

TABLE OF CONTENTS

ILLABO TO STOCKINBINGAL ENVIRONMENTAL IMPACT STATEMENT

ARTC

INLAND
RAIL
An Australian Government Initiative

Contents

Summary

Glossary

Chapter 1

1.	INTRODUCTION	1-1
1.1	The proponent	1-1
1.2	Overview	1-1
1.3	The proposal	1-3
1.3.1	Location	1-3
1.3.2	Key features	1-5
1.3.3	Construction timing	1-7
1.3.4	Operation	1-7
1.3.5	Related development	1-7
1.4	Objectives of the proposal and Inland Rail	1-7
1.5	EIS purpose and structure	1-8

Chapter 2

2.	GENERAL BIOPHYSICAL AND CULTURAL ENVIRONMENT	2-1
2.1	Regional setting	2-1
2.1.1	Illabo to Stockinbingal corridor	2-1
2.2	Description of the proposal site	2-1
2.2.1	Definition	2-1
2.2.2	Description	2-1
2.3	General biophysical environment of the proposal site	2-3
2.3.1	Biodiversity	2-3
2.3.2	Soils	2-3
2.3.3	Water	2-3
2.4	General cultural environment of the proposal	2-4
2.4.1	Land use and property	2-4
2.4.2	Heritage	2-4
2.4.3	Social and economic	2-4
2.5	Existing rail facilities and operations	2-5
2.5.1	Overview	2-5
2.5.2	Branches	2-5
2.5.3	Passenger services	2-5

Chapter 3

3.	STATUTORY CONTEXT	3-1
3.1	Overview of the planning approval pathway	3-1
3.2	Environmental Planning and Assessment Act 1979 (NSW)	3-1
3.2.1	Objects of the EP&A Act	3-2

3.2.2	Division 5.2 of the Environmental Planning and Assessment Act	3-3
3.2.3	Critical State Significant Infrastructure	3-4
3.2.4	Landowners' consent and notification requirements	3-4
3.2.5	Environmental Planning and Assessment Regulation 2021	3-4
3.3	NSW environmental planning instruments	3-4
3.3.1	State Environmental Planning Policy (Transport and Infrastructure) 2021	3-4
3.3.2	State Environmental Planning Policy (Planning Systems) 2021	3-4
3.3.3	Other environmental planning instruments	3-4
3.4	Other NSW legislative requirements	3-5
3.4.1	Approvals not required	3-5
3.4.2	Approvals to be applied consistently	3-5
3.4.3	Consideration of requirements under other NSW Acts	3-5
3.5	Commonwealth requirements	3-8
3.5.1	Environment Protection and Biodiversity Conservation Act 1999	3-8
3.5.2	Native Title Act 1993	3-8
3.6	Summary of approval and notification requirements	3-9
3.7	Summary of the assessment process	3-9
3.7.1	Environmental assessment requirements	3-9
3.7.2	Public exhibition and submissions	3-9
3.7.3	Assessment and determination	3-9

Chapter 4

4.	ENGAGEMENT	4-1
4.1	Engagement approach	4-1
4.1.1	Overall approach and objectives	4-1
4.1.2	Stakeholder identification	4-2
4.2	Engagement during the options development, design and environmental assessment process	4-2
4.3	Summary of issues raised and responses to feedback received	4-7
4.3.1	Where issues relevant to the EIS have been addressed	4-7
4.3.2	How the proposal has accommodated stakeholder feedback	4-9
4.4	Future engagement	4-10
4.4.1	Consultation during exhibition of the EIS	4-10
4.4.2	Consultation during design and delivery of the proposal	4-11

Chapter 5

5.	STRATEGIC CONTEXT AND NEED	5-1
5.1	The existing situation	5-1
5.2	The opportunity and challenges	5-3
5.2.1	Growth in freight demand	5-3
5.2.2	Existing freight capacity and infrastructure issues	5-3
5.2.3	Assessment of demands for Inland Rail	5-4
5.3	Need for Inland Rail	5-4
5.4	Need for the proposal	5-5
5.5	National, state and regional planning policies and strategies	5-5
5.6	Inland Rail	5-7
5.6.1	Supply chain efficiencies	5-7
5.6.2	Value chain growth	5-7
5.6.3	Key benefits	5-8
5.6.4	State and regional	5-9
5.6.5	The proposal	5-10

