

Cochran Horse Treks
“Future under Snowy 2”

ATTENTION.

Corporate Affairs Manager (Snowy Hydro)

Manager KNP (Snowy 2 project)

To whom it may concern.

Cochran Horse Treks partners Peter and Judy Cochran support the concept of Snowy 2 and seek to work cooperatively with Snowy Hydro subject to the approval of terms agreed to within the feasibility study.

Cochran Horse Treks operate in the Tantangara /Bullocks Hill area of KNP between October and May under licence to NPWS which is renewed annually.

Having read the recently published Snowy Hydro News “what you can expect to see” page we have anticipated that there is potential for Snowy Hydro operations to seriously disrupt our business operations and diminish the unique experience of solitude and wilderness connection with nature.

While we have identified other aspects of potential conflict including travel on Tantangara Road, it would be preferable for us to have the opportunity to identify these issues as part of the feasibility study under “social impact.”

We therefore seek consultation with both Snowy Hydro and NPWS as to future options so that both Snowy 2 and Cochran Horse Treks can work in harmony to our mutual benefit .

Peter Cochran
