

Concrete Blinder Replacement System

Neoferma PUR-X® Blinder is a 1-component, water reactive, solvent and sulphate free, ultra-low viscosity polyurethane resin.

PUR-X® Blinder is especially developed to consolidate, strengthen, and harden the top surface of porous soils. If required it can provide an impervious surface, resistant to most contaminants including hydro-carbons.

The advantages ADD UP

Provide a strong working base to support both membrane and reinforcing steel in record time.

No over excavation means

- No excavation costs
- No disposal fees
- No council fees

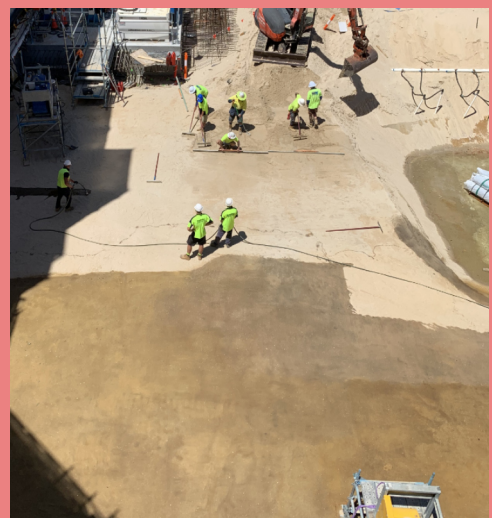

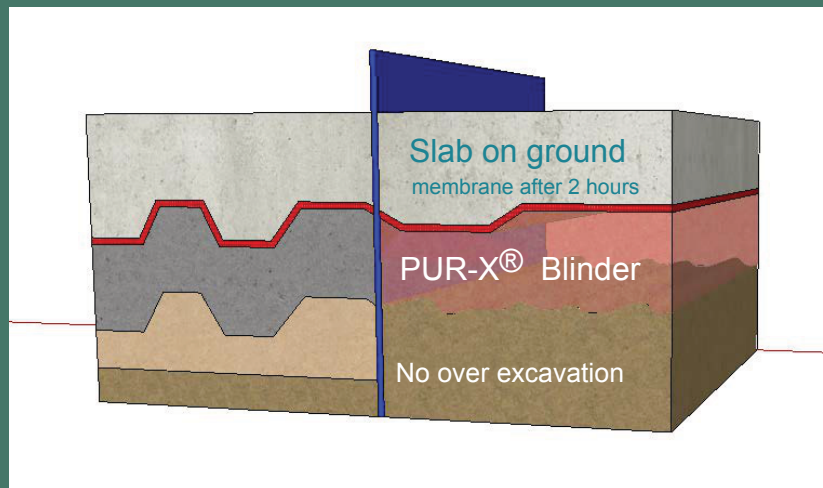

No infill means

- No sand costs
- No traffic control or associated costs

No concrete means

- No concrete costs
- No pumps
- No traffic control
- No fees
- Reduce program
