The Department notes that the Project is currently using three construction support sites — WHT9, WHT10 and WHT12 — that were established by earlier Project Stages including 1A/1B, 2, and 3A. Any additional support sites not yet established by the Project including WHT3 and WHT8 will require the preparation of an Ancillary Site Establishment Management Plan(s) (ASEMP) to meet the requirements of condition A17.

You are reminded that if there is any inconsistency between the approved documents listed above and the conditions of approval then the requirements of the conditions of approval will prevail.

Please ensure you make the approved documents and this letter publicly available on the project website before the relevant works commence as per condition B15.
