

Proposed minarah college – catherine fields

I oppose the school on the following

- 1- Major flooding in the proposed area as per overflow report as well as flooding on different parts of catherine field and adjoining road . Anthony rd which is an access road into catherine fields always overflows and is closed most times when raining
- 2- Catherine fields road , deepfields rd and springfield rd are all in very poor condition and is getting worse due to increased traffic from not only extra traffic but a large number of trucks and semi trailers using these roads
- 3- No kerb and guttering on catherine fields or any of the roads in catherine fields. Thus causing water over the roads , mud , potholes and damage to catherine fields rd and all surrounding roads .
- 4- No kerb side and gutter parents will park on the pathway in front of nearby residents causing more damage to residents properties as well as the local roads
- 5- No streetlighting – this is a major risk especially in the winter where we have early morning fog not clearing till well after 9am with the speeding trucks using catherine fields
- 6- Catherine fields village has already a major traffic influx during these hours with a preschool and baseball field , dance school and function centre as well as the catherine fields fire station all in and around the catherine fields community and playing fields as well as traffic access in and out of oran park from springfield rd
- 7- . IT CANNOT HANDLE ANY MORE TRAFFIC ON THIS ROAD.
- 8- There will be major traffic jams on catherine fields road both ways residents will have difficulty getting in and out of their properties especially residents as well as adjoining street traffic
- 9- Catherine fields fire brigade will have major issues attending emergency with the traffic
- 10 there will be increased pollution and noise pollution in a rural area with still a lot of native wildlife
- 11 CATHERINE FIELDS RD was closed at the from intersection of SPRINGFIELD RD to DEEPFIELDS RD IN THE RECENT LAST FLOODS , THIS IS THE EXACT AREA WHERE THE SCHOOL IS PROPOSED .
- 11 A MAJOR CONCERN is the health safety as there is no town sewage in catherine fields . the Design for this school will fail miserably the surface will be constantly wet , smelly and muddy
