	Z3	2.4	1.7	Located within corridor. DBH estimated. Exempt species.
848	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	6	2	240					240	300	Good	Good	Medium	1. Long	A1	2.9	2.0	None.
849	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	6	2	280					280	300	Good	Good	Medium	1. Long	A1	3.4	2.0	None.
850	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	5	2	200					200	280	Good	Good	Medium	1. Long	A1	2.4	1.9	None.
851	Ash 'Raywood'	*Fraxinus raywood*	Semi-mature	6	2	220					220	280	Good	Good	Medium	1. Long	A1	2.6	1.9	Located within corridor. DBH estimated.
852	Eucalypt	*Eucalyptus spp*	Young	6	2	160					160	220	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	Located within corridor. DBH estimated.
853	Sydney Blue Gum	*Eucalyptus saligna*	Mature	20	6	400	360				538	700	Good	Good	High	1. Long	A1	6.5	2.8	Located within corridor. DBH estimated.
854	Sydney Blue Gum	*Eucalyptus saligna*	Mature	20	6	300	360	200			510	600	Good	Good	High	1. Long	A1	6.1	2.7	Located within corridor. DBH estimated.
855	Swamp Oak	*Casuarina glauca*	Semi-mature	6	2	200					200	300	Good	Fair	Medium	2. Medium	A1	2.4	2.0	Located within corridor. DBH estimated. Trunk lean towards fence.
856	Sydney Blue Gum	*Eucalyptus saligna*	Mature	11	3	300	260				397	490	Good	Good	Medium	1. Long	A1	4.8	2.5	Located within corridor. DBH estimated.
857	River Red Gum	*Eucalyptus camaldulensis*	Mature	28	11	1200					1200	1400	Good	Fair	Very High	1. Long	A4	14.4	3.8	Numerous hollows through trunk and mid crown. Possible ecological significance.
858	Chinese Tallo	*Triadica sebifera*	Semi-mature	5	2	150					150	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor. DBH estimated.
859	Ash 'Raywood'	*Fraxinus raywood*	Semi-mature	6	2	100	130	140			216	300	Good	Fair	Low	5. Small/Young	Z1	2.6	2.0	Located within corridor. DBH estimated.
860	Chinese Tallo	*Triadica sebifera*	Mature	9	2	250					250	300	Fair	Fair	Medium	3. Short	Z4	3.0	2.0	Located within corridor. DBH estimated. Low foliage density for species.
861	Chinese Tallo	*Triadica sebifera*	Semi-mature	6	2	180					180	200	Fair	Fair	Low	5. Small/Young	Z1	2.2	1.7	Located within corridor. DBH estimated. Growing through fence.
862	Chinese Tallo	*Triadica sebifera*	Mature	8	2	250					250	300	Good	Fair	Medium	2. Medium	A1	3.0	2.0	Located within corridor. DBH estimated. Branches growing through fence.
863	Sydney Blue Gum	*Eucalyptus saligna*	Mature	24	7	640					640	720	Good	Good	High	1. Long	A1	7.7	2.9	Co-dominant stems at 4m.
864	Crepe Myrtle	*Lagerstroemia indica*	Mature	6	3	400					400	400	Good	Good	Medium	2. Medium	A1	4.8	2.3	DBH measured at base.
865	Lemon Scented Tea Tree	*Leptospermum petersonii*	Semi-mature	4	2	200					200	200	Good	Good	Low	5. Small/Young	Z1	2.4	1.7	Located directly adjacent to fence.
866	Chinese Tallo	*Triadica sebifera*	Mature	9	4	400					400	450	Good	Fair	Medium	2. Medium	A1	4.8	2.4	Located within corridor. DBH estimated.
867	Canary Palm	*Phoenix canariensis*	Semi-mature	5	2	350					350	NA	Good	Good	Low	5. Small/Young	Z3	3.0	NA	Located within corridor. DBH estimated. Exempt species.
868	Weeping Bottlebrush	*Callistemon viminalis*	Mature	6	2	190	210				283	400	Good	Fair	Medium	2. Medium	A1	3.4	2.3	Located directly adjacent to fence.
869	Queensland Brushbox	*Lophostemon confertus*	Mature	10	8	950					950	1000	Good	Good	High	1. Long	A1	11.4	3.3	None.

923	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	220					220	300	Good	Good	Medium	1. Long	A1	2.6	2.0	Located within nature strip.
924	Eucalypt	*Eucalyptus spp*	Mature	15	6	550					550	620	Good	Good	High	1. Long	A1	6.6	2.7	Located within nature strip. Pruned for power line clearance.
925	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	10	3	310					310	420	Good	Fair	Medium	2. Medium	Z3	3.7	2.3	Located within nature strip. Pruned for power line clearance.
926	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	9	4	410					410	440	Good	Fair	Medium	2. Medium	Z3	4.9	2.3	Located within nature strip. Pruned for power line clearance.
927	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	180	320				367	460	Good	Fair	Medium	2. Medium	A1	4.4	2.4	Located within nature strip. Pruned for power line clearance.
928	Queensland Brushbox	*Lophostemon confertus*	Mature	5	3	310					310	370	Good	Fair	Medium	2. Medium	A1	3.7	2.2	Located within nature strip. Pruned for power line clearance.
929	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	9	3	270					270	360	Good	Good	Medium	2. Medium	Z3	3.2	2.2	Located within nature strip. Pruned for power line clearance. Exempt species.
930	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	490					490	560	Good	Fair	Medium	2. Medium	A1	5.9	2.6	Located within nature strip. Pruned for power line clearance.
931	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	420					420	480	Good	Good	Medium	2. Medium	A1	5.0	2.4	Located within nature strip. Pruned for power line clearance.
932	Weeping Bottlebrush	*Callistemon viminalis*	Mature	6	3	220	220				311	460	Good	Fair	Medium	2. Medium	A1	3.7	2.4	Located within nature strip. Pruned for power line clearance.
933	Weeping Bottlebrush	*Callistemon viminalis*	Mature	6	4	200	240	340			462	600	Good	Fair	Medium	2. Medium	A1	5.5	2.7	Located within nature strip. Pruned for power line clearance.
934	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	270					270	380	Good	Fair	Medium	2. Medium	A1	3.2	2.2	Located within nature strip. Pruned for power line clearance.
935	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	280					280	340	Good	Fair	Medium	2. Medium	A1	3.4	2.1	Located within nature strip. Pruned for power line clearance. Canopy extends into corridor.
936	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	300	150				335	420	Good	Fair	Medium	2. Medium	A1	4.0	2.3	Located within nature strip. Pruned for power line clearance.
937	Queensland Brushbox	*Lophostemon confertus*	Mature	5	3	290					290	370	Good	Fair	Medium	2. Medium	A1	3.5	2.2	Located within nature strip. Pruned for power line clearance.
938	Queensland Brushbox	*Lophostemon confertus*	Mature	5	4	390					390	570	Good	Fair	Medium	2. Medium	A1	4.7	2.6	Located within nature strip. Pruned for power line clearance.
939	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	3	300	300				424	480	Good	Fair	Medium	2. Medium	A1	5.1	2.4	Located within nature strip. Pruned for power line clearance.
940	Queensland Brushbox	*Lophostemon confertus*	Mature	5	3	270					270	360	Good	Fair	Medium	2. Medium	A1	3.2	2.2	Located within nature strip. Pruned for power line clearance.
941	Queensland Brushbox	*Lophostemon confertus*	Mature	8	4	620					620	750	Good	Fair	Medium	2. Medium	A1	7.4	2.9	Located within nature strip. Pruned for power line clearance.
942	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	480					480	560	Good	Fair	Medium	2. Medium	A1	5.8	2.6	Located within nature strip. Pruned for power line clearance.
943	Queensland Brushbox	*Lophostemon confertus*	Mature	5	4	360					360	480	Good	Fair	Medium	2. Medium	A1	4.3	2.4	Located within nature strip. Pruned for power line clearance.
944	Queensland Brushbox	*Lophostemon confertus*	Mature	10	5	530					530	570	Good	Fair	Medium	2. Medium	A1	6.4	2.6	Located within nature strip. Pruned for power line clearance.
945	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	440					440	480	Good	Fair	Medium	2. Medium	A1	5.3	2.4	Located within nature strip. Pruned for power line clearance.
946	Queensland Brushbox	*Lophostemon confertus*	Mature	5	4	470					470	470	Good	Fair	Medium	2. Medium	A1	5.6	2.4	Located within nature strip. Pruned for power line clearance.
947	Queensland Brushbox	*Lophostemon confertus*	Mature	7	4	450					450	570	Good	Fair	Medium	2. Medium	A1	5.4	2.6	Located within nature strip. Pruned for power line clearance.
948	Queensland Brushbox	*Lophostemon confertus*	Mature	8	4	460					460	580	Good	Good	Medium	2. Medium	A1	5.5	2.6	Located within nature strip. Pruned for power line clearance.
949	Queensland Brushbox	*Lophostemon confertus*	Mature	7	5	320	300				439	630	Good	Good	Medium	1. Long	A1	5.3	2.7	Located within corridor.
950	Queensland Brushbox	*Lophostemon confertus*	Mature	7	4	360					360	460	Good	Fair	Medium	2. Medium	A1	4.3	2.4	Located within nature strip. Pruned for power line clearance.
951	Queensland Brushbox	*Lophostemon confertus*	Mature	8	4	400					400	440	Good	Fair	Medium	2. Medium	A1	4.8	2.3	Located within nature strip. Pruned for power line clearance.
952	Queensland Brushbox	*Lophostemon confertus*	Mature	8	6	650					650	760	Good	Fair	Medium	2. Medium	A1	7.8	2.9	Located within nature strip. Pruned for power line clearance.
953	Queensland Brushbox	*Lophostemon confertus*	Mature	11	7	740					740	890	Good	Fair	Medium	2. Medium	A1	8.9	3.2	Located within nature strip. Pruned for power line clearance.
954	Queensland Brushbox	*Lophostemon confertus*	Mature	5	4	430					430	550	Good	Fair	Medium	2. Medium	A1	5.2	2.6	Located within nature strip. Pruned for power line clearance.
955	Queensland Brushbox	*Lophostemon confertus*	Mature	10	5	520					520	600	Good	Fair	Medium	2. Medium	A1	6.2	2.7	Located within nature strip. Pruned for power line clearance.
956	Queensland Brushbox	*Lophostemon confertus*	Young	5	1	110					110	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
957	Queensland Brushbox	*Lophostemon confertus*	Young	5	1	90					90	110	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
958	Queensland Brushbox	*Lophostemon confertus*	Mature	10	6	610					610	690	Good	Fair	Medium	2. Medium	A1	7.3	2.8	Located within nature strip. Pruned for power line clearance.
959	Queensland Brushbox	*Lophostemon confertus*	Mature	11	6	740					740	800	Good	Fair	Medium	2. Medium	A1	8.9	3.0	Located within nature strip. Pruned for power line clearance.
960	Queensland Brushbox	*Lophostemon confertus*	Mature	7	4	470					470	520	Good	Fair	Medium	2. Medium	A1	5.6	2.5	Located within nature strip. Pruned for power line clearance.
961	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	1	100	100				141	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor.

Appendix 1 - Tree Inspection Schedule

1076	Pin Oak	*Quercus palustris*	Mature	15	6	650					650	700	Good	Good	Medium	1. Long	A1	7.8	2.8	Located within corridor. DBH estimated.
1077	Sydney Blue Gum	*Eucalyptus saligna*	Mature	21	10	850					850	1050	Good	Good	Very High	1. Long	A1	10.2	3.4	Located within nature strip. In contact with fence.
1078	Pin Oak	*Quercus palustris*	Mature	11	5	500					500	550	Good	Good	Medium	1. Long	A1	6.0	2.6	Located within corridor. DBH estimated.
1079	Peppercorn Tree	*Schinus molle*	Mature	9	5	450					450	500	Good	Fair	Medium	2. Medium	A1	5.4	2.5	Located within corridor. DBH estimated.
1080	Sydney Blue Gum	*Eucalyptus saligna*	Mature	20	9	850					850	950	Fair	Fair	Very High	2. Medium	A2	10.2	3.2	Located within nature strip. Low foliage density for species. Co-dominant stems with tight union.
1081	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	5	2	120					120	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. DBH estimated.
1082	Pin Oak	*Quercus palustris*	Mature	15	5	500					500	550	Good	Good	Medium	1. Long	A1	6.0	2.6	Located within corridor. DBH estimated.
1083	Peppercorn Tree	*Schinus molle*	Mature	7	3	280					280	330	Good	Good	Medium	1. Long	A1	3.4	2.1	Located within corridor. DBH estimated.
1084	Pin Oak	*Quercus palustris*	Mature	15	6	600					600	650	Good	Good	High	1. Long	A1	7.2	2.8	Located within corridor. DBH estimated.
1085	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	9	2	200					200	240	Good	Fair	Low	2. Medium	Z3	2.4	1.8	Located within corridor. DBH estimated. Exempt species.
1086	Peppercorn Tree	*Schinus molle*	Mature	12	6	600					600	750	Good	Good	Medium	1. Long	A1	7.2	2.9	Located within corridor. DBH estimated.
1087	Swamp Mahogany	*Eucalyptus robusta*	Young	5	1	200	150				250	300	Fair	Fair	Low	3. Short	Z9	3.0	2.0	Located within nature strip. Tree has been topped at 3m.
1088	Sweet Pittosporum	*Pittosporum undulatum*	Mature	9	3	300					300	350	Good	Good	Medium	1. Long	A1	3.6	2.1	Located within corridor. DBH estimated.
1089	Pin Oak	*Quercus palustris*	Mature	16	7	440	440				622	900	Good	Good	Medium	1. Long	A1	7.5	3.2	Located within corridor. DBH estimated.
1090	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	10	2	170					170	210	Good	Good	Medium	1. Long	A1	2.0	1.7	Located within corridor. DBH estimated.
1091	Pin Oak	*Quercus palustris*	Mature	9	5	500					500	580	Fair	Fair	Medium	3. Short	Z4	6.0	2.6	Located within corridor. DBH estimated. Early stages of decline.
1092	Sydney Blue Gum	*Eucalyptus saligna*	Mature	22	9	870					870	1000	Good	Good	Very High	1. Long	A1	10.4	3.3	Located within nature strip.
1093	Pin Oak	*Quercus palustris*	Mature	5	2	300					300	380	Fair	Poor	Low	4. Remove	Z5	3.6	2.2	Located within corridor. DBH estimated. Failure of central leader.
1094	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	7	2	110	110				156	400	Good	Fair	Low	3. Short	Z9	2.0	2.3	Located within corridor. DBH estimated. Regrowth from stump.
1095	Sydney Blue Gum	*Eucalyptus saligna*	Mature	21	7	710					710	860	Good	Fair	Very High	3. Short	Z9	8.5	3.1	Located within nature strip. Large previous branch failure and significant cambium damage on North side of trunk.
1096	Smooth Barked Apple	*Angophora costata*	Semi-mature	10	3	270					270	330	Good	Good	Medium	1. Long	A1	3.2	2.1	Located within corridor. DBH estimated.
1097	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	13	3	240					240	280	Good	Good	Medium	1. Long	A1	2.9	1.9	Located within corridor. DBH estimated.
1098	Swamp Mahogany	*Eucalyptus robusta*	Semi-mature	5	2	190					190	250	Good	Good	Low	5. Small/Young	Z1	2.3	1.8	Located within nature strip. Canopy extends over fence.
1099	Smooth Barked Apple	*Angophora costata*	Semi-mature	8	1	150					150	180	Poor	Fair	Medium	4. Remove	Z4	2.0	1.6	Located within corridor. DBH estimated. Dieback of central leader.
1100	Smooth Barked Apple	*Angophora costata*	Mature	9	3	220	200	110	110		336	500	Fair	Fair	Medium	2. Medium	A2	4.0	2.5	Located within corridor. DBH estimated. Multi stem tree with dieback of South stems.
1101	Smooth Barked Apple	*Angophora costata*	Young	6	2	110					110	140	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. DBH estimated.
1102	Smooth Barked Apple	*Angophora costata*	Young	5	1	100					100	110	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. DBH estimated.
1103	Smooth Barked Apple	*Angophora costata*	Young	8	1	120					120	150	Good	Good	Medium	1. Long	A1	2.0	1.5	Located within corridor. DBH estimated.
1104	Umbrella	*Schefflera actinophylla*	Young	5	1	100	100				141	200	Good	Fair	Low	5. Small/Young	Z3	2.0	1.7	Located within corridor. DBH estimated. Exempt species.
1105	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	200					200	200	Good	Fair	Low	5. Small/Young	Z3	2.4	1.7	Located within corridor. DBH estimated. Exempt species.
1106	Eucalypt	*Eucalyptus spp*	Young	5	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
1107	Smooth Barked Apple	*Angophora costata*	Young	5	1	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. DBH estimated.
1108	Smooth Barked Apple	*Angophora costata*	Semi-mature	9	2	180					180	220	Good	Fair	Medium	2. Medium	A1	2.2	1.8	Located within corridor. DBH estimated. Asymmetric crown shape.
1109	Smooth Barked Apple	*Angophora costata*	Semi-mature	12	2	220					220	240	Good	Good	Medium	2. Medium	A1	2.6	1.8	Located within corridor. DBH estimated.
1110	Smooth Barked Apple	*Angophora costata*	Young	5	1	120					120	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. DBH estimated.
1111	Smooth Barked Apple	*Angophora costata*	Young	5	2	120					120	160	Good	Good	Low	1. Long	Z1	2.0	1.5	Located within corridor. DBH estimated.
1112	Sydney Blue Gum	*Eucalyptus saligna*	Mature	16	6	520					520	730	Good	Good	High	1. Long	A1	6.2	2.9	Located within nature strip.
1113	Queensland Brushbox	*Lophostemon confertus*	Mature	13	5	500	400				640	900	Good	Good	High	1. Long	A1	7.7	3.2	Located within corridor. DBH estimated.
1114	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	17	3	220					220	260	Good	Good	Medium	1. Long	A1	2.6	1.9	Located within corridor. DBH estimated.
1115	Sydney Blue Gum	*Eucalyptus saligna*	Mature	18	7	650					650	800	Good	Good	Very High	1. Long	A1	7.8	3.0	Located within nature strip.

1119	Queensland Brushbox	*Lophostemon confertus*	Mature	9	6	550					550	650	Good	Good	High	1. Long	A1	6.6	2.8	Located within corridor.
1120	Eucalypt	*Eucalyptus spp*	Semi-mature	7	2	180					180	220	Good	Good	Medium	1. Long	A1	2.2	1.8	Located within nature strip.
1121	Swamp Mahogany	*Eucalyptus robusta*	Mature	6	4	260	200				328	400	Good	Fair	Medium	2. Medium	A1	3.9	2.3	Located within nature strip.
1122	Kurrajong	*Brachychiton populneus*	Mature	6	2	360					360	430	Good	Good	Medium	1. Long	A1	4.3	2.3	Located within corridor.
1123	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	8	2	250					250	380	Fair	Fair	Low	3. Short	Z3	3.0	2.2	Located within nature strip. Exempt species. Low foliage density for species.
1124	Grey Gum	*Eucalyptus punctata*	Semi-mature	8	2	150					150	200	Good	Good	Medium	1. Long	A1	2.0	1.7	Located within nature strip.
1125	Eucalypt	*Eucalyptus spp*	Semi-mature	6	1	100					100	180	Good	Good	Low	5. Small/Young	Z1	2.0	1.6	Located within nature strip.
1126	Sydney Blue Gum	*Eucalyptus saligna*	Mature	16	6	360	340				495	750	Good	Good	High	1. Long	A1	5.9	2.9	Located within corridor.
1127	Common Oak	*Quercus robur*	Mature	6	2	370					370	440	Good	Good	Medium	2. Medium	A1	4.4	2.3	Located within nature strip.
1128	Sydney Blue Gum	*Eucalyptus saligna*	Mature	20	9	880					880	960	Good	Fair	Very High	2. Medium	A2	10.6	3.3	Located within nature strip. Previous branch failures. Large diameter deadwood. Cambium wounds.
1129	Sydney Blue Gum	*Eucalyptus saligna*	Mature	9	3	300					300	450	Poor	Fair	Medium	4. Remove	Z4	3.6	2.4	Located within nature strip. In decline.
1130	Lombardy Poplar	*Populus nigra 'Italica'*	Semi-mature	5	1	300					300	300	Fair	Fair	Low	2. Medium	Z3	3.6	2.0	Located within nature strip. Exempt species.
1131	Sydney Blue Gum	*Eucalyptus saligna*	Mature	8	4	200	200	220			358	600	Good	Fair	Medium	2. Medium	A1	4.3	2.7	Located within nature strip.
1132	Lombardy Poplar	*Populus nigra 'Italica'*	Semi-mature	10	2	290					290	320	Fair	Fair	Low	3. Short	Z3	3.5	2.1	Located within nature strip. Exempt species. Low foliage density for species.
1133	Sydney Blue Gum	*Eucalyptus saligna*	Mature	16	6	540					540	650	Good	Fair	High	2. Medium	A3	6.5	2.8	Located within nature strip. Large trunk wound with cavity, possible ecological significance.
1134	Grey Gum	*Eucalyptus punctata*	Mature	25	10	1100					1100	1300	Good	Good	Very High	1. Long	A1	13.2	3.7	Located within nature strip.
1135	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	19	2	500					500	650	Fair	Fair	Low	3. Short	Z3	6.0	2.8	Located within nature strip. Exempt species.
1136	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	9	3	300					300	350	Fair	Fair	Low	3. Short	Z3	3.6	2.1	Located within nature strip. Exempt species.
1137	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	8	2	300					300	380	Fair	Poor	Low	4. Remove	Z3	3.6	2.2	Located within nature strip. Exempt species. Failure of central leader.
1138	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	10	1	300					300	400	Fair	Fair	Low	3. Short	Z3	3.6	2.3	Located within nature strip. Exempt species.
1139	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	7	2	300					300	480	Fair	Poor	Low	4. Remove	Z3	3.6	2.4	Located within nature strip. Exempt species. Failure of central leader.
1140	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	8	2	280					280	490	Fair	Poor	Low	4. Remove	Z3	3.4	2.5	Located within nature strip. Exempt species. Failure of central leader.
1141	Grey Gum	*Eucalyptus punctata*	Semi-mature	7	2	170					170	230	Good	Good	Medium	1. Long	A1	2.0	1.8	Located within nature strip.
1142	Grey Gum	*Eucalyptus punctata*	Semi-mature	10	2	230					230	300	Good	Good	Medium	1. Long	A1	2.8	2.0	Located within nature strip.
1143	Lombardy Poplar	*Populus nigra 'Italica'*	Semi-mature	7	1	190					190	250	Poor	Fair	Low	4. Remove	Z4	2.3	1.8	Located within nature strip. Exempt species. In decline. Bee hive at base.
1144	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	9	2	210	190				283	600	Fair	Fair	Low	3. Short	Z3	3.4	2.7	Located within nature strip. Exempt species.
1145	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	5	1	200					200	200	Good	Poor	Low	4. Remove	Z5	2.4	1.7	Located within nature strip. Exempt species. Topped at 500mm.
1146	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	5	1	300					300	300	Fair	Poor	Low	4. Remove	Z5	3.6	2.0	Located within nature strip. Exempt species. Topped at 2m.
1147	Grey Gum	*Eucalyptus punctata*	Semi-mature	9	2	200					200	270	Good	Good	Medium	1. Long	A1	2.4	1.9	Located within nature strip.
1148	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	11	4	400	200	200			490	700	Fair	Fair	Low	3. Short	Z3	5.9	2.8	Located within nature strip. Exempt species. Cavity in trunk. In decline.
1149	Grey Gum	*Eucalyptus punctata*	Semi-mature	8	2	180					180	220	Good	Good	Medium	1. Long	A1	2.2	1.8	Located within nature strip.
1150	Grey Gum	*Eucalyptus punctata*	Semi-mature	9	2	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Located within nature strip.
1151	Grey Gum	*Eucalyptus punctata*	Semi-mature	13	3	250					250	320	Good	Good	Medium	1. Long	A1	3.0	2.1	Located within nature strip.
1152	Black Peppermint	*Eucalyptus nicholii*	Mature	6	4	600					600	650	Good	Fair	Medium	2. Medium	Z3	7.2	2.8	Located within nature strip. Exempt species.
1153	Chinese Tallo	*Triadica sebifera*	Semi-mature	6	2	300					300	300	Good	Fair	Low	5. Small/Young	Z1	3.6	2.0	Located within corridor.

1342	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	6	1	110					110	130	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. Adjacent to fence.
1343	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Semi-mature	5	2	160					160	200	Good	Good	Medium	1. Long	A1	2.0	1.7	Located within corridor. Adjacent to fence.
1344	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Mature	8	4	440					440	500	Good	Good	High	1. Long	A1	5.3	2.5	Located within corridor. Adjacent to fence.
1345	Tallowood	*Eucalyptus microcorys*	Mature	19	6	600					600	700	Good	Good	High	1. Long	A1	7.2	2.8	Located within nature strip. Camphor laurel growing at base.
1346	Turpentine	*Syncarpia glomulifera*	Mature	10	4	450	400				602	940	Good	Fair	High	3. Short	Z9	7.2	3.2	Soil erosion at base of tree with potential to destabilize tree.
1347	Turpentine	*Syncarpia glomulifera*	Mature	9	3	310					310	440	Good	Good	High	1. Long	A1	3.7	2.3	Located within nature strip.
1348	Turpentine	*Syncarpia glomulifera*	Mature	9	4	320	360	350			595	1200	Fair	Fair	High	2. Medium	A2	7.1	3.6	Low foliage density for species.
1349	Tallowood	*Eucalyptus microcorys*	Mature	17	5	500					500	560	Good	Good	High	1. Long	A1	6.0	2.6	Located within nature strip.
1350	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	2	120					120	170	Good	Good	Low	5. Small/Young	Z1	2.0	1.6	Located within corridor. Adjacent to fence.
1351	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	160	140				213	300	Good	Fair	Medium	2. Medium	A1	2.6	2.0	Co-dominant stems.
1352	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	180					180	220	Good	Good	Medium	1. Long	A1	2.2	1.8	None.
1353	Tallowood	*Eucalyptus microcorys*	Young	8	2	110					110	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. Adjacent to fence.
1354	Tallowood	*Eucalyptus microcorys*	Mature	12	3	280					280	330	Good	Good	Medium	1. Long	A1	3.4	2.1	Located within corridor. Adjacent to fence.
1355	Tallowood	*Eucalyptus microcorys*	Mature	18	6	630					630	660	Good	Good	High	1. Long	A1	7.6	2.8	None.
1356	Tallowood	*Eucalyptus microcorys*	Mature	16	6	530					530	600	Good	Good	High	1. Long	A1	6.4	2.7	None.
1357	Tallowood	*Eucalyptus microcorys*	Mature	11	4	400					400	450	Good	Good	High	1. Long	A1	4.8	2.4	None.
1358	Tallowood	*Eucalyptus microcorys*	Mature	18	6	550					550	640	Good	Good	High	1. Long	A1	6.6	2.7	None.
1359	Lemon Scented Gum	*Corymbia citriodora*	Semi-mature	12	2	200					200	250	Good	Good	Medium	1. Long	A1	2.4	1.8	Located within corridor.
1360	Tallowood	*Eucalyptus microcorys*	Semi-mature	6	2	150					150	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor.
1361	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	110					110	130	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
1362	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	200					200	220	Good	Good	Medium	1. Long	A1	2.4	1.8	Located within corridor.
1363	Tallowood	*Eucalyptus microcorys*	Young	7	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
1364	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	3	120	120	110			202	400	Good	Good	Medium	1. Long	A1	2.4	2.3	Located within corridor. Multi stem.
1365	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	220					220	280	Good	Good	High	1. Long	A1	2.6	1.9	Located within corridor.
1366	Tallowood	*Eucalyptus microcorys*	Mature	17	4	400					400	450	Good	Good	High	1. Long	A1	4.8	2.4	None.
1367	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	3	170	80	80			204	350	Good	Good	Medium	1. Long	A1	2.5	2.1	Located within corridor.
1368	Tallowood	*Eucalyptus microcorys*	Mature	18	5	550					550	600	Fair	Fair	High	2. Medium	A2	6.6	2.7	Minor apical dieback.
1369	Smooth Barked Apple	*Angophora costata*	Young	8	1	100					100	110	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located directly adjacent to fence.
1370	Tallowood	*Eucalyptus microcorys*	Semi-mature	7	2	170					170	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	None.
1371	Tallowood	*Eucalyptus microcorys*	Mature	12	3	300					300	350	Good	Good	High	1. Long	A1	3.6	2.1	None.
1372	Tallowood	*Eucalyptus microcorys*	Mature	12	3	270					270	330	Good	Good	Medium	1. Long	A1	3.2	2.1	None.
1373	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	1	120					120	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1374	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	1	120					120	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1375	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	1	120					120	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1376	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	170					170	230	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	None.
1377	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	200					200	250	Good	Good	Medium	1. Long	A1	2.4	1.8	None.
1378	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	120					120	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	None.
1379	Tallowood	*Eucalyptus microcorys*	Mature	17	5	480					480	550	Good	Good	High	1. Long	A1	5.8	2.6	Canopy extends into corridor.
1380	Tallowood	*Eucalyptus microcorys*	Young	5	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1381	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	1	130					130	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	None.
1382	Tallowood	*Eucalyptus microcorys*	Semi-mature	9	2	190					190	230	Good	Good	Medium	1. Long	A1	2.3	1.8	None.
1383	Hard Leaved Scribbly Gum	*Eucalyptus racemosa*	Mature	11	5	630					630	800	Fair	Good	High	2. Medium	A2	7.6	3.0	Low foliage density for species.

1910	Spotted Gum	*Corymbia maculata*	Young	5	1	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	None.
1911	Sydney Blue Gum	*Eucalyptus saligna*	Young	5	2	150	100	100	50	50	218	300	Good	Fair	Low	5. Small/Young	Z1	2.6	2.0	None.
1912	Sydney Blue Gum	*Eucalyptus saligna*	Mature	11	5	400					400	450	Good	Fair	High	3. Short	Z10	4.8	2.4	Topped for power line clearance. DBH estimated.
1913	Sydney Blue Gum	*Eucalyptus saligna*	Young	3	1	150					150	180	Fair	Poor	Low	4. Remove	Z5	2.0	1.6	Topped for power line clearance. DBH estimated.
1914	Sydney Blue Gum	*Eucalyptus saligna*	Mature	25	6	550					550	650	Good	Fair	High	2. Medium	A1	6.6	2.8	Asymmetric crown shape due to power line clearance.
1915	Sydney Blue Gum	*Eucalyptus saligna*	Young	4	1	120					120	140	Fair	Poor	Low	4. Remove	Z5	2.0	1.5	Topped for power line clearance. DBH estimated.
1916	Sydney Blue Gum	*Eucalyptus saligna*	Mature	26	6	600					600	700	Good	Fair	High	2. Medium	A1	7.2	2.8	Asymmetric crown shape due to power line clearance. DBH estimated.
1917	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	5	2	200					200	300	Fair	Poor	Low	4. Remove	Z5	2.4	2.0	Topped for power line clearance. DBH estimated.
1918	Chinese Tallo	*Triadica sebifera*	Mature	9	3	220	110				246	320	Good	Fair	Medium	2. Medium	A1	3.0	2.1	Branches on fence. DBH estimated.
1919	Chinese Tallo	*Triadica sebifera*	Mature	10	2	210	150				258	400	Good	Fair	Medium	2. Medium	A1	3.1	2.3	Branches on fence. DBH estimated.
1920	Camphor Laurel	*Cinnamomum camphora*	Mature	8	3	350	350				495	700	Good	Fair	Low	2. Medium	Z3	5.9	2.8	Exempt species. DBH estimated.
1921	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	19	5	470					470	550	Good	Good	Medium	2. Medium	Z3	5.6	2.6	Exempt species.
1922	Eucalypt	*Eucalyptus spp*	Semi-mature	9	2	150					150	220	Good	Good	Medium	1. Long	A1	2.0	1.8	None.
1923	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	8	3	1000					1000	1000	Fair	Fair	Low	2. Medium	Z3	12.0	3.3	Exempt species. DBH estimated.
1924	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	400					400	400	Good	Fair	Low	2. Medium	Z3	4.8	2.3	Exempt species. DBH estimated. Growing through fence.
1925	Camphor Laurel	*Cinnamomum camphora*	Mature	9	4	400					400	480	Good	Fair	Low	2. Medium	Z3	4.8	2.4	Exempt species. DBH estimated.
1926	Wallangarra White Gum	*Eucalyptus scoparia*	Semi-mature	7	2	180					180	240	Fair	Fair	Low	2. Medium	Z3	2.2	1.8	Exempt species.
1927	Bangalay	*Eucalyptus botryoides*	Mature	17	6	550					550	680	Good	Good	High	1. Long	A1	6.6	2.8	Growing adjacent to fence.
1928	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	9	4	340					340	400	Good	Good	Medium	2. Medium	Z3	4.1	2.3	Exempt species.
1929	Camphor Laurel	*Cinnamomum camphora*	Young	4	1	100	100	80			162	200	Fair	Fair	Low	5. Small/Young	Z3	2.0	1.7	Exempt species growing through fence.
1930	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	8	3	300					300	380	Good	Good	Low	2. Medium	Z3	3.6	2.2	Exempt species.
1931	Blackbutt	*Eucalyptus pilularis*	Mature	18	5	470					470	540	Good	Good	High	1. Long	A1	5.6	2.6	Growing adjacent to fence.
1932	Camphor Laurel	*Cinnamomum camphora*	Young	4	1	80	50	50	50	50	128	350	Fair	Fair	Low	5. Small/Young	Z3	2.0	2.1	Exempt species.
1933	Sydney Blue Gum	*Eucalyptus saligna*	Mature	14	9	850					850	950	Good	Good	Very High	1. Long	A1	10.2	3.2	Growing directly adjacent to fence with branches in contact with fence.
1934	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	13	6	530					530	640	Good	Fair	Medium	2. Medium	Z3	6.4	2.7	Exempt species. Lopped for power line clearance.
1935	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	2	200					200	200	Good	Good	Low	5. Small/Young	Z1	2.4	1.7	None.
1936	Grey Box	*Eucalyptus moluccana*	Mature	6	3	400					400	450	Fair	Fair	High	3. Short	Z10	4.8	2.4	Lopped for power line clearance.
1937	Bangalay	*Eucalyptus botryoides*	Mature	18	10	500	500	300	300		825	1100	Good	Fair	High	2. Medium	A2	9.9	3.4	Asymmetric crown shape due to power line clearance.
1938	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	12	8	750	250				791	900	Good	Fair	Medium	2. Medium	Z3	9.5	3.2	Asymmetric crown shape due to power line clearance. Exempt species.
1939	Bangalay	*Eucalyptus botryoides*	Mature	10	5	440					440	510	Good	Fair	High	2. Medium	A2	5.3	2.5	Asymmetric crown shape due to power line clearance.
1940	Queensland Brushbox	*Lophostemon confertus*	Mature	5	4	500					500	580	Good	Fair	Medium	3. Short	Z10	6.0	2.6	Topped for power line clearance. DBH estimated.
1941	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	12	6	560					560	650	Good	Fair	Medium	3. Short	Z3	6.7	2.8	Asymmetric crown shape due to power line clearance. Fungal bracket (Phellinus spp) identified in east side of trunk.
1942	Queensland Brushbox	*Lophostemon confertus*	Mature	5	4	400					400	450	Good	Fair	Medium	3. Short	Z10	4.8	2.4	Topped for power line clearance. DBH estimated.
1943	Bangalay	*Eucalyptus botryoides*	Mature	10	5	310	200				369	500	Good	Fair	High	2. Medium	A2	4.4	2.5	Asymmetric crown shape due to power line clearance.
1944	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	14	6	640					640	660	Good	Fair	Medium	2. Medium	Z3	7.7	2.8	Asymmetric crown shape due to power line clearance. Exempt species.
1945	Blackbutt	*Eucalyptus pilularis*	Mature	15	6	500					500	630	Good	Fair	High	2. Medium	A2	6.0	2.7	Asymmetric crown shape due to power line clearance.
1946	Blackbutt	*Eucalyptus pilularis*	Mature	14	4	400	280				488	460	Good	Fair	High	3. Short	Z10	5.9	2.4	Lopped for power line clearance.
1947	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	480					480	550	Good	Fair	Medium	3. Short	Z10	5.8	2.6	Topped for power line clearance. DBH estimated.

