

Goulburn City Council

I'm writing this objection purely for my Dad and his health.

My Dad was recently diagnosed with a Level 1 cancer. That alone has been a huge shock and worry to our family. On top of that, this solar project being built right next to their property has greatly increased the level of stress. This stress is my concern as we do not want it to progress to a level 2 or even a level 3. I also have concern and worry about this project having an impact on his mental health.

Please consider the human impact the solar is having on not only my parents but the other farmers nearby.

Thankyou

Jane Brooker
