

I object to minarah in catherine field

The site is located in RU4 primary production small lot in a precinct that is unzoned

This part of catherine field has no future evidence that it is planned for zoning or development

The nieghbours and surrounding homes should have the right of peace and quiet enjoyment of their home not be bombarded with ridiculous traffic volumes and noise

I only initially heard about this after talking to a resident,

I didn't get any letters for the first proposal

Many parts of catherine field are closed by council during flood events

I don't think the flooding has been addressed

Our roads are constantly having pot holes filled in by council

I don't think the poor state of the roads has been covered

Catherine field is not the place for a school

Once again, On the basis of numerous inconsistencies and non-disclosure of further development of the surrounding site, I believe that the community is being misled by the applicant. Not only is the applicant looking to extend their current operation at from a completely different LGA but the community will see no benefit to a school in Catherine Field especially given the lack of Islamic residents residing in Catherine Field. Considering there is no factual evidence that Catherine Field has planning for rezoning or development, the absence of a town plan and also that there is no evidence from Sydney Water as to when sewer mains connection will be available, this application should be denied.
