**Objection – Emirates Wolgan Valley Resort - Modification 4 MP06\_0310**

I write as the State Member for the Blue Mountains on behalf of my community, Wilderness Australia and the Gardens of Stone Alliance.

As a local resident, a bushwalker and someone who takes solace in the tranquil sounds of nature found throughout the Blue Mountains and beyond, I feel dismayed that this unique and peaceful environment may be disrupted due to such proposed significant increases in flight volume across the area (4 flights per week to 210 flights per week).

It is the view of many that the noise footprint over lower Blue Mountains villages and other areas of the World Heritage National Park will likely and notably change for those who reside in these townships.

The increase in air traffic, the additional noise it will create, and the number of people who will potentially be negatively affected is disproportionate to the number of people who would benefit from such a proposal being approved.

The proponent appears to base the application for modification on the closure of Wolgan Road. However, my understanding is that this road is due to reopen to two-wheel-drive traffic by August 2026. With this being the case, I cannot see the justification for such an application and strongly urge reconsideration of the proposal.

Yours sincerely,

Trish Doyle MP  
**Member for Blue Mountains**
