PARRAMATTA, New South Wales, 2124.

To Whom It May Concern,

Development Application SSD-8911: Sundown Solar Pty Ltd, Swan Vale Project

I object to this project in its entirety.

1. The encroachment on the property rights of the neighbours.
2. The risk of land and water contamination of the site and the encroachment of the same contaminates on the landholders downstream.
3. The unwillingness of Sundown Solar Pty Ltd, the Inverell Shire Council and the NSW Government to be open and honest towards everyone, including the extended community, during the proposal development and the entire permission seeking process.
4. The false information and twisted data associated with so called renewable energy sources in general and the promotion of politicised agendas which go along with it.

The dishonesty, complete lack of transparency, encroachment and destruction associated with this project is totally unacceptable. I do not consent to the Swan Vale Project in any form whatsoever.
