Site 2 – Proposed vegetation clearance area

Photograph 2.01 – looking down on the west bank from the top of the dam wall

Photograph 2.02 – looking west across the dam wall towards the west bank. The cable tower and tracks is located within the large trees in the background

Photograph 2.03

Photograph 2.04

Photograph 2.05 outcropping sandstone on bend in road

Site 3 – Terraced Gardens Area

Photograph 3.01 – Looking down onto the electrical building- (large building in foreground) which contains electrical switch boards and a second small building (behind the electrical building), the smaller building reportedly contains a back up power generator. Anecdotal evidence indicates that a 300-400 litre above ground diesel tank is located within the smaller building. There are no plans to disturb these structures during proposed construction works.

Photograph 3.02 – close up of electrical building containing electrical switchboards. These structures will not be disturbed during proposed construction works.

Photograph 3.03 – Looking east along concrete ‘path’ on the second level of the terraced garden area. The concrete represents a remnant of a former cable tower crane and tracks.
