Re: SSI 8896-Belmont Desalination Water Treatment Plant - Environmental Representative Endorsement - Construction Environmental Management Plan Rev 2

Dear Tommy,

Following a review of the documents provided for the Construction Environmental Management Sub Plan (CEMP) Rev 2, I can provide the following endorsement.

The CEMP Rev 2 has been reviewed against the Conditions of Approval, in particular C10, C11 and Part D. Updated mitigation measures from IA411110_BelmontDesal_RFI2_V003_R001 and DPHI comments have also been reviewed as part of this endorsement. No consultation was undertaken or required to be undertaken for this plan.

All conditions of approval and mitigation measures are contained in the CEMP Rev 2.

The document is endorsed for submission to DPHI for approval.

Yours sincerely

David Bone
Independent Environmental Representative
