

Note that the valid access arrangement as required by the BSAL site verification process is not required in this instance as the Warkworth Mine owns the land and is the proponent of the activity.

For this reason, neither of the following requested evidence required to be uploaded is applicable in this case:

- One of either:
  - A valid access arrangement , or written notice of intention to obtain an access arrangement, as described in clause 17C(2) of the Mining SEPP (landowners only)
  - Evidence of landowner notification as described in clause 17C(3) of the Mining SEPP (mining/petroleum companies only)
