

HOT ENGINEERING

Letter of Support – Ulan West Continued Operations, Mod 8

Date: 29/10/2025

To Whom It May Concern,

Hot Engineering Pty Ltd is pleased to express its full support for the proposed Ulan West Continued Operations, Modification 8 (Pit Extension) being advanced by Glencore.

Hot Engineering is a locally owned and operated manufacturing and engineering company based in Mudgee. We employ 25 full-time staff and engage several local contractors. Our company provides high-quality fabricated products, maintenance services, and skilled labour to mining operations across the Central West region.

We have proudly supported all Glencore operated mines in the Mudgee region and other local operations for many years, contributing to the reliability, safety, and efficiency of their operations. The proposed pit extension represents an important opportunity to sustain local employment, enhance regional economic activity, and ensure continued engagement of local suppliers such as Hot Engineering.

We commend Ulan West, Glencore for its responsible approach to environmental management, community consultation, and commitment to local procurement. The expansion will help secure long-term benefits for the Mudgee community and provide ongoing opportunities for regional businesses.

Hot Engineering looks forward to continuing our partnership with Ulan West, Glencore and providing services that support the safe and sustainable development of the mine.

Please don't hesitate to contact me should further information be required.

Kind Regards,

Truman Goonrey
