Notes: 1. The cumulative impacts of the Western Harbour Tunnel, Warringah Freeway Upgrade, Beaches Link and Gore Hill Freeway Connection have been assessed.
2. Potential increase of >2dB due to multiple projects. Impacts to be confirmed during further design development.
3. Mitigation occurring under the M4-M5 Link Conditions of Approval. Refer Condition E87.

Description:
Area surrounding the surface connection to City West Link at Rozelle
At property treatment to be provided under the M4-M5 Link project Minister's Conditions of Approval (Condition E87) or when predicted operational road traffic noise increases greater than 2 dB(A) due to multiple projects. At-property treatment requirements will be confirmed during further design development.

Notes: 1. The cumulative impacts of the Western Harbour Tunnel, Warringah Freeway Upgrade, Beaches Link and Gore Hill Freeway Connection have been assessed.
2. Individual dwellings eligible for at-property treatment will be confirmed during detailed design.
3. Other (non-residential) sensitive receiver buildings identified in this figure have been found to exceed the external screening criterion. These non-residential receivers will require further investigation during detailed design to confirm the extent of noise impact and eligibility for consideration of noise mitigation since the difference in noise from outside to inside can increase to more than 30 dB(A) depending on the building type, location of the room within the building, window type and whether the use of the space requires the window to be fully opened, slightly opened or closed.
