Subject: M6 Stage 1 (SSI-8931): At-Property Noise Treatment Reporting Frequency, condition E78

Dear Mr Voigt,

I refer to your letter dated 23 May 2025, advising that the at-property noise treatment program is now substantially complete and requesting to discontinue the associated weekly reporting previously requested by the Department to satisfy requirements of condition E78 of SSI-8931. I also acknowledge and thank you for your response to the Department's requests for additional information.

The Department previously approved your request to install at-property noise treatment in parallel with the commencement of out-of-hours works (OOHW) subject to the provision of weekly progress reports under condition E78 (refer to approval letter dated 23 December 2021 under SSI-8931-PA-48).

Accordingly, as nominee of the Planning Secretary, I approve your request to cease providing weekly progress reports for at-property noise treatment program; and continue to report the status of the program on a monthly basis in the reporting format as initially approved by the Department (refer SSI-8931-PA-48).

The Department reminds you to correct any reporting discrepancies within the next monthly cycle. Additionally, appropriate mitigation measures should continue to be effectively implemented, including keeping the community appropriately informed, consulted and responding to complaints.

If you wish to discuss the matter further, please contact Tanja Ibsen on tanja.ibsen@dpie.nsw.gov.au.

Yours sincerely

Dominic Crinnion
Director
Infrastructure Management
As nominee of the Planning Secretary
