Dear Sir/Madam,

**Re: Objection to Application No.SSD-8911 - Sundown Solar Pty Ltd. Swan Vale,  
NSW**

I object to any renewable projects in Australia, when other countries continue to buy our coal and gas resources, which they burn in newly commissioned power stations, while Australians are left with unreliable base load energy sources. It's the beginning of a new kind of dark age, which won't bother the foreign owned investor, as they still get their money.

Additionally, the danger to, and destruction of, the immediate community of Swan Vale with the development of this proposed farm via Spring Mountain Road when a far shorter access road route is available is poor planning. Who is liable for destruction to other properties when emergency services cannot arrive quickly?

Yours sincerely,
