To whom it may concern,

I am writing on behalf of Pittman Building Services Pty Ltd in support of the proposed Bluestone Hard Rock Quarry at Elderslie.

Pittman Building is an established construction company that has operated in the Hunter Valley for more than 20 years, delivering commercial and industrial building projects. Every project we undertake relies on quarry materials. For many years we've taken for granted how easy it is to get quarry products — simply making a phone call and having the materials delivered when we need them. What people often don't see is the amount of planning, investment and regulation behind that convenience. Without new quarries coming online, that reliable supply disappears, and the construction sector feels the impact through delays, higher costs and reduced availability of essential materials.

Our local region continues to grow, and with that growth comes increasing demand for concrete, road base and other quarry products. A locally sited quarry will be critical to supporting that growth and ensuring materials can be sourced efficiently and sustainably.

We understand that projects of this scale can raise concerns in the community. Those concerns should be properly considered and addressed through the assessment process and the conditions of consent.

For these reasons, Pittman Building supports the approval of the Bluestone Hard Rock Quarry.

Thank you for considering our submission.

Yours faithfully,

Luke Standen
Pittman Building Services Pty Ltd