Chapter 6

6.	ALTERNATIVES AND PROPOSAL OPTIONS	6-1
6.1	Alternatives to Inland Rail	6-1
6.1.1	Strategic alternatives—alternative freight transport solutions	6-1
6.2	Alternative route options for Inland Rail	6-3
6.2.1	North–South Rail Corridor Study	6-3
6.2.2	Melbourne–Brisbane Inland Rail Alignment Study	6-6
6.3	Initial project development for Illabo to Stockinbingal 2010 to 2019	6-9
6.3.1	Selection of Illabo to Stockinbingal option in the 2010 Inland Rail Alignment Study	6-9
6.3.2	2015 Inland Rail Report and Business Case	6-11
6.3.3	2016–2018 option assessment and alignment refinement	6-11
6.4	Studies to determine a preferred alignment (2018–2019)	6-12
6.4.1	Overview	6-12
6.4.2	Multi-criteria analysis	6-14
6.4.3	Option development and assessment for the southern section	6-15
6.4.4	Option development and assessment for the central section	6-18
6.4.5	Option development and assessment for the northern section	6-21
6.4.6	Confirmation of the focused area of investigation	6-24
6.4.7	Refinement of preferred alignment for the northern section and modification to the focused area of investigation	6-26
6.5	Development of a feasibility design	6-28
6.5.1	Overview	6-28
6.5.2	Detailed investigations undertaken within the focus area of investigation	6-28

6.5.3	Approach to avoiding or minimising impacts	6-28
6.5.4	2019 feasibility design	6-28
6.6	Design optimisation (2020–2021)	6-28
6.6.1	Need for design optimisation	6-29
6.6.2	Design optimisation assessment process	6-29
6.6.3	Approach to consideration of environmental values	6-29
6.6.4	Key changes as a result of the optimisation process	6-30
6.7	Development of the optimised reference design	6-42
6.7.1	Overview	6-42
6.7.2	Summary of environmental outcomes following optimisation	6-42
6.8	Other design development considerations	6-45
6.8.1	Road–rail interfaces	6-45
6.8.2	Watercourse crossings	6-50
6.9	Rail crossings and other infrastructure provision on private land	6-50
6.10	Refinement of the proposal	6-50

Chapter 7

7.	PROPOSAL DESCRIPTION—OPERATION	7-1
7.1	Overview	7-1
7.2	Description of key proposal features	7-13
7.2.1	New track	7-13
7.2.2	Tie-in and track upgrades	7-14
7.2.3	Crossing loop and maintenance siding	7-17
7.2.4	Turnouts	7-19
7.2.5	Bridges	7-19
7.2.6	Culverts	7-20
7.2.7	Road–rail interfaces	7-20
7.2.8	Road modifications	7-21
7.3	Ancillary works and infrastructure	7-26
7.3.1	Track drainage	7-26
7.3.2	Rail maintenance access road	7-26
7.3.3	Signalling and communications	7-26
7.3.4	New utility connections	7-26
7.3.5	New fencing	7-27
7.3.6	Fauna crossings	7-27
7.3.7	Retaining walls	7-28
7.3.8	Signage	7-28
7.4	Land acquisition	7-28
7.5	Operation of the proposal	7-28
7.5.1	Train operations	7-28
7.5.2	Road network	7-29
7.5.3	Operation of the crossing loop	7-29
7.5.4	Maintenance activities	7-29

Chapter 8

8.	PROPOSAL DESCRIPTION—CONSTRUCTION	8-1
8.1	Overview of construction scope and approach	8-1
8.1.1	Approach to avoiding or minimising impacts during construction	8-3
8.2	Indicative construction methodology	8-3
8.2.1	Site establishment and enabling works	8-14
8.2.2	Track works	8-14
8.2.3	Culverts	8-17
8.2.4	Drainage	8-17
8.2.5	Level crossings	8-17
8.2.6	New bridges	8-18
8.2.7	Rail maintenance access road	8-18
8.2.8	Road modifications	8-18
8.2.9	Signalling and control works	8-21
8.2.10	Earthworks	8-21
8.2.11	Blasting	8-22
8.2.12	Testing and commissioning	8-30
8.2.13	Finishing works and reinstatement	8-30
8.2.14	Timing and staging	8-30
8.2.15	Rail possessions and associated impacts on current rail operations	8-31
8.2.16	Construction hours	8-31
8.3	Construction compounds	8-33
8.3.1	Site servicing requirements	8-35
8.4	Construction workforce	8-35
8.4.1	Workforce numbers	8-35
8.4.2	Workforce accommodation camp requirements	8-36
8.5	Construction resources required	8-36
8.5.1	Raw materials required	8-36
8.5.2	Commercial quarry sources of imported material	8-36
8.5.3	Potential borrow pit at Stockinbingal	8-37
8.5.4	Construction water supply	8-37
8.5.5	Imported precast and steel components and other items	8-38
8.6	Plant and equipment	8-38
8.7	Mobile batch plants	8-40
8.8	Other construction elements	8-40
8.8.1	Demolition	8-40
8.8.2	Demobilisation, rehabilitation and landscaping	8-40
8.8.3	Removal of redundant sections of rail and rehabilitation	8-40
8.8.4	Rehabilitation of the Burley Griffin Way	8-40
8.8.5	Temporary watercourse crossings	8-40
8.9	Transport, access and haulage arrangements	8-43
8.9.1	Construction access	8-43
8.9.2	Haul routes	8-44
8.9.3	Construction traffic numbers	8-44
8.9.4	Emergency access	8-44

