RE: Proposed Plasrefine Plastics Recycling Facility
74-76 Beaconsfield Road Moss Vale NSW 2577
SSD Application No-9409987

I Ben & Alena Shaw object to the Plasrefine Recycling Facility in Moss Vale.

I live in Beaconsfield Road Moss Vale and I'm concerned about the proposed TOXIC Plastic Recycling Facility because

1. It adversely affects the landscape within a couple of hundred metres of rural residential living.
2. All surrounding buildings are within a respectable height, the proposed plastic facility will tower over any existing building by a longshot.
3. We live in a constantly windy area and the waste onsite will not be able to be retained, therefore the local residents will be left with picking up plasrefine plastic waste from our own properties.
4. The local town water supply can not support the proposed plasrefine plant water usage. Their onsite rainwater tanks proposed are not adequate.
5. Moss Vale already has significant traffic issues, Plasrefine truck movements will significantly increase this issue.
6. Plastic waste facility is a high fire risk, the local area does not have the firefighting equipment needed to contain any such event. Not to mention the high toxicity of the air if an event was to occur.
7. Serious health concerns regarding toxins / dust / waste present within the surrounding properties.

We do not understand how this toxic dump is being considered for this beautiful town of Moss Vale

Yours Sincerely

Ben & Alena Shaw
