**Subject: Liebherr-Australia Statement of Support
Maules Creek Continuation Project**

Mining

Date: 06.08.2025

Dear Sir/Madam,

Liebherr Australia would like to formally register our support for the Maules Creek Continuation Project (SSD-63428218). Liebherr Australia directly employs 212 people in the New South Wales mining industry, who support our regional customers in areas like Gunnedah.

Our workforce includes professionals, tradespeople and support staff, who contribute to both the mining and construction sectors. We are also committed to developing future talent through our apprenticeship training program, which plays a critical role in building the next generation of skilled tradespeople in regional Australia.

The Maules Creek Continuation Project will play a vital role in enabling Liebherr Australia to sustain our regional operations. It will support the ongoing delivery of onsite technical support, field services, workshop operations, aftermarket services support and administrative functions across regional NSW.

Liebherr are working with partners, both in the private and public sector, to develop and deploy groundbreaking systems in electrification, automation, and other advanced technologies. We are proud to be a central participant in Australia's decarbonization journey, as is evident by the role we are playing today in electrifying Western Australia's Iron Ore industry.

In addition to direct employment opportunities, Liebherr Australia has continued to invest in regional NSW to support Whitehaven and other mining customers. This project provides us with the certainty to make these investments and provide ongoing skilled employment opportunities in regional NSW. In June 2025, our executive team conducted a facility scoping study in the Gunnedah region to assess future requirements in preparation for the Maules Creek Continuation Project.

The proposed extension of the Maules Creek Mine will provide significant economic benefits to the Gunnedah region and its stakeholders. Liebherr Australia supports Whitehaven's Maules Creek Continuation Project and remains available for future engagement as required.

We thank you for your consideration and look forward to continued engagement.

Yours Sincerely

A handwritten signature in black ink, appearing to read "Brian Boitano".