8.10	Public utilities	8-46
8.10.1	Potential impacts and management framework	8-46

Chapter 9

9.	ASSESSMENT APPROACH AND METHODOLOGY	9-1
9.1	Impact scoping	9-1
9.2	Impact assessment method	9-2
9.2.1	Defining the environmental baseline (existing environment)	9-2
9.2.2	Assessment of potential impacts	9-2
9.2.3	Cumulative impacts	9-4
9.2.4	Mitigation, management and residual impacts	9-4
9.3	Guide to how the impact assessment results are detailed in the EIS	9-4

Chapter 10

10.	BIODIVERSITY	10-1
10.1	Overview	10-1
10.2	Approach	10-2
10.2.1	Legislative and policy context to the assessments	10-2
10.2.2	Secretary's Environmental Assessment Requirements	10-2
10.2.3	Commonwealth requirements	10-2
10.2.4	Methodology	10-3
10.2.5	Risks identified	10-5
10.2.6	How potential impacts have been avoided or minimised	10-5
10.3	EXISTING ENVIRONMENT	10-6
10.3.1	Landscape features	10-6
10.3.2	Terrestrial flora	10-7
10.3.3	Terrestrial fauna	10-18
10.3.4	Aquatic biodiversity	10-20
10.3.5	Groundwater dependent ecosystems	10-21
10.3.6	Wetlands of national and international importance	10-22
10.3.7	Protected and sensitive lands	10-22
10.4	Impact assessment—construction	10-24
10.4.1	Native vegetation	10-24
10.4.2	Terrestrial flora	10-27
10.4.3	Terrestrial fauna	10-27
10.4.4	Aquatic biodiversity	10-29
10.4.5	Indirect impacts unable to be avoided	10-30
10.5	Impact assessment—operation	10-30
10.5.1	Terrestrial biodiversity	10-30
10.5.2	Aquatic biodiversity	10-31
10.6	Key threatening processes	10-31

10.7	Additional impacts that require consideration	10-33
10.7.1	Prescribed biodiversity impacts on threatened entities	10-33
10.7.2	Serious and irreversible impacts	10-34
10.7.3	Groundwater dependent ecosystems	10-34
10.7.4	Wetlands of national and international importance	10-34
10.8	Impacts on protected and sensitive lands	10-34
10.8.1	Protected areas	10-34
10.8.2	Key fish habitat	10-34
10.8.3	Waterfront land	10-35
10.8.4	Critical habitat	10-35
10.8.5	Biobank sites, private conservation lands and other offset lands	10-36
10.9	Mitigation and management	10-36
10.9.1	Approach to mitigation and management	10-36
10.9.2	Expected effectiveness	10-37
10.9.3	Interactions between mitigation measures	10-37
10.9.4	Recommended mitigation measures	10-37
10.9.5	Managing residual impacts	10-39
10.9.6	Biodiversity offset approach	10-42

Chapter 11

11.	TRAFFIC, TRANSPORT AND ACCESS	11-1
11.1	Overview	11-1
11.2	Approach	11-2
11.2.1	Legislative and policy context	11-2
11.2.2	Secretary's Environmental Assessment Requirements	11-2
11.2.3	Methodology	11-2
11.2.4	Risks identified	11-4
11.2.5	How potential impacts have been avoided/minimised	11-4
11.3	Existing environment	11-5
11.3.1	Road network	11-5
11.3.2	Traffic volumes	11-8
11.3.3	Traffic growth rate	11-9
11.3.4	Road safety	11-9
11.3.5	Existing rail network	11-9
11.3.6	Public and active transport	11-10
11.4	Impact assessment—construction	11-13
11.4.1	Traffic and road network impacts	11-16
11.4.2	Rail network	11-21
11.5	Impact assessment—operation	11-21
11.5.1	Traffic and road network	11-21
11.5.2	Rail network	11-24
11.6	Mitigation and management	11-24
11.6.1	Approach to mitigation and management	11-24
11.6.2	Expected effectiveness	11-25
11.6.3	Interactions between mitigation measures	11-25
11.6.4	Recommended mitigation measures	11-25
11.6.5	Managing residual impacts	11-26

