Dear Howard,

Consultation for Site Verification Certificate for Eastern Emplacement Area modification

Bulga Coal Management have been in ongoing consultation with the Mushroom Composters Pty Ltd regarding the proposed Eastern Emplacement Area (EEA) modification including the need for a Site Verification Certificate to be sought for the proposed EEA area. The Mushroom Composters were provided with a copy of the Statement of Environmental Effects (SEE) for the proposed modification that included detail on the site verification process and the site verification application report. The Mushroom Composters provided a letter dated 21 June 2016 that expressed support for the proposed modification. Further, the Mushroom Composters and Bulga Coal Management have entered into a commercial agreement regarding the revised EEA layout which provides a mechanism for Bulga Coal Management to purchase the relevant portion of land from the Mushroom Composters.

Bulga Coal Management considers the consultation detailed above satisfies notification of the Site Verification Certificate in accordance with clause 17C(3)(a) of the State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007.

Yours sincerely

Ralph Northey
Environment & Community Manager
Bulga Coal Complex
