

John Cameron

CEO, Tooleybuc Sports Club

Tooleybuc NSW, 2736

26/06/2024

To AEMO, I am writing to express my support with Windlab and their team's proposal for the Junction Rivers Wind project between Balranald and Kyalite, NSW.

My teams experience with Windlab has been very positive and has included;

- The Sports club being informed when the team visits the town
- Making themselves available for the Tooleybuc Piangil Action Group
- The individuals, businesses and sporting groups who have shown interest or want to be updated.
- Local community organisation being invited to apply for the pilot program
- Involving locals on the evaluation panel for the Community Benefit Pilot program in 2023
- Transparently sharing when Windlab are offering community info sessions i.e. next ones are 10-12 July.

The benefits I see in the long term should the project be selected through the access rights in the South West Renewable Energy Zone and CIS Tenders including goods and services, etc.

The direct benefit to the Tooleybuc Sporting Club would be an increase in engagement towards the Club, specifically in our Accommodation and Club facilities.

Sincerely, John Cameron
