

To whom it may concern,

I am writing to you today to voice my acceptance of the development and operation of the Bowdens Silver open cut mine. I personally visit the region to visit family at least once a year, and primarily believe the project will bring prosperity to families in the region as Bowens are planning on hiring their workforce from the surrounding areas.

I have also taken the time to read through their environmental impact statement and am very happy with the steps they have taken to alleviate environmental impacts upon the surrounding region.

In conclusion I do believe the Bowdens Silver open cut mine will bring vastly more positives to the region than negatives, with low social, environmental and cultural risk to the surrounding communities.

Best regards,

Joshua