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
1948	Wallangarra White Gum	*Eucalyptus scoparia*	Semi-mature	8	2	230					230	290	Good	Good	Low	2. Medium	Z3	2.8	2.0	Exempt species.
1949	Blackbutt	*Eucalyptus pilularis*	Mature	14	6	560					560	650	Good	Fair	High	2. Medium	A2	6.7	2.8	Lopped for power line clearance.
1950	Robinia	*Robinia pseudoacacia*	Semi-mature	5	2	200					200	230	Fair	Fair	Low	3. Short	Z3	2.4	1.8	Exempt species. Apical dieback.
1951	Turpentine	*Syncarpia glomulifera*	Mature	8	6	1400					1400	1400	Good	Fair	High	2. Medium	A2	15.0	3.8	Lopped for power line clearance. DBH estimated.
1952	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	11	6	550					550	690	Good	Fair	Medium	2. Medium	Z3	6.6	2.8	Exempt species. Asymmetric crown shape due to power line clearance.
1953	Wallangarra White Gum	*Eucalyptus scoparia*	Semi-mature	5	2	230					230	320	Fair	Fair	Low	3. Short	Z3	2.8	2.1	Exempt species. Decay at base. Growing on fence.
1954	Bangalay	*Eucalyptus botryoides*	Mature	10	5	440					440	470	Good	Fair	High	2. Medium	A2	5.3	2.4	Pruned for power line clearance.
1955	Lombardy Poplar	*Populus nigra 'Italica'*	Mature	8	2	400					400	480	Good	Fair	Low	2. Medium	Z3	4.8	2.4	Exempt species. Topped for power line clearance.
1956	Bangalay	*Eucalyptus botryoides*	Mature	10	4	420					420	480	Good	Fair	High	2. Medium	A2	5.0	2.4	Asymmetric crown shape due to power line clearance.
1957	Black Peppermint	*Eucalyptus nicholii*	Mature	11	6	550					550	650	Good	Fair	Medium	2. Medium	Z3	6.6	2.8	Exempt species. Asymmetric crown shape due to power line clearance.
1958	Bangalay	*Eucalyptus botryoides*	Mature	8	4	350					350	450	Good	Fair	High	3. Short	Z10	4.2	2.4	Topped for power line clearance.
1959	Queensland Brushbox	*Lophostemon confertus*	Mature	5	3	300	240				384	500	Fair	Fair	Medium	2. Medium	A2	4.6	2.5	Lie foliage density for species. Cavity on south side of trunk near base.
1960	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	8	6	540					540	600	Good	Fair	Medium	2. Medium	Z3	6.5	2.7	Heavily pruned for power line clearance.
G19	Parramatta Wattle	*Acacia parramattensis*	Semi-mature	5	1	100					100	120	Fair	Fair	Low	3. Short	Z1	2.0	1.5	Group of approximately 80 trees. Majority if trees are in decline or dead.
1961	Sydney Blue Gum	*Eucalyptus saligna*	Semi-mature	8	2	160					160	220	Good	Good	Medium	1. Long	A1	2.0	1.8	None.
1962	Bangalay	*Eucalyptus botryoides*	Mature	6	3	300					300	360	Good	Fair	Medium	3. Short	Z10	3.6	2.2	Lopped for power line clearance.
1963	Queensland Brushbox	*Lophostemon confertus*	Mature	6	3	400					400	490	Good	Fair	Medium	2. Medium	A2	4.8	2.5	Asymmetric crown shape due to power line clearance.
1964	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	8	5	500					500	600	Good	Fair	Medium	2. Medium	Z3	6.0	2.7	Exempt species. Lopped for power line clearance.
1965	Queensland Brushbox	*Lophostemon confertus*	Mature	5	3	300					300	360	Good	Good	Medium	2. Medium	A1	3.6	2.2	None.
G20	Wattle	*Acacia spp*	Semi-mature	6	1	150					150	200	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.7	Group of approximately 25 trees.
1966	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	6	4	500					500	550	Fair	Fair	Medium	3. Short	Z3	6.0	2.6	Exempt species. In decline
1967	Queensland Brushbox	*Lophostemon confertus*	Mature	7	4	350	370				509	600	Good	Good	Medium	2. Medium	A2	6.1	2.7	Lopped for power line clearance.
1968	Wattle	*Acacia spp*	Semi-mature	4	1	80	80				113	160	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1969	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	500					500	600	Good	Fair	Medium	3. Short	Z10	6.0	2.7	Topped for power line clearance.
1970	Wattle	*Acacia spp*	Semi-mature	4	1	100	80	50			137	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	None.
1971	Queensland Brushbox	*Lophostemon confertus*	Mature	6	3	370	300				476	550	Fair	Fair	Medium	3. Short	Z10	5.7	2.6	Large pruning wounds and poor overall form.
1972	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	11	6	540					540	650	Good	Fair	Medium	2. Medium	Z3	6.5	2.8	Exempt species. Asymmetric crown shape due to power line clearance.
1973	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	6	2	120	120	120			208	340	Good	Fair	Low	5. Small/Young	Z1	2.5	2.1	None.
1974	Queensland Brushbox	*Lophostemon confertus*	Mature	6	4	400					400	500	Good	Fair	Medium	3. Short	Z10	4.8	2.5	Topped for power line clearance.
1975	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	9	5	440					440	510	Good	Fair	Medium	2. Medium	Z3	5.3	2.5	Exempt species. Asymmetric crown shape due to power line clearance.
1976	Bangalay	*Eucalyptus botryoides*	Mature	10	4	390					390	450	Fair	Fair	Medium	3. Short	Z10	4.7	2.4	Poor overall form. Asymmetric crown shape due to power line clearance.
1977	Blue Jacaranda	*Jacaranda mimosifolia*	Semi-mature	6	2	170					170	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	None.
1978	Queensland Brushbox	*Lophostemon confertus*	Mature	5	6	620					620	750	Good	Fair	High	3. Short	Z10	7.4	2.9	Topped for power line clearance.
1979	Sydney Blue Gum	*Eucalyptus saligna*	Mature	9	4	430					430	490	Fair	Fair	High	2. Medium	A2	5.2	2.5	Asymmetric crown shape due to power line clearance. Fungal bracket (Phellinus spp) on east side of trunk.
1980	Bangalay	*Eucalyptus botryoides*	Mature	8	5	450					450	520	Fair	Fair	High	3. Short	Z10	5.4	2.5	Asymmetric crown shape due to power line clearance.
1981	Eucalypt	*Eucalyptus spp*	Semi-mature	6	2	180	110				211	250	Good	Fair	Low	5. Small/Young	Z1	2.5	1.8	None.
1982	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	10	7	650					650	690	Good	Fair	Medium	2. Medium	Z3	7.8	2.8	Asymmetric crown shape due to power line clearance. Exempt species.
1983	Hickory Wattle	*Acacia implexa*	Mature	9	3	340					340	450	Good	Good	Medium	2. Medium	A1	4.1	2.4	None.
1984	Eucalypt	*Eucalyptus spp*	Mature	10	4	400					400	460	Good	Fair	Medium	2. Medium	A2	4.8	2.4	Asymmetric crown shape due to power line clearance.

1985	Chinese Tallo	*Triadica sebifera*	Semi-mature	6	1	120					120	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Adjacent to fence.
1986	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	8	4	320					320	380	Good	Fair	Medium	2. Medium	Z3	3.8	2.2	Asymmetric crown shape due to power line clearance. Exempt species.
1987	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	10	4	360					360	440	Good	Fair	Medium	2. Medium	Z3	4.3	2.3	Asymmetric crown shape due to power line clearance. Exempt species.
1988	Bangalay	*Eucalyptus botryoides*	Mature	12	4	370					370	440	Good	Fair	High	3. Short	Z10	4.4	2.3	Asymmetric crown shape due to power line clearance. Poor overall form.
1989	Bangalay	*Eucalyptus botryoides*	Mature	11	4	360					360	440	Good	Fair	High	2. Medium	A2	4.3	2.3	Asymmetric crown shape due to power line clearance.
1990	Peppercorn Tree	*Schinus molle*	Mature	10	8	700	500	500			995	1500	Good	Fair	High	2. Medium	A1	11.9	3.9	DBH estimated. Could not view South side of tree.
1991	Peppercorn Tree	*Schinus molle*	Mature	10	9	680	500	500			981	1200	Good	Fair	High	2. Medium	A1	11.8	3.6	DBH estimated. Could not view South side of tree.
1992	Turpentine	*Syncarpia glomulifera*	Mature	9	4	500	300	300	200		686	1000	Fair	Fair	High	2. Medium	A2	8.2	3.3	Growing directly adjacent to fence. Multiple stems.
1993	Sweet Pittosporum	*Pittosporum undulatum*	Mature	7	3	300					300	300	Good	Fair	Medium	2. Medium	A1	3.6	2.0	DBH estimated. Could not view South side of tree.
1994	Peppercorn Tree	*Schinus molle*	Mature	10	8	500	500				707	1100	Good	Fair	High	2. Medium	A1	8.5	3.4	DBH estimated. Could not view South side of tree.
1995	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	2	250	320				406	450	Poor	Fair	Medium	4. Remove	Z4	4.9	2.4	In advanced stages of decline.
1996	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	4	1	210					210	250	Fair	Poor	Low	4. Remove	Z5	2.5	1.8	Partial failure at base, leaning on fence.
1997	Wattle	*Acacia spp*	Semi-mature	6	2	160	110	110			223	250	Good	Fair	Medium	2. Medium	A1	2.7	1.8	Located in adjoining property. DBH estimated.
1998	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	1	120					120	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Trunk lean.
1999	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	2	190					190	220	Fair	Fair	Low	3. Short	Z4	2.3	1.8	Early stages of decline.
G21	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	1	100					100	120	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.5	Group of approximately 13 trees.
2000	Italian Cypress	*Cupressus sempervirens*	Mature	6	1	150					150	200	Good	Fair	Medium	2. Medium	A1	2.0	1.7	Located in adjoining property. DBH estimated.
2001	Common Oak	*Quercus robur*	Mature	8	4	450					450	450	Good	Fair	Medium	2. Medium	A1	5.4	2.4	DBH measured at base.
2002	Italian Cypress	*Cupressus sempervirens*	Mature	6	1	230					230	250	Good	Fair	Medium	2. Medium	A1	2.8	1.8	Located in adjoining property. DBH estimated.
2003	Blue Lilly Pilly	*Syzygium oleosum*	Mature	9	5	390	290				486	520	Good	Good	High	1. Long	A1	5.8	2.5	Located in adjoining property. DBH estimated.
2004	Lemon Scented Tea Tree	*Leptospermum petersonii*	Mature	9	6	550	200				585	650	Good	Fair	Medium	2. Medium	A1	7.0	2.8	Located in adjoining property. DBH estimated.
2005	Chinese Tallo	*Triadica sebifera*	Mature	6	4	190	240				306	650	Good	Fair	Medium	2. Medium	A1	3.7	2.8	Located directly adjacent to fence.
2006	Sydney Golden Wattle	*Acacia longifolia*	Mature	7	2	210					210	250	Good	Fair	Medium	2. Medium	A1	2.5	1.8	None.
2007	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Mature	10	5	1200					1200	1200	Good	Fair	High	1. Long	A1	14.4	3.6	Multi stem tree.
G22	Wattle	*Acacia spp*	Semi-mature	5	1	100					100	150	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.5	Group of approximately 80 trees. Overall condition of group is fair-poor.
2008	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	4	440					440	480	Fair	Fair	Medium	3. Short	Z4	5.3	2.4	Early stages of decline.
2009	Robinia	*Robinia pseudoacacia*	Mature	9	5	460	300				549	790	Good	Fair	Medium	2. Medium	Z3	6.6	3.0	Exempt species. Co-dominant stems with tight union.
2010	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	1	100	120	130			203	250	Good	Fair	Low	5. Small/Young	Z1	2.4	1.8	None.
2011	Weeping Bottlebrush	*Callistemon viminalis*	Young	4	1	120					120	160	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
2012	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	140	100	80			190	230	Good	Fair	Low	5. Small/Young	Z1	2.3	1.8	None.
2013	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	200	130				239	280	Good	Good	Medium	2. Medium	A1	2.9	1.9	None.
2014	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	3	1	150					150	230	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	None.
2015	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	100	90				135	210	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	None.
2016	Swamp Mahogany	*Eucalyptus robusta*	Mature	8	5	530					530	620	Good	Good	High	1. Long	A1	6.4	2.7	None.
2017	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	100	100				141	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Co-dominant stems with tight union.

2246	Swamp Oak	*Casuarina glauca*	Semi-mature	9	2	200					200	250	Good	Fair	Medium	2. Medium	A1	2.4	1.8	Growing through fence.
2247	Swamp Oak	*Casuarina glauca*	Mature	17	3	320					320	350	Good	Fair	High	2. Medium	A1	3.8	2.1	Asymmetric crown shape due to power line clearance. DBH estimated.
2248	Swamp Oak	*Casuarina glauca*	Mature	16	3	300					300	330	Good	Good	Medium	2. Medium	A1	3.6	2.1	Asymmetric crown shape due to power line clearance. DBH estimated.
2249	Swamp Oak	*Casuarina glauca*	Mature	17	3	330					330	360	Good	Fair	High	2. Medium	A1	4.0	2.2	Asymmetric crown shape due to power line clearance. DBH estimated.
2250	Swamp Oak	*Casuarina glauca*	Mature	17	3	450					450	500	Good	Fair	High	3. Short	Z9	5.4	2.5	Damage to base of tree. DBH estimated.
2251	Swamp Oak	*Casuarina glauca*	Mature	18	4	400					400	460	Good	Good	High	1. Long	A1	4.8	2.4	DBH estimated.
2252	Monterey Pine	*Pinus radiata*	Mature	19	5	450					450	500	Good	Good	Medium	2. Medium	Z3	5.4	2.5	Exempt species.
2253	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	17	5	550					550	600	Good	Good	High	1. Long	A1	6.6	2.7	DBH estimated.
2254	Blue Jacaranda	*Jacaranda mimosifolia*	Semi-mature	9	3	260					260	300	Good	Fair	Medium	2. Medium	A1	3.1	2.0	DBH estimated.
2255	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	15	4	450					450	500	Good	Fair	High	2. Medium	A1	5.4	2.5	Notch cut in trunk for fence clearance. DBH estimated.
2256	Mango	*Mangifera indica*	Mature	6	2	250					250	300	Good	Good	Medium	1. Long	Z3	3.0	2.0	Exempt species. DBH estimated.
2257	Canary Palm	*Phoenix canariensis*	Semi-mature	6	2	450					450	NA	Good	Fair	Low	5. Small/Young	Z3	3.0	NA	Exempt species.
2258	Unknown	*Unknown spp*	Mature	8	5	500					500	550	Good	Fair	Medium	2. Medium	A1	6.0	2.6	Multi stem tree. Growing through fence. DBH estimated.
2259	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	5	2	300					300	300	Good	Fair	Very Low	5. Small/Young	Z3	3.6	2.0	Exempt species. DBH estimated at base.
2260	Unknown	*Unknown spp*	Semi-mature	9	3	250	200				320	400	Good	Fair	Medium	3. Short	Z9	3.8	2.3	Loss of cambium and evidence of decay on stems.
2261	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	1	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	None.
2262	Unknown	*Unknown spp*	Young	5	1	150					150	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	None.
2263	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Mature	11	5	470					470	500	Good	Good	High	1. Long	A1	5.6	2.5	Canopy extends into corridor.
2264	Weeping Bottlebrush	*Callistemon viminalis*	Mature	7	2	220	140				261	310	Good	Fair	Medium	2. Medium	A1	3.1	2.0	Asymmetric crown shape. Suppressed by adjacent tree.
2265	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	15	7	770					770	850	Good	Good	High	1. Long	A1	9.2	3.1	None.
2266	Bangalay	*Eucalyptus botryoides*	Mature	14	5	500					500	550	Good	Good	High	1. Long	A1	6.0	2.6	None.
2267	Plum Fruited Yew	*Afrocarpus falcatus*	Mature	8	4	500					500	500	Good	Good	Medium	1. Long	A1	6.0	2.5	None.
2268	Common or Black Mulberry	*Morus nigra*	Young	5	1	80					80	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
2269	Swamp Mahogany	*Eucalyptus robusta*	Mature	12	6	600					600	660	Good	Fair	High	2. Medium	A1	7.2	2.8	Asymmetric crown shape.
2270	Eucalypt	*Eucalyptus spp*	Semi-mature	6	2	110	110				156	300	Good	Fair	Low	5. Small/Young	Z1	2.0	2.0	Regrowth from stump.
2271	Swamp Mahogany	*Eucalyptus robusta*	Mature	16	8	760					760	890	Good	Good	High	1. Long	A1	9.1	3.2	Asymmetric crown shape.
2272	Swamp Mahogany	*Eucalyptus robusta*	Mature	14	5	480					480	550	Good	Good	High	1. Long	A1	5.8	2.6	Asymmetric crown shape.
2273	Swamp Mahogany	*Eucalyptus robusta*	Semi-mature	9	2	500					500	500	Good	Poor	Medium	4. Remove	Z5	6.0	2.5	Regrowth from stump.
2274	Swamp Mahogany	*Eucalyptus robusta*	Mature	14	6	560					560	600	Good	Good	High	1. Long	A1	6.7	2.7	None.
2275	Camphor Laurel	*Cinnamomum camphora*	Mature	12	8	750					750	800	Good	Fair	Medium	2. Medium	A1	9.0	3.0	Pruned away from corridor.
2276	African Olive	*Olea europaea subsp. cuspidata*	Mature	8	2	300					300	300	Good	Fair	Very Low	2. Medium	Z3	3.6	2.0	Exempt species. DBH estimated at base.
2277	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	2	220	200				297	450	Good	Fair	Medium	2. Medium	A1	3.6	2.4	None.
2278	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	2	200					200	250	Fair	Fair	Low	5. Small/Young	Z1	2.4	1.8	Canopy extends over fence.
2279	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	4	1	200					200	200	Fair	Poor	Low	4. Remove	Z5	2.4	1.7	Topped.
2280	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	1	200					200	200	Fair	Fair	Low	5. Small/Young	Z1	2.4	1.7	Significant trunk lean.
2281	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	1	110					110	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	DBH estimated.
2282	Camphor Laurel	*Cinnamomum camphora*	Mature	10	7	650					650	700	Good	Fair	Medium	2. Medium	A1	7.8	2.8	Pruned away from corridor.
2283	Camphor Laurel	*Cinnamomum camphora*	Mature	10	7	750					750	800	Good	Fair	Medium	1. Long	A1	9.0	3.0	Pruned away from corridor.
2284	African Olive	*Olea europaea subsp. cuspidata*	Semi-mature	5	2	250					250	250	Good	Fair	Very Low	5. Small/Young	Z3	3.0	1.8	Exempt species. DBH estimated at base.
2285	Sweet Pittosporum	*Pittosporum undulatum*	Mature	8	2	200	140				244	320	Good	Fair	Medium	2. Medium	A1	2.9	2.1	None.
2286	African Olive	*Olea europaea subsp. cuspidata*	Mature	8	4	440					440	520	Good	Good	Low	2. Medium	Z3	5.3	2.5	Exempt species.

2703	River She Oak	*Casuarina cunninghamiana*	Semi-mature	7	1	100					100	120	Fair	Fair	Low	3. Short	Z9	2.0	1.5	Located within corridor. Topped at 2m with epicormic growth.
2704	River She Oak	*Casuarina cunninghamiana*	Young	8	1	80					80	90	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2705	Swamp Oak	*Casuarina glauca*	Semi-mature	10	2	230					230	280	Good	Fair	Medium	3. Short	Z9	2.8	1.9	Topped for power line clearance at 6m.
2706	River She Oak	*Casuarina cunninghamiana*	Young	8	1	90					90	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2707	River She Oak	*Casuarina cunninghamiana*	Semi-mature	9	1	120					120	160	Good	Good	Medium	1. Long	A1	2.0	1.5	Located within corridor.
2708	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	6	2	110					110	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2709	River She Oak	*Casuarina cunninghamiana*	Young	8	1	100					100	110	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2710	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	10	3	350	280	220			499	550	Good	Good	High	1. Long	A1	6.0	2.6	Pruned for power lines.
2711	River She Oak	*Casuarina cunninghamiana*	Young	9	1	80					80	90	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2712	River She Oak	*Casuarina cunninghamiana*	Young	8	1	90					90	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2713	River She Oak	*Casuarina cunninghamiana*	Semi-mature	12	1	200					200	220	Good	Fair	Medium	3. Short	Z10	2.4	1.8	Abrupt curve in trunk at 8m.
2714	River She Oak	*Casuarina cunninghamiana*	Semi-mature	8	1	120					120	140	Fair	Poor	Medium	4. Remove	Z5	2.0	1.5	Topped at 8m.
2715	River She Oak	*Casuarina cunninghamiana*	Semi-mature	12	1	180					180	200	Good	Fair	Medium	3. Short	Z9	2.2	1.7	Located within corridor. Topped at 10m.
2716	River She Oak	*Casuarina cunninghamiana*	Semi-mature	12	1	140					140	160	Good	Good	Medium	1. Long	A1	2.0	1.5	Located within corridor.
2717	Swamp Oak	*Casuarina glauca*	Young	6	1	50					50	60	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
2718	River She Oak	*Casuarina cunninghamiana*	Semi-mature	18	3	270					270	340	Good	Fair	Medium	2. Medium	A1	3.2	2.1	Trunk lean to west. Phototropism.
2719	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	17	5	340	360	400	460		785	1050	Good	Good	High	1. Long	A1	9.4	3.4	Co-dominant stems.
2720	Sweet Pittosporum	*Pittosporum undulatum*	Mature	10	3	450					450	450	Good	Fair	Medium	2. Medium	A1	5.4	2.4	Located within corridor. DBH estimated at base.
2721	Forest Oak	*Allocasuarina torulosa*	Mature	12	2	100	110	120			191	360	Good	Fair	Medium	2. Medium	A2	2.3	2.2	Evidence of decay on trunk. Extent of decay is unknown.

Appendix 1 - Tree Inspection Schedule

2810	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	9	2	200					200	250	Good	Fair	Low	2. Medium	Z3	2.4	1.8	Area inaccessible. Estimated tree data from opposite side of tracks.
2811	Leyland Cypress	*X Cupressocyparis leylandii*	Mature	11	2	300					300	350	Good	Good	Low	2. Medium	Z3	3.6	2.1	Area inaccessible. Estimated tree data from opposite side of tracks.
2812	Leyland Cypress	*X Cupressocyparis leylandii*	Mature	11	3	300					300	350	Good	Good	Low	2. Medium	Z3	3.6	2.1	Area inaccessible. Estimated tree data from opposite side of tracks.
2813	Saucer Magnolia	*Magnolia x soulangiana*	Mature	6	2	160					160	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Area inaccessible. Estimated tree data from opposite side of tracks.
2814	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	7	2	200					200	250	Good	Good	Medium	1. Long	A1	2.4	1.8	Area inaccessible. Estimated tree data from opposite side of tracks.
2815	Willow Bottlebrush	*Callistemon salignus*	Mature	9	4	350	500				610	750	Good	Good	High	1. Long	A1	7.3	2.9	Area inaccessible. Estimated tree data from opposite side of tracks. Co-dominant stems. Stem in contact with fence.
2816	Argyle Apple	*Eucalyptus cinerea*	Mature	11	6	650					650	700	Fair	Fair	High	3. Short	Z4	7.8	2.8	Low foliage density for species. Early stages of decline.
2817	Bracelet Honey Myrtle	*Melaleuca armillaris*	Mature	5	3	300	200				361	550	Good	Fair	Medium	2. Medium	A1	4.3	2.6	Exposed surface roots. Co-dominant stems.
2818	Bracelet Honey Myrtle	*Melaleuca armillaris*	Mature	7	2	220	240				326	500	Good	Fair	Medium	3. Short	Z9	3.9	2.5	Co-dominant stems with failure of east stem.
2819	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	7	2	150					150	180	Good	Good	Medium	2. Medium	A1	2.0	1.6	Located within corridor.
2820	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	150					150	300	Good	Fair	Low	5. Small/Young	Z1	2.0	2.0	Adjacent to fence.
2821	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	200					200	350	Good	Fair	Medium	3. Short	Z9	2.4	2.1	Adjacent to fence. Previous branch failure.
2822	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	200					200	200	Fair	Fair	Low	3. Short	Z9	2.4	1.7	Adjacent to fence. Topped at 400mm with epicormic growth.
2823	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	10	5	450					450	500	Good	Fair	Medium	2. Medium	Z3	5.4	2.5	Located within corridor. Exempt species.
2824	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	12	8	900					900	950	Good	Good	Medium	2. Medium	Z3	10.8	3.2	Located within corridor. Exempt species.
2825	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	11	7	700					700	800	Good	Good	Medium	2. Medium	Z3	8.4	3.0	Located within corridor. Exempt species.
2826	Wallangarra White Gum	*Eucalyptus scoparia*	Semi-mature	8	2	200					200	250	Fair	Fair	Low	3. Short	Z3	2.4	1.8	Located within corridor. Exempt species. In decline.
2827	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	11	6	600					600	710	Good	Good	Medium	2. Medium	Z3	7.2	2.9	Nature strip. Minor deadwood through canopy.
2828	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Located within corridor. Branch in contact with fence. DBH estimated at base.
2829	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	14	7	720					720	790	Good	Good	Medium	2. Medium	Z3	8.6	3.0	Located within corridor. Exempt species.
2830	London Plane	*Platanus x hispanica*	Semi-mature	7	2	180					180	220	Good	Fair	Medium	1. Long	A1	2.2	1.8	Located in park.
2831	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	10	4	380					380	500	Good	Fair	Medium	2. Medium	Z3	4.6	2.5	Located within corridor. Exempt species.
2832	Black Peppermint	*Eucalyptus nicholii*	Mature	14	8	400	500				640	900	Good	Good	Medium	2. Medium	Z3	7.7	3.2	Located within park. Exempt species.
2833	Wallangarra White Gum	*Eucalyptus scoparia*	Semi-mature	9	2	200					200	280	Good	Fair	Medium	2. Medium	Z3	2.4	1.9	Located within corridor. Exempt species.
2834	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	14	6	600					600	850	Good	Good	Medium	2. Medium	Z3	7.2	3.1	Located within corridor. Exempt species.
2835	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	1	80	100	100			162	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Located within corridor.
2836	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	13	5	450					450	550	Good	Good	Medium	2. Medium	Z3	5.4	2.6	Located within corridor. Exempt species.
2837	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	1	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Located within corridor.
2838	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	13	5	500					500	580	Good	Good	Medium	2. Medium	Z3	6.0	2.6	Located within corridor. Exempt species.
2839	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	15	6	600					600	700	Good	Good	Medium	2. Medium	Z3	7.2	2.8	Located within corridor. Exempt species. Low foliage density for species.
2840	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	3	400					400	400	Good	Fair	Medium	2. Medium	A1	4.8	2.3	Located within corridor. Multi stem tree.
2841	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	2	150	150				212	300	Good	Fair	Medium	2. Medium	A1	2.5	2.0	Located within corridor. Multi stem tree.

2843	Brush Cherry	*Syzygium australe*	Mature	10	3	350					350	350	Good	Good	High	1. Long	A1	4.2	2.1	Located within adjoining property. DBH estimated.
2844	Brush Cherry	*Syzygium australe*	Mature	10	3	350					350	350	Good	Good	High	1. Long	A1	4.2	2.1	Located within adjoining property. DBH estimated.
2845	Umbrella	*Schefflera actinophylla*	Semi-mature	5	2	300					300	350	Good	Fair	Low	2. Medium	Z3	3.6	2.1	Located within corridor. Exempt species.
2846	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	5	2	220					220	250	Good	Fair	Very Low	2. Medium	Z3	2.6	1.8	Located within corridor. Exempt species.
2847	African Olive	*Olea europaea subsp. cuspidata*	Mature	7	2	400					400	400	Good	Fair	Low	2. Medium	Z3	4.8	2.3	Area inaccessible. Tree data estimated from opposite side of tracks. Exempt species.
2848	Umbrella	*Schefflera actinophylla*	Mature	7	3	450					450	450	Good	Fair	Low	2. Medium	Z3	5.4	2.4	Area inaccessible. Tree data estimated from opposite side of tracks. Exempt species.
2849	Common Oak	*Quercus robur*	Semi-mature	7	2	350					350	350	Good	Fair	Medium	2. Medium	A1	4.2	2.1	Area inaccessible. Tree data estimated from opposite side of tracks. Multi stem tree.
2850	Broad Leaved Privet	*Ligustrum lucidum*	Mature	6	2	300					300	300	Good	Fair	Very Low	2. Medium	Z3	3.6	2.0	Area inaccessible. Tree data estimated from opposite side of tracks. Exempt species.
2851	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	5	1	200					200	200	Good	Fair	Very Low	2. Medium	Z3	2.4	1.7	Area inaccessible. Tree data estimated from opposite side of tracks. Exempt species.
2852	Common Oak	*Quercus robur*	Mature	11	5	550					550	610	Good	Good	High	1. Long	A1	6.6	2.7	Located within adjoining property.
2853	Camphor Laurel	*Cinnamomum camphora*	Mature	10	3	400	350				532	580	Good	Fair	Medium	1. Long	A1	6.4	2.6	Located within adjoining property.
2854	Parramatta Wattle	*Acacia parramattensis*	Mature	8	2	140	150	130			243	300	Good	Fair	Medium	2. Medium	A1	2.9	2.0	Located within nature strip.
2855	Wattle	*Acacia spp*	Dead	5	2	150					150	190	Dead	Poor	Low	4. Remove	Z4	2.0	1.6	Located within nature strip. Dead tree.
2856	Illawara Flame	*Brachychiton acerifolius*	Young	5	1	60	60				85	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Located within nature strip.
2857	Parramatta Wattle	*Acacia parramattensis*	Mature	6	2	130	130				184	240	Good	Good	Medium	2. Medium	A1	2.2	1.8	Located within nature strip.
2858	Sydney Blue Gum	*Eucalyptus saligna*	Mature	10	4	350					350	480	Good	Good	High	1. Long	A1	4.2	2.4	Located within nature strip.
2859	Silky Oak	*Grevillea robusta*	Young	5	1	120					120	160	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
2860	Silky Oak	*Grevillea robusta*	Semi-mature	5	2	200					200	200	Fair	Fair	Low	3. Short	Z4	2.4	1.7	Located within nature strip. Apical dieback, early stages of decline.
2861	Parramatta Wattle	*Acacia parramattensis*	Mature	6	2	150					150	200	Good	Good	Medium	2. Medium	A1	2.0	1.7	Located within nature strip.
2862	Bracelet Honey Myrtle	*Melaleuca armillaris*	Mature	6	2	160	170				233	350	Good	Good	Medium	2. Medium	A1	2.8	2.1	Located within nature strip. In contact with fence.
2863	Willow Bottlebrush	*Callistemon salignus*	Semi-mature	6	2	280					280	310	Good	Good	Medium	1. Long	A1	3.4	2.0	Located within nature strip.
2864	Eucalypt	*Eucalyptus spp*	Mature	12	5	490					490	550	Fair	Good	High	2. Medium	A2	5.9	2.6	Located within nature strip. Low foliage density for species. Monitor health.
2865	Eucalypt	*Eucalyptus spp*	Mature	9	5	450					450	490	Good	Good	High	1. Long	A1	5.4	2.5	Located within nature strip.
2866	Wattle	*Acacia spp*	Mature	5	2	150	90				175	220	Good	Good	Medium	2. Medium	A1	2.1	1.8	Located within nature strip.
2867	Wattle	*Acacia spp*	Mature	5	2	120	120				170	200	Fair	Fair	Medium	3. Short	Z4	2.0	1.7	Located within nature strip. Apical dieback, early stages of decline.
2868	Lemon Scented Tea Tree	*Leptospermum petersonii*	Mature	5	2	230	200				305	450	Fair	Good	Medium	2. Medium	A2	3.7	2.4	Located within nature strip. Low foliage density for species. Monitor health.
2869	Wattle	*Acacia spp*	Semi-mature	3	1	100	90	50			144	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor adjacent to fence.
2870	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	7	2	250					250	300	Good	Good	Medium	2. Medium	A1	3.0	2.0	Located within corridor.
2871	Oleander	*Nerium oleander*	Mature	5	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor.
2872	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	220					220	280	Good	Fair	Medium	4. Remove	Z5	2.6	1.9	Located within corridor. Previous failure of trunk with large vertical crack.
2873	Oleander	*Nerium oleander*	Semi-mature	5	1	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor.
2874	Grey Ironbark	*Eucalyptus paniculata*	Mature	8	2	310					310	350	Good	Good	High	1. Long	A1	3.7	2.1	Located within corridor. Vine cover up trunk.
2875	Tallowood	*Eucalyptus microcorys*	Mature	12	5	460					460	550	Good	Good	High	1. Long	A1	5.5	2.6	Located within corridor.
2876	San Pedro Cactus	*Echinopsis pachanoi*	Mature	6	2	320					320	350	Good	Good	Medium	1. Long	A1	3.8	2.1	Located within corridor.
2877	Willow Myrtle	*Agonis flexuosa*	Mature	7	3	300					300	350	Fair	Fair	Medium	3. Short	Z4	3.6	2.1	Located within adjoining property. Apical die back.
2878	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	5	1	150					150	180	Fair	Fair	Very Low	2. Medium	Z3	2.0	1.6	Located within corridor. Exempt species.
2879	Sweet Pittosporum	*Pittosporum undulatum*	Young	5	1	120					120	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.

3033	Weeping Bottlebrush	*Callistemon viminalis*	Mature	7	3	350					350	380	Good	Good	Medium	1. Long	A1	4.2	2.2	Located within nature strip.
3034	Port Jackson Fig	*Ficus rubiginosa*	Semi-mature	8	3	340					340	400	Good	Good	High	1. Long	A1	4.1	2.3	Located within nature strip.
3035	Sydney Blue Gum	*Eucalyptus saligna*	Mature	12	4	370					370	400	Good	Good	High	1. Long	A1	4.4	2.3	Located within nature strip. Adjacent to fence.
3036	Chinese Hackberry	*Celtis sinensis*	Mature	9	4	400					400	400	Good	Fair	Low	2. Medium	Z3	4.8	2.3	Located within corridor. Exempt species.
3037	White Cedar	*Melia azedarach*	Semi-mature	8	2	100	170				197	240	Good	Fair	Low	2. Medium	Z3	2.4	1.8	Located within corridor. Exempt species.
3038	Camphor Laurel	*Cinnamomum camphora*	Mature	12	7	850					850	850	Good	Good	Medium	2. Medium	Z3	10.2	3.1	Located within corridor. Exempt species.
3039	Wattle	*Acacia spp*	Mature	9	2	220					220	250	Good	Fair	Medium	3. Short	Z10	2.6	1.8	Located within corridor. Significant trunk lean towards footpath.
3040	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	8	2	100	100				141	200	Good	Fair	Low	5. Small/Young	Z3	2.0	1.7	Located within corridor. Exempt species.
3041	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	9	2	250					250	250	Good	Fair	Low	2. Medium	Z3	3.0	1.8	Located within corridor. Exempt species.
3042	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	9	2	100	150	150			235	350	Good	Fair	Low	2. Medium	Z3	2.8	2.1	Located within corridor. Exempt species.
3043	River She Oak	*Casuarina cunninghamiana*	Mature	17	6	550					550	650	Good	Good	Very High	1. Long	A1	6.6	2.8	Located within park.
3044	River She Oak	*Casuarina cunninghamiana*	Mature	18	7	640					640	750	Good	Good	Very High	1. Long	A1	7.7	2.9	Located within park.
3045	River She Oak	*Casuarina cunninghamiana*	Mature	12	4	330					330	450	Good	Good	High	1. Long	A1	4.0	2.4	Located within park.
3046	River She Oak	*Casuarina cunninghamiana*	Mature	18	3	300					300	390	Good	Good	High	1. Long	A1	3.6	2.2	Located within park.
3047	River She Oak	*Casuarina cunninghamiana*	Mature	20	5	540					540	620	Good	Good	Very High	1. Long	A1	6.5	2.7	Located within park.
3048	River She Oak	*Casuarina cunninghamiana*	Semi-mature	10	2	180					180	210	Good	Good	Medium	1. Long	A1	2.2	1.7	Located within park.
3049	River She Oak	*Casuarina cunninghamiana*	Mature	22	5	450					450	550	Good	Good	High	1. Long	A1	5.4	2.6	Located within park.
3050	River She Oak	*Casuarina cunninghamiana*	Mature	18	4	390					390	450	Good	Good	High	1. Long	A1	4.7	2.4	Located within park.
3051	River She Oak	*Casuarina cunninghamiana*	Mature	22	6	530					530	650	Good	Good	Very High	1. Long	A1	6.4	2.8	Located within park.
3052	River She Oak	*Casuarina cunninghamiana*	Mature	18	5	460					460	530	Good	Good	High	1. Long	A1	5.5	2.5	Located within park.
3053	River She Oak	*Casuarina cunninghamiana*	Mature	12	7	650					650	780	Good	Good	Very High	1. Long	A1	7.8	3.0	Located within park.
3054	Eucalypt	*Eucalyptus spp*	Semi-mature	6	2	180					180	250	Fair	Good	Medium	2. Medium	A2	2.2	1.8	Located within park. Low foliage density for species.
3055	Bangalay	*Eucalyptus botryoides*	Semi-mature	7	2	160					160	230	Good	Good	Medium	1. Long	A1	2.0	1.8	Located within park.
3056	Forest Oak	*Allocasuarina torulosa*	Mature	10	4	450					450	460	Good	Good	High	1. Long	A1	5.4	2.4	Located within park.
3057	Forest Oak	*Allocasuarina torulosa*	Mature	10	4	380	260	220			510	500	Good	Good	High	1. Long	A1	6.1	2.5	Located within park.
3058	Forest Oak	*Allocasuarina torulosa*	Mature	10	4	490					490	520	Good	Good	High	1. Long	A1	5.9	2.5	Located within park.
3059	River She Oak	*Casuarina cunninghamiana*	Mature	20	6	640					640	700	Good	Good	Very High	1. Long	A1	7.7	2.8	Located within park.
3060	River She Oak	*Casuarina cunninghamiana*	Mature	20	5	470					470	550	Good	Fair	High	2. Medium	A1	5.6	2.6	Located within park. Co-dominant stems with bark inclusion.
3061	River She Oak	*Casuarina cunninghamiana*	Mature	19	5	450					450	550	Good	Good	High	1. Long	A1	5.4	2.6	Located within park.