Chapter 12

12.	HYDROLOGY AND FLOODING	12-1
12.1	Overview	12-1
12.2	Approach	12-1
12.2.1	Legislative and policy context	12-2
12.2.2	Secretary's Environmental Assessment Requirements	12-2
12.2.3	Methodology	12-2
12.2.4	Risks identified	12-7
12.2.5	How potential impacts have been avoided	12-7
12.3	Existing environment	12-8
12.3.1	Climate	12-8
12.3.2	Catchments	12-8
12.3.3	Watercourses	12-10
12.3.4	Flooding	12-12
12.3.5	Surface water supply	12-24
12.3.6	Farm dams	12-24
12.3.7	Stormwater infrastructure	12-25
12.4	Impact assessment—construction	12-25
12.4.1	General impacts	12-25
12.4.2	Construction staging	12-27
12.4.3	Construction surface water supply	12-27
12.4.4	Geomorphology	12-27
12.5	Impact assessment—operation	12-27
12.5.1	Flooding	12-28
12.5.2	Erosion and scour	12-40
12.5.3	Flood immunity	12-40
12.5.4	Geomorphology	12-42
12.5.5	Surface water availability and supply	12-43
12.5.6	Consistency with relevant policy and guidelines	12-43
12.5.7	Social and economic impacts	12-44
12.6	Mitigation and management	12-44
12.6.1	Approach to mitigation and management	12-44
12.6.2	Recommended mitigation measures	12-45
12.6.3	Managing residual impacts	12-47

Chapter 13

13.	WATER QUALITY	13-1
13.1	Overview	13-1
13.2	Approach	13-1
13.2.1	Legislative and policy context to the assessment	13-1
13.2.2	Secretary's Environmental Assessment Requirements	13-2
13.2.3	Methodology	13-2
13.2.4	Development of assessment criteria	13-3
13.2.5	Risks identified	13-5
13.2.6	How impacts have been avoided or minimised	13-5
13.3	Existing environment	13-6
13.3.1	Watercourses	13-6
13.3.2	Farm dams	13-6

13.3.3	Water quality	13-6
13.3.4	Sensitive receiving environments	13-14
13.3.5	Soils and geology	13-15
13.3.6	Contamination	13-15
13.4	Impact assessment—construction	13-16
13.4.1	Water quality impacts	13-16
13.4.2	Soil erodibility	13-18
13.4.3	Salinity	13-18
13.4.4	Contamination	13-18
13.4.5	Farm dams	13-18
13.4.6	Summary of construction impact	13-18
13.5	Impact assessment—operation	13-19
13.5.1	Summary of operation impact	13-20
13.6	Performance against NSW Water Quality Objectives	13-20
13.7	Mitigation and management	13-21
13.7.1	Approach to mitigation and management	13-21
13.7.2	Expected effectiveness	13-23
13.7.3	Interaction between measures	13-23
13.7.4	Recommended mitigation measures	13-23
13.7.5	Managing residual impacts	13-23

Chapter 14

14.	GROUNDWATER	14-1
14.1	Overview	14-1
14.2	Approach	14-2
14.2.1	Legislative and policy context to the assessments	14-2
14.2.2	Secretary's Environmental Assessment Requirements	14-2
14.2.3	Methodology	14-2
14.2.4	Risks identified	14-10
14.2.5	How potential risks have been avoided or minimised	14-11
14.3	Existing environment	14-11
14.3.1	Hydrogeology and groundwater levels	14-11
14.3.2	Groundwater quality	14-14
14.3.3	Sensitive receptors	14-15
14.3.4	Conceptual hydrogeological model	14-23
14.4	Impact assessment—construction	14-24
14.4.1	Dewatering	14-25
14.4.2	Salinity	14-25
14.4.3	Settlement	14-27
14.4.4	Contamination	14-27
14.4.5	Groundwater recharge	14-27
14.5	Impact assessment—operation	14-27
14.5.1	Salinity	14-28
14.5.2	Settlement	14-28
14.5.3	Contamination	14-28
14.5.4	Groundwater recharge and dewatering	14-28
14.5.5	Performance against NSW Aquifer Interference Policy	14-28
14.6	Mitigation and management	14-28

