

12 December 2024

The General Manager
Camden Council

Attention: East DevAdmin

DA/2024/616/1 at 43 - 61 TURNER ROAD GREGORY HILLS 2557

Dear Sir or Madam

I refer to the referral of 12 December 2024 from the NSW Planning Portal Concurrence and Referral Service regarding request CNR-76629 for Camden Council Development Application DA/2024/616/1 at 43 - 61 TURNER ROAD GREGORY HILLS 2557 (Lots 14 - 17 DP 28024) for 'Early Works to Support a Future Data Centre Operation'. Submissions need to be made to Council by 2 January 2025.

Please refer to Endeavour Energy's submission made to Council on 10 June 2022 via the NSW Planning Portal for concurrence and referral request CNR-40215 for Camden Council Development Application DA/2022/492/1 at 43, 49, 55, 61 & 67 (Lots 14 - 18 DP 28024) for 'Subdivision of site into 23 Torrens title industrial allotments, associated site preparation and civil works, tree removal and construction of an internal road network'. The conditions and advice provided therein are essentially also applicable to this Development Application

The below updated Site Plan from Endeavour Energy's G/Net Master Facility Model shows the site is a 'Developer Area' with the proposed subdivision / road layout indicating enquiries and applications for contestable works projects for electricity supply with Endeavour Energy's Customer Network Solutions Branch who are responsible for managing the conditions of supply with the proponent and their Accredited Service Provider (ASP).

The applicant will need to contact Endeavour Energy's Customer Network Solutions Branch if this Development Application:

- Includes any contestable works projects that are outside of any existing approved / certified works.
- Results in an electricity load that is outside of any existing Supply / Connection Offer requiring the incorporation of the additional load for consideration.

Please find attached for the applicant's reference copies of Endeavour Energy's:

- Land Interest Guidelines for Network Connection Works, Version 5, December 2022.
- Standard Conditions for Development Applications and Planning Proposals, Version 9, August 2023 which provides some additional and updated information.

For further advice the applicant can call Endeavour Energy via Head Office enquiries on business days from 9am - 4:30pm on telephone: 133 718 and the following contacts:

- Customer Network Solutions Branch for matters related to the electricity supply or asset removal / relocation who are responsible for managing the conditions of supply with the applicant and their Accredited Service Provider (ASP). Alternatively contact can be made by email CWAdmin@endeavourenergy.com.au .
- Easements Officers for matters related to easement management, protected works or other forms of property tenure / interests. Alternatively contact can be made by email Easements@endeavourenergy.com.au .
- Property Branch for matters related to property tenure. Alternatively contact can be made by email network_property@endeavourenergy.com.au (underscore between 'network' and 'property').
- Field Operations Branch for safety advice for building or working near electrical assets in public areas. The site is in the area covered by Narellan Field Service Centre. Alternatively contact can be made by email Construction.Works@endeavourenergy.com.au .

Should you wish to discuss this matter, or have any questions, please do not hesitate to contact me or the contacts identified above or in Endeavour Energy's submission to DA/2022/492/1 in relation to the various matters. Due to the high number of development application / planning proposal notifications submitted to Endeavour Energy, to ensure a response contact by email to Property.Development@endeavourenergy.com.au is preferred.

Yours faithfully

Cornelis Duba | Development Application Specialist

Site Plan from Endeavour Energy's G/Net Master Facility Model

Please note the location, extent and type of any electricity infrastructure, boundaries etc. shown on the plan is indicative only. In addition it must be recognised that the electricity network is constantly extended, augmented and modified and there is a delay from the completion and commissioning of these works until their capture in the model. Easements benefitting Endeavour Energy are indicated by red hatching. Generally (depending on the scale and/or features selected), low voltage (normally not exceeding 1,000 volts) is indicated by blue lines and high voltage (normally exceeding 1,000 volts but for Endeavour Energy's network not exceeding 132,000 volts / 132 kV) by red lines (these lines can appear as solid or dashed and where there are multiple lines / cables only the higher voltage may be shown). This plan only shows the Endeavour Energy network and does not show electricity infrastructure belonging to other authorities or customers owned electrical equipment beyond the customer connection point / point of supply to the property. This plan does not constitute the provision of information on underground electricity power lines by network operators under Part 5E 'Protection of underground electricity power lines' of the *Electricity Supply Act 1995* (NSW).