3090	Camphor Laurel	*Cinnamomum camphora*	Mature	11	3	350					350	350	Good	Fair	Low	2. Medium	Z3	4.2	2.1	Area inaccessible. Tree data estimated from other side of tracks. Exempt species.
3091	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	300					300	300	Good	Fair	Low	2. Medium	Z3	3.6	2.0	Area inaccessible. Tree data estimated from other side of tracks. Exempt species.
3092	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	300					300	300	Good	Fair	Low	2. Medium	Z3	3.6	2.0	Area inaccessible. Tree data estimated from other side of tracks. Exempt species.
3093	Chinese Hackberry	*Celtis sinensis*	Semi-mature	9	2	200					200	250	Good	Fair	Low	2. Medium	Z3	2.4	1.8	Area inaccessible. Tree data estimated from other side of tracks. Exempt species.
3094	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	7	3	300					300	330	Good	Good	Medium	1. Long	A1	3.6	2.1	Area inaccessible. Tree data estimated from other side of tracks.
3095	Chinese Hackberry	*Celtis sinensis*	Young	5	1	80	80				113	150	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.5	Area inaccessible. Tree data estimated from other side of tracks. Exempt species.
3096	Weeping Bottlebrush	*Callistemon viminalis*	Mature	9	4	500					500	550	Good	Good	Medium	1. Long	A1	6.0	2.6	Area inaccessible. Tree data estimated from other side of tracks.
3097	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	16	5	460					460	550	Good	Good	High	1. Long	A1	5.5	2.6	Area inaccessible. Tree data estimated from other side of tracks.
3098	Golden Robinia	*Robinia pseudoacacia 'Frisia'*	Semi-mature	8	2	150					150	180	Fair	Fair	Low	2. Medium	Z3	2.0	1.6	Area inaccessible. Tree data estimated from other side of tracks. Exempt species.
3099	Swamp Oak	*Casuarina glauca*	Mature	9	2	400					400	450	Fair	Fair	Medium	3. Short	Z10	4.8	2.4	Area inaccessible. Tree data estimated from other side of tracks. Suppressed by vine cover.
3101	Fiddlewood	*Citharexylum spinosum*	Mature	15	5	600					600	600	Good	Fair	Medium	3. Short	Z3	7.2	2.7	Exempt species. Topped for power line clearance.
3103	Willow Myrtle	*Agonis flexuosa*	Semi-mature	6	4	600					600	600	Good	Fair	Medium	3. Short	Z10	7.2	2.7	Topped for power line clearance.
3104	Chinese Tallo	*Triadica sebifera*	Mature	8	2	250					250	280	Good	Fair	Medium	3. Short	Z10	3.0	1.9	Topped for power line clearance.
3105	River She Oak	*Casuarina cunninghamiana*	Mature	10	3	440					440	550	Good	Fair	High	3. Short	Z10	5.3	2.6	Topped for power line clearance.
3106	River She Oak	*Casuarina cunninghamiana*	Semi-mature	9	2	320					320	350	Good	Fair	Medium	3. Short	Z10	3.8	2.1	Topped for power line clearance.
3100	Forest Oak	*Allocasuarina torulosa*	Semi-mature	6	2	170					170	190	Good	Fair	Medium	3. Short	Z10	2.0	1.6	Topped for power line clearance.
3102	Black Peppermint	*Eucalyptus nicholii*	Mature	10	5	380					380	440	Good	Fair	Medium	3. Short	Z10	4.6	2.3	Growing under power lines. Poor overall form.
3107	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	7	4	390					390	460	Good	Good	Medium	1. Long	A1	4.7	2.4	Located within nature strip.
3108	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	300					300	300	Good	Good	Low	5. Small/Young	Z1	3.6	2.0	Located within nature strip. DBH measured at base.
3109	Silky Oak	*Grevillea robusta*	Semi-mature	6	2	350					350	350	Good	Fair	Low	3. Short	Z10	4.2	2.1	Located within corridor. Multi stem tree topped for power line clearance.
3110	Sydney Blue Gum	*Eucalyptus saligna*	Mature	9	10	1400					1400	1500	Good	Fair	Very High	2. Medium	A2	15.0	3.9	Topped for power line clearance. Adapted to growing conditions.
3111	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	6	1	90	100	50	40		149	220	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	Located within nature strip.
3112	Native Franjipani	*Hymenosporum flavum*	Young	7	1	90					90	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip. Previous failure of co-dominant stems at 1m.
3113	Illawara Flame	*Brachychiton acerifolius*	Semi-mature	8	2	140	180				228	250	Good	Fair	Medium	2. Medium	A1	2.7	1.8	Located within nature strip. Co-dominant stems.
3114	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	150	100				180	200	Good	Fair	Low	5. Small/Young	Z1	2.2	1.7	Located within nature strip.
3115	Silky Oak	*Grevillea robusta*	Mature	9	4	400					400	450	Good	Fair	Medium	3. Short	Z10	4.8	2.4	Located within nature strip. Topped for power lines.
3116	Wattle	*Acacia spp*	Semi-mature	5	2	120					120	150	Good	Fair	Low	3. Short	Z10	2.0	1.5	Located within nature strip. Significant trunk lean to street.

3122	Silky Oak	*Grevillea robusta*	Mature	10	5	500					500	580	Good	Fair	Medium	3. Short	Z10	6.0	2.6	Located within nature strip. Topped for power line clearance.
3123	Weeping Bottlebrush	*Callistemon viminalis*	Young	4	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
3124	River She Oak	*Casuarina cunninghamiana*	Young	4	1	140					140	160	Good	Fair	Low	3. Short	Z10	2.0	1.5	Located within corridor. Topped for power line clearance.
3125	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	5	2	400					400	420	Good	Fair	Low	5. Small/Young	Z1	4.8	2.3	Located within nature strip.
3126	Parramatta Wattle	*Acacia parramattensis*	Mature	6	2	200					200	220	Good	Fair	Medium	2. Medium	A1	2.4	1.8	Located within corridor.
3127	Swamp Oak	*Casuarina glauca*	Young	5	1	110					110	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.
3128	Swamp Oak	*Casuarina glauca*	Mature	6	4	400					400	450	Good	Fair	Medium	3. Short	Z10	4.8	2.4	Located within nature strip. Topped for power line clearance.
3129	Swamp Oak	*Casuarina glauca*	Semi-mature	6	2	280					280	300	Good	Fair	Medium	3. Short	Z10	3.4	2.0	Located within nature strip. Topped for power line clearance.
3130	Swamp Oak	*Casuarina glauca*	Semi-mature	6	2	250					250	280	Good	Fair	Medium	3. Short	Z10	3.0	1.9	Located within nature strip. Topped for power line clearance.
3131	River She Oak	*Casuarina cunninghamiana*	Mature	12	5	410					410	500	Good	Fair	High	2. Medium	A1	4.9	2.5	Located within nature strip. Asymmetric crown shape due to power line clearance.
3132	River She Oak	*Casuarina cunninghamiana*	Mature	12	4	400					400	450	Good	Fair	High	2. Medium	A1	4.8	2.4	Located within nature strip. Asymmetric crown shape due to power line clearance.
3133	River She Oak	*Casuarina cunninghamiana*	Semi-mature	7	3	240					240	320	Good	Fair	Medium	2. Medium	A1	2.9	2.1	Located within nature strip. Asymmetric crown shape due to power line clearance.
3134	River She Oak	*Casuarina cunninghamiana*	Mature	12	5	440					440	490	Good	Fair	Medium	2. Medium	A1	5.3	2.5	Located within nature strip. Asymmetric crown shape due to power line clearance.
3135	River She Oak	*Casuarina cunninghamiana*	Semi-mature	7	2	210					210	260	Good	Fair	Medium	2. Medium	A1	2.5	1.9	Located within nature strip. Asymmetric crown shape due to power line clearance.
3136	River She Oak	*Casuarina cunninghamiana*	Mature	12	5	480					480	580	Good	Fair	High	2. Medium	A1	5.8	2.6	Located within nature strip. Asymmetric crown shape due to power line clearance.
3137	River She Oak	*Casuarina cunninghamiana*	Semi-mature	10	4	300					300	350	Good	Fair	Medium	2. Medium	A1	3.6	2.1	Located within nature strip. Asymmetric crown shape due to power line clearance.
3138	River She Oak	*Casuarina cunninghamiana*	Semi-mature	10	3	290					290	350	Good	Fair	Medium	2. Medium	A1	3.5	2.1	Located within nature strip. Asymmetric crown shape due to power line clearance.
3139	River She Oak	*Casuarina cunninghamiana*	Mature	12	5	470					470	580	Good	Fair	High	2. Medium	A1	5.6	2.6	Located within nature strip. Asymmetric crown shape due to power line clearance.
3140	River She Oak	*Casuarina cunninghamiana*	Mature	10	4	420					420	520	Good	Fair	High	2. Medium	A1	5.0	2.5	Located within nature strip. Asymmetric crown shape due to power line clearance.
3141	River She Oak	*Casuarina cunninghamiana*	Mature	10	3	310					310	450	Good	Fair	High	2. Medium	A1	3.7	2.4	Located within nature strip. Asymmetric crown shape due to power line clearance.
3142	River She Oak	*Casuarina cunninghamiana*	Mature	11	5	470					470	560	Good	Fair	High	2. Medium	A1	5.6	2.6	Located within nature strip. Asymmetric crown shape due to power line clearance.
3144	Blue Jacaranda	*Jacaranda mimosifolia*	Semi-mature	9	4	210	210				297	390	Good	Fair	Medium	2. Medium	A1	3.6	2.2	Located within nature strip. Co-dominant stems with trunk lean to North.
3145	Unknown	*Unknown spp*	Mature	8	4	520					520	550	Good	Good	Medium	1. Long	A1	6.2	2.6	Located within nature strip.
3143	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	300					300	300	Good	Fair	Low	5. Small/Young	Z3	3.6	2.0	Located within corridor. Exempt species.
3146	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	2	200					200	220	Fair	Fair	Low	3. Short	Z4	2.4	1.8	Located within corridor. Early stages of decline.
3147	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	3	250	150				292	350	Good	Fair	Medium	2. Medium	A1	3.5	2.1	Located within corridor.
3148	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	450					450	450	Good	Fair	Low	2. Medium	Z3	5.4	2.4	Located within corridor. Exempt species.
3149	Corkscrew Willow	*Salix matsudana 'Tortuosa'*	Semi-mature	6	2	350					350	350	Good	Fair	Medium	2. Medium	A1	4.2	2.1	Located within adjoining property. DBH estimated.

Appendix 1 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes

3151	Red Flowering Gum	*Corymbia ficifolia*	Semi-mature	5	1	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within adjoining property. DBH estimated.
3152	Wallangarra White Gum	*Eucalyptus scoparia*	Mature	19	7	650					650	750	Good	Good	High	2. Medium	A1	7.8	2.9	Located within adjoining property. DBH estimated.
3153	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	250					250	300	Good	Fair	Low	2. Medium	Z3	3.0	2.0	Located within corridor. Exempt species.
3154	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	150					150	180	Good	Fair	Low	5. Small/Young	Z3	2.0	1.6	Located within corridor. Exempt species.
3155	Camphor Laurel	*Cinnamomum camphora*	Mature	6	4	450					450	450	Good	Fair	Low	3. Short	Z3	5.4	2.4	Located within corridor. Exempt species.
3156	Camphor Laurel	*Cinnamomum camphora*	Mature	7	5	550					550	600	Good	Fair	Low	3. Short	Z3	6.6	2.7	Located within corridor. Exempt species. Topped.
3157	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	300					300	350	Fair	Fair	Low	3. Short	Z3	3.6	2.1	Located within corridor. Exempt species. Topped for power line clearance.
3158	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	300					300	350	Fair	Fair	Low	3. Short	Z3	3.6	2.1	Located within corridor. Exempt species. Topped for power line clearance.
3159	Bangalow Palm	*Archontophoenix cunninghamiana*	Semi-mature	5	1	150					150	NA	Good	Good	Low	1. Long	Z3	2.0	NA	Located within adjoining property.
3160	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	200	200	150			320	350	Good	Fair	Low	2. Medium	Z3	3.8	2.1	Located within corridor. Exempt species. Topped for power line clearance.
3161	Camphor Laurel	*Cinnamomum camphora*	Mature	6	2	340					340	400	Fair	Fair	Low	3. Short	Z3	4.1	2.3	Located within corridor. Exempt species. Topped for power line clearance.
3162	Mango	*Mangifera indica*	Semi-mature	4	2	150					150	180	Good	Good	Low	5. Small/Young	Z3	2.0	1.6	Located within adjoining property. Exempt species.
3163	Camphor Laurel	*Cinnamomum camphora*	Mature	5	2	400					400	400	Good	Fair	Low	3. Short	Z3	4.8	2.3	Located within corridor. Exempt species. Topped for power line clearance.
3164	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	150	180				234	300	Good	Fair	Low	3. Short	Z3	2.8	2.0	Located within corridor. Exempt species. Topped for power line clearance.
3165	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	210					210	250	Good	Fair	Low	3. Short	Z3	2.5	1.8	Located within corridor. Exempt species. Topped for power line clearance.
3166	Wattle	*Acacia spp*	Semi-mature	5	2	200					200	200	Good	Good	Medium	2. Medium	A1	2.4	1.7	Located within adjoining property. DBH estimated.
3167	Camphor Laurel	*Cinnamomum camphora*	Mature	4	2	450					450	450	Good	Fair	Low	3. Short	Z3	5.4	2.4	Located within corridor. Exempt species. Topped for power line clearance.
3168	Spotted Gum	*Corymbia maculata*	Mature	20	7	700					700	800	Good	Fair	High	2. Medium	A1	8.4	3.0	Located within adjoining property. Asymmetric crown shape due to power line clearance.
3169	Guava	*Psidium guajava*	Semi-mature	5	2	200					200	220	Good	Good	Low	5. Small/Young	Z1	2.4	1.8	Located within adjoining property.
3170	Chinese Hackberry	*Celtis sinensis*	Young	5	1	100	100				141	200	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.7	Located within corridor. Exempt species.
3171	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	140	140				198	320	Good	Fair	Low	2. Medium	Z3	2.4	2.1	Located within nature strip. Exempt species.
3172	Queensland Brushbox	*Lophostemon confertus*	Young	5	1	120	100				156	250	Good	Fair	Low	5. Small/Young	Z1	2.0	1.8	Located within corridor.
3173	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	4	2	300					300	300	Good	Fair	Low	5. Small/Young	Z3	3.6	2.0	Located within corridor. Exempt species.
3174	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	2	260					260	350	Fair	Fair	Low	3. Short	Z10	3.1	2.1	Located within corridor. Directly adjacent to fence.
3175	Ash 'Raywood'	*Fraxinus raywood*	Semi-mature	6	2	140					140	200	Good	Fair	Medium	2. Medium	A1	2.0	1.7	Located within nature strip.
3176	Crimson Bottlebrush	*Callistemon citrinus*	Semi-mature	4	1	120					120	140	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
3177	Broad Leaved Privet	*Ligustrum lucidum*	Semi-mature	6	2	250					250	250	Good	Fair	Very Low	5. Small/Young	Z3	3.0	1.8	Located within corridor. Exempt species.
3178	Sydney Green Wattle	*Acacia decurrens*	Mature	8	2	190					190	210	Fair	Fair	Medium	3. Short	Z4	2.3	1.7	Located within nature strip. Low foliage density for species. In decline.
3179	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	7	2	300					300	300	Good	Fair	Low	2. Medium	Z3	3.6	2.0	Located within corridor. Exempt species.
3180	Forest Red Gum	*Eucalyptus tereticornis*	Mature	12	5	450					450	550	Fair	Fair	High	2. Medium	A2	5.4	2.6	Located within corridor. Asymmetric crown shape due to power line clearance. Low foliage density for species.
3181	Ash 'Raywood'	*Fraxinus raywood*	Young	4	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within nature strip.
3182	Swamp Oak	*Casuarina glauca*	Semi-mature	5	2	200					200	250	Fair	Fair	Medium	3. Short	Z10	2.4	1.8	Area inaccessible. Tree data estimated from opposite side of tracks. Topped.
3183	Leyland Cypress	*X Cupressocyparis leylandii*	Mature	9	2	500					500	550	Good	Fair	Low	2. Medium	Z3	6.0	2.6	Area inaccessible. Tree data estimated from opposite side of tracks. Exempt species.

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
3204	Swamp Oak	*Casuarina glauca*	Semi-mature	6	1	200					200	220	Fair	Fair	Low	3. Short	Z10	2.4	1.8	Area inaccessible. Tree data estimated from opposite side of tracks. Topped for power line clearance.
3205	Swamp Oak	*Casuarina glauca*	Semi-mature	6	1	200					200	250	Good	Fair	Low	3. Short	Z10	2.4	1.8	Area inaccessible. Tree data estimated from opposite side of tracks. Topped for power line clearance.
3209	Leyland Cypress	*X Cupressocyparis leylandii*	Mature	9	4	500					500	550	Good	Fair	Low	2. Medium	Z3	6.0	2.6	Located in adjoining property. DBH estimated. Exempt species.
3210	Chinese Hackberry	*Celtis sinensis*	Semi-mature	5	1	100	100				141	200	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.7	Located in adjoining property. DBH estimated. Exempt species.
3211	Wattle	*Acacia spp*	Mature	5	2	180	200	100			287	350	Fair	Fair	Low	3. Short	Z10	3.4	2.1	Located within corridor. Poor overall form.
3212	Weeping Bottlebrush	*Callistemon viminalis*	Mature	5	2	300					300	300	Good	Good	Medium	2. Medium	A1	3.6	2.0	Located within corridor. Multi stem tree.
3213	Wattle	*Acacia spp*	Semi-mature	5	1	150					150	190	Good	Fair	Medium	2. Medium	A1	2.0	1.6	Located within corridor.
3214	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	7	2	150	210				258	300	Good	Good	Medium	1. Long	A1	3.1	2.0	Located within corridor.
3215	Wattle	*Acacia spp*	Mature	6	2	250					250	250	Fair	Fair	Medium	3. Short	Z10	3.0	1.8	Located within corridor. Poor overall form. Vine cover throughout crown.
3216	Chinese Tallo	*Triadica sebifera*	Semi-mature	5	2	180					180	220	Good	Fair	Low	3. Short	Z10	2.2	1.8	Located within corridor. Topped for power line clearance.
3217	Chinese Hackberry	*Celtis sinensis*	Mature	8	3	280					280	350	Good	Good	Low	2. Medium	Z3	3.4	2.1	Located within adjoining property. Exempt species.
3218	Black She Oak	*Allocasuarina littoralis*	Semi-mature	8	2	200					200	220	Good	Fair	Medium	2. Medium	A1	2.4	1.8	Located within corridor. DBH estimated.
3219	Black She Oak	*Allocasuarina littoralis*	Semi-mature	8	2	200					200	220	Good	Fair	Medium	2. Medium	A1	2.4	1.8	Located within corridor. DBH estimated.
3220	Black She Oak	*Allocasuarina littoralis*	Mature	8	3	300					300	350	Good	Fair	Medium	2. Medium	A1	3.6	2.1	Located within corridor. DBH estimated.
3221	Swamp Oak	*Casuarina glauca*	Mature	14	4	400					400	450	Good	Good	High	1. Long	A1	4.8	2.4	Located within corridor. DBH estimated.
3222	Grey Ironbark	*Eucalyptus paniculata*	Mature	10	3	300					300	350	Good	Good	High	1. Long	A1	3.6	2.1	Located within corridor. DBH estimated.
3223	Smooth Barked Apple	*Angophora costata*	Mature	21	5	450	300				541	600	Good	Good	Very High	1. Long	A1	6.5	2.7	Located within corridor. DBH estimated.
3224	Swamp Oak	*Casuarina glauca*	Mature	10	3	300					300	350	Good	Fair	High	2. Medium	A1	3.6	2.1	Located within corridor. Asymmetric crown shape due to adjacent trees.
3225	Swamp Oak	*Casuarina glauca*	Mature	17	3	330					330	370	Good	Good	High	1. Long	A1	4.0	2.2	Located within corridor.
3226	Swamp Oak	*Casuarina glauca*	Semi-mature	17	3	280					280	330	Good	Good	Medium	1. Long	A1	3.4	2.1	Located within corridor.
3227	Swamp Oak	*Casuarina glauca*	Semi-mature	18	2	280					280	330	Good	Good	Medium	1. Long	A1	3.4	2.1	Located within corridor.
3228	Swamp Oak	*Casuarina glauca*	Semi-mature	10	1	130					130	160	Good	Good	Medium	1. Long	A1	2.0	1.5	Located within corridor.
3229	Smooth Barked Apple	*Angophora costata*	Semi-mature	10	3	220					220	250	Good	Good	Medium	1. Long	A1	2.6	1.8	Located within corridor.
3230	Smooth Barked Apple	*Angophora costata*	Mature	20	5	400					400	480	Good	Good	High	1. Long	A1	4.8	2.4	Located within corridor.
3231	Swamp Oak	*Casuarina glauca*	Mature	11	3	300					300	350	Good	Good	High	1. Long	A1	3.6	2.1	Located within corridor.
3232	Swamp Oak	*Casuarina glauca*	Mature	20	5	500					500	650	Good	Good	High	1. Long	A1	6.0	2.8	Located within corridor adjacent to tracks.
G26	Mixed Species	*Mixed spp*	Mature	15	3	300					300	350	Good	Good	High	1. Long	A1	3.6	2.1	Area inaccessible between Myrtle Street and Carrington Road. Tree data estimated from Myrtle Street. Group of approximately 20 trees, including Acacia spp, Eucalyptus spp, Ligustrum spp, Cinnamomum camphora.

Explanatory Notes

Tree Species - Common name followed by botanical name. Where species is unknown it is indicated with an '*spp*'.
Age Class - Dead (D), Mature (M), Semi mature (SM), Young (Y).
Diameter at Breast Height (DBH) - Measured with a DBH tape or estimated at approximately 1.4m above ground level.
Diameter Above root Buttresses (DAB): Measured with a DBH tape or estimated above root buttresses (DAB) for calculating the SRZ.
Height - Height from ground level to top of crown. All heights are estimated unless otherwise indicated.
Spread - Radius of crown at widest section. All tree spreads are estimated unless otherwise indicated.
Tree Protection Zone (TPZ) - DBH x 12. Measured in radius from the centre of the trunk. Rounded to nearest 0.1m. For monocots, the TPZ is set at 1 metre outside the crown projection.
Structural Root Zone (SRZ) - $(DAB \times 50)^{0.42} \times 0.64$. Measured in radius from the centre of the trunk. Rounded up to nearest 0.1m.
Health - Good/Fair/Poor/Dead
Structure - Good/Fair/Poor
Safe Useful Life Expectancy (SULE) - 1. Long (40+years), 2. Medium (15 - 40 years), 3. Short (5 - 15 years), 4. Remove (under 5 years), 5. Small/young.
Amenity Value - Very High/High/Medium/Low/Very Low.

Appendix 2 - Further Information of Methodology

1. **Tree Protection Zone:** The tree protection zone (TPZ) is the principle means of protecting trees on development sites. The TPZ is a combination of the root area and crown area requiring protection. It is an area isolated from construction disturbance, so that the tree remains viable. The radius of the TPZ is calculated for each tree by multiplying its DBH x 12. The derived value is measured in radius from the centre of the stem/trunk at ground level. A TPZ should not be less than 2.0 metres nor greater than 15 metres (except where crown protection is required).
   It is commonly observed that tree roots will extend significant further than the indicative TPZ, however the TPZ is an area identified AS4970-2009 to be extent where root loss or disturbance will generally not impact the viability of the tree. The TPZ is identified as a restricted area to prevent damage to trees either above or below ground during a development. Where trees are intended to be retained proposed developments must provide an adequate TPZ around trees. The TPZ is set aside for the tree's root zone, trunk and crown and it is essential for the stability and longevity of the tree. The tree protection also incorporates the SRZ (see below for more information about the SRZ). I have calculated the TPZ of palms, other monocots, cycads and tree ferns at one metre outside the crown projection. See appendices for additional information about the TPZ including information about calculating the TPZ and examples of TPZ encroachment.
   Minor encroachment into TPZ: Sometimes encroachment into the TPZ is unavoidable. Encroachment includes but is not limited to activities such as excavation, compacted fill and machine trenching. Minor encroachment of up to 10% of the overall TPZ area is normally considered acceptable, providing there is space adjacent to the TPZ for the tree to compensate and the tree is displaying adequate vigour/health to tolerate changes to its growing environment.
   Major encroachment into TPZ: Where encroachment of more than 10% of the overall TPZ area is proposed the project Arborist must investigate and demonstrate that the tree will remain in a viable condition. In some cases, tree sensitive construction methods such as pier and beam footings, suspended slabs, or cantilevered sections, can be utilised to allow additional encroachment into the TPZ by bridging over roots and minimising root disturbance. Major encroachment is only possible if it can be undertaken without severing significant size roots, or if it can be demonstrated that significant roots will not be impacted.

2. **Structural Root Zone:** This is the area around the base of a tree required for the trees stability in the ground. An area larger than the SRZ always need to be maintained to preserve a viable tree as it will only have a minor effect on the trees vigour and health. There are several factors that determine the SRZ which include height, crown area, soil type and soil moisture. It can also be influenced by other factors such as natural or built structures. Generally work within the SRZ should be avoided.
   An indicative SRZ radius can be determined from the diameter of the trunk measured immediately above the root buttresses. Root investigation could provide more information about the extent of the SRZ. The following formula should be used to calculate the SRZ.
   SRZ radius = $(D \times 50)^{0.42} \times 0.64$ (D = Diameter above root buttress).

3. **Tree Age Class:** If can be difficult to determine the age of a tree without carrying out invasive tests that may damage the tree, so we have categorised there likely age class which is defined below;
   - Young/Newly planted: Young or recently planted tree.
   - Semi Mature: Up to 20% of the usual life expectancy for the species.
   - Early mature/Mature: Between 20%-80% of the usual life expectancy for the species.
   - Over mature: Over 80% of the usual life expectancy for the species.
   - Dead: Tree is dead or almost dead.

4. **Health/Physiological Condition:** Below are examples conditions used when assigning a category for tree health.

Category	Example condition	Summary
Good	• Crown has good foliage density for species. • Tree shows no or minimal signs of pathogens that are unlikely to have an effect on the health of the tree. • Tree is displaying good vigour and reactive growth development.	• The tree is in above average health and condition and no remedial works are required.
Fair	• The tree may be starting to dieback or have over 25% deadwood. • Tree may have slightly reduced crown density or thinning. • There may be some discolouration of foliage. • Average reactive growth development. • There may be early signs of pathogens which may further deteriorate the health of the tree. • There may be epicormic growth indicating increased levels of stress within the tree.	• The tree is in below average health and condition and may require remedial works to improve the trees health.
Poor	• The may be in decline, have extensive dieback or have over 30% deadwood. • The canopy may be sparse or the leaves may be unusually small for species. • Pathogens or pests are having a significant detrimental effect on the tree health.	• The tree is displaying low levels of health and removal or remedial works may be required.
Dead	• The tree is dead or almost dead.	• The tree should generally be removed.

5. **Structural Condition:** Below are examples conditions used when assigning a category for structural condition.

Category	Example condition	Summary
Good	• Branch unions appear to be strong with no sign of defects. • There are no significant cavities. • The tree is unlikely to fail in usual conditions. • The tree has a balanced crown shape and form.	• The tree is considered structurally good with well developed form.
Fair	• The tree may have minor structural defects within the structure of the crown that could potentially develop into more significant defects. • The tree may a cavity that is currently unlikely to fail but may deteriorate in the future. • The tree is an unbalanced shape or leans significantly. • The tree may have minor damage to its roots. • The root plate may have moved in the past but the tree has now compensated for this. • Branches may be rubbing or crossing.	• The identified defects are unlikely cause major failure. • Some branch failure may occur in usual conditions. • Remedial works can be undertaken to alleviate potential defects.
Poor	• The tree has significant structural defects. • Branch unions may be poor or weak. • The tree may have a cavity or cavities with excessive levels of decay that could cause catastrophic failure. • The tree may have root damage or is displaying signs of recent movement. • The tree crown may have poor weight distribution which could cause failure.	• The identified defects are likely to cause either partial or whole failure of the tree.

6. **Amenity Value:** To determine the amenity value of a tree we assess a number of different factors, which include but are not limited to the information below.
   - The visibility of the tree to adjacent sites.
   - The relationship between the tree and the site.
   - Whether the tree is protected by any statuary conditions.
   - The habitat value of the tree.
   - Whether the tree is considered a noxious weed species.

   The amenity value is rated using one of the following values.
   - Very High
   - High
   - Moderate
   - Low
   - Very Low

7. **Safe Useful Life Expectancy (SULE), (Barrel, 2001):** A trees safe useful life expectancy is determined by assessing a number of different factors including the health and vitality, estimated age in relation to expected life expectancy for the species, structural defects, and remedial works that could allow retention in the existing situation.

Category	Description
1. Long - Over 40 years	(a) Structurally sound trees located in positions that can accommodate future growth. (b) Trees that could be made suitable for retention in the long term by remedial tree care. (c) Trees of special significance for historical, commemorative or rarity reasons that would warrant extraordinary efforts to secure their long term retention.
2. Medium - 15 to 40 years	(a) Trees that may only live between 15 and 40 more years. (b) Trees that could live for more than 40 years but may be removed for safety or nuisance reasons. (c) Trees that could live for more than 40 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (d) Trees that could be made suitable for retention in the medium term by remedial tree care.
3. Short - 5 to 15 years	(a) Trees that may only live between 5 and 15 more years. (b) Trees that could live for more than 15 years but may be removed for safety or nuisance reasons. (c) Trees that could live for more than 15 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (d) Trees that require substantial remedial tree care and are only suitable for retention in the short term.
4. Remove - Under 5 years	(a) Dead, dying, suppressed or declining trees because of disease or inhospitable conditions. (b) Dangerous trees because of instability or recent loss of adjacent trees. (c) Dangerous trees because of structural defects including cavities, decay, included bark, wounds or poor form. (d) Damaged trees that are clearly not safe to retain. (e) Trees that could live for more than 5 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (f) Trees that are damaging or may cause damage to existing structures within 5 years. (g) Trees that will become dangerous after removal of other trees for the reasons given in (a) to (f). (h) Trees in categories (a) to (g) that have a high wildlife habitat value and, with appropriate treatment, could be retained subject to regular review.
5. Small/Young	(a) Small trees less than 5m in height. (b) Young trees less than 15 years old but over 5m in height. (c) Formal hedges and trees intended for regular pruning to artificially control growth.

8. **Root investigations:** The root investigations should identify roots greater than 30mm in diameter that are located along the edge of the structures footprint or in the location of footings. Root investigations must be carried out using non-invasive methods, such as manual excavations or ground penetrating radar (GPR). Any excavations for the root investigations must carried out manually to avoid damaging the roots during excavations. Manual excavation may include the use of a high-pressure air/air knife, or a combination of high-pressure water and a vacuum device. When hand excavating carefully work around roots retaining as many as possible. Take care to not fray, wound, or cause damage to any roots during excavations as this may cause decay or infection from pathogens. It is essential that exposed roots are kept moist and the excavation back filled as soon as possible. The root investigations should be carried out by a qualified Arborist minimum AQF3. Once roots are exposed, a visual assessment can be carried out by a consulting Arborist to evaluate the potential impact of the proposed root loss on the health and stability of the tree. A root map/report should be prepared identifying the findings of investigations, including photographs as supporting evidence in the report.

9. **Retention Value:** The system I have used to award the retention value is Tree AZ. Tree AZ is used to identify higher value trees worthy of being a constraint to development and lower value trees that should generally not be a constraint to the development. The table below provides a brief description of each category.

TreeAZ Categories (Version 10.04-ANZ)

CAUTION: TreeAZ assessments must be carried out by a competent person qualified and experienced in arboriculture. The following category descriptions are designed to be a brief field reference and are not intended to be self-explanatory. They must be read in conjunction with the most current explanations published at www.TreeAZ.com.

Category Z: Unimportant trees not worthy of being a material constraint

Local policy exemptions: Trees that are unsuitable for legal protection for local policy reasons including size, proximity and species	
Z1	Young or insignificant small trees, i.e. below the local size threshold for legal protection, etc
Z2	Too close to a building, i.e. exempt from legal protection because of proximity, etc
Z3	Species that cannot be protected for other reasons, i.e. scheduled noxious weeds, out of character in a setting of acknowledged importance, etc
High risk of death or failure: Trees that are likely to be removed within 10 years because of acute health issues or severe structural failure	
Z4	Dead, dying, diseased or declining
Z5	Severe damage and/or structural defects where a high risk of failure cannot be satisfactorily reduced by reasonable remedial care, i.e. cavities, decay, included bark, wounds, excessive imbalance, overgrown and vulnerable to adverse weather conditions, etc
Z6	Instability, i.e. poor anchorage, increased exposure, etc
Excessive nuisance: Trees that are likely to be removed within 10 years because of unacceptable impact on people	
Z7	Excessive, severe and intolerable inconvenience to the extent that a locally recognized court or tribunal would be likely to authorize removal, i.e. dominance, debris, interference, etc
Z8	Excessive, severe and intolerable damage to property to the extent that a locally recognized court or tribunal would be likely to authorize removal, i.e. severe structural damage to surfacing and buildings, etc
Good management: Trees that are likely to be removed within 10 years through responsible management of the tree population	
Z9	Severe damage and/or structural defects where a high risk of failure can be temporarily reduced by reasonable remedial care, i.e. cavities, decay, included bark, wounds, excessive imbalance, vulnerable to adverse weather conditions, etc
Z10	Poor condition or location with a low potential for recovery or improvement, i.e. dominated by adjacent trees or buildings, poor architectural framework, etc
Z11	Removal would benefit better adjacent trees, i.e. relieve physical interference, suppression, etc
Z12	Unacceptably expensive to retain, i.e. severe defects requiring excessive levels of maintenance, etc

NOTE: Z trees with a high risk of death/failure (Z4, Z5 & Z6) or causing severe inconvenience (Z7 & Z8) at the time of assessment and need an urgent risk assessment can be designated as ZZ. ZZ trees are likely to be unsuitable for retention and at the bottom of the categorization hierarchy. In contrast, although Z trees are not worthy of influencing new designs, urgent removal is not essential and they could be retained in the short term, if appropriate.

Category A: Important trees suitable for retention for more than 10 years and worthy of being a material constraint

A1	No significant defects and could be retained with minimal remedial care
A2	Minor defects that could be addressed by remedial care and/or work to adjacent trees
A3	Special significance for historical, cultural, commemorative or rarity reasons that would warrant extraordinary efforts to retain for more than 10 years
A4	Trees that may be worthy of legal protection for ecological reasons (Advisory requiring specialist assessment)

NOTE: Category A1 trees that are already large and exceptional, or have the potential to become so with minimal maintenance, can be designated as AA at the discretion of the assessor. Although all A and AA trees are sufficiently important to be material constraints, AA trees are at the top of the categorization hierarchy and should be given the most weight in any selection process.

TreeAZ is designed by Barrell Tree Consultancy (www.barrelltreecare.co.uk) and is reproduced with their permission

Glossary of Terms

Abiotic - Pertaining to non-living agents; e.g. environmental factors

Adventitious shoots - Shoots that develop other than from apical, axillary or dormant buds; see also 'epicormic'

Anchorage - The system whereby a tree is fixed within the soil, involving cohesion between roots and soil and the development of a branched system of roots which withstands wind and gravitational forces transmitted from the aerial parts of the tree

Bark - A term usually applied to all the tissues of a woody plant lying outside the vascular cambium, thus including the phloem, cortex and periderm; occasionally applied only to the periderm or the phellem

Branch:
- **Primary**. A first order branch arising from a stem
- **Lateral**. A second order branch, subordinate to a primary branch or stem and bearing sub-lateral branches
- **Sub-lateral**. A third order branch, subordinate to a lateral or primary branch, or stem and usually bearing only twigs

Branch collar - A visible swelling formed at the base of a branch whose diameter growth has been disproportionately slow compared to that of the parent stem; a term sometimes applied also to the pattern of growth of the cells of the parent stem around the branch base

Brown-rot - A type of wood decay in which cellulose is degraded, while lignin is only modified

Buckling - An irreversible deformation of a structure subjected to a bending load

Buttress zone - The region at the base of a tree where the major lateral roots join the stem, with buttress-like formations on the upper side of the junctions

Cambium - Layer of dividing cells producing xylem (woody) tissue internally and phloem (bark) tissue externally

Canker - A persistent lesion formed by the death of bark and cambium due to colonisation by fungi or bacteria

Compartmentalisation - The confinement of disease, decay or other dysfunction within an anatomically discrete region of plant tissue, due to passive and/or active defences operating at the boundaries of the affected region

Compressive loading - Mechanical loading which exerts a positive pressure; the opposite to tensile loading

Condition - An indication of the physiological condition of the tree. Where the term ‘condition’ is used in a report, it should not be taken as an indication of the stability of the tree

Crown/Canopy - The main foliage bearing section of the tree

Crown lifting - The removal of limbs and small branches to a specified height above ground level

Crown thinning - The removal of a proportion of secondary branch growth throughout the crown to produce an even density of foliage around a well-balanced branch structure

Crown reduction/shaping - A specified reduction in crown size whilst preserving, as far as possible, the natural tree shape

DAB (Diameter Above Buttress) - Trunk diameter measured above the root buttress

Defect - In relation to tree hazards, any feature of a tree which detracts from the uniform distribution of mechanical stress, or which makes the tree mechanically unsuited to its environment

Dieback - The death of parts of a woody plant, starting at shoot-tips or root-tips

Disease - A malfunction in or destruction of tissues within a living organism, usually excluding mechanical damage; in trees, usually caused by pathogenic micro-organisms

Dominance - In trees, the tendency for a leading shoot to grow faster or more vigorously than the lateral shoots; also the tendency of a tree to maintain a taller crown than its neighbours

Dormant bud - An axial bud which does not develop into a shoot until after the formation of two or more annual wood increments; many such buds persist through the life of a tree and develop only if stimulated to do so

Dysfunction - In woody tissues, the loss of physiological function, especially water conduction, in sapwood

DBH (Diameter at Breast Height) - Stem diameter measured at a height of 1.4 metres or the nearest measurable point. Where measurement at a height of 1.4 metres is not possible, another height may be specified

Deadwood - Branch or stem wood bearing no live tissues. Retention of deadwood provides valuable habitat for a wide range of species and seldom represents a threat to the health of the tree. Removal of deadwood can result in the ingress of decay to otherwise sound tissues and climbing operations to access deadwood can cause significant damage to a tree. Removal of deadwood is generally recommended only where it represents an unacceptable level of hazard

Epicormic shoot - A shoot having developed from a dormant or adventitious bud and not having developed from a first year shoot

Flush-cut - A pruning cut which removes part of the branch bark ridge and or branch-collar

Girdling root - A root which circles and constricts the stem or roots possibly causing death of phloem and/or cambial tissue

Habit - The overall growth characteristics, shape of the tree and branch structure

Hazard beam - An upwardly curved part of a tree in which strong internal stresses may occur without being reduced by adaptive growth; prone to longitudinal splitting

Incorporating extracts from Lonsdale, D. 1999. Principles of Tree Hazard Assessment. Her Majesty's Stationary Office, London

Heartwood/false-heartwood - The dead central wood that has become dysfunctional as part of the aging processes and being distinct from the sapwood

Heave - A term mainly applicable to a shrinkable clay soil which expands due to re-wetting after the felling of a tree which was previously extracting moisture from the deeper layers; also the lifting of pavements and other structures by root diameter expansion; also the lifting of one side of a wind-rocked root-plate

Included bark (ingrown bark) - Bark of adjacent parts of a tree (usually forks, acutely joined branches or basal flutes) which is in face-to-face contact

Lever arm - A mechanical term denoting the length of the lever represented by a structure that is free to move at one end, such as a tree or an individual branch

Lignin - The hard, cement-like constituent of wood cells; deposition of lignin within the matrix of cellulose microfibrils in the cell wall is termed Lignification

Lions tailing - A term applied to a branch of a tree that has few if any side-branches except at its end, and is thus liable to snap due to end- loading

Loading - A mechanical term describing the force acting on a structure from a particular source; e.g. the weight of the structure itself or wind pressure

Mycelium - The body of a fungus, consisting of branched filaments (hyphae)

Occlusion - The process whereby a wound is progressively closed by the formation of new wood and bark around it

Pathogen - A micro-organism which causes disease in another organism

Photosynthesis - The process whereby plants use light energy to split hydrogen from water molecules, and combine it with carbon dioxide to form the molecular building blocks for synthesizing carbohydrates and other biochemical products

Probability - A statistical measure of the likelihood that a particular event might occur

Pruning - The removal or cutting back of twigs or branches, sometimes applied to twigs or small branches only, but often used to describe most activities involving the cutting of trees or shrubs

Radial - In the plane or direction of the radius of a circular object such as a tree stem

Reactive Growth/Reaction Wood - Production of woody tissue in response to altered mechanical loading; often in response to internal defect or decay and associated strength loss (cf. adaptive growth)

Ring-barking - The removal of a ring of bark and phloem around the circumference of a stem or branch, normally resulting in an inability to transport photosynthetic assimilates below the area of damage. Almost inevitably results in the eventual death of the affected stem or branch above the damage

Root-collar - The transitional area between the stem/s and roots

Sapwood - Living xylem tissues

Soft-rot - A kind of wood decay in which a fungus degrades cellulose within the cell walls, without any general degradation of the wall as a whole

Stem/s - Principle above-ground structural component(s) of a tree that supports its branches

Stress - In plant physiology, a condition under which one or more physiological functions are not operating within their optimum range, for example due to lack of water, inadequate nutrition or extremes of temperature

SRZ (Structural Root Zone) - The area around the bas of the tree required for the trees stability in the ground.

