Subject: Snowy 2.0 - Main Works
Tunnel Boring Machine (TBM) - Florence Monitoring Report (21/12/2023 to 03/01/2024)

Dear Miss Martin

Reference is made to your post approval matter, SSI-9687-PA-164, Tunnel Boring Machine (TBM) - Florence Monitoring Report, submitted as required by Section 4.2 of the Snowy 2.0 Main Works - Subsidence Management Plan of CSSI-9687 as modified (the approval) to the NSW Department of Planning, Housing and Infrastructure (NSW Planning) on 4 January 2024.

NSW Planning has reviewed the TBM Florence Monitoring Report and notes the following:

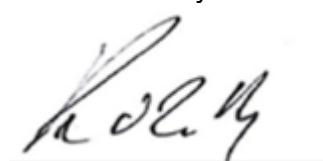

- the 1st advance, subject to the Subsidence Management Plan, of the TBM Florence occurred on 6 December 2023;
- as at 3 January 2024 the TBM Florence had advanced approximately 52 metres with 26 rings completed in closed (slurry) mode,
- no alerts, actions or alarm levels have been triggered, and
- there was heavy spillage of material from the Conveyor Belts in the Slurry Treatment Plant during excavation.
-

NSW Planning considers the TBM Florence Monitoring report to generally satisfy the monitoring report requirement. In accordance with Schedule 4 condition 12 of the approval, please ensure this report is uploaded to the Snowy 2.0 website.

Please note that acknowledgement of this report is not an endorsement of the compliance status of the project.

Should you wish to discuss the matter further, please contact Michael Wood on 0459890661 or email compliance@planning.nsw.gov.au

Yours sincerely