14.6.1	Approach to mitigation and management	14-28
14.6.2	Expected effectiveness	14-29
14.6.3	Interaction between mitigation measures	14-29
14.6.4	Recommended mitigation measures	14-29
14.6.5	Managing residual impacts	14-30

Chapter 15

15.	CULTURAL HERITAGE	15-1
15.1	Overview	15-1
15.1.1	Aboriginal heritage	15-1
15.1.2	Non-Aboriginal heritage	15-1
15.2	Approach	15-2
15.2.1	Legislative and policy context to the assessment	15-2
15.2.2	Secretary's Environmental Assessment Requirements	15-3
15.2.3	Methodology	15-3
15.2.4	Risks identified	15-7
15.2.5	How potential impacts have been minimised or avoided	15-7
15.3	Existing environment	15-8
15.3.1	Environmental context	15-8
15.3.2	Aboriginal heritage	15-8
15.3.3	Non-Aboriginal heritage	15-26
15.4	Impact assessment—construction	15-32
15.4.1	Aboriginal heritage	15-32
15.4.2	Non-Aboriginal heritage	15-35
15.5	Impact assessment—operation	15-35
15.6	Mitigation and management	15-36
15.6.1	Approach to mitigation and management	15-36
15.6.2	Expected effectiveness	15-36
15.6.3	Interactions between mitigation measures	15-37
15.6.4	Recommended mitigation measures	15-37
15.6.5	Managing residual impacts	15-39

Chapter 16

16.	NOISE AND VIBRATION	16-1
16.1	Overview	16-1
16.1.1	Noise	16-1
16.1.2	Vibration	16-2
16.1.3	Blasting	16-2
16.2	Approach	16-3
16.2.1	Legislative and policy context	16-3
16.2.2	Secretary's Environmental Assessment Requirements	16-4
16.3	Methodology	16-4
16.3.1	Construction	16-4
16.3.2	Operation	16-5
16.3.3	Risks identified	16-6
16.3.4	How potential impacts have been avoided/minimised	16-6

16.4	Noise and vibration criteria	16-7	17.3.6	How potential impacts have been avoided or minimised	17-11
16.4.1	Construction	16-7	17.4	Existing social environment	17-11
16.4.2	Operation	16-9	17.4.1	Local study area baseline	17-11
16.5	Existing environment	16-11	17.4.2	Regional study area baseline	17-13
16.5.1	Overview	16-11	17.4.3	Regional transport networks	17-16
16.5.2	Sensitive receivers	16-11	17.4.4	Social infrastructure	17-17
16.5.3	Vibration sensitive receivers	16-12	17.5	Existing economic environment	17-18
16.5.4	Existing noise levels	16-12	17.5.1	Labour market and employment	17-18
16.6	Impact assessment—construction	16-15	17.5.2	Business and industry	17-22
16.6.1	Construction noise	16-15	17.5.3	Local businesses and industry	17-23
16.6.2	Construction noise impacts over proposal duration	16-19	17.6	Social impact assessment—construction	17-24
16.6.3	Management of noise impacts associated with out-of-hours work	16-19	17.6.1	Way of life	17-24
16.6.4	Traffic noise	16-20	17.6.2	Community	17-27
16.6.5	Ground-borne noise	16-22	17.6.3	Accessibility	17-27
16.6.6	Vibration	16-22	17.6.4	Culture	17-27
16.6.7	Road infrastructure and utilities	16-23	17.6.5	Health and wellbeing	17-27
16.6.8	Blasting criteria	16-23	17.6.6	Surroundings	17-27
16.7	Cumulative construction noise and vibration	16-23	17.6.7	Livelihoods	17-28
16.8	Impact assessment—operation (rail)	16-23	17.6.8	Decision-making systems	17-29
16.8.1	Noise	16-23	17.6.9	Summary of social impacts during construction	17-29
16.8.2	Sleep disturbance	16-24	17.7	Social impact assessment—operation	17-30
16.8.3	Predicted noise levels non-residential sensitive receivers	16-24	17.7.1	Way of life	17-30
16.8.4	Other noise impacts	16-25	17.7.2	Community	17-31
16.8.5	Vibration	16-25	17.7.3	Accessibility	17-31
16.9	Impact assessment—operation (non-rail)	16-26	17.7.4	Culture	17-31
16.9.1	Predicted noise levels—2026	16-26	17.7.5	Health and wellbeing	17-31
16.9.2	Predicted noise levels—2036	16-27	17.7.6	Surroundings	17-31
16.9.3	Traffic noise at level crossings	16-29	17.7.7	Livelihoods	17-32
16.10	Mitigation and management	16-29	17.7.8	Decision-making systems	17-32
16.10.1	Approach to mitigation and management	16-29	17.7.9	Sentiment	17-33
16.10.2	Expected effectiveness	16-31	17.7.10	Summary of social impacts during operation	17-33
16.10.3	Interactions between mitigation measures	16-31	17.8	Economic impact assessment	17-34
16.10.4	Recommended mitigation measures	16-31	17.8.1	Workforce impacts	17-34
16.10.5	Recommended construction management measures	16-33	17.8.2	Business and industry impacts	17-34
16.10.6	Managing residual impacts	16-34	17.8.3	Local businesses	17-34
Chapter 17					
17.	SOCIAL AND ECONOMIC	17-1	17.9	Economic benefits assessment	17-35
17.1	Overview	17-1	17.9.1	Base case and project case	17-36
17.2	Approach	17-2	17.9.2	Benefit categories	17-36
17.2.1	Legislative and policy context to the assessments	17-2	17.9.3	Economic benefits assessment results	17-36
17.2.2	Secretary's Environmental Assessment Requirements	17-3	17.9.4	Cost-benefit analysis: Inland Rail program business case	17-37
17.3	Methodology	17-3	17.10	Regional economic impact analysis	17-37
17.3.1	Study area	17-3	17.10.1	Key considerations	17-37
17.3.2	Key tasks—social impact assessment	17-8	17.10.2	Regional economic impact analysis results	17-38
17.3.3	Key tasks—economic impact assessment	17-9	17.11	Mitigation and management	17-42
17.3.4	Consultation and the social impact assessment	17-9	17.11.1	Approach to mitigation and management	17-42
17.3.5	Risks identified	17-10	17.11.2	Expected effectiveness	17-43
			17.11.3	Interactions between mitigation measures	17-43
			17.11.4	Recommended mitigation measures	17-43
			17.11.5	Managing residual impacts	17-44