Subsidence - In relation to soil or structures resting in or on soil, a sinking due to shrinkage when certain types of clay soil dry out, sometimes due to extraction of moisture by tree roots

Taper - In stems and branches, the degree of change in girth along a given length

Targets - In tree risk assessment (with slight misuse of normal meaning) persons or property or other things of value which might be harmed by mechanical failure of the tree or by objects falling from it

Topping - In arboriculture, the removal of the crown of a tree, or of a major proportion of it

Transpiration - The evaporation of moisture from the surface of a plant, especially via the stomata of leaves; it exerts a suction which draws water up from the roots and through the intervening xylem cells

TPZ (Tree Protection Zone) - A specified area above and below ground and at a given distance from the trunk set aside for the protection of a tree's roots and crown to provide for the viability and stability of a tree to be retained where it is potentially subject to damage by development.

Understory - This layer consists of younger individuals of the dominant trees, together with smaller trees and shrubs which are adapted to grow under lower light conditions

Veteran tree - Tree that, by recognised criteria, shows features of biological, cultural or aesthetic value that are characteristic of, but not exclusive to, individuals surviving beyond the typical age range for the species concerned. These characteristics might typically include a large girth, signs of crown retrenchment and hollowing of the stem

Vigour - The expression of carbohydrate expenditure to growth (in trees)

White-rot - A range of kinds of wood decay in which lignin, usually together with cellulose and other wood constituents, is degraded

Wind exposure - The degree to which a tree or other object is exposed to wind, both in terms of duration and velocity

Wind pressure - The force exerted by a wind on a particular object

Windthrow - The blowing over of a tree at its roots

Incorporating extracts from Lonsdale, D. 1999. Principles of Tree Hazard Assessment. Her Majesty's Stationary Office, London

APPENDIX 3 BRIEF DESCRIPTION OF A TREES ROOT SYSTEM

1.1 It is generally accepted that the root system of a tree has four main functions;

A) Support and anchor the tree in the soil.

B) Absorb and conduct water.

C) Absorb and conduct nutrients required for tree growth.

D) Provide storage for starch.

1.2 AS4970-2009 describes that 'the main functions of roots include the uptake of water and nutrients, anchorage, storage of sugar reserves and the production of some plant hormones required by the shoots. In order for roots to function, they must be supplied with oxygen from the soil. The root system of trees consists of several 'types' of roots found in different parts of the soil and is generally much more extensive than commonly thought'.[1]

1.3 AS4970-2009 says that the root system of a tree consists of three main types of roots and these include the following;

A) Structural woody roots - Required for anchorage, storage and transport.

B) Lower order roots - Required for anchorage, storage and transport.

C) Non-woody or fibrous roots - Required for absorption of water and nutrients, extension, synthesis of amino acids and growth regulators.

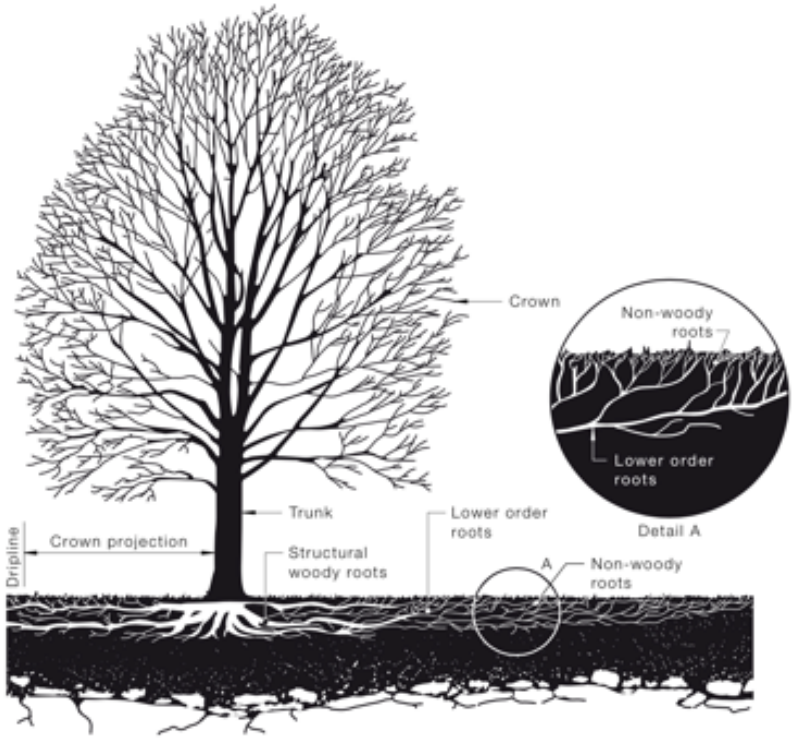

Image from AS4970-2009 showing the structure of a trees root system in normal (unobstructed) growing conditions.

[1] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009) page 24.

1.4 A trees root system is generally located far shallower in the soil than is normally considered, and should be thought of as a 'root plate'. The majority of a trees root growth is usually found in the 500mm of the soil closest to the surface, but a percentage of the roots will extend to deeper in the soil. AS4970-2009 says that 'root growth is opportunistic and takes place wherever the soil environment is favourable. The most limiting factor for root growth is air. A number of studies have indicated that roots are much more extensive than commonly thought. In general roots extend outward from the trunk and occupy irregularly shaped areas 4 to 7 times larger than the projected crown area with an average diameter of two or more times the height of the tree'.[2]

1.5 The shape of the root system will vary greatly depending on a number of different factors which control the direction and extent of root growth and as these factors are not uniformly distributed in the soil, the shape of the trees root system will be very irregular. For example, Biddle (1998) says that 'a deep well drained soil will encourage a deep root system, where as a shallow soil over rock or waterlogged subsoil can produce a root system which is virtually restricted to the surface 200mm or less'.[3]

1. INTRODUCTION

1.1 Urban Arbor have been instructed by John Holland Laing O'Rourke to provide an Arboricultural Report for trees located at the site and adjoining sites in relation to the proposed Sydney Trains Service Relocation works. This report is an addendum to the SMEW Tree Report by Urban Arbor, dated 17 September 2020. The report is to address trees to be removed or pruned within specific areas at the site and to specify tree protection requirements for trees to be retained.

1.2 Documents and information provided to assist in preparing the report;

A) Infrastructure Approval, NSW Government Planning & Environment, 12 December 2018, Condition of Approval – SSI 8256.
B) Compilation of Revised Mitigation Measures, Transport for NSW, LV12 – Impact to trees, no date shown.
C) 03 MWA – Veg Prune and Clear Table, John Holland Laing O'Rourke, Page 1 – 33, 23 February 2021.
D) 00 Lak & Cant – Veg Prune and Clear Table, John Holland Laing O'Rourke, Page 1 – 8, 14 December 2020.
E) SMC – Tree Prune and Clearing Mark-up, John Holland Laing O'Rourke, Page 1 – 10, 23 November 2020.
F) SMC – Tree Prune and Clearing Mark-up, John Holland Laing O'Rourke, Page 1 – 15, November 2021.
G) Appendix D12_SWTC1.6 Early Works Mark-up, John Holland Laing O'Rourke, Page 1 – 13, No date shown.
H) SMEW Tree Report, Urban Arbor Pty Ltd, Ref: 200917-SWM-AIA, Rev: H, 17 September 2020.
I) Bowls Club Lease Gazette, Government Gazette of the state of New South Wales, Number 290 – Compulsory Acquisitions, 23 December 2020.

1.3 The site and tree inspections were completed on 6 November 2020, 9 December 2020, 12 February 2021, 17 February 2021, 10 June 2021, 16 July 2021, 19 November 2021 and 17 December 2021. Some trees included within this report were previously inspected between the dates of 6 January 2020 to 3 April 2020 during the Southwest Metro Rail Corridor (Marrickville to Bankstown) works. Access was available to the subject site and adjoining public areas only.

2. SCOPE OF THE REPORT

2.1 This report has been undertaken to meet the following objectives.

2.1.1 Conduct a visual assessment of all significant trees located within the area identified for assessment by John Holland Laing O'Rourke. For the purpose of this report, a significant tree is a 'Long lived woody perennial plant greater than (or usually greater than) 3 metres in height with one or relatively few main stems or trunks'.

2.1.2 Determine the trees estimated contribution years and remaining useful life expectancy and award the trees a retention value.

2.1.3 Determine trees that are to be removed or retained within each area.

2.1.4 Specify tree protection measures for trees to be retained in accordance with AS4970-2009.

2.1.5 Provide pruning specifications for trees where required, in accordance with AS4373-2007.

URBAN ARBOR
The Trusted Name in Tree Management

3. LIMITATIONS

3.1 The observations and recommendations are based on the site inspections identified in section 1 only. The findings of this report are based on the observations and site conditions at the time of inspection.

3.2 All of the observations were carried out from ground level. The accuracy of the assessment of the subject trees structural condition and health is limited to the visibility of the tree at the time of inspection.

3.3 The tree inspection was visual from ground level only. No soil or tissue testing was carried out as part of the tree inspection. None of the surrounding surfaces adjacent to trees were lifted or removed during the tree inspections.

3.4 Root decay can sometimes be present with no visual indication above ground. It is also impossible to know the extent of any root damage caused by mechanical damage such as underground root cutting during the installation of services without undertaking detailed root investigation. Any form of tree failure due to these activities is beyond the scope of this assessment.

3.5 The report reflects the subject tree(s) as found on the day of inspection. Any changes to the growing environment of the subject tree, or tree management works beyond those recommended in this report may alter the findings of the report. There is no warranty, expressed or implied, that problems or deficiencies relating to the subject tree, or subject site may not arise in the future.

3.6 Tree identification is based on accessible visual characteristics at the time of inspection. As key identifying features are not always available the accuracy of identification is not guaranteed. Where tree species is unknown, it is indicated with an *spp*.

3.7 Some trees included within this report have been located using a Trimble TDC100 hand held GNSS device by Urban Arbor Pty Ltd. Tree locations are only accurate within 1m - 3m. If an accurate location of the trees is required, a registered surveyor should locate the trees.

3.8 All diagrams, plans and photographs included in this report are visual aids only and are not to scale unless otherwise indicated.

3.9 Alteration of this report invalidates the entire report.

URBAN ARBOR
The Trusted Name in Tree Management

4. METHODOLOGY

4.1 The following information was collected during the assessment of the subject tree(s).

4.1.1 Tree common name
4.1.2 Tree botanical name
4.1.3 Tree age class
4.1.4 DBH (Trunk/Stem diameter at breast height/1.4m) - millimetres.
4.1.5 DAB (Trunk diameter directly above the root buttress) – millimetres.
4.1.6 Estimated height - metres
4.1.7 Estimated crown spread (diameter of crown) - metres
4.1.8 Health
4.1.9 Structural condition
4.1.10 Amenity value
4.1.11 Estimated remaining contribution years (SULE)[1]
4.1.12 Retention value (Tree AZ)[2]
4.1.13 Notes/comments

4.2 An assessment of the trees condition was made using the visual tree assessment (VTA) model (Mattheck & Breloer, 1994).[3]

4.3 Tree diameter was measured using a DBH tape or in some cases estimated. Tree height and tree canopy spread was measured with a clinometer or in some cases estimated. All other measurements were estimations unless otherwise stated. The other tools used during the assessment were a nylon mallet, compass, camera and a steel probe.

4.4 All information was imported into our computerised geographical information system (GIS) PT-mapper pro. This software was used to measure/calculate all encroachment estimates included in this report.

4.5 All DBH measurements, tree protection zones, and structural root zones were calculated in accordance with methods set out in AS4970 Protection of trees on development sites (2009).[4]

4.6 Details of how the observations in this report have been assessed are listed in the appendices.

URBAN ARBOR
The Trusted Name in Tree Management

5. SITE LOCATION AND BRIEF DESCRIPTION

5.1 The area covered in the site inspections is located within two Local Government Areas (LGA), including Inner West LGA and Canterbury Bankstown LGA. All trees within the Inner West LGA are subject to protection under the corresponding Local Environmental Plans (LEP)[5], Development Control Plans (DCP)[6] and Tree Management DCP 2020.[7] All trees within the Canterbury Bankstown LGA are subject to protection under the Canterbury LEP 2012[8], Canterbury DCP 2012[9], Bankstown LEP 2015[10] and Bankstown DCP 2015.[11]

6. GENERAL INFORMATION IN RELATION TO PROTECTING TREES ON DEVELOPMENT SITES

6.1 **Tree protection zone (TPZ):** The TPZ is the principle means of protecting trees on development sites and is an area required to maintain the viability of trees during development. It is commonly observed that tree roots will extend significantly further than the indicative TPZ, however the TPZ is an area identified in AS4970-2009 to be the area where root loss or disturbance will generally impact the viability of the tree. The TPZ is identified as a restricted area to prevent damage to trees either above or below ground during a development. Where trees are intended to be retained proposed developments must provide an adequate TPZ around trees. The TPZ is set aside for the tree's root zone, trunk and crown and it is essential for the stability and longevity of the tree. The TPZ also incorporates the SRZ (see below for more information about the SRZ). The TPZ is calculated by multiplying the DBH by twelve, with the exception of palms, other monocots, cycads and tree ferns, the TPZ of which have been calculated at one metre outside the crown projection. Additional information about the TPZ is included in appendix 3.

URBAN ARBOR
The Trusted Name in Tree Management

6.2 **Structural Root Zone (SRZ):** This is the area around the base of a tree required for the trees stability in the ground. An area larger than the SRZ always needs to be maintained to preserve a viable tree. The SRZ is calculated using the following formula; (DAB x 50) $^{0.42}$ x 0.64. There are several factors that can vary the SRZ which include height, crown area, soil type and soil moisture. It can also be influenced by other factors such as natural or built structures. Generally, work within the SRZ should be avoided. Soil level changes should also generally be avoided inside the SRZ of trees to be retained. Palms, other monocots, cycads and tree ferns do not have an SRZ. See the appendices for more information about the SRZ.

6.3 **Minor encroachment into TPZ:** Sometimes encroachment into the TPZ is unavoidable. Encroachment includes but is not limited to activities such as excavation, compacted fill and machine trenching. Minor encroachment of up to 10% of the overall TPZ area is normally considered acceptable, providing there is space adjacent to the TPZ for the tree to compensate and the tree is displaying adequate vigour/health to tolerate changes to its growing environment.

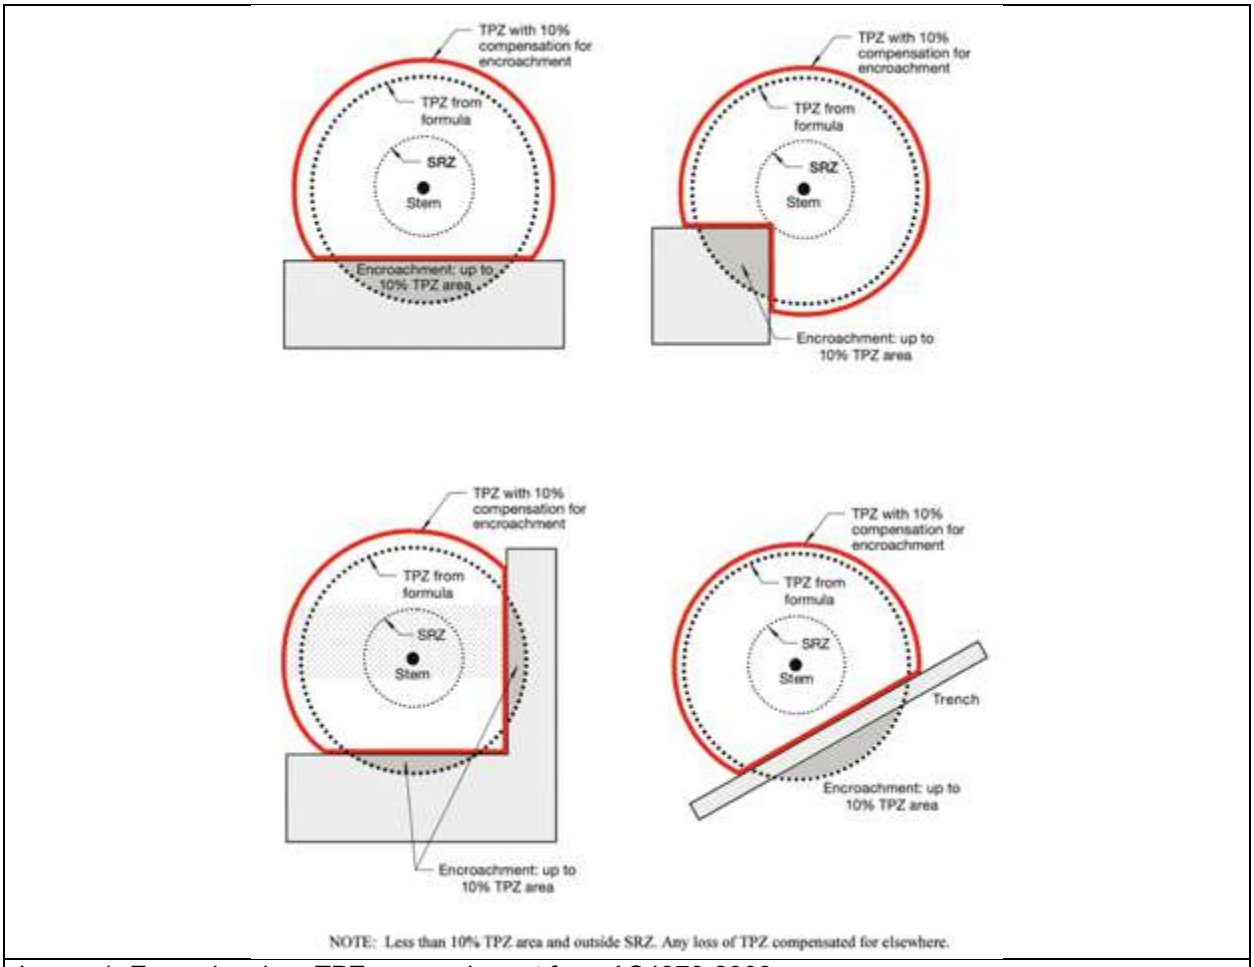

Image 1: Example minor TPZ encroachment from AS4970-2009.

URBAN ARBOR
The Trusted Name in Tree Management

6.4 **Major encroachment into TPZ:** Where encroachment of more than 10% of the overall TPZ area is proposed the project Arborist must investigate and demonstrate that the tree will remain in a viable condition. In some cases, tree sensitive construction methods such as pier and beam footings, suspended slabs, or cantilevered sections, can be utilised to allow additional encroachment into the TPZ by bridging over roots and minimising root disturbance. Major encroachment is only possible if it can be undertaken without severing significant size roots, or if it can be demonstrated that significant roots will not be impacted. Root investigations may be required to identify roots that will be impacted during major TPZ encroachment (see appendix 3 for more information in relation to root investigations).

7. SITE LOCATION

7.1 The areas assessed in this report have been identified by John Holland Laing O'Rourke and have been listed below. Urban Arbor carried out a site inspection to identify significant trees within each area. The following areas were assessed for significant trees that could potentially be impacted by the proposed development;

- **9.3** Marrickville
- **9.4** Dulwich Hill
- **9.5** Hurlstone Park
- **9.6** Canterbury
- **9.7** Campsie
- **9.8** Belmore
- **9.9** Lakemba
- **9.10** Wiley Park
- **9.11** Punchbowl
- **9.12** Bankstown

URBAN ARBOR
The Trusted Name in Tree Management

8. TREE OBSERVATIONS

8.1 **Tree information:** Details of each individual tree assessed, including the observations taken during the site inspection, can be found in the tree inspection schedule in appendix 2, where the indicative tree protection zone (TPZ) and Structural Root Zone (SRZ) has been calculated for each of the subject trees. The TPZ and SRZ should be measured in radius from the centre of the trunk. Each of the subject trees have been awarded a retention value based on the observations using the Tree AZ method. Tree AZ is used to identify higher value trees worthy of being a constraint to development and lower value trees that should generally not be a constraint to the development. The Tree AZ categories sheet (Barrell Tree Consultancy) has been included in appendix 3 to assist with understanding the retention values. The retention value that has been allocated to the subject trees in this report is not definitive and should only be used as a guideline.

9. ASSESSMENT OF TREE IMPACTS BY AREA

9.1 The below tables include trees and other *vegetation* - refer to the notes column in Appendix 2 for classification. *Vegetation* has been identified at the discretion of Urban Arbor to meet the requirements of Condition of Approval E5 and includes shrubs and some exotic species but does not include small insignificant regrowth, weed species and grasses. Totals derived for replacement planting include trees only, as defined by the *NSW Government Planning & Environment, 12 December 2018, Condition of Approval – E5, SSI 8256*.

9.2 The trees and *vegetation* included in the following sections have been identified by John Holland Laing O'Rourke as being subject to impacts from development works. All trees to be retained should be protected in accordance with AS4970-2009, details of which are included in section 12. If there are any development works that have not been assessed and could potentially impact additional trees, the project arborist must assess the impact of the proposed works to the condition of the trees, determining the trees viability for retention.

URBAN ARBOR
The Trusted Name in Tree Management

9.3 Marrickville

9.3.1 **Way Street Access:** Two trees require canopy pruning for vehicle access. The pruning is to provide adequate clearance for the vehicles entering and exiting the site. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
3453	*Casuarina glauca*	1. Long	A1	9.6	289.5	3.1	Native	High
3454	*Casuarina glauca*	1. Long	A1	3.2	32.2	2.3	Native	High

Image 1: Looking towards tree 3453 and 3454 showing required pruning for vehicle access. The East side of the canopy is to be reduced by 1m (hatched yellow). The pruning will result in removing less than 5% of the overall live foliage area. Final pruning cuts should not exceed 100mm in diameter.

URBAN ARBOR
The Trusted Name in Tree Management

9.3.2 **Way Street Compound:** No access was available to this area, therefore the tree information has been estimated based on the received photographs and available information. Three trees in this area require removal to accommodate the proposed laydown area. A group of trees adjacent to this area requires crown pruning to provide adequate clearance for the proposed works area. The following trees and group of trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
3460	*Eucalyptus spp*	5. Small/Young	Z1	2.7	22.9	2.0	Native	Low
3461	*Eucalyptus spp*	5. Small/Young	Z1	2.4	18.1	1.8	Native	Low
3462	*Eucalyptus spp*	5. Small/Young	Z1	3.3	34.2	2.0	Native	Low
G28	*Mixed species*	5. Small/Young	Z3	3.0	28.3	2.0	Exotic/Native	Low

Image 2: Looking towards tree 3460, 3461 and 3462. The removal of the trees is recommended to accommodate the development.

URBAN ARBOR
The Trusted Name in Tree Management

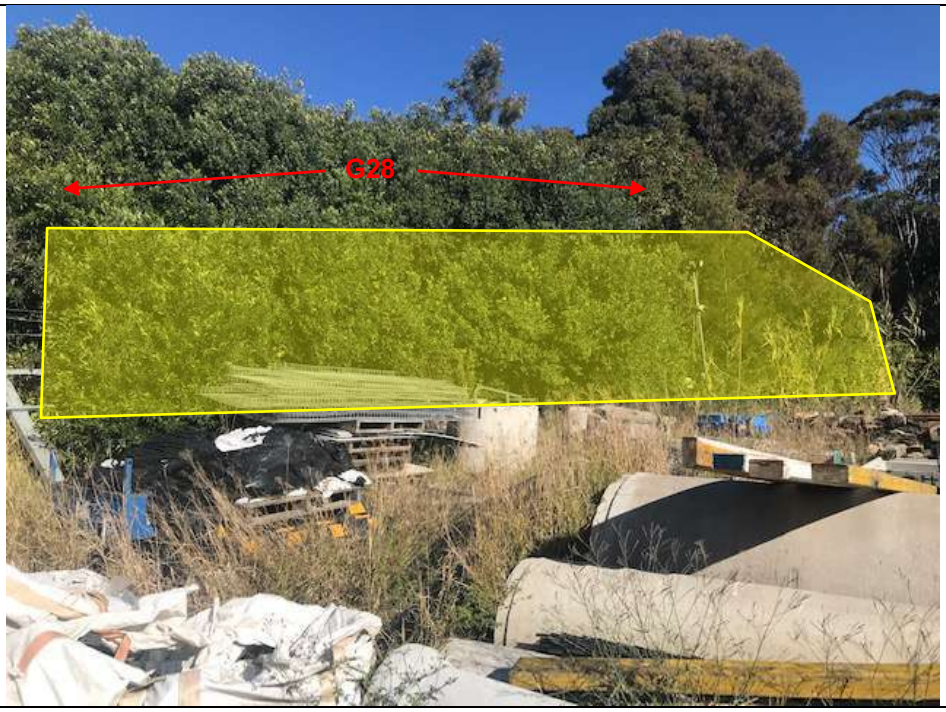

Image 3: Looking towards G28 showing required pruning for the works area. The section of the foliage that overhangs the fence is to be reduced by of the canopy is to be reduced by 1m (hatched yellow). The pruning will result in removing less than 5% of the overall live foliage area of each tree. Final pruning cuts should not exceed 10mm in diameter.

URBAN ARBOR
The Trusted Name in Tree Management

9.3.3 **Victoria Road – City side:** The trees within this area are located adjacent to the proposed piling and retaining wall works. The proposed piling is to be completed directly adjacent to tree 3375. The proposed retaining wall is to be completed directly adjacent to tree 3455 and weed species to the East of tree. Therefore, tree 3375, 3455 and the weed species to the East are to be removed to accommodate the development. Tree 3376 and additional small weed species will require canopy pruning to allow for the piling/retaining wall works. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
3375	*Morus alba*	2. Medium	Z3	3.4	36.3	2.1	Exotic	Low
3376	*Melaleuca spp*	5. Small/Young	Z1	2.4	18.1	1.7	Native	Low
3455	*Ficus rubiginosa*	3. Short	Z10	5.4	91.6	2.5	Native	Medium

Image 4: Looking towards tree 3375. The tree is recommended for removal due to construction impacts. Also showing required pruning for the small weed species (hatched yellow). The pruning will result in removing less than 5% of the overall live foliage area of the small weed species. Final pruning cuts should not exceed 50mm in diameter.

URBAN ARBOR
The Trusted Name in Tree Management

Image 5: Looking East towards tree 3376 showing required pruning for piling works (hatched yellow). The crown is to be reduced by 2m, in line with the brick wall. The pruning will result in removing less than 30% of the overall live foliage area of the tree. Final pruning cuts should not exceed 80mm in diameter.

Image 6: Looking towards tree 3455. The tree is recommended for removal due to construction impacts.

URBAN ARBOR
The Trusted Name in Tree Management

9.3.4 **Victoria Road – Country side:** The trees within this area are located adjacent to the proposed piling/works area. Tree 3211, 3213, 3214, 3215 and 3216 will be located within the footprint of the proposed works and are to be removed to accommodate the development. Smaller weed species adjacent to the trees are also to be removed. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
3211	*Acacia spp*	3. Short	Z10	3.4	36.3	2.1	Native	Low
3213	*Acacia spp*	2. Medium	A1	2.0	12.6	1.6	Native	Medium
3214	*Callistemon viminalis*	1. Long	A1	3.1	30.2	2.0	Native	Medium
3215	*Acacia spp*	3. Short	Z10	3.0	28.3	1.8	Native	Medium
3216	*Triadica sebifera*	3. Short	Z10	2.2	15.2	1.8	Exotic	Low

Image 8: Looking West towards tree 3211, 3213, 3214, 3215 and 3216. The trees are recommended for removal due to construction impacts.

URBAN ARBOR
The Trusted Name in Tree Management

9.3.5 **Livingstone Ave access to SE abutment:** Trees in this area require crown pruning to allow for heavy vehicle access to enable plant & equipment items to pass between the trees and the GST. The pruning is to provide 4 metres of clearance below the canopy of the trees. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
74	*Quercus robur*	2. Medium	A2	5.4	91.6	2.4	Exotic	Medium
75	*Erythrina crista-galli*	2. Medium	Z3	4.8	72.4	2.3	Exotic	Low

Image 9: Looking West towards tree 74 and 75 showing required pruning for vehicle access (hatched yellow). The North side of the canopy of both trees is to be crown raised by 4m above ground height. The pruning will result in removing 10% of the overall live foliage area of each tree. Final pruning cuts should not exceed 100mm in diameter.

URBAN ARBOR
The Trusted Name in Tree Management

9.3.6 **Bridge Livingstone Road NW Abutment:** The trees within this area are located adjacent to the proposed piling/works area. Tree 3178, 3180, 3181, 3472, 3473, 3474 and 3475 will be located within the footprint of the proposed works and are to be removed to accommodate the development. Smaller weed species surrounding the trees are also to be removed to allow for the works area. Tree 3175 and 3179 will require canopy pruning to allow for the works – see Image 26 and 28. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
3175	*Fraxinus raywood*	2. Medium	A1	2.0	12.6	1.7	Exotic	Medium
3178	*Acacia decurrens*	3. Short	Z4	2.3	16.6	1.7	Native	Medium
3179	*Cinnamomum camphora*	2. Medium	Z3	3.6	40.7	2.0	Exotic	Low
3180	*Eucalyptus tereticornis*	2. Medium	A2	5.4	91.6	2.6	Native	High
3181	*Fraxinus raywood*	5. Small/Young	Z1	2.0	12.6	1.5	Exotic	Low
3472	*Pistacia chinensis*	5. Small/Young	Z1	2.0	12.6	1.5	Exotic	Low
3473	*Pistacia chinensis*	5. Small/Young	Z1	2.0	12.6	1.5	Exotic	Low
3474	*Pistacia chinensis*	5. Small/Young	Z1	2.0	12.6	1.5	Exotic	Low

9.12 Bankstown

9.12.1 **South Terrace, Bankstown:** The trees within this area are located within the footprint or adjacent to the proposed CSR/works area. Tree 1488, 1491, 1497, 1498 and 1499 will be in conflict with the works area and are required to be removed. Tree 1489 and 1490 will require canopy pruning to allow for access to the works area. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
1488	*Eucalyptus microcorys*	5. Small/Young	Z1	2.0	12.6	1.7	Native	Low
1489	*Eucalyptus microcorys*	1. Long	A1	5.0	78.5	2.4	Native	High
1490	*Eucalyptus microcorys*	1. Long	A1	7.9	196.1	3.2	Native	High
1491	*Eucalyptus saligna*	3. Short	Z9	5.4	91.6	3.4	Native	High
1497	*Eucalyptus microcorys*	1. Long	A1	3.6	40.7	2.5	Native	Medium
1498	*Eucalyptus moluccana*	5. Small/Young	Z1	2.0	12.6	1.5	Native	Low
1499	*Eucalyptus moluccana*	1. Long	A1	2.5	19.6	1.9	Native	Medium

Image 237: Looking up into the canopy of tree 1489, showing required canopy pruning. The first order 120mm branch to the Northeast at 2m is to be removed. The first order 170mm branch to the North at 2.5m is to be removed. The pruning will result in the removal of 10% of the overall live canopy.

URBAN ARBOR
The Trusted Name in Tree Management

Image 238: Looking up into the canopy of tree 1490, showing required canopy pruning. The first order 150mm branch to the North at 3m is to be removed. The pruning will result in the removal of less than 5% of the overall live canopy.

9.12.2 **Bridge - Stacey Street and Hardstand, Bankstown:** The trees within this area are located adjacent to the new protection screens, hard stand/works area, and CSR construction. Tree 1510, 1511, 1513, 1514, 1516 and 3493 will be in conflict with the works area and are required to be removed. Insignificant small weed species are also to be removed to accommodate the proposed works area. Tree 1512 and 3492 will require canopy pruning to allow for the works. The following trees have been identified in this area;

Tree ID	Species	SULE	Retention Value	TPZ Radius (M)	TPZ Area (m^2)	SRZ Radius (m)	Native or Exotic Species	Amenity/ Visual Value
1510	*Eucalyptus microcorys*	1. Long	A1	4.2	55.4	2.3	Native	High

10. CONCLUSIONS

10.1 **Table 2:** Summary of the impact to trees and *vegetation* by the development;

Impact	Reason	Category A	Category Z	TOTAL
		A	Z	
Trees recommended to be removed	Installation of services, construction works areas, vehicle access	19, 20, 48, 122, 123, 124, 605, 680, 681, 693, 694, 731, 1202, 1226, 1276, 1279, 1337, 1497, 1499, 1510, 1511, 1522, 1569, 1735, 1847, 1850, 1852, 1858, 1861, 1868, 1961, 1989, 1990, 1991, 2042, 2046, 2065, 2074, 2078, 2085, 2096, 2098, 2301, 2302, 2303, 2304, 2306, 2307, 2308, 2314, 2315, 2317, 2318, 2325, 2327, 2378, 2817, 2819, 3180, 3213, 3214, 3276, 3277, 3278, 3279, 3281, 3282, 3438 (68 trees)	37, 44, 46, 47, 63, 125, 287, 288, 289, 294, 295, 305, 498, 777, 778, 785, 1215, 1227, 1228, 1233, 1277, 1336, 1338, 1339, 1340, 1488, 1491, 1498, 1513, 1514, 1516, 1523, 1526, 1527, 1732, 1734, 1737, 1738, 1739, 1759, 1848, 1849, 1851, 1853, 1854, 1855, 1856, 1857, 1859, 1860, 1862, 1863, 1864, 1865, 1866, 1867, 1869, 1870, 1871, 1872, 1873, 1935, 1940, 1942, 1987, 1988, 1998, 1999, 2038, 2041, 2044, 2047, 2048, 2049, 2050, 2061, 2062, 2066, 2067, 2067, 2070, 2075, 2075, 2077, 2080, 2097, 2305, 2313, 2316, 2319, 2320, 2321, 2322, 2323, 2324, 2326, 2328, 2818, 2820, 2821, 2869, 2872, 3178, 3181, 3211, 3215, 3216, 3280, 3286, 3287, 3288, 3295, 3375, 3383, 3384, 3385, 3386, 3387, 3434, 3435, 3436, 3437, 3439, 3440, 3441, 3442, 3443, 3444, 3445, 3446, 3447, 3448, 3449, 3450, 3451, 3452, 3455, 3456, 3457, 3458, 3459, 3460, 3461, 3462, 3472, 3473, 3474, 3475, 3476, 3478, 3479, 3480, 3483, 3484, 3493, 3502, 3503, 3512, 43a, 43b, 63a, 63b, 63c, 82a, G18, G21, G23, G24, G30, G5a, G6 (164 trees and 7 groups of trees)	**232 trees and 7 groups of trees**
Vegetation recommended to be removed	Installation of services, construction works areas, vehicle access	None	3293, 3294 (2 veg)	**2 veg**
Trees recommended to be retained requiring canopy pruning	Clearance for construction works i.e. vehicle access, GST, GLT, Service trenching etc.	9, 17, 18, 21, 22, 23, 24, 25, 27, 28, 61, 62, 74, 115, 257, 692, 724, 797, 798, 799, 800, 802, 803, 911, 912, 913, 914, 915, 916, 917, 950, 951, 987, 989, 1134, 1141, 1299, 1362, 1365, 1367, 1368, 1377, 1386, 1390, 1427, 1489, 1490, 1512, 1672, 1673, 1676, 1680, 1681, 1682, 1683, 1684, 1723, 1724, 1927, 1931, 1933, 2005, 2006, 2007, 2091, 2093, 2095, 2101, 2105, 2106, 2107, 2108, 2129, 2163, 2377, 2378, 2868, 2870, 3069, 3175, 3292, 3296, 3377, 3453, 3454, 3467, 3468, 3469, 3495, 3496, 3497 (91 trees)	29, 31, 38, 39, 40, 41, 42, 43, 75, 684, 727, 788, 789, 801, 1360, 1373, 1374, 1417, 1528, 1677, 1678, 1685, 1686, 1690, 1691, 1930, 1932, 1934, 1938, 2008, 2090, 2099, 2100, 2102, 2871, 3125, 3128, 3179, 3376, 3378, 3381, 3463, 3470, 3471, 3477, 3481, 3482, 3485, 3486, 3487, 3488, 3489, 3490, 3491, 3492, 3494, 3498, 3499, 3500, 3504, 3506, 3507, 3508, 3510, 3511, 3513, 3514, 3515, 3516, 3517, 3518, 3519, 54a, 61a, G22, G28, G29 (74 trees and 3 group of trees)	**165 trees and 3 group of trees**
Vegetation recommended to be retained requiring canopy pruning	Clearance for construction works i.e. vehicle access, GST, GLT, Service trenching etc.	None	G27 (1 group of veg)	**1 group of veg**
Trees recommended to be retained subject to no construction impacts	Installation of services, construction works areas, vehicle access will not impact the trees	26, 60, 503, 510, 1300, 1301, 1302, 1304, 1306, 1307, 1308, 1309, (12 trees)	30, 81, 81a, 81b, 82, 126, 292, 293, 508, 509, 781, 782, 1303, 1305, 3379, 3380, 3464, 3465, 3466 (19 trees)	**31 trees**

URBAN ARBOR
The Trusted Name in Tree Management

11. RECOMMENDATIONS

11.1 This report assesses the impact of a proposed development to four hundred and twenty-eight (428) trees, ten (10) group of trees, two (2) *vegetation* and one (1) group of *vegetation* that are located at selected areas around the development site.

