Subject: CASA'S RESPONSE: GI20/877-1 - Project EnergyConnect (NSW Eastern Section)(SSI-9172452) - Request for Advice on EIS [SEC=OFFICIAL]

OFFICIAL

Dear Mr Gillies

Thank you for your email and invitation to comment on the proposed State Significant Infrastructure (SSI) application for the Project EnergyConnect, reference SSI- 9172452.

The provided Environmental Impact Statement indicates that the proposed Energy Connect transmission line will be clear of the obstacle limitation surfaces of all airports along the proposed route of the line. As such, CASA does not consider the transmission line to be a hazard to aircraft operations.

Once completed, the location/route of the line should be reported to Airservices Australia to ensure that the line is represented on aeronautical charts for the benefit of pilots conducting low level operations.

I trust this information is of assistance.

Kind regards

Leah