Chapter 18

18.	LAND USE AND PROPERTY	18-1
18.1	Overview	18-1
18.2	Approach	18-2
18.2.1	Legislative and policy context of the assessments	18-2
18.2.2	Methodology	18-3
18.2.3	Risks identified	18-4
18.3	Existing environment	18-5
18.3.1	General land use description	18-5
18.3.2	Land uses within the proposal site	18-5
18.3.3	Agriculture uses and activities	18-8
18.3.4	Mining exploration and petroleum leases and licences	18-18
18.3.5	Travelling stock reserves, livestock highways, Crown land and road reserves	18-18
18.3.6	Biosecurity	18-18
18.4	Impact assessment—construction	18-22
18.4.1	Land requirements	18-22
18.4.2	Agricultural land use impacts	18-22
18.4.3	Other land use impacts	18-24
18.5	Impact assessment—operation	18-25
18.5.1	General land-use impacts	18-25
18.5.2	Agricultural land-use impacts	18-25
18.5.3	Impacts on future use, subdivision and development potential	18-27
18.5.4	Other land-use impacts	18-27
18.6	Mitigation and management	18-28
18.6.1	Approach to mitigation and management	18-28
18.6.2	Approach to managing the key potential impacts identified	18-28
18.6.3	Expected effectiveness	18-29
18.6.4	Consideration of the interactions between mitigation measures	18-30
18.6.5	Recommended mitigation measures	18-30
18.6.6	Managing residual impacts	18-31

Chapter 19

19.	LANDSCAPE AND VISUAL IMPACTS	19-1
19.1	Overview	19-1
19.2	Approach	19-1
19.2.1	Legislative and policy context to the assessment	19-1
19.2.2	Secretary's Environmental Assessment Requirements	19-2
19.2.3	Methodology	19-2
19.2.4	Risks identified	19-7
19.2.5	How potential impacts have been avoided/minimised	19-7
19.3	Existing environment	19-7
19.3.1	Existing landscape character	19-7
19.3.2	Viewpoints	19-9
19.4	Impact assessment—construction	19-11

19.4.1	Visual impact	19-11
19.4.2	Landscape character impact	19-19
19.4.3	Lighting impact	19-19
19.5	Impact assessment—operation	19-20
19.5.1	Visual impact	19-21
19.5.2	Landscape character impact	19-31
19.5.3	Lighting impact	19-33
19.6	Mitigation and management	19-34
19.6.1	Approach to mitigation and management	19-34
19.6.2	Expected effectiveness	19-35
19.6.3	Interaction between measures	19-35
19.6.4	Recommended mitigation measures	19-36
19.6.5	Managing residual impacts	19-38