11.2 Two hundred and thirty-two (232) trees and seven (7) groups of trees have been recommended for removal to accommodate the development, including tree 19, 20, 37, 44, 46, 47, 48, 63, 122, 123, 124, 125, 287, 288, 289, 294, 295, 305, 498, 605, 680, 681, 693, 694, 731, 777, 778, 785, 1202, 1215, 1226, 1227, 1228, 1233, 1276, 1277, 1279, 1336, 1337, 1338, 1339, 1340, 1488, 1491, 1497, 1498, 1499, 1510, 1511, 1513, 1514, 1516, 1522, 1523, 1526, 1527, 1569, 1732, 1734, 1735, 1737, 1738, 1739, 1759, 1847, 1848, 1849, 1850, 1851, 1852, 1853, 1854, 1855, 1856, 1857, 1858, 1859, 1860, 1861, 1862, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, 1872, 1873, 1935, 1940, 1942, 1961, 1987, 1988, 1989, 1990, 1991, 1998, 1999, 2038, 2041, 2042, 2044, 2046, 2047, 2048, 2049, 2050, 2061, 2062, 2065, 2066, 2067, 2067, 2070, 2074, 2075, 2075, 2077, 2078, 2080, 2085, 2096, 2097, 2098, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2378, 2817, 2818, 2819, 2820, 2821, 2869, 2872, 3178, 3180, 3181, 3211, 3213, 3214, 3215, 3216, 3276, 3277, 3278, 3279, 3280, 3281, 3282, 3286, 3287, 3288, 3295, 3375, 3383, 3384, 3385, 3386, 3387, 3434, 3435, 3436, 3437, 3438, 3439, 3440, 3441, 3442, 3443, 3444, 3445, 3446, 3447, 3448, 3449, 3450, 3451, 3452, 3455, 3456, 3457, 3458, 3459, 3460, 3461, 3462, 3472, 3473, 3474, 3475, 3476, 3478, 3479, 3480, 3483, 3484, 3493, 3502, 3503, 3512, 43a, 43b, 63a, 63b, 63c, 82a, G18, G21, G23, G24, G30, G5 and G6. See Table 2 for recommended tree removal by retention values.

11.3 Two (2) *vegetation* have been recommended for removal to accommodate the development, including *vegetation* 3293 and 3294. Both 3293 and 3294 have a category Z retention value and should generally not be a constraint to development.

11.4 One hundred and sixty-five (165) trees and three (3) groups of trees have been identified for canopy pruning to provide clearance for proposed construction works, including tree 9, 17, 18, 21, 22, 23, 24, 25, 27, 28, 29, 31, 38, 39, 40, 41, 42, 43, 61, 62, 74, 75, 115, 257, 684, 692, 724, 727, 788, 789, 797, 798, 799, 800, 801, 802, 803, 911, 912, 913, 914, 915, 916, 917, 950, 951, 987, 989, 1134, 1141, 1299, 1360, 1362, 1365, 1367, 1368, 1373, 1374, 1377, 1386, 1390, 1417, 1427, 1489, 1490, 1512, 1528, 1672, 1673, 1676, 1677, 1678, 1680, 1681, 1682, 1683, 1684, 1685, 1686, 1690, 1691, 1723, 1724, 1927, 1930, 1931, 1932, 1933, 1934, 1938, 2005, 2006, 2007, 2008, 2090, 2091, 2093, 2095, 2099, 2100, 2101, 2102, 2105, 2106, 2107, 2108, 2129, 2163, 2377, 2378, 2868, 2870, 2871, 3069, 3125, 3128, 3175, 3179, 3292, 3296, 3376, 3377, 3378, 3381, 3453, 3454, 3463, 3467, 3468, 3469, 3470, 3471, 3477, 3481, 3482, 3485, 3486, 3487, 3488, 3489, 3490, 3491, 3492, 3494, 3495, 3496, 3497, 3498, 3499, 3500, 3504, 3506, 3507, 3508, 3510, 3511, 3513, 3514, 3515, 3516, 3517, 3518, 3519, 54a, 61a, G22, G28 and G29. Refer to section 9 for canopy pruning specifications. All pruning works must be completed in accordance with AS4373-2007 Pruning of Amenity Trees.

11.5 One (1) group of *vegetation* (12 individuals) has been identified for canopy pruning to provide clearance for proposed construction works, including *vegetation* G27. Refer to section 9 for canopy pruning specifications. All pruning works must be completed in accordance with AS4373-2007 Pruning of Amenity Trees.

11.6 Thirty-one (31) additional trees will not be impacted by the development and can be retained in a viable condition, including tree 26, 30, 60, 81, 81a, 81b, 82, 126, 292, 293, 503, 508, 509, 510, 781, 782, 1300, 1301, 1302, 1303, 1304, 1305, 1306, 1307, 1308, 1309, 3379, 3380, 3464, 3465 and 3466.

11.7 All trees and *vegetation* that require canopy pruning can be retained in a viable condition. All trees and *vegetation* to be retained must be protected in accordance with AS4970-2009, details of which are included in section 12 of this report.

11.8 Site plans with the locations marked are listed in section 1.2 of this report.

URBAN ARBOR
The Trusted Name in Tree Management

12. TREE PROTECTION REQUIREMENTS

12.1 **Use of this report:** All contractors must be made aware of the tree protection requirements prior to commencing works at the site. This report and a copy of the site plans (Appendix 1) drawing must also be made available to any contractor prior to works commencing and during any on site operations.

12.2 **Project Arborist:** Prior to any works commencing at the site a project Arborist should be appointed. The project Arborist should be qualified to a minimum AQF level 5 and/or equivalent qualifications and experience and should assist with any development issues relating to trees that may arise. If at any time it is not feasible to carryout works in accordance with this, an alternative must be agreed in writing with the project Arborist.

12.3 **Tree work:** All tree work should be carried out by a qualified and experienced Arborist with a minimum of AQF level 3 in arboriculture, in accordance with NSW Work Cover Code of Practice for the Amenity Tree Industry (1998) and AS4373 Pruning of amenity trees (2007).

12.4 **Initial site meeting/on-going regular inspections:** The project Arborist is to hold a pre-construction site meeting with principal contractor to discuss methods and importance of tree protection measures and resolve any issues in relation to tree protection that may arise. In accordance with AS4970-2009, the project Arborist should carryout regular site inspections to ensure works are carried out in accordance with this document throughout the development process. Site inspections are recommended on a monthly frequency throughout the development.

12.5 **Site Specific Tree Protection Recommendations:** Site specific tree protection measures should be specified by the project Arborist during the initial site meeting, prior to development works. All development works that are within the TPZ of the trees to be retained should be discussed during this meeting and required tree protection measures agreed in writing.

12.6 **Tree Protection Specifications:** It is the responsibility of the principal contractor to install tree protection prior to works commencing at the site (prior to demolition works) and to ensure that the tree protection remains in adequate condition for the duration of the development. The tree protection must not be moved without prior agreement of the project Arborist. The project Arborist must inspect that the tree protection has been installed in accordance with this document and AS4970-2009 prior to works commencing.

12.6.1 Protective fencing: The protective fencing must be constructed from materials that complies with all other relevant standards for fencing and temporary structures within the rail corridor, i.e. bollards, flagging etc. The fencing should only be removed for the landscaping/soft works phase. Where it is not feasible to install fencing at the specified location due to factors such as restricting access to areas of the site or for constructing new structures, an alternative location should be specified and must be installed in accordance with AS4970-2009.

URBAN ARBOR
The Trusted Name in Tree Management

12.6.2 TPZ signage: Tree protection signage is to be attached to the protective fencing, displayed in a prominent position and the sign repeated at 10 metres intervals or closer where the fence changes direction. Each sign shall contain in a clearly legible form, the following information:

- Tree protection zone/No access.
- This fence has been installed to prevent damage to the tree/s and their growing environment both above and below ground. Do not move fencing or enter TPZ without the agreement of the project Arborist.
- The name, address, and telephone number of the developer/builder and project Arborist

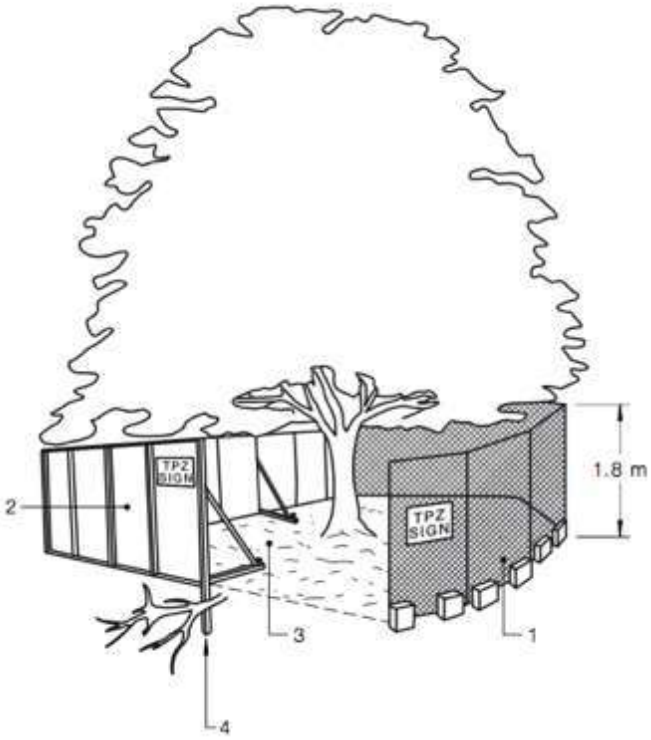

12.6.3 Trunk and Branch Protection: The trunk must be protected by wrapped hessian or similar material to limit damage. Timber planks (50mm x 100mm or similar) should then be placed around tree trunk. The timber planks should be spaced at 100mm intervals and must be fixed against the trunk with tie wire or strapping and connections finished or covered to protect pedestrians from injury. The hessian and timber planks must not be fixed to the tree in any instance. The trunk and branch protection shall be installed prior to any work commencing on site and shall be maintained in good condition for the entire development period.

12.6.4 Mulch: Any areas of the TPZ located inside the subject site must be mulched to a depth of 75mm with good quality mulch. Mulch must not be built-up around the trunk the trees as it can cause collar rot.

12.6.5 Ground Protection: Ground protection is required to protect the underlying soil structure and root system in areas where it is not practical to restrict access to whole TPZ, while allowing space for construction. Ground protection must consist of good quality composted wood chip/leaf mulch to a depth of between 150-300mm, laid on top of geo textile fabric. If vehicles are to be using the area, additional protection will be required such as rumble boards or track mats to spread the weight of the vehicle and avoid load points. Ground protection is to be specified by the project Arborist as required.

12.6.6 Temporary irrigation: Temporary irrigation should distribute water evenly throughout the area of the TPZ. The irrigation should be used for at minimum one hour daily throughout all stages of the development.

URBAN ARBOR

LEGEND:
1 Chain wire mesh panels with shade cloth (if required) attached, held in place with concrete feet.
2 Alternative plywood or wooden paling fence panels. This fencing material also prevents building materials or soil entering the TPZ.
3 Mulch installation across surface of TPZ (at the discretion of the project arborist). No excavation, construction activity, grade changes, surface treatment or storage of materials of any kind is permitted within the TPZ.
4 Bracing is permissible within the TPZ. Installation of supports should avoid damaging roots.

An image from AS4970-2009,[12] with example tree protection.

[12] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009), page 16.

URBAN ARBOR
The Trusted Name in Tree Management

NOTES:

1 For trunk and branch protection use boards and padding that will prevent damage to bark. Boards are to be strapped to trees, not nailed or screwed.

2 Rumble boards should be of a suitable thickness to prevent soil compaction and root damage.

An image from AS4970-2009,[13] with example tree protection.

12.7 **Restricted activities inside TPZ:** The following activities must be avoided inside the TPZ of all trees to be retained unless approved by the project Arborist. If at any time these activities cannot be avoided an alternative must be agreed in writing with the project Arborist to minimise the impact to the tree.

A) Machine excavation.
B) Ripping or cultivation of soil.
C) Storage of spoil, soil or any such materials
D) Preparation of chemicals, including preparation of cement products.
E) Refuelling.
F) Dumping of waste.
G) Wash down and cleaning of equipment.
H) Placement of fill.
I) Lighting of fires.
J) Soil level changes.
K) Any physical damage to the crown, trunk, or root system.
L) Parking of vehicles.

[13] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009), page 17.

URBAN ARBOR
The Trusted Name in Tree Management

12.8 **Demolition:** The demolition of all existing structures inside or directly adjacent to the TPZ of trees to be retained must be undertaken in consultation with the project Arborist. Any machinery is to work from inside the footprint of the existing structures or outside the TPZ, reaching in to minimise soil disturbance and compaction. If it is not feasible to locate demolition machinery outside the TPZ of trees to be retained, ground protection will be required. The demolition should be undertaken inwards into the footprint of the existing structures, sometimes referred to as the 'top down, pull back' method.

12.9 **Excavations:** The project Arborist must supervise and certify that all excavations and root pruning are in accordance with AS4373-2007 and AS4970-2009. For continuous strip footings, first manual excavation is required along the edge of the structures closest to the subject trees. Manual excavation should be a depth of 1 metre (or to unfavourable root growth conditions such as bed rock or heavy clay, if agreed by project Arborist). Next roots must be pruned back in accordance with AS4373-2007. After all root pruning is completed, machine excavation is permitted within the footprint of the structure. For tree sensitive footings, such as pier and beam, all excavations inside the TPZ must be manual. Manual excavation may include the use of pneumatic and hydraulic tools, high-pressure air or a combination of high-pressure water and a vacuum device. No pruning of roots greater 40mm in diameter is to be carried out without approval of the project arborist. All pruning of roots greater than 40mm in diameter must be carried out by a qualified Arborist/Horticulturalist with a minimum AQF level 3. Root pruning is to be a clean cut with a sharp tool in accordance with AS4373 Pruning of amenity trees (2007).[14] The tree root is to be pruned back to a branch root if possible. Make a clean cut and leave as small a wound as possible.

12.10 **Sediment and Contamination:** All contamination run off from the development such as but not limited to concrete, sediment and toxic wastes must be prevented from entering the TPZ at all times.

12.11 **Tree Wounding/Injury:** Any wounding or injury that occurs to a tree during the construction process will require the project Arborist to be contacted for an assessment of the injury and provide mitigation/remediation advice. It is generally accepted that trees may take many years to decline and eventually die from root damage. All repair work is to be carried out by the project Arborist, at the contractor's expense.

12.12 **Completion of Development Works:** After all construction works are complete the project Arborist should assess that the subject trees have been retained in the same condition and vigour. If changes to condition are identified the project Arborist should provide recommendations for remediation.

URBAN ARBOR
The Trusted Name in Tree Management

13. CONSTRUCTION HOLD POINTS FOR TREE PROTECTION

13.1 **Hold Points:** Below is a sequence of hold points requiring project Arborist certification throughout the development process**.** It provides a list of hold points that must be checked and certified. All certification must be provided in written format upon completion of the development. The final certification must include details of any instructions for remediation undertaken during the development. The principal contractor should be responsible for implementing all tree protection requirements.

Hold Point	Stage	Date Completed and Signature of Project Arborist Responsible
Project Arborist to hold pre construction site meeting with principal contractor to discuss methods and importance of tree protection measures and resolve any issues in relation to feasibility of tree protection requirements that may arise. Project Arborist to mark all trees approved for removal.	Prior to development work commencing	
Project Arborist to assess and certify that tree protection has been installed in accordance with AS4970-2009 prior to works commencing at site.	Prior to development work commencing.	
In accordance with AS4970-2009 the project arborist should carryout regular site inspections to ensure works are carried out in accordance with the recommendations. Site inspection are recommended on a monthly frequency.	On-going throughout the development	
The removal of existing structures inside the TPZ of any tree to be retained, such as the existing buildings and hard surfaces, must be completed in consultation with the Project Arborist.	Demolition	
The Project Arborist must be consulted with for all manual excavations and root pruning inside the TPZ of any tree to be retained. Project Arborist to approve all pruning of roots greater than 40mm inside TPZ. All root pruning of roots greater than 40mm in diameter must be carried out by a qualified Arborist/Horticulturalist with a minimum AQF level 3.	Construction	
Project Arborist to certify that all underground services including storm water inside TPZ of any tree to be retained have been installed in accordance with AS4970-2009.	Construction	
Project Arborist to approve relocation of tree protection for landscaping. All landscaping works within the TPZ of trees to be retained are to be undertaken in consultation with the project Arborist to minimise the impact to trees.	Construction/ Landscape	
After all demolition, construction and landscaping works are complete the project Arborist should assess that the subject trees have been retained in the same condition and vigour. If changes to condition are identified the project Arborist should provide recommendations for remediation.	Upon completion of development	

URBAN ARBOR
The Trusted Name in Tree Management

15. LIST OF APPENDICES

The following are included in the appendices:

- Appendix 2 - Tree inspection schedule
- Appendix 3 - Definition of Methodology

Bryce Claassens
Diploma of Arboriculture (AQF5)
Cert III Landscape Construction
Member Arboriculture Australia
Quantified Tree Risk Assessment (QTRA)
ISA Tree Risk Assessment Qualification (TRAQ)

Appendix 2 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m)	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes	Recommendations
9	Swamp Sheoak	*Casuarina glauca*	Mature	24	6	470					470	550	Good	Good	High	1. Long	A1	5.6	2.6	Group of 10 trees. Western most trees within group require canopy pruning. Crown raise the lowest Western and North Western branches. Max finsihed cut diameter of 150mm.	Prune
17	Queensland Brushbox	*Lophostemon confertus*	Mature	20	9	800	500	600			1118	900	Good	Good	High	1. Long	A1	13.4	3.2	Potential removal - if removal is not required, crown raise North side of canopy to 8m.	Prune
18	Queensland Brushbox	*Lophostemon confertus*	Mature	20	8	800					800	850	Good	Good	High	1. Long	A1	9.6	3.1	Potential removal - if removal is not required, crown raise North side of canopy to 8m.	Prune
19	Queensland Brushbox	*Lophostemon confertus*	Mature	22	8	850					850	900	Good	Good	High	1. Long	A1	10.2	3.2	Crown raise North side of canopy to 8m.	Remove
20	Queensland Brushbox	*Lophostemon confertus*	Mature	22	8	800					800	850	Good	Good	High	1. Long	A1	9.6	3.1	Crown raise North side of canopy to 8m.	Remove
21	Queensland Brushbox	*Lophostemon confertus*	Mature	22	8	720					720	780	Good	Good	High	1. Long	A1	8.6	3.0	Crown raise North side of canopy to 8m.	Prune
22	Queensland Brushbox	*Lophostemon confertus*	Mature	21	8	700					700	750	Good	Good	High	1. Long	A1	8.4	2.9	Crown raise North side of canopy to 8m.	Prune
23	Queensland Brushbox	*Lophostemon confertus*	Mature	21	8	560					560	650	Good	Good	High	1. Long	A1	6.7	2.8	Crown raise North side of canopy to 8m.	Prune
24	Queensland Brushbox	*Lophostemon confertus*	Mature	21	8	650					650	750	Good	Good	High	1. Long	A1	7.8	2.9	Crown raise North side of canopy to 8m.	Prune
25	Queensland Brushbox	*Lophostemon confertus*	Mature	20	8	600					600	700	Good	Good	High	1. Long	A1	7.2	2.8	Crown raise North side of canopy to 8m.	Prune
26	Dragon Tree	*Dracaena draco*	Mature	4	3	400					400	400	Good	Fair	Medium	2. Medium	A1	4.8	2.3	To be protected.	Retain
27	Fig	*Ficus spp*	Mature	11	6	300					300	450	Good	Good	High	1. Long	A1	3.6	2.4	Crown raise East side of canopy to 5m.	Prune
28	Weeping Fig	*Ficus benjamina*	Mature	12	8	800					800	850	Good	Good	High	1. Long	A1	9.6	3.1	Crown raise East side of canopy to 5m.	Prune
29	Mulberry	*Morus spp*	Mature	10	4	400					400	450	Good	Good	Low	2. Medium	Z3	4.8	2.4	Crown raise East side of canopy to 5m. Exempt species.	Prune
30	Cocos Palm	*Syagrus romanzoffiana*	Mature	10	2	250					250	NA	Good	Good	Low	2. Medium	Z3	3.0	NA	No pruning required. Exempt species.	Retain
31	Cotoneaster	*Cotoneaster spp*	Mature	7	3	500					500	500	Good	Fair	Low	5. Small/Young	Z1	6.0	2.5	Crown raise East side of canopy to 3m. Undesirable species.	Prune
37	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Remove
38	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Prune
39	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Prune
40	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Prune
41	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Prune
42	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Prune
43	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Two options of crown raising for North or South side.	Prune
44	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	600					600	650	Good	Fair	Medium	3. Short	Z10	7.2	2.8	Reduce North side of crown by 200mm for fence.	Remove
46	Himalayan Cypress	*Cupressus torulosa*	Mature	7	3	500					500	500	Good	Fair	Medium	3. Short	Z10	6.0	2.5	Reduce North side of crown by 200mm for fence.	Remove
47	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	5	2	400					400	400	Good	Fair	Low	5. Small/Young	Z1	4.8	2.3	Remove for fence installation.	Remove
48	Himalayan Cypress	*Cupressus torulosa*	Mature	10	3	580					580	620	Good	Good	Medium	1. Long	A1	7.0	2.7	Remove for fence installation.	Remove
60	Eucalypt	*Eucalyptus spp*	Mature	20	8	600					600	650	Good	Good	High	1. Long	A1	7.2	2.8	Could not access base of tree for fruit identification. To be protected.	Retain
61	Camphor Laurel	*Cinnamomum camphora*	Mature	16	9	1500					1500	1600	Good	Good	Medium	1. Long	A1	15.0	4.0	Crown raise North side of canopy to 5m. To be protected	Prune

Appendix 2 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m)	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes	Recommendations
62	Himalayan Cypress	*Cupressus torulosa*	Mature	13	4	600					600	620	Good	Good	Medium	1. Long	A1	7.2	2.7	Crown raise South side of canopy to 3m. To be protected	Prune
63	Lemon Scented Teatree	*Leptospermum petersonii*	Mature	7	4	200	300				361	450	Good	Fair	Medium	3. Short	Z10	4.3	2.4	Poor overall form. Remove for demolition.	Remove
74	Common Oak	*Quercus robur*	Mature	8	4	450					450	470	Good	Fair	Medium	2. Medium	A2	5.4	2.4	Located within corridor. Pruned for power line clearance.	Prune
75	Coral	*Erythrina crista-galli*	Mature	8	4	400					400	440	Good	Fair	Low	2. Medium	Z3	4.8	2.3	Located within corridor. Pruned for power lines. Exempt species.	Prune
81	Unknown	*Unknown spp*	Dead	4	1	150					150	150	Dead	Poor	Very Low	4. Remove	Z4	2.0	1.5	Dead tree. Branch extends into corridor.	Retain
81a	Tibouchina	*Tibouchina spp*	Young	3	1	80					80	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.	Retain
81b	Camellia	*Camellia spp*	Semi-mature	2	0.5	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy extends into corridor.	Retain
82	Weeping Fig	*Ficus benjamina*	Semi-mature	6	2	250					250	250	Good	Good	Low	5. Small/Young	Z1	3.0	1.8	Canopy extends into corridor.	Retain
115	Parramatta Wattle	*Acacia parramattensis*	Mature	9	3	180	180				255	350	Good	Fair	Medium	2. Medium	A1	3.1	2.1	Located within corridor. South stem lopped.	Prune
122	Black Tea-tree	*Melaleuca bracteata*	Mature	9	3	300	260				397	440	Good	Good	Medium	1. Long	A1	4.8	2.3	Canopy extends into corridor.	Remove
123	Weeping Bottlebrush	*Callistemon viminalis*	Mature	8	2	130	160	180			274	310	Good	Good	Medium	1. Long	A1	3.3	2.0	Canopy extends into corridor.	Remove
124	Black Tea-tree	*Melaleuca bracteata*	Mature	9	3	200	230	400			503	460	Good	Good	Medium	1. Long	A1	6.0	2.4	Canopy extends into corridor.	Remove
125	Blueberry Ash	*Elaeocarpus reticulatus*	Young	3	1	60					60	80	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy within nature strip only.	Remove
126	Blueberry Ash	*Elaeocarpus reticulatus*	Semi-mature	5	1	90	110				142	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy within nature strip only.	Retain
257	Blue Jacaranda	*Jacaranda mimosifolia*	Mature	8	4	180	200	300			403	450	Good	Fair	Medium	2. Medium	A1	4.8	2.4	Canopy extends into corridor.	Prune
287	Wattle	*Acacia spp*	Mature	5	2	190					190	200	Good	Fair	Low	3. Short	Z9	2.3	1.7	Located within corridor. Trunk lean into boundary fence.	Remove
288	Cheese Tree	*Glochidion ferdinandi*	Mature	5	3	450					450	450	Fair	Fair	Medium	3. Short	Z9	5.4	2.4	Located within corridor. Multi stem tree DBH measured at ground. Topped for power line clearance.	Remove
289	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	110					110	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Canopy within nature strip only.	Remove
292	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	2	120	100				156	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Canopy extends into corridor. Branch failure at 500mm to the south.	Retain
293	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	4	1	80	130				153	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Canopy within nature strip only.	Retain
294	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	250					250	250	Good	Fair	Low	5. Small/Young	Z1	3.0	1.8	Located within corridor. Multi stem tree DBH measured at ground.	Remove
295	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	3	1	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Located within corridor. Multi stem tree DBH measured at ground.	Remove
305	Wattle	*Acacia spp*	Dead	7	2	340					340	380	Dead	Poor	Low	4. Remove	Z4	4.1	2.2	Dead tree. Remove for compound works.	Remove
498	Sweetgum	*Liquidambar styraciflua*	Mature	9	4	500					500	540	Good	Fair	Low	2. Medium	Z3	6.0	2.6	Located within nature strip. Pruned for power lines. Exempt species.	Remove
503	She Oak	*Casuarina spp*	Mature	8	2	220					220	250	Good	Good	Medium	1. Long	A1	2.6	1.8	Located within corridor.	Retain
508	Parramatta Wattle	*Acacia parramattensis*	Young	3	1	100					100	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor.	Retain
509	Wattle	*Acacia spp*	Dead	6	2	280					280	300	Dead	Poor	Low	4. Remove	Z4	3.4	2.0	Dead tree	Retain
510	Parramatta Wattle	*Acacia parramattensis*	Mature	7	2	180					180	200	Good	Good	Medium	2. Medium	A1	2.2	1.7	Located within corridor.	Retain
605	Weeping Bottlebrush	*Callistemon viminalis*	Semi-mature	6	2	200	140				244	300	Good	Good	Medium	2. Medium	A1	2.9	2.0	None.	Remove
680	Lemon Scented Gum	*Corymbia citriodora*	Mature	17	5	370					370	450	Good	Good	High	1. Long	A1	4.4	2.4	Co-dominant stems with relatively good form to union.	Remove
681	Queensland Brushbox	*Lophostemon confertus*	Mature	9	6	660					660	720	Good	Good	High	1. Long	A1	7.9	2.9	None.	Remove
684	Sweet Pittosporum	*Pittosporum undulatum*	Semi-mature	4	2	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Located within corridor.	Prune
692	Peppercorn	*Schinus molle*	Mature	10	8	1050					1050	1200	Good	Good	Medium	1. Long	A1	12.6	3.6	Located within corridor.	Prune
693	Chinese Tallo	*Triadica sebifera*	Mature	5	2	160	160	160			277	450	Good	Good	Medium	2. Medium	A1	3.3	2.4	Located within corridor.	Remove
694	Chinese Tallo	*Triadica sebifera*	Mature	6	3	340					340	410	Good	Good	Medium	1. Long	A1	4.1	2.3	Located within corridor.	Remove
724	Queensland Brushbox	*Lophostemon confertus*	Mature	7	4	410					410	460	Good	Good	Medium	1. Long	A1	4.9	2.4	Located within corridor. DBH estimated.	Prune

3517	Golden Wreath Wattle	*Acacia saligna*	Semi-mature	4	1.5	140					140	160	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Prune	Prune
3518	Golden Wreath Wattle	*Acacia saligna*	Semi-mature	4	1	90					90	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Prune	Prune
3519	Golden Wreath Wattle	*Acacia saligna*	Semi-mature	3	1	40					40	50	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Prune	Prune
43a	Hackberry	*Celtis sinensis*	Semi-mature	4	2	200					200	200	Good	Fair	Very Low	5. Small/Young	Z3	2.4	1.7	Reduce North side of crown by 1m for fence.	Remove
43b	Japanese Camellia	*Camellia japonica*	Young	3	1	150					150	150	Good	Fair	Very Low	5. Small/Young	Z1	2.0	1.5	Reduce North side of crown by 200mm for fence.	Remove
54a	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	8	3	240					240	260	Good	Fair	Low	5. Small/Young	Z3	2.9	1.9	Reduce West side of lower crown by 1m.	Prune
61a	Norfolk Island Hibiscus	*Lagunaria patersonia*	Semi-mature	8	3	200					200	200	Good	Fair	Low	5. Small/Young	Z1	2.4	1.7	Reduce North side of lower crown by 1m.	Prune
63a	Broad-leaved Privet	*Ligustrum lucidum*	Young	6	2	180					180	200	Good	Fair	Very Low	5. Small/Young	Z3	2.2	1.7	Exempt species. Remove for demolition.	Remove
63b	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	9	2	100	100				141	200	Good	Fair	Very Low	5. Small/Young	Z1	2.0	1.7	Remove for demolition.	Remove
63c	Swamp Sheoak	*Casuarina glauca*	Young	7	1	50	50	50			87	150	Good	Fair	Very Low	5. Small/Young	Z1	2.0	1.5	Remove for demolition.	Remove
82a	Turpentine	*Syncarpia glomulifera*	Young	4	1	90					90	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located adjacent to council footpath.	Remove
G18	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	2	180					180	220	Good	Fair	Low	5. Small/Young	Z1	2.2	1.8	Group of approximately 46 trees. 100-200mm stem diameter.	Remove
G21	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	5	1	100					100	120	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.5	Group of approximately 13 trees.	Remove
G22	Wattle	*Acacia spp*	Semi-mature	5	1	100					100	150	Fair	Fair	Low	5. Small/Young	Z1	2.0	1.5	Group of approximately 80 trees. Overall condition of group is fair-poor.	Prune
G23	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	6	2	150					150	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	Group of approximately 20 trees within corridor. 12 trees to be removed.	Remove
G24	Mixed Species	*Mixed species*	Mature	6	2	200					200	250	Good	Fair	Low	2. Medium	Z3	2.4	1.8	Group of approximately 20 trees. Weed species exempt from protection including African Olive, Camphor Laurel, Privet, Lantana.	Remove
G27	Mixed Species	*Mixed species*	Young	2.5	1	100					100	150	Good	Fair	Very Low	5. Small/Young	Z3	2.0	1.5	Vegetation. Group of mixed species weeds	Prune

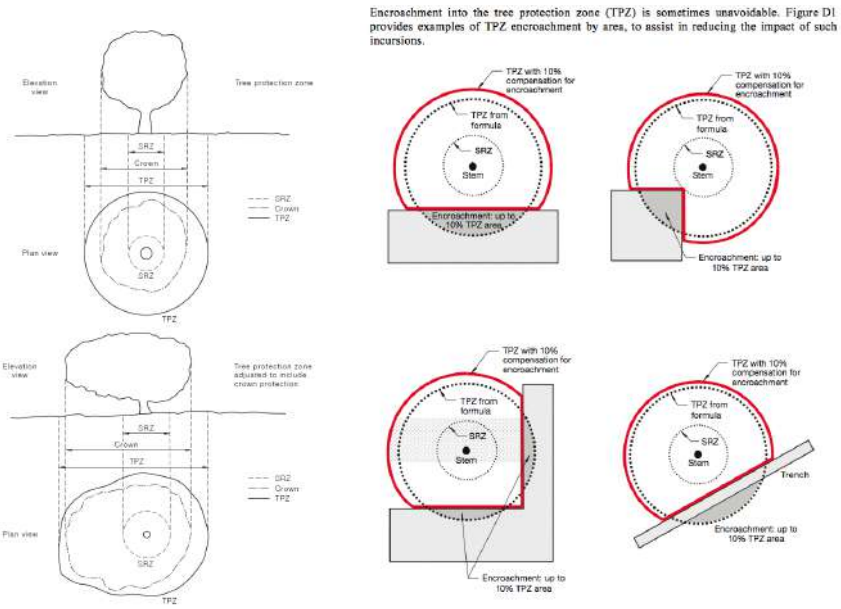

Appendix 2 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m)	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes	Recommendations
G28	Mixed Species	*Mixed species*	Semi-mature	10	3	250					250	300	Good	Fair	Low	5. Small/Young	Z1	3.0	2.0	Group of approximately 20 trees. Majoirty are weed species exempt from protection including African Olive. One Swamp Sheoak also within group.	Prune
G29	Golden Wreath Wattle	*Acacia saligna*	Young	4	1.5	110					110	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Prune	Prune
G30	Mixed Species	*Mixed species*	Young	3	1	100					100	100	Good	Fair	Very Low	5. Small/Young	Z1	2.0	1.5	Selective removal for CSR. Majority is vegetation.	Remove
G5a	Wattle	*Acacia spp*	Young	3	1	80					80	100	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located within corridor. Group of wattles. Approximately 5 individuals.	Remove
G6	Cheese Tree	*Glochidion ferdinandi*	Semi-mature	5	2	100	150				180	200	Good	Fair	Medium	3. Short	Z9	2.2	1.7	Group of trees located within corridor and on nature strip. All topped at 5m for power line clearance.	Remove

Explanatory Notes
Tree Species - Common name followed by botanical name. Where species is unknown it is indicated with an *'spp'*.
Age Class - Over mature (OM), Mature (M), Early mature (EM), Semi mature (SM), Young (Y).
Diameter at Breast Height (DBH) - Measured with a DBH tape or estimated at approximately 1.4m above ground level.
Diameter Above root Buttresses (DAB): Measured with a DBH tape or estimated above root buttresses (DAB) for calculating the SRZ.
Height - Height from ground level to top of crown. All heights are estimated unless otherwise indicated.
Spread - Radius of crown at widest section. All tree spreads are estimated unless otherwise indicated.
Tree Protection Zone (TPZ) - DBH x 12. Measured in radius from the centre of the trunk. Rounded to nearest 0.1m. For monocots, the TPZ is set at 1 metre outside the crown projection.
Structural Root Zone (SRZ) - $(DAB \times 50)^{0.42} \times 0.64$. Measured in radius from the centre of the trunk. Rounded up to nearest 0.1m.
Health - Good/Fair/Poor/Dead
Structure - Good/Fair/Poor
Safe Useful Life Expectancy (SULE) - 1. Long (40+years), 2. Medium (15 - 40 years), 3. Short (5 - 15 years), 4. Remove (under 5 years), 5. Small/young.
Amenity Value - Very High/High/Medium/Low/Very Low.
Retention Value: Tree AZ, see appendix 3 for categories.
Recommendations: Retain, Prune, Remove. See report for detailed information.

