Dear Mr Cheong

**Elgas LPG Pipeline (DA 469/93 MOD1)**

Thank you for your e-mail, dated 6 March 2014, inviting WorkCover's submission on the project, including advice on recommended conditions of approval.

The Major Hazard Facilities Unit reviewed the Environmental Assessment on matters related to the Preliminary Hazard Analysis (PHA). WorkCover will require Elgas Ltd. to address any matters relevant to complying with the Major Hazard Facilities legislation before the detailed design stage and site risk assessments when Elgas Ltd. consults WorkCover under suggested condition 1 below.

Should the proposal be approved, the suggested conditions of approval are:

1. Prior to commencement of detailed design and hazard/risk related studies, the proponent must consult with WorkCover with regard to complying with the regulations applicable to Major Hazard Facilities (clauses 534 and 569 of the Work Health and Safety Regulations 2011) and agree on the extent of revision of the site Safety Case associated with the MHF conditional licence granted by WorkCover on 4 March 2014. The proponent must comply with all requirements provided by WorkCover.
2. Prior to completion of detailed design, of the LPG pipeline, the proponent must provide an outline to WorkCover with regard to following the Management of Change procedure as described in the Elgas Safety Management System.

Should you have any queries, please contact me on telephone (02) 8281 6485 or e-mail [sohan.fernando@workcover.nsw.gov.au](mailto:sohan.fernando@workcover.nsw.gov.au).

Yours sincerely

Sohan Fernando  
Senior Safety Analyst, MHF  
Hazardous Chemical Services Team