Chapter 20

20.	SOILS AND CONTAMINATION	20-1
20.1	Overview	20-1
20.2	Approach	20-1
20.2.1	Legislative and policy context to the assessment	20-1
20.2.2	Secretary's Environmental Assessment Requirements	20-2
20.2.3	Methodology	20-2
20.2.4	Risks identified	20-2
20.2.5	How potential impacts have been avoided/minimised	20-3
20.3	Existing environment	20-5
20.3.1	Geology and soils	20-5
20.3.2	Contamination	20-7
20.4	Impact assessment—construction	20-10
20.4.1	Erosion and sedimentation impacts	20-10
20.4.2	Acidity	20-10
20.4.3	Saline soils	20-10
20.4.4	Contamination	20-11
20.5	Impact assessment—operation	20-12
20.5.1	Soils	20-12
20.5.2	Contamination	20-12
20.6	Mitigation and management	20-12
20.6.1	Approach to mitigation and management	20-12
20.6.2	Expected effectiveness	20-13
20.6.3	Interactions between mitigation measures	20-13
20.6.4	Recommended mitigation measures	20-14
20.6.5	Managing residual impacts	20-15

Chapter 21

21.	WASTE	21-1
21.1	Overview	21-1
21.2	Approach	21-1
21.2.1	Legislative and policy context to the assessment	21-1
21.2.2	Secretary's Environmental Assessment Requirements	21-2
21.2.3	Methodology	21-2
21.2.4	Risks identified	21-3
21.2.5	How potential impacts have been avoided/minimised	21-3
21.3	Impact assessment—construction	21-3
21.3.1	Waste-generating activities	21-3
21.4	Impact assessment—operation	21-7
21.4.1	Waste generation from operating activities	21-7
21.4.2	Waste disposal	21-7
21.5	Mitigation and management	21-7
21.5.1	Approach to mitigation and management	21-7
21.5.2	Expected effectiveness	21-8
21.5.3	Interactions between mitigation measures	21-8
21.5.4	Waste management hierarchy	21-8
21.5.5	Waste segregation	21-9
21.5.6	Recommended mitigation measures	21-13
21.5.7	Managing residual impacts	21-14

Chapter 22

22.	CLIMATE CHANGE RISK	22-1
22.1	Overview	22-1
22.2	Scope of chapter	22-1
22.3	Secretary's Environmental Assessment Requirements	22-1
22.4	Legislation, policies, standards and guidelines	22-1
22.5	Impact assessment methodology	22-3
22.5.1	Climate change risk assessment	22-3
22.6	Existing and future climate	22-3
22.6.1	Observed local climate	22-3
22.7	Potential impacts	22-6
22.7.1	Construction	22-7
22.7.2	Operation	22-7
22.8	Adaptation measures	22-10
22.8.1	Climate adaptation measures	22-10
22.8.2	Recommended mitigation measures	22-11
22.8.3	Residual risk assessment	22-12

Chapter 23

23.	SUSTAINABILITY	23-1
23.1	Overview	23-1
23.2	Background	23-1
23.3	Scope of chapter	23-1
23.4	Secretary's Environmental Assessment Requirements	23-1
23.5	Legislative, policy, standards and guideline context	23-1
23.6	Approach to Sustainability on Inland Rail	23-3
23.7	Methodology	23-4
23.7.1	Infrastructure Sustainability Council of Australia Rating Scheme	23-4
23.7.2	Adoption of the Infrastructure Sustainability Council of Australia Rating Scheme during the planning phase	23-6
23.7.3	Preliminary weightings assessment	23-6
23.7.4	Previous studies relating to sustainability	23-6
23.7.5	Preliminary Performance Assessment	23-7
23.8	Sustainability management and measures	23-8
23.8.1	Sustainability Management Plan	23-8
23.8.2	Sustainability in Design	23-8
23.8.3	Future sustainability opportunities at program and proposal level	23-12
23.8.4	Broad-scale sustainability opportunities	23-13
23.8.5	Skills and legacy	23-13
23.8.6	Recommended mitigation measures	23-13
23.9	Conclusions	23-14

