11 July 2023

The Director Resource Assessments. Jessie Evans.

I live within 10 km as the Yellowtail Black Cockatoo flies to this development.  
I object to the proposal or the Stone Ridge Quarry project SSD - 10432 for the following reasons;

I seriously doubt Italia road could take the proposed amount of traffic in the condition it is in at the moment. It is not even safe for normal domestic traffic in that Road having to share it with the amount of gravel trucks from the Hanson Quarry at Brandy Hill.

Major Loss of natural habitat and biodiversity.

Overbearing traffic noise (I don't care what Brandy Hill Hanson Quarry says, they start at 5 am we can hear them here in Nelsons Plains every day except Sunday.

- Noise vibration and dust from dynamite blasting.

Loss of air quality and associated health concerns.

Can you imagine what damage the blasting does to the burrowing creatures?

Polluting of surface and ground water.

The loss of the tranquillity of our beautiful natural forest and surrounds.

We made massive sacrifices to move here, both financially and mentally, to be in this wonderful tranquil area for the rest of our (hopefully) years, this proposal threatens all we've done to live here happily.

I have not made any reportable political donation in the last two years. I acknowledge and accept the department disclaimer and declaration.

I would appreciate it very much if you could please acknowledge receipt of this submission.

Regards

Terence Smith.
