21/10/2020

Dear Mr Fania

**Powering Sydney's Future (SSI 8583)
Variation to Approved Construction Hours**

I refer to your request (SSI-8583-PA-26) submitted on 29 September 2020 for the Planning Secretary's approval of high risk out of hours works for the Powering Sydney's Future project (SSI 8583).

The Department has reviewed your request to extend construction hours to carry out the intersection works between Rawson and Waterloo Roads, Greenacre.

The Department accepts the request to vary constructions hours subject to the following:

1. The works must be undertaken as detailed in the *Out of Hours Works Permit (002)* prepared by Taihan and the *Out of Hours Works Construction Noise and Vibration Impact Statement* (prepared by VMS Australia dated 3 September 2020) as submitted in the application SSI-8583-PA-26, unless otherwise varied by the conditions below:
2. Work must not be undertaken outside the hours of work identified in condition E4 of the development consent, except for the works and hours detailed below:
 - 8 to 10 nights of work at the Rawson and Waterloo Road intersection between 26 October 2020 and 14 December 2020.
3. Written notice must be provided to surrounding residential occupiers and placed on site at least 48 hours before work occurs outside the normal construction hours identified in condition E4. The written notice must:
 - (i) identify what works are to occur outside normal construction hours;
 - (ii) nominate the timeframe the works are likely to occur;
 - (iii) be reissued 24 hours before any work occurs outside normal construction hours if the wet weather requires an alternative day from that notified; and
 - (iv) provide a telephone contact number of the construction site manager during the extended construction hours.

4. A record of any complaints made regarding works undertaken during the extended construction hours must be provided to the Department's Compliance team within 24 hours of the complaint.
5. In the event that any complaint is received, appropriate mitigation measures are to be implemented, and the Department and the complainant are to be informed of the actions undertaken to address the complaint.
6. All noise management controls as described in Section 9 of the *Out of Hours Works Noise and Vibration Impact Statement* (prepared by VMS Australia dated 3 September 2020), are to be adopted and implemented for the duration of the works.

If you wish to discuss the matter further, please contact Bronagh McGeown on 0499 688 913.

Yours sincerely

Nicole Brewer
Director
Energy Assessments

As nominee of the Planning Secretary