Chapter 24

24.	AIR QUALITY	24-1
24.1	Overview	24-1
24.2	Approach	24-1
24.2.1	Legislative and policy context to the assessment	24-1
24.2.2	Secretary's Environmental Assessment Requirements	24-2
24.2.3	Methodology	24-2
24.2.4	Risk identified	24-6
24.2.5	How potential impacts have been avoided/minimised	24-6
24.3	Existing environment	24-7
24.3.1	Sensitive receivers	24-7
24.3.2	Local meteorology	24-10
24.3.3	Existing air quality	24-12
24.4	Impact assessment—construction	24-14
24.4.1	Generation of particulate matter	24-14
24.4.2	Odour emissions	24-20
24.4.3	Gaseous emissions	24-20
24.4.4	Ecological sensitivity	24-21

24.5	Impact assessment—operation	24-21
24.5.1	Comparison with other NSW rail projects	24-21
24.5.2	Road modifications	24-22
24.5.3	Assessment of operational impacts from the proposal	24-22
24.6	Mitigation and management	24-22
24.6.1	Approach to mitigation and management	24-22
24.6.2	Interactions between measures	24-23
24.6.3	Expected effectiveness	24-23
24.6.4	Recommended mitigation measures	24-23
24.6.5	Managing residual impacts	24-24

Chapter 25

25.	HEALTH AND SAFETY (INCLUDING HAZARDOUS MATERIALS)	25-1
25.1	Overview	25-1
25.2	Approach	25-1
25.2.1	Legislative and policy context to the assessment	25-1
25.2.2	Secretary's Environmental Assessment Requirements	25-2
25.2.3	Methodology	25-2
25.2.4	How potential impacts have been avoided/minimised	25-4
25.3	Existing environment	25-4
25.3.1	Receivers	25-4
25.3.2	Dangerous goods and hazardous materials	25-5
25.3.3	Extreme weather events	25-5
25.3.4	Subsidence	25-8
25.3.5	Contamination	25-8
25.4	Impact assessment—construction	25-9
25.4.1	Dangerous goods and hazardous materials	25-9
25.4.2	Extreme weather	25-11
25.4.3	Utilities	25-11
25.4.4	Contamination	25-11
25.4.5	Emergency vehicle movements	25-12
25.4.6	Subsidence	25-12
25.4.7	Community safety	25-12
25.4.8	Workplace safety	25-12
25.5	Impact assessment—operation	25-13
25.5.1	Dangerous goods and hazardous materials	25-13
25.5.2	Extreme weather events	25-13
25.5.3	Emergency vehicle movements	25-13
25.5.4	Community safety	25-14
25.5.5	Subsidence	25-14
25.5.6	Contamination	25-14
25.6	Mitigation and management	25-14
25.6.1	Approach to mitigation and management	25-14
25.6.2	Expected effectiveness	25-16
25.6.3	Interaction between measures	25-16
25.6.4	Recommended mitigation measures	25-16
25.6.5	Managing residual impacts	25-17

Chapter 26

26.	CUMULATIVE AND RESIDUAL IMPACTS	26-1
26.1	Overview	26-1
26.2	Methodology	26-1
26.2.1	Residual impacts assessment	26-2
26.3	Projects considered for cumulative impact assessment	26-2
26.3.1	Adjacent sections of Inland Rail	26-2
26.3.2	Other projects considered	26-3
26.4	Cumulative impacts	26-5
26.4.1	Residual impacts	26-6
26.5	Summary of results	26-7
26.6	Mitigation and management	26-7

Chapter 27

27.	APPROACH TO ENVIRONMENTAL MANAGEMENT AND MITIGATION	27-1
27.1	Compilation of impacts	27-1
27.2	Approach to environmental management	27-4
27.2.1	Construction environmental management plan	27-5
27.2.2	Operational Environmental Management Framework (EMF)	27-6
27.3	Compilation of mitigation measures	27-7
27.4	Proposal uncertainties and approach to design refinements	27-24
27.4.1	Proposal uncertainties	27-24
27.4.2	Approach to design refinements	27-25
27.5	Compilation of performance outcomes	27-27

Chapter 28

28.	JUSTIFICATION OF THE PROPOSAL	28-1
28.1	Summary of the proposal for approval	28-1
28.1.1	Overview of the proposal	28-1
28.1.2	Location	28-1
28.1.3	Key design features	28-1
28.1.4	Construction features	28-2
28.1.5	Operation	28-2
28.1.6	Timing	28-2
28.1.7	Statutory requirements	28-2
28.2	Summary of impacts	28-3
28.2.1	Outline of strategies to avoid or minimise impacts	28-3
28.2.2	Impacts that have not been avoided	28-3
28.2.3	Proposal uncertainties	28-8

28.3	Justification of the proposal	28-9
28.3.1	Strategic need	28-9
28.3.2	Biophysical, economic and social considerations	28-10
28.4	Concluding statement	28-13

Chapter 29
