

22 December 2022

The Secretary
NSW Department of Planning and Environment

Attention: Dominic Crinnion, Acting Director Infrastructure Management

Moorebank Intermodal Precinct East Stage 2 Modifications 5 and 6

Dear Sir or Madam

I refer to the Department's letter of email of 13 December 2022 regarding the exhibition of the Moorebank Intermodal Precinct East Stage 2 at Moorebank Avenue, Moorebank in the Liverpool City Council Local Government Area (LGA) for modifications:

- SSD-7628-Mod-5 to adjust the timing requirements for completion of required road upgrades, and align required works to the approved Moorebank Avenue Realignment (SSI-10053).
- SSD-7628-Mod-6 to allow for the storage of dangerous goods at warehouse 7.

Submissions need to be made to the Department by 18 January 2023.

Please refer to Endeavour Energy's previous submission made to the Department on 3 February 2017 for the Moorebank Precinct East (MPE): Stage 2 Application - SSD 7628.

The Modification Reports do not appear to indicate any stakeholder consultation with Endeavour Energy or any impact on the electricity distribution network.

In regard to the storage of dangerous goods, please find attached a copy of Endeavour Energy's 'Standard Conditions for Development Applications and Planning Proposals', Version 7 December 2022 in which condition 19 'Hazardous Environment' is relevant. It also provides additional / updated advice for the matters raised in Endeavour Energy's previous submissions.

For further advice the applicant can call Endeavour Energy via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 or (02) 9853 6666 and the following contacts:

- Customer Network Solutions Branch for matters related to the electricity supply or asset relocation who are responsible for managing the conditions of supply with the applicant and their Accredited Service Provider (ASP). Alternatively contact can be made by email cicadmin@endeavourenergy.com.au.
- Easements Officers for matters related to easement management or protected works / assets. Alternatively contact can be made via email Easements@endeavourenergy.com.au.

- Property Branch for matters related to property tenure. Alternatively contact can be made by email network_property@endeavourenergy.com.au (underscore between 'network' and 'property').
- Field Operations Branch for safety advice for building or working near electrical assets in public areas. The site is in the area covered by Penrith Field Service Centre. Alternatively contact can be made by email Construction.Works@endeavourenergy.com.au .

Should you wish to discuss this matter, or have any questions, please do not hesitate to contact me or the contacts identified above or in Endeavour Energy's previous submission in relation to the various matters. Due to the high number of development application / planning proposal notifications submitted to Endeavour Energy, to ensure a response contact by email to property.development@endeavourenergy.com.au is preferred.

