Photo 1: North Facing Rear Garden 14a Norton Street

Based on current plans, the building height visible will extend beyond the height of the current vegetation. Our concern is that the South Facing windows will have a direct line of sight into our property creating concerns for our privacy.

Photo 2: North Facing Rear garden 14a Norton Street

Based on current plans, this box is an estimate of the visual impact from our rear garden. There is significant size and bulk visible for well used space in our home. The proposed height will extend beyond the height of the current vegetation.
