OBJECTION

Department of Planning and Environment

Application No. SSD-6236

**Location Honeycomb Drive, Eastern Creek
(Part Lot 1, Part Lot 2 and Lot 3 DP 1145808)**

Applicant The Next Generation (NSW) Pty Ltd

Council Area Blacktown

Consent Authority Land and Environment Court of NSW

I am writing to register my OBJECTION to the proposed Energy from Waste Facility at Eastern Creek by The Next Generation NSW Pty Ltd.

I live with my Family close (approx. 5km) to the site. I go to School in the Local Area. I play sport in the local Area.

When I heard that the largest energy incinerator in the world would be burning rubbish in the middle of Sydney, I started reading about these Incinerators and was amazed that there did not appear to be any limit on the type of rubbish that would be burnt. Very little reading revealed that there could be an excess risk of cancer and respiratory problems to local residents. Further reading also revealed the formation of cancer clusters in areas where very little thought or concern was given to environmental matters by the so-called Authorities of certain areas which years later, reveals problems for residents who have lived in that area.

I also believe that as our area is a lower social economic area, even less thought is given and this Incinerator would never be allowed to proceed in more affluent areas of Sydney.

I say that there are many more sustainable methods of generating energy which do not jeopardise the lives of people and this Incinerator should never be allowed. I cannot see how the EPA could even concern any kind of approval.

I believe that my family's health will be at risk.

Regards