Yours faithfully

Cornelis Duba | Development Application Specialist

-  Existing railway
-  Watercourse

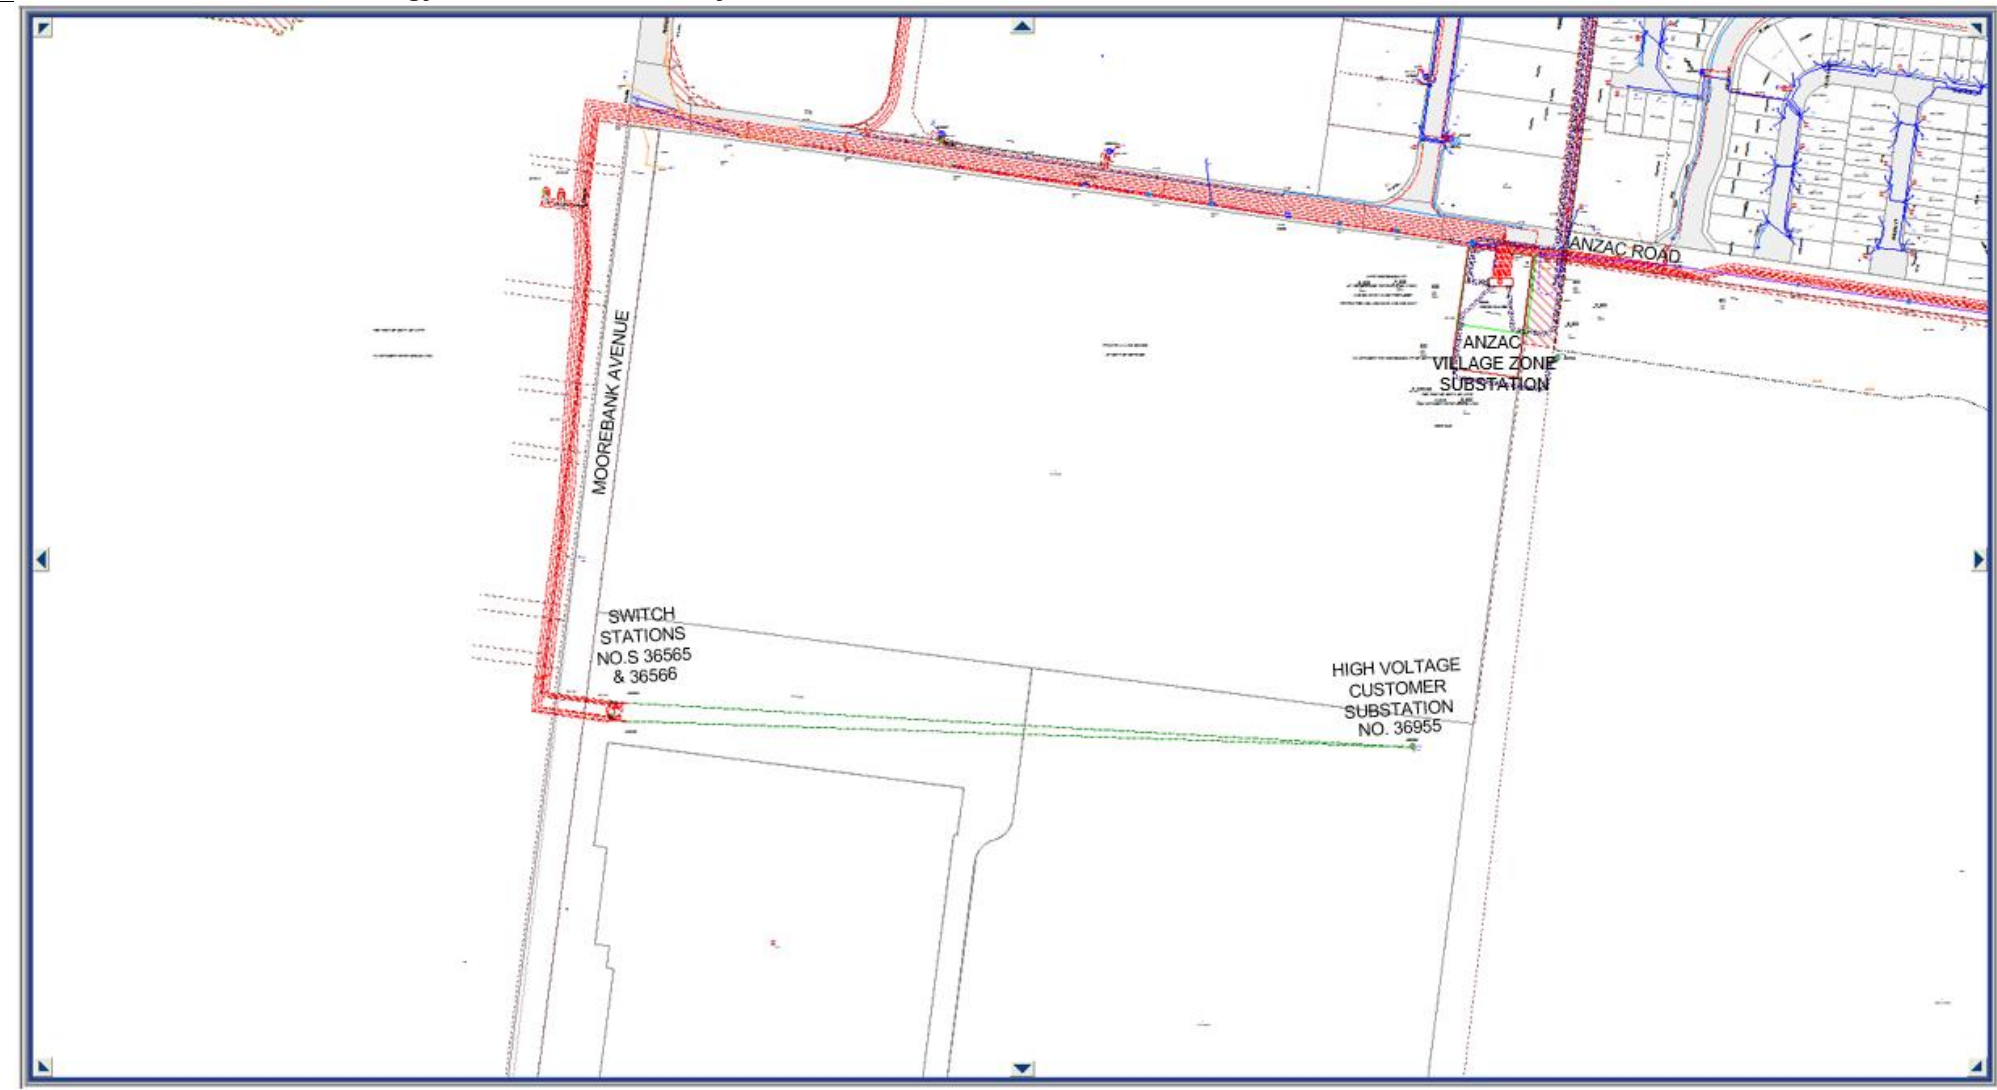

Figure 1-1: Site Location

Site Plan from Endeavour Energy's G/Net Master Facility Model

Please note the location, extent and type of any electricity infrastructure, boundaries etc. shown on the plan is indicative only. In addition it must be recognised that the electricity network is constantly extended, augmented and modified and there is a delay from the completion and commissioning of these works until their capture in the model. Easements benefitting Endeavour Energy are indicated by red hatching. Generally (depending on the scale and/or features selected), low voltage (normally not exceeding 1,000 volts) is indicated by blue lines and high voltage (normally exceeding 1,000 volts but for Endeavour Energy's network not exceeding 132,000 volts / 132 kV) by red lines (these lines can appear as solid or dashed and where there are multiple lines / cables only the higher voltage may be shown). This plan only shows the Endeavour Energy network and does not show electricity infrastructure belonging to other authorities or customers owned electrical equipment beyond the customer connection point / point of supply to the property. This plan does not constitute the provision of information on underground electricity power lines by network operators under Part 5E 'Protection of underground electricity power lines' of the *Electricity Supply Act 1995* (NSW).