Appendix 3 - Further Information of Methodology

1. **Tree Protection Zone:** The tree protection zone (TPZ) is the principle means of protecting trees on development sites. The TPZ is a combination of the root area and crown area requiring protection. It is an area isolated from construction disturbance, so that the tree remains viable. The radius of the TPZ is calculated for each tree by multiplying its DBH x 12. The derived value is measured in radius from the centre of the stem/trunk at ground level. A TPZ should not be less than 2.0 metres nor greater than 15 metres (except where crown protection is required).
   It is commonly observed that tree roots will extend significant further than the indicative TPZ, however the TPZ is an area identified AS4970-2009 to be extent where root loss or disturbance will generally not impact the viability of the tree. The TPZ is identified as a restricted area to prevent damage to trees either above or below ground during a development. Where trees are intended to be retained proposed developments must provide an adequate TPZ around trees. The TPZ is set aside for the tree's root zone, trunk and crown and it is essential for the stability and longevity of the tree. The tree protection also incorporates the SRZ (see below for more information about the SRZ). I have calculated the TPZ of palms, other monocots, cycads and tree ferns at one metre outside the crown projection. See appendices for additional information about the TPZ including information about calculating the TPZ and examples of TPZ encroachment.
   Minor encroachment into TPZ: Sometimes encroachment into the TPZ is unavoidable. Encroachment includes but is not limited to activities such as excavation, compacted fill and machine trenching. Minor encroachment of up to 10% of the overall TPZ area is normally considered acceptable, providing there is space adjacent to the TPZ for the tree to compensate and the tree is displaying adequate vigour/health to tolerate changes to its growing environment.
   Major encroachment into TPZ: Where encroachment of more than 10% of the overall TPZ area is proposed the project Arborist must investigate and demonstrate that the tree will remain in a viable condition. In some cases, tree sensitive construction methods such as pier and beam footings, suspended slabs, or cantilevered sections, can be utilised to allow additional encroachment into the TPZ by bridging over roots and minimising root disturbance. Major encroachment is only possible if it can be undertaken without severing significant size roots, or if it can be demonstrated that significant roots will not be impacted.

2. **Structural Root Zone:** This is the area around the base of a tree required for the trees stability in the ground. An area larger than the SRZ always need to be maintained to preserve a viable tree as it will only have a minor effect on the trees vigour and health. There are several factors that determine the SRZ which include height, crown area, soil type and soil moisture. It can also be influenced by other factors such as natural or built structures. Generally work within the SRZ should be avoided.
   An indicative SRZ radius can be determined from the diameter of the trunk measured immediately above the root buttresses. Root investigation could provide more information about the extent of the SRZ. The following formula should be used to calculate the SRZ.
   SRZ radius = $(D \times 50)^{0.42} \times 0.64$ (D = Diameter above root buttress).

3. **Tree Age Class:** If can be difficult to determine the age of a tree without carrying out invasive tests that may damage the tree, so we have categorised there likely age class which is defined below;
   - Young/Newly planted: Young or recently planted tree.
   - Semi Mature: Up to 20% of the usual life expectancy for the species.
   - Early mature/Mature: Between 20%-80% of the usual life expectancy for the species.
   - Over mature: Over 80% of the usual life expectancy for the species.
   - Dead: Tree is dead or almost dead.

4. **Health/Physiological Condition:** Below are examples conditions used when assigning a category for tree health.

Category	Example condition	Summary
Good	• Crown has good foliage density for species. • Tree shows no or minimal signs of pathogens that are unlikely to have an effect on the health of the tree. • Tree is displaying good vigour and reactive growth development.	• The tree is in above average health and condition and no remedial works are required.
Fair	• The tree may be starting to dieback or have over 25% deadwood. • Tree may have slightly reduced crown density or thinning. • There may be some discolouration of foliage. • Average reactive growth development. • There may be early signs of pathogens which may further deteriorate the health of the tree. • There may be epicormic growth indicating increased levels of stress within the tree.	• The tree is in below average health and condition and may require remedial works to improve the trees health.
Poor	• The may be in decline, have extensive dieback or have over 30% deadwood. • The canopy may be sparse or the leaves may be unusually small for species. • Pathogens or pests are having a significant detrimental effect on the tree health.	• The tree is displaying low levels of health and removal or remedial works may be required.
Dead	• The tree is dead or almost dead.	• The tree should generally be removed.

5. **Structural Condition:** Below are examples conditions used when assigning a category for structural condition.

Category	Example condition	Summary
Good	• Branch unions appear to be strong with no sign of defects. • There are no significant cavities. • The tree is unlikely to fail in usual conditions. • The tree has a balanced crown shape and form.	• The tree is considered structurally good with well developed form.
Fair	• The tree may have minor structural defects within the structure of the crown that could potentially develop into more significant defects. • The tree may a cavity that is currently unlikely to fail but may deteriorate in the future. • The tree is an unbalanced shape or leans significantly. • The tree may have minor damage to its roots. • The root plate may have moved in the past but the tree has now compensated for this. • Branches may be rubbing or crossing.	• The identified defects are unlikely cause major failure. • Some branch failure may occur in usual conditions. • Remedial works can be undertaken to alleviate potential defects.
Poor	• The tree has significant structural defects. • Branch unions may be poor or weak. • The tree may have a cavity or cavities with excessive levels of decay that could cause catastrophic failure. • The tree may have root damage or is displaying signs of recent movement. • The tree crown may have poor weight distribution which could cause failure.	• The identified defects are likely to cause either partial or whole failure of the tree.

6. **Amenity Value:** To determine the amenity value of a tree we assess a number of different factors, which include but are not limited to the information below.
   - The visibility of the tree to adjacent sites.
   - The relationship between the tree and the site.
   - Whether the tree is protected by any statuary conditions.
   - The habitat value of the tree.
   - Whether the tree is considered a noxious weed species.

   The amenity value is rated using one of the following values.
   - Very High
   - High
   - Moderate
   - Low
   - Very Low

7. **Safe Useful Life Expectancy (SULE), (Barrel, 2001):** A trees safe useful life expectancy is determined by assessing a number of different factors including the health and vitality, estimated age in relation to expected life expectancy for the species, structural defects, and remedial works that could allow retention in the existing situation.

Category	Description
1. Long - Over 40 years	(a) Structurally sound trees located in positions that can accommodate future growth. (b) Trees that could be made suitable for retention in the long term by remedial tree care. (c) Trees of special significance for historical, commemorative or rarity reasons that would warrant extraordinary efforts to secure their long term retention.
2. Medium - 15 to 40 years	(a) Trees that may only live between 15 and 40 more years. (b) Trees that could live for more than 40 years but may be removed for safety or nuisance reasons. (c) Trees that could live for more than 40 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (d) Trees that could be made suitable for retention in the medium term by remedial tree care.
3. Short - 5 to 15 years	(a) Trees that may only live between 5 and 15 more years. (b) Trees that could live for more than 15 years but may be removed for safety or nuisance reasons. (c) Trees that could live for more than 15 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (d) Trees that require substantial remedial tree care and are only suitable for retention in the short term.
4. Remove - Under 5 years	(a) Dead, dying, suppressed or declining trees because of disease or inhospitable conditions. (b) Dangerous trees because of instability or recent loss of adjacent trees. (c) Dangerous trees because of structural defects including cavities, decay, included bark, wounds or poor form. (d) Damaged trees that are clearly not safe to retain. (e) Trees that could live for more than 5 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (f) Trees that are damaging or may cause damage to existing structures within 5 years. (g) Trees that will become dangerous after removal of other trees for the reasons given in (a) to (f). (h) Trees in categories (a) to (g) that have a high wildlife habitat value and, with appropriate treatment, could be retained subject to regular review.
5. Small/Young	(a) Small trees less than 5m in height. (b) Young trees less than 15 years old but over 5m in height. (c) Formal hedges and trees intended for regular pruning to artificially control growth.

8. **Root investigations:** The root investigations should identify roots greater than 30mm in diameter that are located along the edge of the structures footprint or in the location of footings. Root investigations must be carried out using non-invasive methods (manual excavations). Any excavations for the root investigations must carried out manually to avoid damaging the roots during excavations. Manual excavation may include the use of a high-pressure air/air knife, or a combination of high-pressure water and a vacuum device. When hand excavating carefully work around roots retaining as many as possible. Take care to not fray, wound, or cause damage to any roots during excavations as this may cause decay or infection from pathogens. It is essential that exposed roots are kept moist and the excavation back filled as soon as possible. The root investigations should be carried out by a qualified Arborist minimum AQF3. Once roots are exposed, a visual assessment can be carried out by a consulting Arborist to evaluate the potential impact of the proposed root loss on the health and stability of the tree. A root map/report should be prepared identifying the findings of investigations, including photographs as supporting evidence in the report.

9. **Retention Value:** The system I have used to award the retention value is Tree AZ. Tree AZ is used to identify higher value trees worthy of being a constraint to development and lower value trees that should generally not be a constraint to the development. The table below provides a brief description of each category.

TreeAZ Categories (Version 10.04-ANZ)

CAUTION: TreeAZ assessments must be carried out by a competent person qualified and experienced in arboriculture. The following category descriptions are designed to be a brief field reference and are not intended to be self-explanatory. They must be read in conjunction with the most current explanations published at www.TreeAZ.com.

Category Z: Unimportant trees not worthy of being a material constraint

Local policy exemptions: Trees that are unsuitable for legal protection for local policy reasons including size, proximity and species	
Z1	Young or insignificant small trees, i.e. below the local size threshold for legal protection, etc
Z2	Too close to a building, i.e. exempt from legal protection because of proximity, etc
Z3	Species that cannot be protected for other reasons, i.e. scheduled noxious weeds, out of character in a setting of acknowledged importance, etc
High risk of death or failure: Trees that are likely to be removed within 10 years because of acute health issues or severe structural failure	
Z4	Dead, dying, diseased or declining
Z5	Severe damage and/or structural defects where a high risk of failure cannot be satisfactorily reduced by reasonable remedial care, i.e. cavities, decay, included bark, wounds, excessive imbalance, overgrown and vulnerable to adverse weather conditions, etc
Z6	Instability, i.e. poor anchorage, increased exposure, etc
Excessive nuisance: Trees that are likely to be removed within 10 years because of unacceptable impact on people	
Z7	Excessive, severe and intolerable inconvenience to the extent that a locally recognized court or tribunal would be likely to authorize removal, i.e. dominance, debris, interference, etc
Z8	Excessive, severe and intolerable damage to property to the extent that a locally recognized court or tribunal would be likely to authorize removal, i.e. severe structural damage to surfacing and buildings, etc
Good management: Trees that are likely to be removed within 10 years through responsible management of the tree population	
Z9	Severe damage and/or structural defects where a high risk of failure can be temporarily reduced by reasonable remedial care, i.e. cavities, decay, included bark, wounds, excessive imbalance, vulnerable to adverse weather conditions, etc
Z10	Poor condition or location with a low potential for recovery or improvement, i.e. dominated by adjacent trees or buildings, poor architectural framework, etc
Z11	Removal would benefit better adjacent trees, i.e. relieve physical interference, suppression, etc
Z12	Unacceptably expensive to retain, i.e. severe defects requiring excessive levels of maintenance, etc

NOTE: Z trees with a high risk of death/failure (Z4, Z5 & Z6) or causing severe inconvenience (Z7 & Z8) at the time of assessment and need an urgent risk assessment can be designated as ZZ. ZZ trees are likely to be unsuitable for retention and at the bottom of the categorization hierarchy. In contrast, although Z trees are not worthy of influencing new designs, urgent removal is not essential and they could be retained in the short term, if appropriate.

Category A: Important trees suitable for retention for more than 10 years and worthy of being a material constraint

A1	No significant defects and could be retained with minimal remedial care
A2	Minor defects that could be addressed by remedial care and/or work to adjacent trees
A3	Special significance for historical, cultural, commemorative or rarity reasons that would warrant extraordinary efforts to retain for more than 10 years
A4	Trees that may be worthy of legal protection for ecological reasons (Advisory requiring specialist assessment)

NOTE: Category A1 trees that are already large and exceptional, or have the potential to become so with minimal maintenance, can be designated as AA at the discretion of the assessor. Although all A and AA trees are sufficiently important to be material constraints, AA trees are at the top of the categorization hierarchy and should be given the most weight in any selection process.

TreeAZ is designed by Barrell Tree Consultancy (www.barrelltreecare.co.uk) and is reproduced with their permission

URBAN ARBOR
The Trusted Name in Tree Management

Glossary of Terms

Abiotic - Pertaining to non-living agents; e.g. environmental factors

Adventitious shoots - Shoots that develop other than from apical, axillary or dormant buds; see also 'epicormic'

Anchorage - The system whereby a tree is fixed within the soil, involving cohesion between roots and soil and the development of a branched system of roots which withstands wind and gravitational forces transmitted from the aerial parts of the tree

Bark - A term usually applied to all the tissues of a woody plant lying outside the vascular cambium, thus including the phloem, cortex and periderm; occasionally applied only to the periderm or the phellem

Branch:
• **Primary**. A first order branch arising from a stem
• **Lateral**. A second order branch, subordinate to a primary branch or stem and bearing sub-lateral branches
• **Sub-lateral**. A third order branch, subordinate to a lateral or primary branch, or stem and usually bearing only twigs

Branch collar - A visible swelling formed at the base of a branch whose diameter growth has been disproportionately slow compared to that of the parent stem; a term sometimes applied also to the pattern of growth of the cells of the parent stem around the branch base

Brown-rot - A type of wood decay in which cellulose is degraded, while lignin is only modified

Buckling - An irreversible deformation of a structure subjected to a bending load

Buttress zone - The region at the base of a tree where the major lateral roots join the stem, with buttress-like formations on the upper side of the junctions

Cambium - Layer of dividing cells producing xylem (woody) tissue internally and phloem (bark) tissue externally

Canker - A persistent lesion formed by the death of bark and cambium due to colonisation by fungi or bacteria

Compartmentalisation - The confinement of disease, decay or other dysfunction within an anatomically discrete region of plant tissue, due to passive and/or active defences operating at the boundaries of the affected region

Compressive loading - Mechanical loading which exerts a positive pressure; the opposite to tensile loading

Condition - An indication of the physiological condition of the tree. Where the term 'condition' is used in a report, it should not be taken as an indication of the stability of the tree

Crown/Canopy - The main foliage bearing section of the tree

Crown lifting - The removal of limbs and small branches to a specified height above ground level

Crown thinning - The removal of a proportion of secondary branch growth throughout the crown to produce an even density of foliage around a well-balanced branch structure

Crown reduction/shaping - A specified reduction in crown size whilst preserving, as far as possible, the natural tree shape

DAB (Diameter Above Buttress) - Trunk diameter measured above the root buttress

Defect - In relation to tree hazards, any feature of a tree which detracts from the uniform distribution of mechanical stress, or which makes the tree mechanically unsuited to its environment

Dieback - The death of parts of a woody plant, starting at shoot-tips or root-tips

Disease - A malfunction in or destruction of tissues within a living organism, usually excluding mechanical damage; in trees, usually caused by pathogenic micro-organisms

Dominance - In trees, the tendency for a leading shoot to grow faster or more vigorously than the lateral shoots; also the tendency of a tree to maintain a taller crown than its neighbours

Dormant bud - An axial bud which does not develop into a shoot until after the formation of two or more annual wood increments; many such buds persist through the life of a tree and develop only if stimulated to do so

Dysfunction - In woody tissues, the loss of physiological function, especially water conduction, in sapwood

DBH (Diameter at Breast Height) - Stem diameter measured at a height of 1.4 metres or the nearest measurable point. Where measurement at a height of 1.4 metres is not possible, another height may be specified

Deadwood - Branch or stem wood bearing no live tissues. Retention of deadwood provides valuable habitat for a wide range of species and seldom represents a threat to the health of the tree. Removal of deadwood can result in the ingress of decay to otherwise sound tissues and climbing operations to access deadwood can cause significant damage to a tree. Removal of deadwood is generally recommended only where it represents an unacceptable level of hazard

Epicormic shoot - A shoot having developed from a dormant or adventitious bud and not having developed from a first year shoot

Flush-cut - A pruning cut which removes part of the branch bark ridge and or branch-collar

Girdling root - A root which circles and constricts the stem or roots possibly causing death of phloem and/or cambial tissue

Habit - The overall growth characteristics, shape of the tree and branch structure

Hazard beam - An upwardly curved part of a tree in which strong internal stresses may occur without being reduced by adaptive growth; prone to longitudinal splitting

Incorporating extracts from Lonsdale, D. 1999. Principles of Tree Hazard Assessment. Her Majesty's Stationary Office, London

URBAN ARBOR
The Trusted Name in Tree Management

Heartwood/false-heartwood - The dead central wood that has become dysfunctional as part of the aging processes and being distinct from the sapwood

Heave - A term mainly applicable to a shrinkable clay soil which expands due to re-wetting after the felling of a tree which was previously extracting moisture from the deeper layers; also the lifting of pavements and other structures by root diameter expansion; also the lifting of one side of a wind-rocked root-plate

Included bark (ingrown bark) - Bark of adjacent parts of a tree (usually forks, acutely joined branches or basal flutes) which is in face-to-face contact

Lever arm - A mechanical term denoting the length of the lever represented by a structure that is free to move at one end, such as a tree or an individual branch

Lignin - The hard, cement-like constituent of wood cells; deposition of lignin within the matrix of cellulose microfibrils in the cell wall is termed Lignification

Lions tailing - A term applied to a branch of a tree that has few if any side-branches except at its end, and is thus liable to snap due to end- loading

Loading - A mechanical term describing the force acting on a structure from a particular source; e.g. the weight of the structure itself or wind pressure

Mycelium - The body of a fungus, consisting of branched filaments (hyphae)

Occlusion - The process whereby a wound is progressively closed by the formation of new wood and bark around it

Pathogen - A micro-organism which causes disease in another organism

Photosynthesis - The process whereby plants use light energy to split hydrogen from water molecules, and combine it with carbon dioxide to form the molecular building blocks for synthesizing carbohydrates and other biochemical products

Probability - A statistical measure of the likelihood that a particular event might occur

Pruning - The removal or cutting back of twigs or branches, sometimes applied to twigs or small branches only, but often used to describe most activities involving the cutting of trees or shrubs

Radial - In the plane or direction of the radius of a circular object such as a tree stem

Reactive Growth/Reaction Wood - Production of woody tissue in response to altered mechanical loading; often in response to internal defect or decay and associated strength loss (cf. adaptive growth)

Ring-barking - The removal of a ring of bark and phloem around the circumference of a stem or branch, normally resulting in an inability to transport photosynthetic assimilates below the area of damage. Almost inevitably results in the eventual death of the affected stem or branch above the damage

Root-collar - The transitional area between the stem/s and roots

Sapwood - Living xylem tissues

Soft-rot - A kind of wood decay in which a fungus degrades cellulose within the cell walls, without any general degradation of the wall as a whole

Stem/s - Principle above-ground structural component(s) of a tree that supports its branches

Stress - In plant physiology, a condition under which one or more physiological functions are not operating within their optimum range, for example due to lack of water, inadequate nutrition or extremes of temperature

SRZ (Structural Root Zone) - The area around the base of the tree required for the trees stability in the ground

Subsidence - In relation to soil or structures resting in or on soil, a sinking due to shrinkage when certain types of clay soil dry out, sometimes due to extraction of moisture by tree roots

Taper - In stems and branches, the degree of change in girth along a given length

Targets - In tree risk assessment (with slight misuse of normal meaning) persons or property or other things of value which might be harmed by mechanical failure of the tree or by objects falling from it

Topping - In arboriculture, the removal of the crown of a tree, or of a major proportion of it

Transpiration - The evaporation of moisture from the surface of a plant, especially via the stomata of leaves; it exerts a suction which draws water up from the roots and through the intervening xylem cells

TPZ (Tree Protection Zone) - A specified area above and below ground and at a given distance from the trunk set aside for the protection of a tree's roots and crown to provide for the viability and stability of a tree to be retained where it is potentially subject to damage by development

Understory - This layer consists of younger individuals of the dominant trees, together with smaller trees and shrubs which are adapted to grow under lower light conditions

Veteran tree - Tree that, by recognised criteria, shows features of biological, cultural or aesthetic value that are characteristic of, but not exclusive to, individuals surviving beyond the typical age range for the species concerned. These characteristics might typically include a large girth, signs of crown retrenchment and hollowing of the stem

Vigour - The expression of carbohydrate expenditure to growth (in trees)

White-rot - A range of kinds of wood decay in which lignin, usually together with cellulose and other wood constituents, is degraded

Wind exposure - The degree to which a tree or other object is exposed to wind, both in terms of duration and velocity

Wind pressure - The force exerted by a wind on a particular object

Windthrow - The blowing over of a tree at its roots

Incorporating extracts from Lonsdale, D. 1999. Principles of Tree Hazard Assessment. Her Majesty's Stationary Office, London

URBAN ARBOR
The Trusted Name in Tree Management

1. INTRODUCTION

1.1 Urban Arbor have been instructed by Metron T2M to provide an Arboricultural Impact Assessment Report for trees located within the site and adjoining sites in relation to a proposed development.

1.2 Below is a list of all documents and information provided to Urban Arbor to assist in preparing this report.

A) Bankstown Station Civil Engineering General Arrangement Tree Survey, Metron T2M, SMCSWSWM-MTM-WBK-CE-SKG-PKG-000000, Including Pages 1-9, Rev A, 30 June 2021 (Appendix 1).
B) Landscape Design Package No. 521, Metron T2M, 18 December 2020, Stage 2, Including Page 1 - 49.
C) Landscape Design Package No. 521, Metron T2M, 18 December 2020, Stage 3 – Early Works, Including Page 1 - 25.
D) Detail Survey, Cardno, Including Sheet 1-28, 16 April 2020.

1.3 The trees were inspected on 22 - 24 January 2020. Access was available to the subject site and the adjoining public areas only. All tree data contained in this report was collected during these site inspections.

2. SCOPE OF THE REPORT

2.1 This report has been undertaken to meet the following objectives.

2.1.1 Conduct a visual assessment of all significant trees located within 10 metres of development works from ground level. For the purpose of this report, a significant tree is a tree with a height equal to or greater than 5 metres.

2.1.2 Determine the trees estimated contribution years and remaining, useful life expectancy and award the trees a retention value.

2.1.3 Provide an assessment of the potential impact the proposed development is likely to cause to the condition of the subject trees in accordance with AS4970 Protection of trees on development sites (2009).

2.1.4 Specify tree protection measures for trees to be retained in accordance with AS4970-2009.

URBAN ARBOR
The Trusted Name in Tree Management

3. LIMITATIONS

3.1 The observations and recommendations are based on the site inspections identified in the introduction (section 1) and the access available at the time of inspection. Findings of this report are based on the observations and site conditions at the time inspection.

3.2 All of the observations were carried out from ground level and none of the surrounding surfaces were lifted or removed during the inspection. No tests were carried out to the subject trees or surrounding area during the inspection.

3.3 Root decay can sometimes be present with no visual indication above ground. It is also impossible to know the extent of any root damage caused by mechanical damage such as underground root cutting during the installation of services without undertaking detailed root investigation. Any form of tree failure due to these activities is beyond the scope of this assessment.

3.4 The report reflects the subject tree(s) as found on the day of inspection. Any changes to the growing environment of the subject tree, or tree management works beyond those recommended in this report may alter the findings of the report. There is no warranty, expressed or implied, that problems or deficiencies relating to the subject tree, or subject site may not arise in the future.

3.5 Tree identification is based on accessible visual characteristics at the time of inspection. As key identifying features are not always available the accuracy of identification is not guaranteed. Where tree species is unknown, it is indicated with an *spp*.

3.6 All diagrams, plans and photographs included in this report are visual aids only, and are not to scale unless otherwise indicated.

3.7 Urban Arbor neither guarantees, nor is it responsible for, the accuracy of information provided by others that is contained within this report.

3.8 While an assessment of the subject trees estimated useful life expectancy is included in this report, no specific tree risk assessment has been undertaken for any of trees at the site.

3.9 The ultimate safety of any tree cannot be categorically guaranteed. Even trees apparently free of defects can collapse or partially collapse in extreme weather conditions. Trees are dynamic, biological entities subject to changes in their environment, the presence of pathogens and the effects of ageing. These factors reinforce the need for regular inspections. It is generally accepted that hazards can only be identified from distinct defects or from other failure-prone characteristics of a tree or its locality.

3.10 Alteration of this report invalidates the entire report.

URBAN ARBOR
The Trusted Name in Tree Management

4. METHODOLOGY

4.1 The following information was collected during the assessment of the subject tree(s).

4.1.1 Tree common name

4.1.2 Tree botanical name

4.1.3 Tree age class

4.1.4 DBH (Trunk/Stem diameter at breast height/1.4m above ground level) - millimetres.

4.1.5 Estimated height - metres

4.1.6 Estimated crown spread (diameter of crown) - metres

4.1.7 Health

4.1.8 Structural condition

4.1.9 Amenity value

4.1.10 Estimated remaining contribution years (SULE)[1]

4.1.11 Retention value (Tree AZ)[2]

4.1.12 Notes/comments

4.2 An assessment of the trees condition was made using the visual tree assessment (VTA) model (Mattheck & Breloer, 1994).[3]

4.3 Tree diameter was measured using a DBH tape or in some cases estimated. Tree height and tree canopy spread was measured with a clinometer or in some cases estimated. All other measurements were estimations unless otherwise stated. The other tools used during the assessment were a nylon mallet, compass, camera and a steel probe.

4.4 All information was imported into our computerised geographical information system (GIS) PT-mapper pro. This software was used to measure/calculate all encroachment estimates included in this report.

4.5 All DBH measurements, tree protection zones, and structural root zones were calculated in accordance with methods set out in AS4970 Protection of trees on development sites (2009) [4] and in some cases estimated. See appendices for information.

4.6 Details of how the observations in this report have been assessed are listed in the appendices.

URBAN ARBOR
The Trusted Name in Tree Management

5. SITE LOCATION AND BRIEF DESCRIPTION

5.1 The site is located in the suburb of Bankstown, New South Wales, which is located in the Canterbury Bankstown Local Government Area (LGA). Therefore, all trees at the site are subject to protection under the Bankstown Local Environmental Plan (LEP) 2015[5] and Development Control Plan (DCP) 2015.[6] The site has been identified as containing two heritage items (I3 and I4) in the LEP heritage maps.[7] None of the site is identified as 'biodiversity' in the Bankstown LEP biodiversity maps.[8]

6. GENERAL INFORMATION IN RELATION TO PROTECTING TREES ON DEVELOPMENT SITES

6.1 **Tree protection zone (TPZ):** The TPZ is the principle means of protecting trees on development sites and is an area required to maintain the viability of trees during development. It is commonly observed that tree roots will extend significantly further than the indicative TPZ, however the TPZ is an area identified in AS4970-2009 to be the area where root loss or disturbance will generally impact the viability of the tree. The TPZ is identified as a restricted area to prevent damage to trees either above or below ground during a development. Where trees are intended to be retained proposed developments must provide an adequate TPZ around trees. The TPZ is set aside for the tree's root zone, trunk and crown and it is essential for the stability and longevity of the tree. The TPZ also incorporates the SRZ (see below for more information about the SRZ). The TPZ is calculated by multiplying the DBH by twelve, with the exception of palms, other monocots, cycads and tree ferns, the TPZ of which have been calculated at one metre outside the crown projection. Additional information about the TPZ is included in appendix 3.

6.2 **Structural Root Zone (SRZ):** This is the area around the base of a tree required for the trees stability in the ground. An area larger than the SRZ always needs to be maintained to preserve a viable tree. The SRZ is calculated using the following formula; $(DAB \times 50)^{0.42} \times 0.64$. There are several factors that can vary the SRZ which include height, crown area, soil type and soil moisture. It can also be influenced by other factors such as natural or built structures. Generally, work within the SRZ should be avoided. Soil level changes should also generally be avoided inside the SRZ of trees to be retained. Palms, other monocots, cycads and tree ferns do not have an SRZ. See the appendices for more information about the SRZ.

URBAN ARBOR
The Trusted Name in Tree Management

6.3 **Minor encroachment into TPZ:** Sometimes encroachment into the TPZ is unavoidable. Encroachment includes but is not limited to activities such as excavation, compacted fill and machine trenching. Minor encroachment of up to 10% of the overall TPZ area is normally considered acceptable, providing there is space adjacent to the TPZ for the tree to compensate and the tree is displaying adequate vigour/health to tolerate changes to its growing environment.

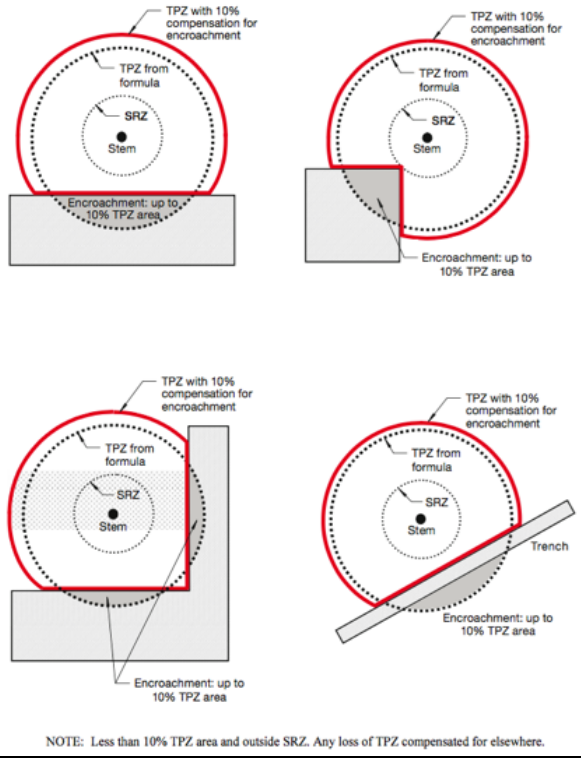

Image 1: Example minor TPZ encroachment from AS4970-2009.

6.4 **Major encroachment into TPZ:** Where encroachment of more than 10% of the overall TPZ area is proposed the project Arborist must investigate and demonstrate that the tree will remain in a viable condition. In some cases, tree sensitive construction methods such as pier and beam footings, suspended slabs, or cantilevered sections, can be utilised to allow additional encroachment into the TPZ by bridging over roots and minimising root disturbance. Major encroachment is only possible if it can be undertaken without severing significant size roots, or if it can be demonstrated that significant roots will not be impacted. Root investigations may be required to identify roots that will be impacted during major TPZ encroachment (see appendix 3 for more information in relation to root investigations).

URBAN ARBOR
The Trusted Name in Tree Management

7. OBSERVATIONS

7.1 **Tree information:** Details of each individual tree assessed, including the observations taken during the site inspection, can be found in the tree inspection schedule in appendix 1, where the indicative tree protection zone (TPZ) and Structural Root Zone (SRZ) has been calculated for each of the subject trees. The TPZ and SRZ should be measured in radius from the centre of the trunk. Each of the subject trees have been awarded a retention value based on the observations using the Tree AZ method. Tree AZ is used to identify higher value trees worthy of being a constraint to development and lower value trees that should generally not be a constraint to the development. The Tree AZ categories sheet (Barrell Tree Consultancy) has been included in appendix 2 to assist with understanding the retention values. The retention value that has been allocated to the subject trees in this report is not definitive and should only be used as a guideline.

7.2 **Site plans:** The location of all trees included in this report were surveyed by Cardno (registered surveyors). The information for all trees included in this report has been collected by Urban Arbor. The tree location and tree information has been overlaid onto the proposed site plans by Metron T2M. Urban Arbor has used the software PT-Mapper-Pro to calculate all TPZ encroachment areas and percentages discussed in this report. Please refer to Appendix 1 for the Bankstown Station Civil Engineering General Arrangement Tree Survey, Metron T2M, Including Pages 1-9, Rev A, 30 June 2021, for detailed site plans. The site plans include tree location/tree trunk, tree identification number, canopy spread, tree protection zone (TPZ) and Structural Root Zone (SRZ). An example of the tree information identified within the site plans has been included in Image 2 below:

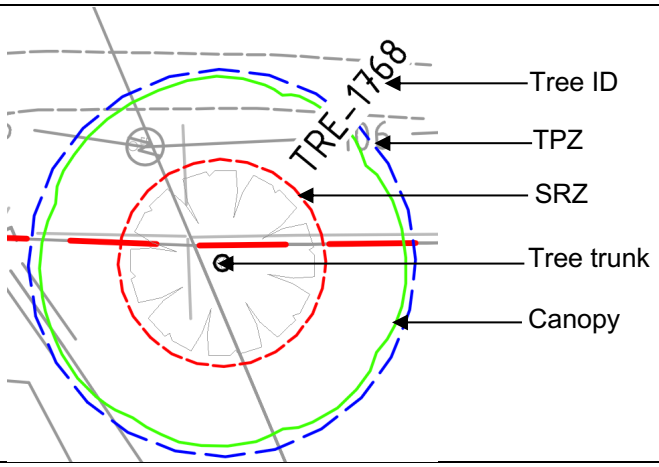

Image 2: Example of tree information identified within site plans.

8. ASSESSMENT OF CONSTRUCTION IMPACTS

8.1 Table 1: In the table below, the impact of the proposed development has been assessed for all trees included in the report. The assessed TPZ encroachments include proposed structures and hard landscaping only. All soft landscaping should be completed in accordance with section 11.10.

Tree ID	Species	Retention value	TPZ radius (m)	TPZ area (m^2)	SRZ radius (m)	TPZ encroachment	Discussion/ Conclusion	Recommendation
1433	*Eucalyptus microcorys*	A1	5.0	79.8	2.4	None	The tree is located outside the site boundary. No proposed TPZ encroachment.	Retain and protect

URBAN ARBOR
The Trusted Name in Tree Management

Tree ID	Species	Retention value	TPZ radius (m)	TPZ area (m^2)	SRZ radius (m)	TPZ encroachment	Discussion/ Conclusion	Recommendation
1672	*Ficus macrocarpa var. hillii*	A1	11.6	425.7	3.4	Major	The proposed CSR, security fencing and metro platform will encroach into the TPZ by 10% (43.4m^2) but not into the SRZ. This is considered to be a minor TPZ encroachment as a single component of the development. The adjacent tree (tree 1673) is located between the trunk of the tree and the majority of the area where the CSR, security fencing and metro platform are proposed. Tree 1673 is likely to have restricted significant root growth from tree 1672 into this area. Therefore, the proposed CSR, security fencing and metro platform will not significantly impact the tree. The proposed decking will encroach into the TPZ by an additional 58% (249m^2) and into the SRZ. This is considered to be a major TPZ encroachment and the proposed works could potentially impact the condition and stability of the tree. However, the decking will be a light elevated structure constructed on concrete pad footings. Minimal excavations will be required for the concrete pads (max 100mm below existing grades), therefore, the majority of the trees root system can be retained below the proposed structure. Areas of existing hard surfacing within the TPZ are also to be removed and replaced with the decking discussed above. The increase in permeable areas within the TPZ could potentially improve the condition of the tree due to the increased availability of water, nutrients and air to the trees root system. To ensure the tree can be retained in a viable condition, the proposed decking must be constructed in accordance with section 9.2 of this report.	Retain and protect*
1673	*Ficus macrocarpa var. hillii*	A1	8.4	221.7	3.2	Major	The proposed CSR, security fencing and metro platform will encroach into the TPZ by 34% (76.4m^2) and into the SRZ. The proposed decking will encroach into the TPZ by an additional 21% (45.5m^2) and into the SRZ. The total TPZ encroachment will be 55%. This is considered to be a major TPZ encroachment and the proposed works could potentially impact the condition and stability of the tree. Therefore, the tree will not be significantly impacted by the proposed development.	Retain and protect
1768	*Eucalyptus robusta*	A2	4.2	55.4	2.3	None	The tree is located outside the site boundary. No proposed TPZ encroachment.	Retain and protect
G17	*Acacia longifolia*	Z1	2.0	12.6	1.5	Footprint	Group of approximately 150 small trees. The majority of the trees will be located within the footprint of the proposed CSR and security fence construction.	Remove
1769	*Cinnamomum camphora*	Z3	2.0	12.6	1.8	Major	The proposed CSR and security fencing will encroach into the TPZ by 20% (2.5m^2) and into the SRZ. This is considered to be a major TPZ encroachment and the proposed works could potentially impact the condition and stability of the tree. The tree is recommended for removal due to impacts from the proposed development.	Remove
1770	*Triadica sebifera*	A1	2.9	26.1	2.1	None	The tree is located outside the site boundary. No proposed TPZ encroachment.	Retain and protect
1771	*Cinnamomum camphora*	Z3	3.6	40.7	2.0	Major	The proposed CSR and security fencing will encroach into the TPZ by 13% (5.3m^2) and into the SRZ. This is considered to be a major TPZ encroachment and the proposed works could potentially impact the condition and stability of the tree. The tree is an exempt species. The tree is recommended for removal due to impacts from the proposed development.	Remove
1772	*Acacia longifolia*	Z4	4.6	65.3	2.3	Footprint	The trunk of the tree is located within the footprint of the proposed CSR and security fence.	Remove

Notes

TPZ Encroachment Percentage: TPZ encroachment percentages are based on new structures and hard surfaces only. New soft landscaping, such as turf or amenity planting areas have not been included in the calculation for TPZ encroachment.
Retain and protect*: The proposed construction must be completed in accordance with section 9.2 to reduce the impact to the tree.

