Dartbrook Mine Modification 8

Denman Aberdeen Muswellbrook Scone Healthy Environment Group Inc(DAMS HEG) is a group which provides community voice to industry and all levels of government in defence of our natural environment and in the interests of human health, well-being, and the protection of biodiversity.

We are concerned to find Dartbrook Mine is seeking an additional 6years mining via Modification 8of DA 231-07-2000

This is at a time when we know we are already not on track to achieve our Net Zero Targets. Underground mines release significant amounts of CO₂ and CH₄ to the atmosphere and we do not see that allowing Dartbrook to increase its emissions when all other players must reduce theirs is in the spirit or meeting the necessity of Net Zero targets.

We are living in the beginnings of the climate emergency and tough decisions need to be made to meet Net Zero trend lines and choose a habitable climate& planet over profit.

Yours sincerely

Wendy Wales
