

Mr Chris Buscall
Environment Manager – Snowy 2.0
Snowy Hydro Limited
27/6/2022

Subject: Snowy 2.0 Main Works (SSI 9687) Spoil Management Plan update

Dear Mr Buscall

I refer to the revised Spoil Management Plan (rev L, dated 27 June 2022), which was submitted in accordance with Condition 7 of Schedule 3 of the Infrastructure Approval for the Snowy 2.0 Main Works project (SSI 9687).

The Department has carefully reviewed the document and is satisfied that it has been prepared in accordance with the relevant conditions.

Accordingly, as nominee of the Planning Secretary, I approve the revised Spoil Management Plan (rev L, 27 June 2022). Please ensure you make the document and this approval letter publicly available on the project website.

The Department notes that a variation to the Environment Protection Licence to accommodate works at GF01 is required, and that Snowy Hydro will need to prepare a comprehensive monitoring program and contingency plan subject to consultation with the Environment Protection Authority (EPA).

Once these additional details are finalised, you must review and update the relevant strategies, plans and programs by either including or referencing these measures. This must be done prior to emplacing any spoil at GF01.

In addition, the Spoil Management Plan must be updated in consultation with relevant stakeholders and approved by the Department prior to the emplacement of spoil at the Tantangara, Ravine Bay and Rock Forest emplacement areas.

If you wish to discuss the matter further, please contact Anthony Ko on 02 8217 2022 or at anthony.ko@planning.nsw.gov.au.

Yours sincerely

Nicole Brewer
Director
Energy Assessments

As nominee of the Planning Secretary
