

9.118 Compensation to be Mitigated

Whom has the upper hand once the rail bridge has been completed. This needs to be resolved prior to construction, or do the sensible thing and use the alternative route down Kiandool Lane Narrabri, less effect on people's mental health and save millions of dollars.

9.11.9 Property Value (Response wasn't wide ranging)

Valuer General still hasn't responded to my rates Valuation objection. Inland Rail received a valuation from me stating a 40% drop in property value, once the proposed route starts. Its not just the immediate devaluation, but the lack of appreciation in value to my property that wouldn't continually apply. When other properties would appreciate.

Regards

William John Foster