9. CONCLUSIONS

9.1 **Table 2:** Summary of the impact to trees during the development;

Impact	Reason	Category A	Category Z	Total
		A	Z	
Trees recommended to be removed	Building construction, new surfacing and/or proximity, or trees in poor condition.	1532, 1533, 1534, 1535, 1536, 1537, 1538, 1539, 1540, 1542, 1543, 1544, 1545, 1546, 1547, 1549, 1551, 1553, 1554, 1556, 1557, 1558, 1559, 1560, 1561, 1562, 1563, 1564, 1565, 1566, 1567, 1568, 1574, 1576, 1577, 1589, 1590, 1591, 1650, 1651, 1652, 1653, 1654, 1655, 1671, 1673, 1689	1555, 1541, 1548, 1550, 1552, 1575, 1578, 1579, 1580, 1638, 1659, 1660, 1661, 1662, 1663, 1664, 1665, 1666, 1667, 1668, 1669, 1670, 1679, 1687, 1688, 1692, 1693, 1702, 1703, 1740, 1741, 1742, 1743, 1755, G17, 1769, 1771, 1772	**84 trees & 1 group of trees**
Trees recommended to be retained requiring tree sensitive construction methods and/or design modifications	Removal of existing surfacing/structures and/or installation of new surfacing/structures may impact the viability of the trees	1569, 1647, 1658, 1672, 1753	1657	**6 trees**
Trees recommended to be retained	Removal of existing surfacing/structures and/or installation of new surfacing/structures will not impact the viability of the trees	1433, 1434, 1435, 1436, 1439, 1441, 1444, 1445, 1446, 1449, 1450, 1451, 1452, 1456, 1460, 1463, 1466, 1469, 1471, 1473, 1474, 1475, 1476, 1477, 1478, 1479, 1480, 1481, 1482, 1483, 1485, 1487, 1489, 1490, 1492, 1494, 1495, 1497, 1499, 1501, 1502, 1503, 1504, 1505, 1509, 1510, 1511, 1512, 1515, 1517, 1518, 1521, 1522, 1530, 1531, 1570, 1571, 1573, 1592, 1593, 1594, 1595, 1596, 1597, 1598, 1599, 1600, 1601, 1602, 1603, 1604, 1605, 1606, 1607, 1608, 1609, 1610, 1611, 1612, 1613, 1614, 1617, 1621, 1622, 1623, 1624, 1625, 1626, 1627, 1628, 1629, 1631, 1632, 1633, 1634, 1635, 1636, 1637, 1643, 1644, 1649, 1676, 1680, 1681, 1682, 1683, 1684, 1695, 1697, 1699, 1700, 1701, 1705, 1706, 1707, 1708, 1709, 1710, 1711, 1712, 1714, 1715, 1716, 1717, 1718, 1720, 1721, 1722, 1723, 1724, 1725, 1726, 1727, 1728, 1729, 1730, 1733, 1735, 1745, 1751, 1754, 1756, 1758, 1761, 1762, 1763, 1764, 1765, 1767, 1768, 1770	1437, 1438, 1440, 1442, 1443, 1447, 1448, 1453, 1454, 1455, 1457, 1458, 1459, 1461, 1462, 1464, 1465, 1467, 1468, 1470, 1472, 1484, 1486, 1488, 1491, 1493, 1496, 1498, 1500, 1506, 1507, 1508, 1513, 1514, 1516, 1519, 1520, 1523, 1524, 1525, 1526, 1527, 1528, 1529, 1572, 1581, 1582, 1583, 1584, 1585, 1586, 1587, 1588, 1615, 1616, 1618, 1619, 1620, 1630, 1639, 1640, 1641, 1642, 1645, 1646, 1648, 1656, 1674, 1675, 1677, 1678, 1685, 1686, 1690, 1691, 1694, 1696, 1698, 1704, 1713, 1719, 1731, 1732, 1734, 1736, 1737, 1738, 1739, 1744, G16, 1746, 1747, 1748, 1749, 1750, 1752, 1757, 1759, 1760, 1766	**250 trees & 1 group of trees**

9.2 **Construction Design/Specification Requirements for Tree 1569, 1647, 1657, 1658, 1672 and 1753:** The proposed construction will encroach into the TPZ of tree 1569, 1647, 1657, 1658 and 1753 by more than 10%. To ensure the trees are not adversely impacted by the construction, it must be demonstrated the following design and construction specifications can be implemented within the TPZ of the trees. If the construction cannot be completed in accordance with these specifications, the trees may not be viable for retention.

9.2.1 **Hard Surfacing – tree 1569, 1647, 1657 and 1658:** Areas of proposed hard surfacing will be replacing the existing hard surfacing. To ensure that tree root systems are not significantly impacted, the proposed hard surfacing must be constructed on or above the existing sub base of the existing hard surfacing. Where the proposed hard surfacing is located outside the footprint of the existing hard surfacing, it should be constructed above existing soil grades. Compaction of lowest sub base materials must be minimised, as this can cause soil compaction and impact the health of trees. The diagram below (Image A) gives an example of a no-dig method for constructing hard surfacing close to trees, retaining pegs avoiding significant roots.

If excavations are essential, they must not exceed 100mm below the existing grades. The excavations should be supervised by a project Arborist with a minimum AQF level 5 qualification. All excavations for the hard surfacing should be carried out manually to avoid impacting retained tree roots. All tree roots greater than 40mm in diameter should be retained, unless the project arborist has assessed and advised that the pruning/severing of the root will not impact the condition or stability of the tree. Manual excavation may include the use of pneumatic and hydraulic tools, high-pressure air or a combination of high-pressure water and a vacuum device.

Where tree roots greater than 40mm are encountered that must be retained, the hard surfacing should be elevated over the individual tree root to allow for its retention. Examples of methods that can be used to bridge individual tree roots have been included below (Image B and C). Using pier and beam bridges as per image C is the recommended/preferred method, as it will allow for future growth of the tree roots, reducing future damage to the hard surfacing from the roots.

URBAN ARBOR
The Trusted Name in Tree Management

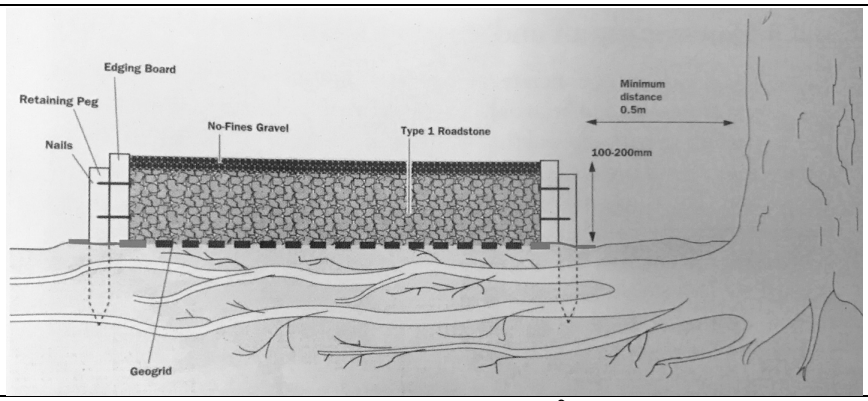

Image A: An image from 'Tree Roots in the Built Environment'[9], showing how to construct hard surfacing above a trees root system without excavation. Type 1 Roadstones are an example of blue metal or crushed sandstone.

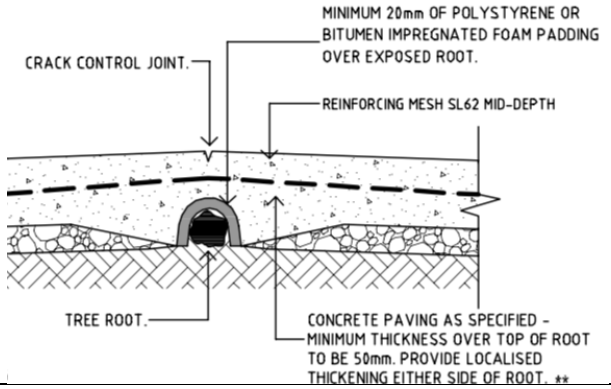

Image B: Example method for bridging concrete footpaths over tree roots provided in the Canterbury Bankstown Council standard drawings.[10]

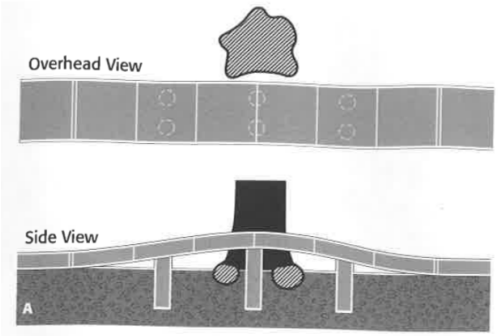

Image C: Example method from Reducing infrastructure damage by tree roots: A compendium of strategies.[11]

9 Roberts, J., Jackson, N., & Smith, M., *Tree Roots in the Built Environment*, The Stationary Office, London, England (2006). Page 305 & 306.

10 *Canterbury Bankstown Council standard drawing S-209 Existing street tree treatments*, https://www.cbcity.nsw.gov.au/development/planning-control-policies/council-standard-drawings, accessed 3 October 2019.

11 Costello, L. R., & Jones, K. S, *Reducing infrastructure damage by tree roots: A compendium of strategies*, Western Chapter of the International Society of Arboriculture, 31883 Success Valley Drive, Porterville, CA (2003), page 27.

9.2.2 **CSR and Security Fence – tree 1753:** The proposed CSR and security fence will be installed using the tree sensitive method of post and rail type construction. To ensure the tree is not significantly impacted by the works, all post holes must be excavated manually. The post location must be flexible to avoid the severance of significant roots 40mm and greater in diameter. No posts are to be located within the SRZ or root investigations will be required to determine the post location. See appendix 3 for more information in regards to root investigations. All rails/horizontal materials are to be located on or above existing soil grades. This will allow for the majority of the root system to be retained between the posts, minimising root loss. Any canopy pruning required for the installation of the proposed structures must be assessed by the project arborist and completed in accordance with AS4373 Pruning of amenity trees (2007).

9.2.3 **Timber Deck Construction Method – tree 1672:** To minimise the impact to tree 1672, the timber deck must be constructed in accordance with the following tree sensitive construction methods;

- All excavations for the concrete pad footings of the timber deck should be carried out manually under the supervision of the project arborist (see section 11 for more information).
- The location of the concrete pad footings for the deck should be flexible to avoid significant roots (roots greater than 40mm in diameter). Concrete pads should be located at minimum 100mm from retained roots that are greater than 40mm in diameter.
- All horizontal beams/joists are to be located on or above existing soil grades.
- To minimise the impact of reduced nutrient recycling in the TPZ, a layer of good quality composted mulch should be distributed below the deck to a depth of 75mm.
- The deck should be permeable to allow for the filtration of water to the root system below. The recommended spacing between the deck boards should be no less than 3mm to allow water to filter through.

The Trusted Name in Tree Management

10. RECOMMENDATIONS

10.1 This report assesses the impact of a proposed development at the subject site to three hundred and forty (340) trees and two (2) groups of trees located within the site and adjoining sites, in accordance with AS4970 Protection of trees on development sites (2009).

10.2 For site plans of tree locations, refer to Appendix 1 for the Bankstown Station Civil Engineering General Arrangement Tree Survey, Metron T2M, Including Pages 1-9, Rev A, 30 June 2021. See section 7.2 for more information.

10.3 Eighty-four (84) trees and one (1) group of trees have been recommended for removal within this report. Forty-seven (47) of these trees are higher value category A retention value trees. Thirty-seven (37) of these trees and one (1) group of trees are lower value category Z retention value trees. See section 9.1 table 2 for tree numbers within this category.

10.4 Six (6) trees have been identified that require tree sensitive construction methods to be retained in a viable condition, including tree 1569, 1647, 1657, 1658, 1672 and 1753. To retain the trees in a viable condition, the proposed construction within the TPZ of the trees must be completed in accordance with section 9.2 of this report.

10.5 The remaining two-hundred and fifty (250) trees and one (1) group of trees can be retained in a viable condition. See section 9.1 table 2 for tree numbers within this category.

10.6 All trees to be retained must be protected for the duration of development, (including demolition and landscaping, in accordance with AS4970-2009). Generic tree protection guidance has been provided in section 11.

10.7 This report does not provide approval for tree removal or pruning works. All recommendations in this report are subject to approval by the relevant authorities and/or tree owners. This report should be submitted as supporting evidence with any tree removal/pruning or development application.

URBAN ARBOR
The Trusted Name in Tree Management

11. TREE PROTECTION REQUIREMENTS

11.1 **Use of this report:** All contractors must be made aware of the tree protection requirements prior to commencing works at the site. This report and a copy of the site plan (Appendix 1) drawings must also be made available to any contractor prior to works commencing and during any on site operations.

11.2 **Project Arborist:** Prior to any works commencing at the site a project Arborist should be appointed. The project Arborist should be qualified to a minimum AQF level 5 and/or equivalent qualifications and experience and should assist with any development issues relating to trees that may arise. If at any time it is not feasible to carryout works in accordance with this, an alternative must be agreed in writing with the project Arborist.

11.3 **Tree work:** All tree work must be carried out by a qualified and experienced Arborist with a minimum of AQF level 2 in arboriculture, in accordance with NSW Work Cover Code of Practice for the Amenity Tree Industry (1998) and AS4373 Pruning of amenity trees (2007).

11.4 **Initial site meeting/on-going regular inspections:** The project Arborist is to hold a pre-construction site meeting with principal contractor to discuss methods and importance of tree protection measures and resolve any issues in relation to tree protection that may arise. In accordance with AS4970-2009, the project Arborist should carryout regular site inspections to ensure works are carried out in accordance with this document throughout the development process. Site inspections are recommended on a one-month frequency.

11.5 **Site Specific Tree Protection Recommendations:** Tree protection fencing should be located at the extent of the TPZ perimeter for all trees to be retained that are located within 10m of proposed works and construction traffic areas. Tree protection is to be specified and approved by the project arborist recommendations. All trees to be retained must be protected in accordance with general requirements of AS4970-2009 for the duration of the development, details of which are discussed in further details in this section of the report.

11.6 **Tree protection Specifications:** It is the responsibility of the principal contractor to install tree protection prior to works commencing at the site (prior to demolition works) and to ensure that the tree protection remains in adequate condition for the duration of the development. The tree protection must not be moved without prior agreement of the project Arborist. The project Arborist must inspect that the tree protection has been installed in accordance with this document and AS4970-2009 prior to works commencing.

11.6.1 Protective fencing: Site specific tree protection requirements are in section 11.5. Where it is not feasible to install fencing at the specified location due to factors such restricting access to areas of the site or for constructing new structures, an alternative location and protection specification must be agreed with the project Arborist. Where the installation of fencing in unfeasible due to restrictions on space, trunk and branch protection will be required (see below). The protective fencing must be constructed of 1.8 metre ‘cyclone chainmesh fence’. The fencing must only

be removed for the landscaping phase and must be authorised by the project Arborist. Any modifications to the fencing locations must be approved by the project Arborist.

11.6.2 TPZ signage: Tree protection signage is to be attached to the protective fencing, displayed in a prominent position and the sign repeated at 10 metres intervals or closer where the fence changes direction. Each sign shall contain in a clearly legible form, the following information:

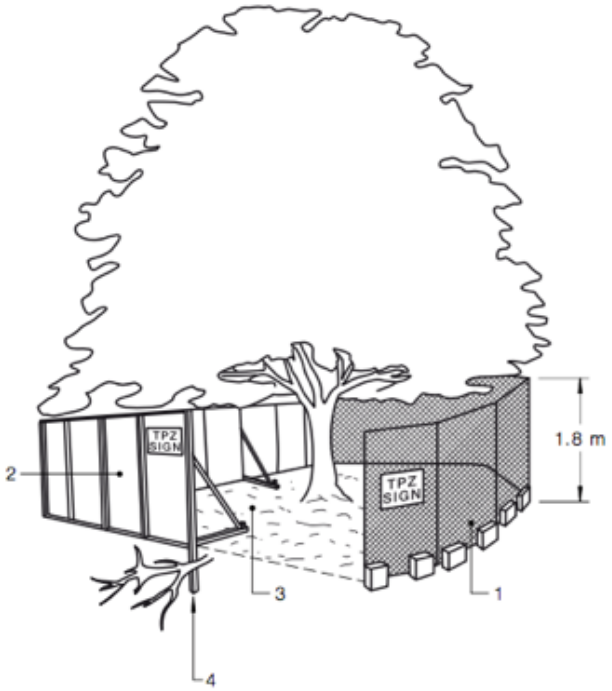

- Tree protection zone/No access.
- This fence has been installed to prevent damage to the tree/s and their growing environment both above and below ground. Do not move fencing or enter TPZ without the agreement of the project Arborist.
- The name, address, and telephone number of the developer/builder and project Arborist

11.6.3 Trunk and Branch Protection: The trunk must be protected by wrapped hessian or similar material to limit damage. Timber planks (50mm x 100mm or similar) should then be placed around tree trunk. The timber planks should be spaced at 100mm intervals and must be fixed against the trunk with tie wire, or strapping and connections finished or covered to protect pedestrians from injury. The hessian and timber planks must not be fixed to the tree in any instance. The trunk and branch protection shall be installed prior to any work commencing on site and shall be maintained in good condition for the entire development period.

11.6.4 Mulch: Any areas of the TPZ located inside the subject site (only trees to be retained directly adjacent to site works must be mulched to a depth of 75mm with good quality composted wood chip/leaf mulch.

11.6.5 Ground Protection: Ground protection is required to protect the underlying soil structure and root system in areas where it is not practical to restrict access to whole TPZ, while allowing space for construction. Ground protection must consist of good quality composted wood chip/leaf mulch to a depth of between 150-300mm, laid on top of geo textile fabric. If vehicles are to be using the area, additional protection will be required such as rumble boards or track mats to spread the weight of the vehicle and avoid load points. Ground protection is to be specified by the project Arborist as required.

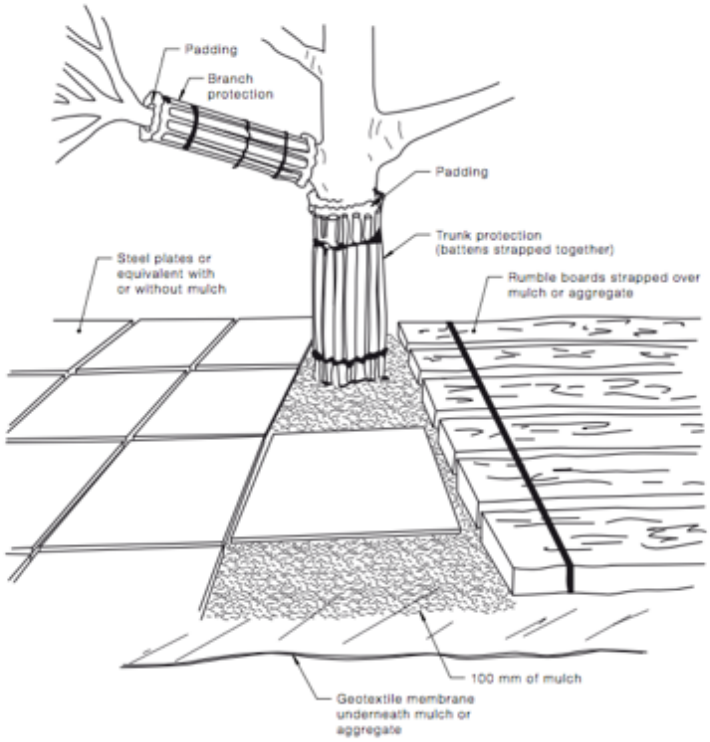

11.6.6 Temporary irrigation: Temporary irrigation should be set up in the TPZ of all trees to be retained and should distribute water evenly throughout the area of the TPZ. The irrigation should be used for at minimum one hour daily throughout all stages of the development.

LEGEND:
1 Chain wire mesh panels with shade cloth (if required) attached, held in place with concrete feet.
2 Alternative plywood or wooden paling fence panels. This fencing material also prevents building materials or soil entering the TPZ.
3 Mulch installation across surface of TPZ (at the discretion of the project arborist). No excavation, construction activity, grade changes, surface treatment or storage of materials of any kind is permitted within the TPZ.
4 Bracing is permissible within the TPZ. Installation of supports should avoid damaging roots.

An image from AS4970-2009,[12] with example tree protection.

[12] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009), page 16.

NOTES:

1 For trunk and branch protection use boards and padding that will prevent damage to bark. Boards are to be strapped to trees, not nailed or screwed.

2 Rumble boards should be of a suitable thickness to prevent soil compaction and root damage.

An image from AS4970-2009,[13] with example tree protection.

11.7 **Restricted activities inside TPZ:** The following activities must be avoided inside the TPZ of all trees to be retained unless approved by the project Arborist. If at any time these activities cannot be avoided an alternative must be agreed in writing with the project Arborist to minimise the impact to the tree.

A) Machine excavation.
B) Ripping or cultivation of soil.
C) Storage of spoil, soil or any such materials
D) Preparation of chemicals, including preparation of cement products.
E) Refueling.
F) Dumping of waste.
G) Wash down and cleaning of equipment.
H) Placement of fill.
I) Lighting of fires.
J) Soil level changes.
K) Any physical damage to the crown, trunk, or root system.
L) Parking of vehicles.

[13] Council Of Standards Australia, *AS4970 Protection of trees on development sites* (2009), page 17.

11.8 **Demolition:** The demolition of all existing structures inside or directly adjacent to the TPZ of trees to be retained must be undertaken in consultation with the project Arborist. Any machinery is to work from inside the footprint of the existing structures or outside the TPZ, reaching in to minimise soil disturbance and compaction. If it is not feasible to locate demolition machinery outside the TPZ of trees to be retained, ground protection will be required. The demolition should be undertaken inwards into the footprint of the existing structures, sometimes referred to as the 'top down, pull back' method.

11.9 **Excavations:** The project Arborist must supervise and certify that all excavations and root pruning are in accordance with AS4373-2007 and AS4970-2009. For continuous strip footings, first manual excavation is required along the edge of the structures closest to the subject trees. Manual excavation should be a depth of 1 metre (or to unfavourable root growth conditions such as bed rock or heavy clay, if agreed by project Arborist). Next roots must be pruned back in accordance with AS4373-2007. After all root pruning is completed, machine excavation is permitted within the footprint of the structure. For tree sensitive footings, such as pier and beam, all excavations inside the TPZ must be manual. Manual excavation may include the use of pneumatic and hydraulic tools, high-pressure air or a combination of high-pressure water and a vacuum device. No pruning of roots greater 30mm in diameter is to be carried out without approval of the project arborist. All pruning of roots greater than 30mm in diameter must be carried out by a qualified Arborist/Horticulturalist with a minimum AQF level 3. Root pruning is to be a clean cut with a sharp tool in accordance with AS4373 Pruning of amenity trees (2007).[14] The tree root is to be pruned back to a branch root if possible. Make a clean cut and leave as small a wound as possible.

11.10 **Landscaping:** All landscaping works within the TPZ of trees to be retained are to be undertaken in consultation with a consulting Arborist to minimise the impact to trees. General guidance is provided below to minimise the impact of new landscaping to trees to be retained.

- All excavations for landscaping works should be manual and in accordance with section 11.9.
- Replacement planting for all trees recommended for removal should be incorporated into the landscape plan. It is recommended that at minimum one tree for each tree proposed to be removed are planted to maintain/increase overall canopy cover at the site when mature. Any replacement tree must be selected in accordance with AS2303-2015 Tree stock for landscape use.
- The location of new plantings inside the TPZ of trees to be retained should be flexible to avoid unnecessary damage to tree roots greater than 40mm in diameter.

[14] Council Of Standards Australia, *AS 4373 Pruning of amenity trees* (2007) page 18

- Level changes should be minimised. The existing ground levels within the landscape areas should not be lowered by more than 50mm or increased by more 100mm without assessment by a consulting Arborist.
- New retaining walls should be avoided. Where new retaining walls are proposed inside the TPZ of trees to be retained, they should be constructed from tree sensitive material, such as timber sleepers, that require minimal footings/excavations. If brick retaining walls are proposed inside the TPZ, considerer pier and beam type footings to bridge significant roots that are critical to the trees condition. Retaining walls must be located outside the SRZ and sleepers/beams located above existing soil grades.
- New footpaths and hard surfaces should be minimised, as they can limit the availability of water, nutrients and air to the trees root system. Where they are proposed, they should be constructed on or above existing soil grades to minimise root disturbance and consider using a permeable surface. Footpaths should be located outside the SRZ.
- Where fill/sub base is used inside the TPZ, fill material should be a coarse granular material that does not restrict the flow of water and air to the root system below. This type of material will also reduce the impact of soil compaction during construction.
- Any new fencing in the TPZ of trees should constructed carefully to avoid impacting significant roots. The location of fence posts should be flexible to allow for the retention of root greater than 40mm in diameter. The base of fence panels should be located above existing soil grades.

11.11 **Underground Services:** Where possible underground services should be located outside the TPZ of trees to be retained. All underground services located inside the TPZ of any tree to be retained must be installed via tree sensitive techniques. This should include either directional drilling methods or manual excavations to minimise the impact to trees identified for retention. No roots greater than 30mm in diameter should be severed during the installation of service pipes unless approved in writing by the project Arborist.

11.12 **Sediment and Contamination:** All contamination run off from the development such as but not limited to concrete, sediment and toxic wastes must be prevented from entering the TPZ at all times.

11.13 **Tree Wounding/Injury:** Any wounding or injury that occurs to a tree during the construction process will require the project Arborist to be contacted for an assessment of the injury and provide mitigation/remediation advice. It is generally accepted that trees may take many years to decline and eventually die from root damage. All repair work is to be carried out by the project Arborist, at the contractor's expense.

11.14 **Completion of Development Works:** After all construction works are complete the project Arborist should assess that the subject trees have been retained in the same condition and vigour. If changes to condition are identified the project Arborist should provide recommendations for remediation.

URBAN ARBOR
The Trusted Name in Tree Management

12. CONSTRUCTION HOLD POINTS FOR TREE PROTECTION

12.1 **Hold Points:** Below is a sequence of hold points requiring project Arborist certification throughout the development process**.** It provides a list of hold points that must be checked and certified. All certification must be provided in written format upon completion of the development. The final certification must include details of any instructions for remediation undertaken during the development. The principal contractor should be responsible for implementing all tree protection requirements.

Hold Point	Stage	Date Completed and Signature of Project Arborist Responsible
Project Arborist to hold pre construction site meeting with principal contractor to discuss methods and importance of tree protection measures and resolve any issues in relation to feasibility of tree protection requirements that may arise. Project Arborist to mark all trees approved for removal under DA consent.	Prior to development work commencing	
Project Arborist to assess and certify that tree protection has been installed in accordance with AS4970-2009 prior to works commencing at site.	Prior to development work commencing.	
In accordance with AS4970-2009 the project arborist should carryout regular site inspections to ensure works are carried out in accordance with the recommendations. Site inspections are recommended on a monthly frequency.	On-going throughout the development	
The removal of existing structures inside the TPZ of any tree to be retained, such as the existing buildings and hard surfaces must be supervised by the project Arborist.	Demolition	
Project Arborist to supervise all manual excavations and root pruning inside the TPZ of any tree to be retained. Project Arborist to approve all pruning of roots greater than 30mm inside TPZ. All root pruning of roots greater than 30mm in diameter must be carried out by a qualified Arborist/Horticulturalist with a minimum AQF level 3.	Construction	
Project Arborist to certify that all underground services including storm water inside TPZ of any tree to be retained have been installed in accordance with AS4970-2009.	Construction	
All landscaping works within the TPZ of trees to be retained are to be undertaken in consultation with the project Arborist to minimise the impact to trees.	Construction/ Landscape	
After all demolition, construction and landscaping works are complete the project Arborist should assess that the subject trees have been retained in the same condition and vigour. If changes to condition are identified the project Arborist should provide recommendations for remediation.	Upon completion of development

Appendix 2 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m)	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
1433	Tallowood	*Eucalyptus microcorys*	Mature	18	4	420					420	480	Good	Good	High	1. Long	A1	5.0	2.4	Canopy extends into corridor.
1434	Tallowood	*Eucalyptus microcorys*	Mature	20	5	430					430	550	Good	Good	High	1. Long	A1	5.2	2.6	Canopy extends into corridor.
1435	Tallowood	*Eucalyptus microcorys*	Mature	16	4	350					350	440	Good	Good	High	1. Long	A1	4.2	2.3	Canopy extends into corridor.
1436	Tallowood	*Eucalyptus microcorys*	Semi-mature	11	3	230					230	350	Good	Good	Medium	1. Long	A1	2.8	2.1	Canopy extends into corridor.
1437	Grey Ironbark	*Eucalyptus paniculata*	Young	8	1	120					120	160	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	None.
1438	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	4	2	150	100				180	250	Good	Fair	Low	5. Small/Young	Z1	2.2	1.8	Located directly adjacent to fence.
1439	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Mature	19	6	350	480				594	850	Good	Good	Very High	1. Long	A1	7.1	3.1	Located adjacent to fence.
1440	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	5	2	120	50	50			139	300	Fair	Fair	Low	5. Small/Young	Z1	2.0	2.0	Growing through fence.
1441	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Semi-mature	9	2	180	200				269	400	Good	Good	Medium	1. Long	A1	3.2	2.3	None.
1442	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	6	2	120					120	180	Good	Fair	Low	5. Small/Young	Z1	2.0	1.6	None.
1443	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	7	2	110	150				186	350	Good	Fair	Low	5. Small/Young	Z1	2.2	2.1	Located adjacent to fence.
1444	Grey Ironbark	*Eucalyptus paniculata*	Mature	16	5	350	450				570	800	Good	Fair	High	2. Medium	A1	6.8	3.0	Located adjacent to fence. Co-dominant stems.
1445	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Mature	18	4	400					400	450	Good	Good	High	1. Long	A1	4.8	2.4	Located adjacent to fence.
1446	Tallowood	*Eucalyptus microcorys*	Mature	11	4	340					340	420	Good	Fair	Medium	2. Medium	A1	4.1	2.3	Co-dominant stems with tight union.
1447	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Young	6	1	120					120	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Co-dominant stems with tight union.
1448	Tallowood	*Eucalyptus microcorys*	Semi-mature	7	3	240					240	290	Fair	Poor	Medium	4. Remove	Z5	2.9	2.0	Root girdling and partial failure at base. Tree is potentially unstable.
1449	Tallowood	*Eucalyptus microcorys*	Mature	12	5	440					440	490	Good	Good	High	1. Long	A1	5.3	2.5	Canopy extends into corridor.
1450	Grey Ironbark	*Eucalyptus paniculata*	Mature	16	6	500					500	580	Good	Good	High	1. Long	A1	6.0	2.6	Located adjacent to fence.
1451	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Mature	15	5	450					450	550	Good	Good	High	1. Long	A1	5.4	2.6	Located adjacent to fence.
1452	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Mature	15	5	490					490	580	Good	Good	High	1. Long	A1	5.9	2.6	Located adjacent to fence.
1453	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	4	2	110	120	110	50	50	209	400	Good	Fair	Low	5. Small/Young	Z1	2.5	2.3	Located adjacent to fence.
1454	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	3	2	450					450	450	Good	Fair	Low	5. Small/Young	Z1	5.4	2.4	Multi stem tree. Located adjacent to fence.
1455	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	2	1	200					200	250	Good	Fair	Low	5. Small/Young	Z1	2.4	1.8	Located adjacent to fence.
1456	Broad leaved red Ironbark	*Eucalyptus fibrosa*	Mature	16	7	520	490				714	1100	Good	Good	High	1. Long	A1	8.6	3.4	Located adjacent to fence.
1457	Snow In Summer	*Melaleuca linarifolia*	Semi-mature	3	2	300					300	300	Good	Fair	Low	5. Small/Young	Z1	3.6	2.0	Located adjacent to fence.
1458	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	3	240					240	300	Fair	Fair	Low	5. Small/Young	Z1	2.9	2.0	Located adjacent to fence. Low foliage density for species.
1459	Sydney Golden Wattle	*Acacia longifolia*	Dead	5	3	300					300	300	Dead	Poor	Low	4. Remove	Z4	3.6	2.0	Dead tree.
1460	Tallowood	*Eucalyptus microcorys*	Mature	17	6	520					520	600	Good	Good	High	1. Long	A1	6.2	2.7	Canopy extends into corridor.
1461	Sydney Golden Wattle	*Acacia longifolia*	Mature	5	3	250					250	300	Poor	Fair	Low	4. Remove	Z4	3.0	2.0	In advanced stages of decline.
1462	Tallowood	*Eucalyptus microcorys*	Young	7	1	100					100	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located adjacent to fence.
1463	Tallowood	*Eucalyptus microcorys*	Semi-mature	10	2	230					230	280	Good	Good	Medium	1. Long	A1	2.8	1.9	Located adjacent to fence.
1464	Tallowood	*Eucalyptus microcorys*	Young	6	1	90					90	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1465	Tallowood	*Eucalyptus microcorys*	Young	5	1	100					100	120	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located adjacent to fence.
1466	Tallowood	*Eucalyptus microcorys*	Mature	16	5	500					500	600	Good	Good	High	1. Long	A1	6.0	2.7	Canopy extends into corridor.
1467	Tallowood	*Eucalyptus microcorys*	Young	5	1	120					120	150	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	None.

Appendix 2 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m)	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
1468	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	2	150					150	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Located adjacent to fence.
1469	Tallowood	*Eucalyptus microcorys*	Mature	17	6	560					560	650	Good	Good	High	1. Long	A1	6.7	2.8	Canopy extends into corridor.
1470	Sydney Golden Wattle	*Acacia longifolia*	Mature	7	3	240					240	300	Fair	Fair	Low	3. Short	Z4	2.9	2.0	Low foliage density for species. Suppressed. Low potential for recovery.
1471	Tallowood	*Eucalyptus microcorys*	Mature	21	7	700					700	850	Good	Good	High	1. Long	A1	8.4	3.1	Canopy extends into corridor.
1472	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	2	160					160	240	Good	Good	Low	5. Small/Young	Z1	2.0	1.8	Located adjacent to fence.
1473	Tallowood	*Eucalyptus microcorys*	Mature	19	7	690					690	770	Good	Good	High	1. Long	A1	8.3	3.0	Canopy extends into corridor.
1474	Sweet Pittosporum	*Pittosporum undulatum*	Mature	6	2	250					250	250	Good	Good	Medium	2. Medium	A1	3.0	1.8	DBH estimated.
1475	Tallowood	*Eucalyptus microcorys*	Mature	21	8	800					800	950	Good	Good	Very High	1. Long	A1	9.6	3.2	Canopy extends into corridor.
1476	Tallowood	*Eucalyptus microcorys*	Mature	22	8	750					750	850	Good	Good	High	1. Long	A1	9.0	3.1	Canopy extends into corridor.
1477	Tallowood	*Eucalyptus microcorys*	Mature	19	5	440					440	500	Good	Good	High	1. Long	A1	5.3	2.5	Existing drain restricting root growth patterns.
1478	Tallowood	*Eucalyptus microcorys*	Mature	24	9	900					900	1100	Good	Good	Very High	1. Long	A1	10.8	3.4	Canopy extends into corridor. Large diameter deadwood.
1479	Tallowood	*Eucalyptus microcorys*	Mature	18	4	350					350	450	Good	Good	High	1. Long	A1	4.2	2.4	None.
1480	Tallowood	*Eucalyptus microcorys*	Mature	20	4	400					400	490	Good	Good	High	1. Long	A1	4.8	2.5	None.
1481	Tallowood	*Eucalyptus microcorys*	Mature	21	8	780					780	900	Good	Good	High	1. Long	A1	9.4	3.2	Canopy extends into corridor.
1482	Tallowood	*Eucalyptus microcorys*	Mature	18	5	450					450	550	Good	Good	High	1. Long	A1	5.4	2.6	None.
1483	Tallowood	*Eucalyptus microcorys*	Mature	21	7	670					670	750	Good	Good	High	1. Long	A1	8.0	2.9	Canopy extends into corridor.
1484	Tallowood	*Eucalyptus microcorys*	Semi-mature	6	1	120					120	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Located adjacent to fence.
1485	Tallowood	*Eucalyptus microcorys*	Semi-mature	8	2	180					180	200	Good	Good	Medium	1. Long	A1	2.2	1.7	Located adjacent to fence.
1486	Tallowood	*Eucalyptus microcorys*	Young	6	1	100					100	140	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located adjacent to fence.
1487	Tallowood	*Eucalyptus microcorys*	Mature	20	7	680					680	750	Good	Good	High	1. Long	A1	8.2	2.9	Canopy extends into corridor.
1488	Tallowood	*Eucalyptus microcorys*	Young	5	1	100	100				141	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	None.
1489	Tallowood	*Eucalyptus microcorys*	Mature	17	4	420					420	460	Good	Good	High	1. Long	A1	5.0	2.4	Canopy extends into corridor.
1490	Tallowood	*Eucalyptus microcorys*	Mature	18	7	660					660	900	Good	Good	High	1. Long	A1	7.9	3.2	Canopy extends into corridor.
1491	Sydney Blue Gum	*Eucalyptus saligna*	Mature	16	7	220	200	250	220		446	1100	Good	Fair	High	3. Short	Z9	5.4	3.4	Regrowth from stump.
1492	Tallowood	*Eucalyptus microcorys*	Mature	19	7	670					670	850	Good	Good	High	1. Long	A1	8.0	3.1	Canopy extends into corridor.
1493	Tallowood	*Eucalyptus microcorys*	Semi-mature	5	2	150					150	200	Good	Good	Low	5. Small/Young	Z1	2.0	1.7	Located adjacent to fence.
1494	Tallowood	*Eucalyptus microcorys*	Semi-mature	10	2	320					320	400	Good	Fair	Medium	1. Long	A1	3.8	2.3	Located directly adjacent to fence.
1495	Sydney Blue Gum	*Eucalyptus saligna*	Mature	10	4	230	330				402	650	Good	Good	High	1. Long	A1	4.8	2.8	Canopy extends into corridor.
1496	Tallowood	*Eucalyptus microcorys*	Young	6	2	110					110	180	Good	Good	Low	5. Small/Young	Z1	2.0	1.6	None.
1497	Tallowood	*Eucalyptus microcorys*	Mature	11	3	200	220				297	500	Good	Fair	Medium	1. Long	A1	3.6	2.5	Located adjacent to fence.
1498	Grey Box	*Eucalyptus moluccana*	Young	6	1	100					100	120	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	None
1499	Grey Box	*Eucalyptus moluccana*	Semi-mature	12	2	210					210	260	Good	Good	Medium	1. Long	A1	2.5	1.9	None.
1500	Tallowood	*Eucalyptus microcorys*	Semi-mature	6	2	160					160	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	None.
1501	Tallowood	*Eucalyptus microcorys*	Mature	16	6	650					650	650	Good	Good	High	1. Long	A1	7.8	2.8	Canopy extends into corridor.
1502	Grey Gum	*Eucalyptus punctata*	Mature	21	6	580					580	650	Good	Good	High	1. Long	A1	7.0	2.8	Canopy extends into corridor.
1503	Tallowood	*Eucalyptus microcorys*	Mature	10	3	260					260	300	Good	Good	Medium	1. Long	A1	3.1	2.0	None.
1504	Grey Gum	*Eucalyptus punctata*	Mature	8	3	190	230				298	350	Good	Good	Medium	1. Long	A1	3.6	2.1	Located directly adjacent to fence.
1505	Grey Gum	*Eucalyptus punctata*	Mature	12	4	330					330	490	Good	Good	High	1. Long	A1	4.0	2.5	Canopy extends into corridor.
1506	Grey Gum	*Eucalyptus punctata*	Young	4	1	100					100	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Asymmetric crown shape.
1507	Tallowood	*Eucalyptus microcorys*	Semi-mature	6	2	130	110				170	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Co-dominant stems at ground.
1508	Sydney Green Wattle	*Acacia decurrens*	Semi-mature	4	1	80					80	100	Good	Good	Low	5. Small/Young	Z1	2.0	1.5	Located directly adjacent to fence.
1509	Tallowood	*Eucalyptus microcorys*	Mature	10	3	180	200				269	290	Good	Good	Medium	1. Long	A1	3.2	2.0	None.

