

Hi my name is Maya; I am 9 years old. I go to Lane cove west public school and my family and I play lots sport at Blackman Park. I am deeply concerned about the data centre being proposed as I imagine it will affect the community, the school that I go to and Blackman Park in many ways. Because of this the data centre should not be built here.

Noise: As I mentioned earlier I go to Lane cove west public school which is very close to the site that you will be building the data centre. I fear that the construction will be very loud and distracting for the students. Aside from my school it will also be very noisy for the community.

Sport: Blackan park is also very close to the site of the data centre. It is used for lots of sport and training. I am afraid that it is going to affect the sport there too.

The community: I know that it is going to take a long time to build the data centre and once it is built it is going to take up a lot of electricity and water. Because of this there are going to be potential power outages and that is not going to be good for us. It will also create lots of pollution which is bad for everybody's health.

Tree cutting: I know that during the building of the data centre there are going to be trees in the way that you need to cut down. The removal of those trees is going to affect the birds and the and all the other animals that live in them.

Questions: Is the building of the data centre going to affect our backyard? Will the data centre effect our water supply?

I think it is the important for you to know that I have written this letter by myself and not using AI.
