**Subject: M6 Stage 1 (SSI-8931) - Air Quality Community Consultative Committee (AQCCC)
Pause in Meetings Request, Condition E2(b)**

Dear Mr Voigt

I refer to your submission dated 16 April 2025 requesting a pause to the AQCCC meetings until 2027 under condition E2(b) of SSI-8931.

I note that the:

- chair for the AQCCC has provided advice to support the pause of meetings until 2027;
- submission indicates that no concerns to pause the meetings have been raised by the community members; and
- next anticipated document requiring AQCCC consultation is the Ambient Air Quality Protocol, which is due at least 6 months prior to the commencement of operation in late 2028.

Accordingly, as nominee of the Planning Secretary I approve the pause of the AQCCC meetings until the beginning of 2027 in accordance with condition E2(b) of SSI-8931.

You are reminded that from 2027, the AQCCC meetings will return to a minimum of four (4) per year as required by condition E2(b).

Please ensure that if the AQCCC chair determines the need for meetings prior to 2027, the Proponent will be required to facilitate such meetings.

Should you wish to discuss the matter further, please do not hesitate to contact Sarah Kamarudin at sarah.kamarudin@dpie.nsw.gov.au.

Yours sincerely