Appendix 2 - Tree Inspection Schedule

Tree ID	Common Name	Botanical Name	Age Class	Height (m)	Canopy Spread Radius (m)	Stem 1	Stem 2	Stem 3	Stem 4	Stem 5	DBH (mm)	DAB (mm)	Health	Structure	Amenity Value	SULE	Retention Value	TPZ Radius (m)	SRZ Radius (m)	Notes
1510	Tallowood	*Eucalyptus microcorys*	Mature	15	4	350					350	400	Good	Good	High	1. Long	A1	4.2	2.3	Canopy extends into corridor.
1511	Tallowood	*Eucalyptus microcorys*	Semi-mature	14	3	240					240	290	Good	Fair	Medium	2. Medium	A1	2.9	2.0	Located adjacent to bridge.
1512	Tallowood	*Eucalyptus microcorys*	Mature	22	6	550					550	600	Good	Good	High	1. Long	A1	6.6	2.7	Canopy extends into corridor.
1513	Camphor Laurel	*Cinnamomum camphora*	Mature	9	5	600					600	680	Poor	Poor	Low	4. Remove	Z4	7.2	2.8	In advanced stages of decline. Exempt species.
1514	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	8	3	550					550	550	Poor	Poor	Low	5. Small/Young	Z4	6.6	2.6	In advanced stages of decline. Exempt species.
1515	Tallowood	*Eucalyptus microcorys*	Mature	18	6	550					550	650	Good	Good	High	1. Long	A1	6.6	2.8	Canopy extends into corridor.
1516	Camphor Laurel	*Cinnamomum camphora*	Mature	6	4	500					500	550	Poor	Poor	Low	4. Remove	Z4	6.0	2.6	In advanced stages of decline. Exempt species.
1517	Tallowood	*Eucalyptus microcorys*	Mature	19	5	480					480	550	Good	Good	High	1. Long	A1	5.8	2.6	Canopy extends into corridor.
1518	Swamp Oak	*Casuarina glauca*	Mature	15	3	320					320	440	Good	Good	Medium	1. Long	A1	3.8	2.3	None.
1519	Swamp Oak	*Casuarina glauca*	Semi-mature	6	1	110					110	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1520	Swamp Oak	*Casuarina glauca*	Semi-mature	7	1	110					110	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	None.
1521	Queensland Brushbox	*Lophostemon confertus*	Semi-mature	10	3	300					300	400	Good	Good	Medium	1. Long	A1	3.6	2.3	Located directly adjacent to fence.
1522	Tallowood	*Eucalyptus microcorys*	Mature	17	5	440					440	520	Good	Good	High	1. Long	A1	5.3	2.5	None.
1523	Camphor Laurel	*Cinnamomum camphora*	Mature	6	3	500					500	550	Fair	Fair	Low	3. Short	Z3	6.0	2.6	Located directly adjacent to fence. Exempt species.
1524	Camphor Laurel	*Cinnamomum camphora*	Mature	8	4	650					650	800	Fair	Fair	Low	3. Short	Z3	7.8	3.0	Located adjacent to fence. Exempt species.
1525	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	300					300	300	Good	Fair	Low	3. Short	Z3	3.6	2.0	Located adjacent to fence. Exempt species.
1526	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	200	250				320	400	Good	Fair	Low	2. Medium	Z3	3.8	2.3	Located adjacent to fence. Exempt species.
1527	Camphor Laurel	*Cinnamomum camphora*	Mature	6	3	500					500	500	Good	Fair	Low	2. Medium	Z3	6.0	2.5	Located adjacent to fence. Exempt species.
1528	Camphor Laurel	*Cinnamomum camphora*	Mature	6	4	400	250				472	580	Good	Fair	Low	5. Small/Young	Z3	5.7	2.6	Located adjacent to fence. Exempt species.
1529	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	110	110	110	110		220	350	Good	Fair	Low	5. Small/Young	Z3	2.6	2.1	Located adjacent to fence. Exempt species.
1530	Forest Red Gum	*Eucalyptus tereticornis*	Mature	25	7	650					650	890	Good	Fair	Very High	2. Medium	A2	7.8	3.2	Wound on trunk at 3m with fungal bracket (Phellinus spp). Extent of decay is unknown.
1531	Broad Leaved Paperbark	*Melaleuca quinquenervia*	Mature	15	6	1000					1000	1000	Good	Good	High	1. Long	A1	12.0	3.3	Canopy extends into corridor.
1532	Tallowood	*Eucalyptus microcorys*	Mature	24	5	450					450	500	Good	Good	High	1. Long	A1	5.4	2.5	DBH estimated.
1533	Tallowood	*Eucalyptus microcorys*	Mature	25	5	450					450	500	Good	Good	High	1. Long	A1	5.4	2.5	None.
1534	Tallowood	*Eucalyptus microcorys*	Mature	25	6	700					700	740	Good	Good	High	1. Long	A1	8.4	2.9	DBH estimated.
1535	Tallowood	*Eucalyptus microcorys*	Mature	14	4	320					320	400	Good	Good	High	1. Long	A1	3.8	2.3	None.
1536	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Mature	10	2	350					350	400	Good	Good	High	1. Long	A1	4.2	2.3	None.
1555	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Semi-mature	6	2	200					200	250	Good	Fair	Medium	3. Short	Z10	2.4	1.8	Suppressed. Bird nest in canopy.
1537	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Mature	10	3	340					340	480	Good	Good	High	1. Long	A1	4.1	2.4	None.
1538	Tallowood	*Eucalyptus microcorys*	Mature	20	6	550					550	650	Good	Good	High	1. Long	A1	6.6	2.8	Located adjacent to fence.
1539	Prickly Leaved Paperbark	*Melaleuca styphelioides*	Mature	6	3	350					350	420	Good	Good	Medium	1. Long	A1	4.2	2.3	None.
1540	Tallowood	*Eucalyptus microcorys*	Mature	24	7	500	480	300			755	1200	Good	Good	High	1. Long	A1	9.1	3.6	Multi stem tree.
1541	Smooth Barked Apple	*Angophora costata*	Mature	16	6	550					550	620	Fair	Fair	High	3. Short	Z4	6.6	2.7	Located adjacent to fence. Low foliage density for species with apical dieback. In decline.
1542	Sydney Blue Gum	*Eucalyptus saligna*	Mature	28	6	570					570	750	Good	Fair	High	2. Medium	A1	6.8	2.9	Multiple wounds on trunk.
1543	Spotted Gum	*Corymbia maculata*	Semi-mature	9	3	280					280	380	Good	Fair	Medium	2. Medium	A1	3.4	2.2	Deadwood through lower crown. Bulging at base.
1544	Tallowood	*Eucalyptus microcorys*	Mature	20	4	350					350	490	Good	Good	High	1. Long	A1	4.2	2.5	None.
1545	Tallowood	*Eucalyptus microcorys*	Mature	20	5	440					440	530	Good	Fair	High	2. Medium	A1	5.3	2.5	Asymmetric crown shape.
1546	Tallowood	*Eucalyptus microcorys*	Mature	24	6	570					570	650	Good	Good	High	1. Long	A1	6.8	2.8	Co-dominant stems at 3m.
1547	Spotted Gum	*Corymbia maculata*	Mature	18	4	360					360	440	Good	Good	High	1. Long	A1	4.3	2.3	Located adjacent to fence.
1548	White Cedar	*Melia azedarach*	Semi-mature	6	2	110	120	60	60	60	193	350	Good	Good	Low	5. Small/Young	Z1	2.3	2.1	Located adjacent to fence.
1549	Tallowood	*Eucalyptus microcorys*	Mature	19	7	430	330				542	730	Good	Good	High	1. Long	A1	6.5	2.9	Co-dominant stems at 1m.

1759	Wattle	*Acacia spp*	Semi-mature	4	2	150					150	200	Good	Fair	Low	5. Small/Young	Z1	2.0	1.7	Suppressed.
1760	Monterey Pine	*Pinus radiata*	Mature	17	5	600					600	650	Good	Good	Medium	2. Medium	Z3	7.2	2.8	Located in adjoining property. DBH estimated. Exempt species.
1761	Swamp Mahogany	*Eucalyptus robusta*	Mature	11	6	640					640	800	Good	Fair	High	2. Medium	A2	7.7	3.0	Pruned for power line clearance.
1762	Canary Palm	*Phoenix canariensis*	Mature	8	2	450					450	NA	Good	Good	Medium	1. Long	A1	3.0	NA	Located directly adjacent to fence.
1763	Swamp Mahogany	*Eucalyptus robusta*	Mature	12	7	660					660	820	Good	Fair	High	2. Medium	A2	7.9	3.0	Pruned for power line clearance.
1764	Wattle	*Acacia spp*	Mature	8	2	150					150	180	Good	Good	Medium	2. Medium	A1	2.0	1.6	Located in adjoining property. DBH estimated.
1765	Swamp Mahogany	*Eucalyptus robusta*	Mature	11	6	760					760	910	Good	Fair	Very High	2. Medium	A2	9.1	3.2	Pruned for power line clearance.
1766	Indian Coral	*Erythrina x sykesii*	Mature	9	4	330	290				439	550	Good	Fair	Low	2. Medium	Z3	5.3	2.6	Located in adjoining property. DBH estimated. Exempt species.
1767	Swamp Mahogany	*Eucalyptus robusta*	Mature	12	9	950					950	1100	Good	Fair	Very High	2. Medium	A1	11.4	3.4	Pruned for power line clearance.
1768	Swamp Mahogany	*Eucalyptus robusta*	Mature	9	4	350					350	400	Good	Fair	High	2. Medium	A2	4.2	2.3	Pruned for power line clearance.
G17	Sydney Golden Wattle	*Acacia longifolia*	Semi-mature	6	2	100					100	150	Good	Fair	Low	5. Small/Young	Z1	2.0	1.5	Group of approximately 150 small trees.
1769	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	6	2	110	100				149	220	Good	Fair	Low	5. Small/Young	Z3	2.0	1.8	Exempt species.
1770	Chinese Tallo	*Triadica sebifera*	Mature	9	2	240					240	320	Good	Fair	Medium	2. Medium	A1	2.9	2.1	Growing directly adjacent and through fence.
1771	Camphor Laurel	*Cinnamomum camphora*	Semi-mature	5	2	300					300	300	Good	Fair	Low	5. Small/Young	Z3	3.6	2.0	Exempt species. DBH estimated at base.
1772	Sydney Golden Wattle	*Acacia longifolia*	Mature	6	2	380					380	400	Poor	Fair	Low	4. Remove	Z4	4.6	2.3	Advanced stages of decline.

Explanatory Notes

Tree Species - Common name followed by botanical name. Where species is unknown it is indicated with an *'spp'*.
Age Class - Over mature (OM), Mature (M), Early mature (EM), Semi mature (SM), Young (Y).
Diameter at Breast Height (DBH) - Measured with a DBH tape or estimated at approximately 1.4m above ground level.
Diameter Above root Buttresses (DAB): Measured with a DBH tape or estimated above root buttresses (DAB) for calculating the SRZ.
Height - Height from ground level to top of crown. All heights are estimated unless otherwise indicated.
Spread - Radius of crown at widest section. All tree spreads are estimated unless otherwise indicated.
Tree Protection Zone (TPZ) - DBH x 12. Measured in radius from the centre of the trunk. Rounded to nearest 0.1m. For monocots, the TPZ is set at 1 metre outside the crown projection.
Structural Root Zone (SRZ) - $(DAB \times 50)^{0.42} \times 0.64$. Measured in radius from the centre of the trunk. Rounded up to nearest 0.1m.
Health - Good/Fair/Poor/Dead
Structure - Good/Fair/Poor
Safe Useful Life Expectancy (SULE) - 1. Long (40+years), 2. Medium (15 - 40 years), 3. Short (5 - 15 years), 4. Remove (under 5 years), 5. Small/young.
Amenity Value - Very High/High/Medium/Low/Very Low.
Retention Value: Tree AZ, see appendix 3 for categories.

Appendix 3 - Further Information of Methodology

1. **Tree Protection Zone:** The tree protection zone (TPZ) is the principle means of protecting trees on development sites. The TPZ is a combination of the root area and crown area requiring protection. It is an area isolated from construction disturbance, so that the tree remains viable. The radius of the TPZ is calculated for each tree by multiplying its DBH x 12. The derived value is measured in radius from the centre of the stem/trunk at ground level. A TPZ should not be less than 2.0 metres nor greater than 15 metres (except where crown protection is required).
It is commonly observed that tree roots will extend significant further than the indicative TPZ, however the TPZ is an area identified AS4970-2009 to be extent where root loss or disturbance will generally not impact the viability of the tree. The TPZ is identified as a restricted area to prevent damage to trees either above or below ground during a development. Where trees are intended to be retained proposed developments must provide an adequate TPZ around trees. The TPZ is set aside for the tree's root zone, trunk and crown and it is essential for the stability and longevity of the tree. The tree protection also incorporates the SRZ (see below for more information about the SRZ). I have calculated the TPZ of palms, other monocots, cycads and tree ferns at one metre outside the crown projection. See appendices for additional information about the TPZ including information about calculating the TPZ and examples of TPZ encroachment.
Minor encroachment into TPZ: Sometimes encroachment into the TPZ is unavoidable. Encroachment includes but is not limited to activities such as excavation, compacted fill and machine trenching. Minor encroachment of up to 10% of the overall TPZ area is normally considered acceptable, providing there is space adjacent to the TPZ for the tree to compensate and the tree is displaying adequate vigour/health to tolerate changes to its growing environment.
Major encroachment into TPZ: Where encroachment of more than 10% of the overall TPZ area is proposed the project Arborist must investigate and demonstrate that the tree will remain in a viable condition. In some cases, tree sensitive construction methods such as pier and beam footings, suspended slabs, or cantilevered sections, can be utilised to allow additional encroachment into the TPZ by bridging over roots and minimising root disturbance. Major encroachment is only possible if it can be undertaken without severing significant size roots, or if it can be demonstrated that significant roots will not be impacted.

2. **Structural Root Zone:** This is the area around the base of a tree required for the trees stability in the ground. An area larger than the SRZ always need to be maintained to preserve a viable tree as it will only have a minor effect on the trees vigour and health. There are several factors that determine the SRZ which include height, crown area, soil type and soil moisture. It can also be influenced by other factors such as natural or built structures. Generally work within the SRZ should be avoided.
An indicative SRZ radius can be determined from the diameter of the trunk measured immediately above the root buttresses. Root investigation could provide more information about the extent of the SRZ. The following formula should be used to calculate the SRZ.
SRZ radius = $(D \times 50)^{0.42} \times 0.64$ (D = Diameter above root buttress).

3. **Tree Age Class:** If can be difficult to determine the age of a tree without carrying out invasive tests that may damage the tree, so we have categorised there likely age class which is defined below;
    - Young/Newly planted: Young or recently planted tree.
    - Semi Mature: Up to 20% of the usual life expectancy for the species.
    - Early mature/Mature: Between 20%-80% of the usual life expectancy for the species.
    - Over mature: Over 80% of the usual life expectancy for the species.
    - Dead: Tree is dead or almost dead.

4. **Health/Physiological Condition:** Below are examples conditions used when assigning a category for tree health.

Category	Example condition	Summary
Good	• Crown has good foliage density for species. • Tree shows no or minimal signs of pathogens that are unlikely to have an effect on the health of the tree. • Tree is displaying good vigour and reactive growth development.	• The tree is in above average health and condition and no remedial works are required.
Fair	• The tree may be starting to dieback or have over 25% deadwood. • Tree may have slightly reduced crown density or thinning. • There may be some discolouration of foliage. • Average reactive growth development. • There may be early signs of pathogens which may further deteriorate the health of the tree. • There may be epicormic growth indicating increased levels of stress within the tree.	• The tree is in below average health and condition and may require remedial works to improve the trees health.
Poor	• The may be in decline, have extensive dieback or have over 30% deadwood. • The canopy may be sparse or the leaves may be unusually small for species. • Pathogens or pests are having a significant detrimental effect on the tree health.	• The tree is displaying low levels of health and removal or remedial works may be required.
Dead	• The tree is dead or almost dead.	• The tree should generally be removed.

5. **Structural Condition:** Below are examples conditions used when assigning a category for structural condition.

Category	Example condition	Summary
Good	• Branch unions appear to be strong with no sign of defects. • There are no significant cavities. • The tree is unlikely to fail in usual conditions. • The tree has a balanced crown shape and form.	• The tree is considered structurally good with well developed form.
Fair	• The tree may have minor structural defects within the structure of the crown that could potentially develop into more significant defects. • The tree may a cavity that is currently unlikely to fail but may deteriorate in the future. • The tree is an unbalanced shape or leans significantly. • The tree may have minor damage to its roots. • The root plate may have moved in the past but the tree has now compensated for this. • Branches may be rubbing or crossing.	• The identified defects are unlikely cause major failure. • Some branch failure may occur in usual conditions. • Remedial works can be undertaken to alleviate potential defects.
Poor	• The tree has significant structural defects. • Branch unions may be poor or weak. • The tree may have a cavity or cavities with excessive levels of decay that could cause catastrophic failure. • The tree may have root damage or is displaying signs of recent movement. • The tree crown may have poor weight distribution which could cause failure.	• The identified defects are likely to cause either partial or whole failure of the tree.

6. **Amenity Value:** To determine the amenity value of a tree we assess a number of different factors, which include but are not limited to the information below.
   - The visibility of the tree to adjacent sites.
   - The relationship between the tree and the site.
   - Whether the tree is protected by any statuary conditions.
   - The habitat value of the tree.
   - Whether the tree is considered a noxious weed species.

   The amenity value is rated using one of the following values.
   - Very High
   - High
   - Moderate
   - Low
   - Very Low

7. **Safe Useful Life Expectancy (SULE), (Barrel, 2001):** A trees safe useful life expectancy is determined by assessing a number of different factors including the health and vitality, estimated age in relation to expected life expectancy for the species, structural defects, and remedial works that could allow retention in the existing situation.

Category	Description
1. Long - Over 40 years	(a) Structurally sound trees located in positions that can accommodate future growth. (b) Trees that could be made suitable for retention in the long term by remedial tree care. (c) Trees of special significance for historical, commemorative or rarity reasons that would warrant extraordinary efforts to secure their long term retention.
2. Medium - 15 to 40 years	(a) Trees that may only live between 15 and 40 more years. (b) Trees that could live for more than 40 years but may be removed for safety or nuisance reasons. (c) Trees that could live for more than 40 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (d) Trees that could be made suitable for retention in the medium term by remedial tree care.
3. Short - 5 to 15 years	(a) Trees that may only live between 5 and 15 more years. (b) Trees that could live for more than 15 years but may be removed for safety or nuisance reasons. (c) Trees that could live for more than 15 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (d) Trees that require substantial remedial tree care and are only suitable for retention in the short term.
4. Remove - Under 5 years	(a) Dead, dying, suppressed or declining trees because of disease or inhospitable conditions. (b) Dangerous trees because of instability or recent loss of adjacent trees. (c) Dangerous trees because of structural defects including cavities, decay, included bark, wounds or poor form. (d) Damaged trees that are clearly not safe to retain. (e) Trees that could live for more than 5 years but may be removed to prevent interference with more suitable individuals or to provide space for new planting. (f) Trees that are damaging or may cause damage to existing structures within 5 years. (g) Trees that will become dangerous after removal of other trees for the reasons given in (a) to (f). (h) Trees in categories (a) to (g) that have a high wildlife habitat value and, with appropriate treatment, could be retained subject to regular review.
5. Small/Young	(a) Small trees less than 5m in height. (b) Young trees less than 15 years old but over 5m in height. (c) Formal hedges and trees intended for regular pruning to artificially control growth.

8. **Root investigations:** The root investigations should identify roots greater than 30mm in diameter that are located along the edge of the structures footprint or in the location of footings. Root investigations must be carried out using non-invasive methods (manual excavations). Any excavations for the root investigations must carried out manually to avoid damaging the roots during excavations. Manual excavation may include the use of a high-pressure air/air knife, or a combination of high-pressure water and a vacuum device. When hand excavating carefully work around roots retaining as many as possible. Take care to not fray, wound, or cause damage to any roots during excavations as this may cause decay or infection from pathogens. It is essential that exposed roots are kept moist and the excavation back filled as soon as possible. The root investigations should be carried out by a qualified Arborist minimum AQF3. Once roots are exposed, a visual assessment can be carried out by a consulting Arborist to evaluate the potential impact of the proposed root loss on the health and stability of the tree. A root map/report should be prepared identifying the findings of investigations, including photographs as supporting evidence in the report.

9. **Retention Value:** The system I have used to award the retention value is Tree AZ. Tree AZ is used to identify higher value trees worthy of being a constraint to development and lower value trees that should generally not be a constraint to the development. The table below provides a brief description of each category.

TreeAZ Categories (Version 10.04-ANZ)

CAUTION: TreeAZ assessments must be carried out by a competent person qualified and experienced in arboriculture. The following category descriptions are designed to be a brief field reference and are not intended to be self-explanatory. They must be read in conjunction with the most current explanations published at www.TreeAZ.com.

Category Z: Unimportant trees not worthy of being a material constraint

Local policy exemptions: Trees that are unsuitable for legal protection for local policy reasons including size, proximity and species	
Z1	Young or insignificant small trees, i.e. below the local size threshold for legal protection, etc
Z2	Too close to a building, i.e. exempt from legal protection because of proximity, etc
Z3	Species that cannot be protected for other reasons, i.e. scheduled noxious weeds, out of character in a setting of acknowledged importance, etc
High risk of death or failure: Trees that are likely to be removed within 10 years because of acute health issues or severe structural failure	
Z4	Dead, dying, diseased or declining
Z5	Severe damage and/or structural defects where a high risk of failure cannot be satisfactorily reduced by reasonable remedial care, i.e. cavities, decay, included bark, wounds, excessive imbalance, overgrown and vulnerable to adverse weather conditions, etc
Z6	Instability, i.e. poor anchorage, increased exposure, etc
Excessive nuisance: Trees that are likely to be removed within 10 years because of unacceptable impact on people	
Z7	Excessive, severe and intolerable inconvenience to the extent that a locally recognized court or tribunal would be likely to authorize removal, i.e. dominance, debris, interference, etc
Z8	Excessive, severe and intolerable damage to property to the extent that a locally recognized court or tribunal would be likely to authorize removal, i.e. severe structural damage to surfacing and buildings, etc
Good management: Trees that are likely to be removed within 10 years through responsible management of the tree population	
Z9	Severe damage and/or structural defects where a high risk of failure can be temporarily reduced by reasonable remedial care, i.e. cavities, decay, included bark, wounds, excessive imbalance, vulnerable to adverse weather conditions, etc
Z10	Poor condition or location with a low potential for recovery or improvement, i.e. dominated by adjacent trees or buildings, poor architectural framework, etc
Z11	Removal would benefit better adjacent trees, i.e. relieve physical interference, suppression, etc
Z12	Unacceptably expensive to retain, i.e. severe defects requiring excessive levels of maintenance, etc

NOTE: Z trees with a high risk of death/failure (Z4, Z5 & Z6) or causing severe inconvenience (Z7 & Z8) at the time of assessment and need an urgent risk assessment can be designated as ZZ. ZZ trees are likely to be unsuitable for retention and at the bottom of the categorization hierarchy. In contrast, although Z trees are not worthy of influencing new designs, urgent removal is not essential and they could be retained in the short term, if appropriate.

Category A: Important trees suitable for retention for more than 10 years and worthy of being a material constraint

A1	No significant defects and could be retained with minimal remedial care
A2	Minor defects that could be addressed by remedial care and/or work to adjacent trees
A3	Special significance for historical, cultural, commemorative or rarity reasons that would warrant extraordinary efforts to retain for more than 10 years
A4	Trees that may be worthy of legal protection for ecological reasons (Advisory requiring specialist assessment)

NOTE: Category A1 trees that are already large and exceptional, or have the potential to become so with minimal maintenance, can be designated as AA at the discretion of the assessor. Although all A and AA trees are sufficiently important to be material constraints, AA trees are at the top of the categorization hierarchy and should be given the most weight in any selection process.

TreeAZ is designed by Barrell Tree Consultancy (www.barrelltreecare.co.uk) and is reproduced with their permission

URBAN ARBOR
The Trusted Name in Tree Management

Glossary of Terms

Abiotic - Pertaining to non-living agents; e.g. environmental factors

Adventitious shoots - Shoots that develop other than from apical, axillary or dormant buds; see also 'epicormic'

Anchorage - The system whereby a tree is fixed within the soil, involving cohesion between roots and soil and the development of a branched system of roots which withstands wind and gravitational forces transmitted from the aerial parts of the tree

Bark - A term usually applied to all the tissues of a woody plant lying outside the vascular cambium, thus including the phloem, cortex and periderm; occasionally applied only to the periderm or the phellem

Branch:
• **Primary**. A first order branch arising from a stem
• **Lateral**. A second order branch, subordinate to a primary branch or stem and bearing sub-lateral branches
• **Sub-lateral**. A third order branch, subordinate to a lateral or primary branch, or stem and usually bearing only twigs

Branch collar - A visible swelling formed at the base of a branch whose diameter growth has been disproportionately slow compared to that of the parent stem; a term sometimes applied also to the pattern of growth of the cells of the parent stem around the branch base

Brown-rot - A type of wood decay in which cellulose is degraded, while lignin is only modified

Buckling - An irreversible deformation of a structure subjected to a bending load

Buttress zone - The region at the base of a tree where the major lateral roots join the stem, with buttress-like formations on the upper side of the junctions

Cambium - Layer of dividing cells producing xylem (woody) tissue internally and phloem (bark) tissue externally

Canker - A persistent lesion formed by the death of bark and cambium due to colonisation by fungi or bacteria

Compartmentalisation - The confinement of disease, decay or other dysfunction within an anatomically discrete region of plant tissue, due to passive and/or active defences operating at the boundaries of the affected region

Compressive loading - Mechanical loading which exerts a positive pressure; the opposite to tensile loading

Condition - An indication of the physiological condition of the tree. Where the term ‘condition’ is used in a report, it should not be taken as an indication of the stability of the tree

Crown/Canopy - The main foliage bearing section of the tree

Crown lifting - The removal of limbs and small branches to a specified height above ground level

Crown thinning - The removal of a proportion of secondary branch growth throughout the crown to produce an even density of foliage around a well-balanced branch structure

Crown reduction/shaping - A specified reduction in crown size whilst preserving, as far as possible, the natural tree shape

DAB (Diameter Above Buttress) - Trunk diameter measured above the root buttress

Defect - In relation to tree hazards, any feature of a tree which detracts from the uniform distribution of mechanical stress, or which makes the tree mechanically unsuited to its environment

Dieback - The death of parts of a woody plant, starting at shoot-tips or root-tips

Disease - A malfunction in or destruction of tissues within a living organism, usually excluding mechanical damage; in trees, usually caused by pathogenic micro-organisms

Dominance - In trees, the tendency for a leading shoot to grow faster or more vigorously than the lateral shoots; also the tendency of a tree to maintain a taller crown than its neighbours

Dormant bud - An axial bud which does not develop into a shoot until after the formation of two or more annual wood increments; many such buds persist through the life of a tree and develop only if stimulated to do so

Dysfunction - In woody tissues, the loss of physiological function, especially water conduction, in sapwood

DBH (Diameter at Breast Height) - Stem diameter measured at a height of 1.4 metres or the nearest measurable point. Where measurement at a height of 1.4 metres is not possible, another height may be specified

Deadwood - Branch or stem wood bearing no live tissues. Retention of deadwood provides valuable habitat for a wide range of species and seldom represents a threat to the health of the tree. Removal of deadwood can result in the ingress of decay to otherwise sound tissues and climbing operations to access deadwood can cause significant damage to a tree. Removal of deadwood is generally recommended only where it represents an unacceptable level of hazard

Epicormic shoot - A shoot having developed from a dormant or adventitious bud and not having developed from a first year shoot

Flush-cut - A pruning cut which removes part of the branch bark ridge and or branch-collar

Girdling root - A root which circles and constricts the stem or roots possibly causing death of phloem and/or cambial tissue

Habit - The overall growth characteristics, shape of the tree and branch structure

Hazard beam - An upwardly curved part of a tree in which strong internal stresses may occur without being reduced by adaptive growth; prone to longitudinal splitting

Incorporating extracts from Lonsdale, D. 1999. Principles of Tree Hazard Assessment. Her Majesty's Stationary Office, London

URBAN ARBOR
The Trusted Name in Tree Management

Heartwood/false-heartwood - The dead central wood that has become dysfunctional as part of the aging processes and being distinct from the sapwood

Heave - A term mainly applicable to a shrinkable clay soil which expands due to re-wetting after the felling of a tree which was previously extracting moisture from the deeper layers; also the lifting of pavements and other structures by root diameter expansion; also the lifting of one side of a wind-rocked root-plate

Included bark (ingrown bark) - Bark of adjacent parts of a tree (usually forks, acutely joined branches or basal flutes) which is in face-to-face contact

Lever arm - A mechanical term denoting the length of the lever represented by a structure that is free to move at one end, such as a tree or an individual branch

Lignin - The hard, cement-like constituent of wood cells; deposition of lignin within the matrix of cellulose microfibrils in the cell wall is termed Lignification

Lions tailing - A term applied to a branch of a tree that has few if any side-branches except at its end, and is thus liable to snap due to end- loading

Loading - A mechanical term describing the force acting on a structure from a particular source; e.g. the weight of the structure itself or wind pressure

Mycelium - The body of a fungus, consisting of branched filaments (hyphae)

Occlusion - The process whereby a wound is progressively closed by the formation of new wood and bark around it

Pathogen - A micro-organism which causes disease in another organism

Photosynthesis - The process whereby plants use light energy to split hydrogen from water molecules, and combine it with carbon dioxide to form the molecular building blocks for synthesizing carbohydrates and other biochemical products

Probability - A statistical measure of the likelihood that a particular event might occur

Pruning - The removal or cutting back of twigs or branches, sometimes applied to twigs or small branches only, but often used to describe most activities involving the cutting of trees or shrubs

Radial - In the plane or direction of the radius of a circular object such as a tree stem

Reactive Growth/Reaction Wood - Production of woody tissue in response to altered mechanical loading; often in response to internal defect or decay and associated strength loss (cf. adaptive growth)

Ring-barking - The removal of a ring of bark and phloem around the circumference of a stem or branch, normally resulting in an inability to transport photosynthetic assimilates below the area of damage. Almost inevitably results in the eventual death of the affected stem or branch above the damage

Root-collar - The transitional area between the stem/s and roots

Sapwood - Living xylem tissues

Soft-rot - A kind of wood decay in which a fungus degrades cellulose within the cell walls, without any general degradation of the wall as a whole

Stem/s - Principle above-ground structural component(s) of a tree that supports its branches

Stress - In plant physiology, a condition under which one or more physiological functions are not operating within their optimum range, for example due to lack of water, inadequate nutrition or extremes of temperature

SRZ (Structural Root Zone) - The area around the base of the tree required for the trees stability in the ground

Subsidence - In relation to soil or structures resting in or on soil, a sinking due to shrinkage when certain types of clay soil dry out, sometimes due to extraction of moisture by tree roots

Taper - In stems and branches, the degree of change in girth along a given length

Targets - In tree risk assessment (with slight misuse of normal meaning) persons or property or other things of value which might be harmed by mechanical failure of the tree or by objects falling from it

Topping - In arboriculture, the removal of the crown of a tree, or of a major proportion of it

Transpiration - The evaporation of moisture from the surface of a plant, especially via the stomata of leaves; it exerts a suction which draws water up from the roots and through the intervening xylem cells

TPZ (Tree Protection Zone) - A specified area above and below ground and at a given distance from the trunk set aside for the protection of a tree's roots and crown to provide for the viability and stability of a tree to be retained where it is potentially subject to damage by development

Understory - This layer consists of younger individuals of the dominant trees, together with smaller trees and shrubs which are adapted to grow under lower light conditions

Veteran tree - Tree that, by recognised criteria, shows features of biological, cultural or aesthetic value that are characteristic of, but not exclusive to, individuals surviving beyond the typical age range for the species concerned. These characteristics might typically include a large girth, signs of crown retrenchment and hollowing of the stem

Vigour - The expression of carbohydrate expenditure to growth (in trees)

White-rot - A range of kinds of wood decay in which lignin, usually together with cellulose and other wood constituents, is degraded

Wind exposure - The degree to which a tree or other object is exposed to wind, both in terms of duration and velocity

Wind pressure - The force exerted by a wind on a particular object

Windthrow - The blowing over of a tree at its roots

Incorporating extracts from Lonsdale, D. 1999. Principles of Tree Hazard Assessment. Her Majesty's Stationary Office, London

Appendix D – Urban Arbor Curriculum Vitae

Curriculum Vitae - Bryce Claassens - Consulting Arborist
Urban Arbor Pty Ltd

Address: Urban Arbor Pty Ltd, Unit 12/36 Leighton Place, Hornsby, NSW
Contact: [redacted]

Arboricultural and Horticultural Qualifications

- Diploma of Arboriculture (AQF5)
- Cert III Horticulture - Landscape (AQF3)
- Registered Quantified Tree Risk Assessment assessor (QTRA)

Professional Memberships

- General Membership of Arboriculture Australia (AA)

Experience

Bryce brings ten (10) years of experience in Arboriculture and Horticulture. His career has varied experience in both landscape construction/horticulture and arboricultural consulting.

Bryce is a Consulting Arborist for Urban Arbor Pty Ltd. Urban Arbor is a consultancy company that specifically deals with tree management with no practical tree work being offered. Bryce has managed sites and provided expert reports on various projects, from single trees through to large sites with over 600 trees.
Bryce has experience delivering arboricultural management and recommendations throughout the Sydney region.

Bryce's current role includes the following;
- Report writing including preliminary reports, development impact assessments, risk assessment and tree protection during development.
- Developing and implementing tree management programs
- Risk assessments using the QTRA method
- Project Arborist work
- Diagnostic procedures for determination of various tree related issues
- Consultancy work both verbal and written format

Arboricultural and Horticultural Employment History

- 2017 to Present: Consulting Arborist at Urban Arbor Pty Ltd, Sydney, NSW
- 2015 to 2017: Landscape Construction Tradesman/Stonemason at Collaroy Stoneworks, Sydney, NSW
- 2008 to 2015: Landscape Construction Apprentice-Tradesman at All Landscape Services, Sydney, NSW

Recent Project Works Undertaken

Preparing Arboricultural Impact Assessment reports for large projects, such as the new private hospital in Terrey Hills and various public schools for the Department of Education and Training school beautification project, including providing significant tree sensitive solutions of developments within public schools across Sydney.

Project Arborist on large developments including Royal Far West in Manly and Macquarie University. Bryce has worked as a project Arborist for many first tier construction companies, such as Richard Crookes, Liang O'Rourke, PDS Group and FDC Construction.

Delivering Arboricultural Impact Assessments and Project Arborist works for private developers within Councils including Ku Ring Gai Council, Hornsby Council, The Hills Shire, Holroyd Council, Inner West Council, Manly Council, Warringah Council, Pittwater Council, North Sydney Council, Mosman Council, Hunters Hill Council, Lane Cove Council, Parramatta Council, Ryde Council, Blacktown Council, Woollahra Council, Waverley Council, Sutherland Council, and Hawkesbury Council.

Appendix E – Compliance Matrix

Table 1 lists the Section of this report that demonstrate compliance with CoA – E5.

Details	Compliance
The Proponent must commission an independent experienced and suitably qualified arborist, to prepare a comprehensive Tree Report(s) before removing any trees as detailed in the documents listed in Condition A1. The Tree Report may be prepared for the entire CSSI or separate reports may be prepared for individual areas where trees are required to be removed. The report(s) must identify the impacts of the CSSI on trees and vegetation within and adjacent to the Construction footprint.	Section 2, Appendix A, Appendix B, Appendix C and Appendix D. Bryce Claassens, consulting arborist from Urban Arbor was engaged to assess trees.
The report(s) must include:	
(a) a description of the conditions of the tree(s) and its amenity and visual value;	Appendix A, Appendix B and Appendix C
(b) consideration of all options to avoid tree removal, including relocation of services, redesign or relocation of ancillary components (such as substations, fencing etc.) and reduction of standard offsets to underground services; and	Section 4, Appendix A, Appendix B and Appendix C
(c) measures to avoid the removal of trees or minimise damage to existing trees and ensure the health and stability of those trees to be protected. This includes details of any proposed canopy or root pruning, root protection zone, excavation, site controls on waste disposal, vehicular access, storage of materials and protection of public utilities.	Appendix A, Appendix B and Appendix C
A copy of the report(s) must be submitted to the Planning Secretary before the removal or pruning of any trees, including those affected by site establishment Work. All recommendations of the report must be implemented by the Proponent, unless otherwise agreed by the Planning Secretary.	Section 5
