These blocks adjoining the Abercrombie River look directly on to the area planned for the proposal of the Paling Yard Wind Farm. This is an iconic view that was selected for the official opening of the Tablelands Way in 2009. It is a spectacular site for future subdivision and probable residential building anticipated. There is no doubt that the value of my land will depreciate once the wind farm is in place.

While I do not oppose the concept of a wind farm, I would definitely expect compensation for the serious financial impact that the planned wind farm will have on my property.

Kind regards,
